

Conference collection

11th International Conference on Vibration Measurements by Laser and Noncontact Techniques – AIVELA 2014 Advances and Applications

Ancona, Italy

25 – 27 June 2014

Editor

Enrico Primo Tomasini

Polytechnic University of Marche, Ancona, Italy

All papers have been peer reviewed.

Supporting Organizations

AIP – American Institute of Physics

EAA – European Acoustics Association

EOS – European Optical Society

OSA – The Optical Society

SEM – Society for Experimental Mechanics

Melville, New York, 2014
AIP Proceedings

Volume 1600

**11th International Conference on Vibration Measurements
by Laser and Noncontact Techniques - AIVELA 2014
Advances and Applications**

Table of Contents

Preface: AIVELA Conference on Vibration Measurements by Laser and Noncontact Techniques Enrico Primo Tomasini	1
CONDITION MONITORING AND NDT	
Using digital image correlation and three dimensional point tracking in conjunction with real time operating data expansion techniques to predict full-field dynamic strain Peter Avitabile, Javad Baqersad, and Christopher Niezrecki	3
A study of radial-flow turbomachinery blade vibration measurements using Eulerian laser Doppler vibrometry A. J. Oberholster and P. S. Heyns	23
Digital Shearography and vibration excitation for NDT of aircraft components Dirk Findeis and Jasson Gryzagoridis	33
On the use of optical fiber Bragg grating (FBG) sensor technology for strain modal analysis Bart Peeters, Fábio Luis Marques dos Santos, Andreia Pereira, and Francisco Araujo	39
Study on correlation methods for damage detection: Simulation and experimental validation D. Dall'Acqua and D. Di Maio	50
On the development of a magnetoresistive sensor for blade tip timing and blade tip clearance measurement systems R. Tomassini, G. Rossi, and J-F. Brouckaert	65
Displacement measurement on specimens subjected to non-Gaussian random vibrations in fatigue life tests M. Troncossi, R. Di Sante, and A. Rivola	74
Research on relation between bending stress and characteristic frequency of H-shaped beam by free vibration deflection Tsutomu Yoshida and Takeshi Watanabe	83

Experimental investigation of thermal characteristics of synthetic jet generator's diaphragm with piezoelectric actuator Ruta Rimasauskiene, Marius Rimasauskas, Magdalena Mieloszyk, Tomasz Wandowski, Pawel Malinowski, and Wieslaw Ostachowicz	94
Study of a defect detection accuracy of a granite nondestructive resonance technique based on a laser interferometer Tomasz Podzorny, Grzegorz Budzyń, Janusz Rzepka, and Jakub Tkaczyk	103
Use of Cosserat birefringence to measurement couple stresses by photoelasticity Sikoń Marek	112
Evaluation of measurement uncertainty in calibrations of laser vibrometers Hans-Jürgen von Martens	123
Approaching attometer laser vibrometry Christian Rembe, Lisa Kadner, and Moritz Giesen	143
Novel calibration techniques for laser Doppler profile sensor Dazhi Zhang, Andreas Fischer, Jürgen Czarske, and Pillipe Günther	155
The application of Raman laser in gravity measurement and metrology Ning Ru, Li Zhang, Yu Wang, and Shangchun Fan	164
Monitoring a tall tower through radar interferometry: The case of the Collserola tower in Barcelona Guido Luzi, Michele Crosetto, and Oriol Monserrat	171
Radar-based dynamic testing of the cable-suspended bridge crossing the Ebro River at Amposta, Spain Carmelo Gentile and Guido Luzi	180
Vibration measurement through high speed vision system in a civil structure under impact loading Belén Ferrer, Juan I. García, Ana B. Roig, and David Mas	190
Measurement of dynamic patterns of an elastic membrane at bi-modal vibration using high speed electronic speckle pattern interferometry Jorge Sanchez Preciado, Carlos Perez Lopez, and Fernando Mendoza Santoyo	196

Heterodyne interferometry with Smart Pixel detector for vibration investigations Adam Styk and Tomasz Kozłowski	203
Low cost subpixel method for vibration measurement Belen Ferrer, Julian Espinosa, Ana B. Roig, Jorge Perez, Pablo Acevedo, and David Mas	210
Fluid pulsation detection in presence of induced motion artifacts using speckle techniques M. Nemati, L. G. Paroni, N. Bhattacharya, and H. P. Urbach	215
Imaging performance comparison between CMOS and sCMOS detectors in a vibration test on large areas using digital holographic interferometry J. M. Flores-Morenoa, Manuel H. De la Torre I., Daniel D. Aguayo, and Fernando Mendoza S.	223
Improved holographic method for vibration amplitude measurement from nano to microscale Pavel Psota, Vít Lédl, Roman Doleček, Jan Václavík, and Václav Kopecký	228
Time-average dynamic speckle interferometry A. P. Vladimirov	237
Micro vibrometry measurements of a subordinate oscillator array John Sterling, Aldo A. Glean, John A. Judge, Joseph F. Vignola, Nicole B. Bull, and Teresa Ryan	243
Application of a multi-beam vibrometer on industrial components Karl Bendel	251
Spectral analysis for sign recovery in a self-mixing vibrometer Michele Norgia, Alessandro Magnani, and Alessandro Pesatori	259
Diversity combining in laser Doppler vibrometry for improved signal reliability Alexander Dräbenstedt	263
Measuring with laser Doppler vibrometer on moving frame (LDVMF) Siamand Rahimi, Zili Li, and Rolf Dollevoet	274

Design of 3D eye-safe middle range vibrometer Valeriy Polulyakh and Iouri Poutivski	287
Methods of real time high resolution phase detection for use in laser rangefinders Grzegorz Budzyn, Jakub Tkaczyk, Tomasz Podzorny, and Janusz Rzepka	292
Decoding carotid pressure waveforms recorded by laser Doppler vibrometry: Effects of rebreathing Sara Casaccia, Erik J. Sirevaag, Edward Richter, Joseph A. O'Sullivan, Lorenzo Scalise, and John W. Rohrbaugh	298
Medical diagnosis of the cardiovascular system on the carotid artery with IR laser Doppler vibrometer Laura Mignanelli, Christian Rembe, Kristian Kroschel, Armin Luik, Paolo Castellini, and Lorenzo Scalise	313
Measurement of rabbit eardrum vibration through stroboscopic digital holography Daniël De Greef and Joris J. J. Dirckx	323
Optical techniques as validation tools for finite element modeling of biomechanical structures, demonstrated in bird ear research Pieter Muyshondt, Daniël De Greef, Joris Soons, and Joris J. J. Dirckx	330
Laser Doppler vibrometry for assessment of arteriosclerosis: A first step towards validation Adriaan Campo and Joris Dirckx	338
Laser Doppler velocimetry for measurement of nonlinearity in the vibrations of the middle ear John Peacock and Joris Dirckx	342
Vibration transmissibility on rifle shooter: A comparison between accelerometer and laser Doppler vibrometer data L. Scalise, L. Casacanditella, C. Santolini, M. Martarelli, and E. P. Tomasini	347
Application of speckle dynamics for studying metabolic activity of cell cultures with herpes virus A. P. Vladimirov, A. A. Bakharev, A. S. Malygin, J. A. Mikhaylova, E. M. Borodin, A. P. Poryvayeva, and N. P. Glinskikh	357
TRACKING/CONTINUOUS SCANNING LDV	
Continuous-scanning laser Doppler vibrometry: Extensions to arbitrary areas, multi-frequency and 3D capture B. Weekes, D. Ewins, and F. Acciavatti	361

Complete elastic constants of α-BaB₂O₄: Resonant ultrasound spectroscopy versus Schaefer-Bergmann diffraction	377
Jonathan B. Pfeiffer, Yaniv Kaufman, Kelvin H. Wagner, and Hassel Ledbetter	
Detection and reconstruction of solidification cracks – Laser ultrasonic measurements during the continuous casting process of aluminum	384
Thomas Mitter, Hubert Grün, Jürgen Roither, Andreas Betz, Salar Bozorgi, Bernhard Reitinger, and Peter Burgholzer	
Laser ultrasound technology for fault detection on carbon fiber composites	390
Robert Seyrkammer, Bernhard Reitinger, Hubert Grün, Jakov Sekelja, and Peter Burgholzer	
Reliability analysis of laser ultrasonics for train axle diagnostics based on model assisted POD curves	396
M. S. Malik, A. Cavuto, M. Martarelli, G. Pandarese, and G. M. Revel	
Delamination detection in composites by laser ultrasonics	405
M. Martarelli, P. Chiariotti, M. Pezzola, and P. Castellini	
Remote imaging of concealed objects	413
Aner Lev and Bruno Sfez	
High-speed self-mixing laser distance sensor	422
Michele Norgia, Dario Melchionni, Alessandro Magnani, and Alessandro Pesatori	
Integrated nanophotonic frequency shifter on the silicon-organic hybrid (SOH) platform for laser vibrometry	426
M. Lauermann, C. Weimann, R. Palmer, P. C. Schindler, S. Koeber, C. Rembe, W. Freude, and C. Koos	
Dynamic characteristics of the output light from a vibrating hole assisted fiber curl cord and its application to intrusion location	431
Mitsuhiro Tateda and Akihiro Mizushima	
Vibrometry using a chromatic confocal sensor	439
G. Berkovic, S. Zilberman, E. Shafir, and J. Cohen-Sabban
