# Contents

## Organizing Committee

## Preface

### Atmospheres

#### **Advanced On-Site Hydrogen Generation Provides Enhanced Capabilities.....1**

*Dave Wolff<sup>1</sup>, Randy Gorman<sup>2</sup>, Mike Wood<sup>2</sup>, and Adam Herringshaw<sup>2</sup>*

*(1) Proton OnSite, Wallingford, CT, USA*

*(2) Riverhawk Company, New Hartford, NY, USA*

#### **Case Hardening Using Nitrogen-Based Atmospheres.....5**

*Zbigniew Zurecki<sup>1</sup> and Karl-Michael Winter<sup>2</sup>*

*(1) Air Products & Chemicals, Inc., Allentown, PA, USA*

*(2) Process-Electronic GmbH, Heiningen, Germany*

#### **Understanding Atmosphere in Carburizing Applications Using Simulation and Real-Time Carbon Diffusion.....9**

*Jim Oakes, Super Systems, Inc., Cincinnati, OH, USA*

### Brazing

#### **Dynamic Fluoride Ion Cleaning as A Pre-Brace Process.....12**

*Robert E. Kornfeld*

*Hi-Tech Furnace Systems, Inc., Shelby Township, MI, USA*

#### **Welding Behavior of Molybdenum Tubing With and Without Lanthanum Oxide.....N/A**

*Todd Leonhardt, Rhenium Alloys Inc., North Ridgeville, OH, USA*

### Cryogenics

#### **Comparisons of Deep Cryogenically Treated Brake Rotors versus Untreated Rotors Using Laboratory Tests and Practical Tests.....15**

*Frederick (Rick) J. Diekman*

*Controlled Thermal Processing, Inc., Antioch, IL, USA*

#### **Cryogenic Non Destructive Testing (NDT) and Material Treatment Cryogenic Transition Detection.....18**

*Victor F. Sloan*

*Victor Aviation Service, Inc., Palo Alto, CA, USA*

#### **New Frontiers in Metal Treatment—Deep Cryogenic Treating of Metals and Other Materials.....22**

*Rozalia Papp, Air Liquide U.S. LP, Houston, TX, USA*

## Emerging Technologies

<b>Austempering versus Quenching and Tempering—Impact Behavior of SAE 4140 and SAE O1 Steels.....</b>	<b>26</b>
<i>Lauralice de C. F. Canale<sup>1</sup>, José E. Nucci<sup>1</sup>; Jan Vatauvuk<sup>2</sup>, and George E. Totten<sup>3</sup></i>	
<i>(1) University of São Paulo, São Carlos, SP, Brazil</i>	
<i>(2) Universidade Presbiteriana Mackenzie, São Paulo, SP, Brazil</i>	
<i>(3) Portland State University, Portland, OR, USA</i>	
<b>Calculate Allowable Stress—Quit Factor of Safety.....</b>	<b>29</b>
<i>Nori VSN Murthy, Independent Researcher, India</i>	
<b>Delta Ferrite in Heat Treated Bolts—Characterization and Consequences.....</b>	<b>36</b>
<i>Robson Bussoloti<sup>1</sup>, George E. Totten<sup>2</sup>, and Lauralice de C. F. Canale<sup>1</sup></i>	
<i>(1) Escola de Engenharia de São Carlos, São Carlos, SP, Brazil</i>	
<i>(2) Portland State University, Portland, OR, USA</i>	
<b>Is There A Viable Alternative to Refractory Ceramic Fibers?.....</b>	<b>40</b>
<i>Chris Johnson and William Patton</i>	
<i>Thermal Ceramics business of Morgan Advanced Materials, Augusta, GA, USA</i>	
<b>Self-Heating of Powder Materials during High-Temperature Drying.....</b>	<b>44</b>
<i>Muhammad M. Rafique Qureshi</i>	
<i>Chilworth Technology, Inc., Princeton, NJ, USA</i>	
<b>The Effects of Tempering on The Hardness Profiles in Carburized Steels.....</b>	<b>49</b>
<i>Lei Zhang, Xiaoqing Cai, Mei Yang, and Richard D. Sisson, Jr</i>	
<i>Worcester Polytechnic Institute, Worcester, MA, USA</i>	

## Equipment Innovations

<b>Batch Integral Quench Furnace Innovations—Heating, Quenching, Automation.....</b>	<b>53</b>
<i>Ralph P. Poor, Surface Combustion, Inc., Maumee, OH, USA</i>	
<b>Bright Tempering—Achieving High Quality Appearance During Tempering.....</b>	<b>55</b>
<i>Aymeric Goldsteinas and Craig Moller, Ipsen, Inc., Cherry Valley, IL USA</i>	
<b>Dual Processes' Normalize and Anneal Temperature Uniformities in Box Furnaces.....</b>	<b>58</b>
<i>William J. Bernard, III, Surface Combustion, Inc., Maumee, OH, USA</i>	
<b>Heat Treating with Diode Lasers.....</b>	<b>60</b>
<i>Mark Daichendt<sup>1</sup> and Wolfgang Todt<sup>2</sup></i>	
<i>(1) Laserline GmbH, Muelheim-Kaerlich, Germany</i>	
<i>(2) Laserline, Inc., Santa Clara, CA, USA</i>	

<b>Investigation on Improving The Life of Immersion Burner Tubes in Industrial Furnaces.....</b>	<b>63</b>
<i>R. Krishna Sabareesh, P. Ragupathy, Sudhir Malavade, Shishir Desai, Rajesh Mohite, Devendra Patil, Suresh Gulavani, and Joseph Lopes Tata Steel Global Wire Division, Maharashtra, India</i>	
<b>Monitoring, Understanding, and Reducing Energy in Heat Treat.....</b>	<b>66</b>
<i>Michael A. Pershing, David M. Miller, and Kinyon Gorton Caterpillar Inc., East Peoria, IL, USA</i>	
<b>Trial to Determine The Suitability of The New Heat Treat Facility at Corry Forge Company for Processing Blowout Preventer Bodies.....</b>	<b>N/A</b>
<i>Jared C. Alexander, Corry Forge Company, Corry, PA, USA</i>	

## Global Issues

<b>Environmental Friendly Controlled Cooling of Forgings—Potential Replacement to Normalizing and Iso-Annealing.....</b>	<b>70</b>
<i>Udayan Pathak and Vikas Shingade Tata Motors Limited Pune, India</i>	
<b>Reducing Heat Treat Product Issues in The Global Automotive Heat Treat Supply Chain.....</b>	<b>74</b>
<i>Teri Buck<sup>1</sup>, Suranjeeta Dhar<sup>2</sup>, Medina Kaknjo<sup>2</sup>, Philip Mikula<sup>3</sup> (1) TRW Automotive, Livonia, MI, USA (2) Ford Motor Company, Allen Park, MI, USA (3) P.C. Mikula Consulting LLC, Grosse Point Woods, MI, USA</i>	
<b>Web Based Wireless Heat Treating Services.....</b>	<b>78</b>
<i>Tom Decker<sup>1</sup> and Eric Sjerne<sup>2</sup> (1) Thermal Technologies International Inc., Claremore, OK, USA (2) IRISNDT Corp., Alberta, Canada</i>	

## Induction Heating

<b>Control Systems for Induction Heat Treating—The Obsolete and Newest Designs.....</b>	<b>81</b>
<i>Fred R. Specht Ajax Tocco Magnethermic Corp., Warren, OH, USA</i>	
<b>Enhancing Induction Coil Reliability.....</b>	<b>90</b>
<i>K. Kreter, R. Goldstein, C. Yakey, and V. Nemkov Fluxtrol Inc., Auburn Hills, MI, USA</i>	
<b>In-Line Induction Heat Treating of Tube, Pip, and Bar Products.....</b>	<b>96</b>
<i>Lesley D. Frame, Thermatool Corp., East Haven, CT, USA</i>	

<b>Influence of Geometric Parameters on Residual Stress in Hollow Cylindrical Parts Subjected to Induction Surface Hardening.....</b>	<b>100</b>
<i>Dmitry Ivanov, Leif Markegård, and John Inge Asperheim</i> <i>EFD Induction a.s., Skien, Norway</i>	

<b>Innovations in Soft Magnetic Composites and Their Applications in Induction Systems.....</b>	<b>104</b>
<i>R. Ruffini, N. Vyshinskaya, V. Nemkov, R. Goldstein, and C.J. Yakey</i> <i>Fluxtrol Inc., Auburn Hills, MI, USA</i>	

<b>Novel User-Friendly Computer Modeling Software for Induction Heating and Induction Heat Treating.....</b>	<b>110</b>
<i>Valery Rudnev, Inductoheat, Inc., Madison Heights, MI, USA</i>	

<b>Effect of Spray Quenching Rate on Distortion and Residual Stresses during Induction Hardening of A Full-Float Truck Axle.....</b>	<b>113</b>
<i>Zhichao (Charlie) Li<sup>1</sup>, B. Lynn Ferguson<sup>1</sup>, Valentin Nemkov<sup>2</sup>, Robert Goldstein<sup>2</sup>, John Jackowski<sup>2</sup>, and Greg Fett<sup>3</sup></i> <i>(1) Dante Software, Cleveland, OH, USA</i> <i>(2) Fluxtrol, Inc., Auburn Hills, MI, USA</i> <i>(3) Dana Corporation, Maumee, OH, USA</i>	

<b>Process Innovation to Eliminate Cracking Problems in Large Diameter Parts with Nonuniform Wall Thickness.....</b>	<b>125</b>
<i>Zhichao (Charlie) Li and B. Lynn Ferguson</i> <i>Dante Software, Cleveland, OH, USA</i>	

<b>Materials Selection for Induction Hardening Processes.....</b>	<b>129</b>
<i>Fred R. Specht, Ajax-Tocco-Magnethermic, Warren, OH, USA</i>	

## **Masters Series**

<b>The Jominy End Quench and Effect of Austenitizing on The Hardenability and Performance of Quenched Steels.....</b>	<b>134</b>
<i>George Krauss, Colorado School of Mines, Golden, CO, USA</i>	

## **Nitriding & Carburizing**

<b>Effect of Plasma Nitriding on Fatigue and Wear Behavior of AISI4330 Low Alloy Steel.....</b>	<b>137</b>
<i>Jagdish Sherkar<sup>1</sup>, Rajkumar Singh<sup>1</sup>, Raju Kadam<sup>1</sup>, Ganesh Jawale<sup>1</sup>, and Ram Chandra Prasad<sup>2</sup></i> <i>(1) Bharat Forge Ltd., Maharashtra State, India</i> <i>(2) Indian Institute of Technology Bombay, Maharashtra State, India</i>	

<b>A Practical Approach to Controlling Gas Nitriding and Ferritic Nitrocarburizing (FNC) Processes.....</b>	<b>141</b>
<i>Stephen Thompson, Super Systems, Inc., Cincinnati, OH, USA</i>	

<b>An Investigation of Case-Core Separation in Carburized Steels.....</b>	<b>144</b>
<i>Sarah Byrnes, Claire A. Campbell, and Timothy De Hennis</i> <i>The Boeing Company, Philadelphia, PA, USA</i>	
<b>Analysis and Experience using Process Modeling for Developing New and Corrective Heat Treat Schedules for Deep Case Carburizing.....</b>	<b>154</b>
<i>Andrew M. Freborg and B. Lynn Ferguson</i> <i>Dante Software, Cleveland, OH, USA</i>	
<b>Influence of Steel Surface Roughness on The Nitrogen Uptake during Gaseous Nitriding Process.....</b>	<b>158</b>
<i>D. Koshel and J. Kalucki, Nitrex Metal Inc., QC, Canada</i>	
<b>Modeling The Carbonitriding of Steel.....</b>	<b>162</b>
<i>Mei Yang, Xiaolan Wang, Yuan Xu, Liang He, and Richard D. Sisson Jr.</i> <i>Worcester Polytechnic Institute, Worcester, MA, USA</i>	
<b>Modeling The Gas Nitriding Process for Steels.....</b>	<b>166</b>
<i>Mei Yang, Xiaolan Wang, and Richard. D. Sisson Jr.</i> <i>Worcester Polytechnic Institute, Worcester, MA, USA</i>	
<b>Ferritic Nitrocarburizing Processes and Applications.....</b>	<b>170</b>
<i>Benjamin T. Bernard, Surface Combustion, Inc., Maumee, OH, USA</i>	
<b>Numerical Simulation Advances in Gear Manufacturing Processes.....</b>	<b>173</b>
<i>James B. Miller, Ravi Shankar, and John Walters</i> <i>Scientific Forming Technologies Corp., Columbus, OH, USA</i>	

## **Processes and Applications**

<b>Advances in Eddy Current Verification of Heat Treat Processes.....</b>	<b>177</b>
<i>Dan DeVries, Criterion NDT, Auburn, WA, USA</i>	
<b>Banding Effect on The Hardenability of AISI 4340 Steel Bar—Case Study.....</b>	<b>181</b>
<i>Jan Vatauvuk<sup>1</sup>, Antonio Augusto Couto<sup>1</sup>, Silvio André de Lima Pereira<sup>2</sup>, Silas Aragão de Sousa<sup>2</sup>, and Lauralice de C. F. Canale<sup>3</sup></i> <i>(1) Universidade Presbiteriana Mackenzie, SP, Brasil</i> <i>(2) Mahle Metal Leve S.A. Centro Tecnológico, SP, Brasil</i> <i>(3) Escola de Engenharia de São Carlos, SP, Brasil</i>	
<b>Evaluation of A New Alloy (PremoMet) for Seamless Rings Application.....</b>	<b>185</b>
<i>Octavio Covarrubias-Alvarado<sup>1</sup>, Arisbeth Sias-Chacon<sup>1</sup>, and Alberto Perez-Unzueta<sup>2</sup></i> <i>(1) Frisa Forjados SA de CV, Nuevo Leon, Mexico</i> <i>(2) Universidad Autonoma de Nuevo Leon, Nuevo Leon, Mexico</i>	

<b>Improvement in Mechanical Properties of Austempered Ductile Iron (ADI) by Cryogenic Treatment.....</b>	<b>189</b>
<i>Susil K. Putatunda<sup>1</sup>, Saranya Panneerselvam<sup>1</sup>, Codrick J Martis<sup>1</sup>, Frederick Diekman<sup>2</sup>, and Rozalia Papp<sup>3</sup></i>	
<i>(1) Wayne State University, Detroit, MI, USA</i>	
<i>(2) Controlled Thermal Processing Inc., Park City, IL, USA</i>	
<i>(3) Air Liquide US LP, Countryside, IL, USA</i>	
<b>Improving New and Existing Heat Treat Processes.....</b>	<b>193</b>
<i>Joe Clarke, Invensys Eurotherm, Ashburn, VA, USA</i>	
<b>Localized Surface Modification on 1018 Low Carbon Steel by Electrolytic Plasma Process and its Impact on Corrosion Behavior.....</b>	<b>197</b>
<i>Jiandong Liang, Shengmin Guo, and Muhammad A. Wahab</i>	
<b>Modeling Precipitation Kinetics during Heat Treatment with Calphad-Based Tools.....</b>	<b>206</b>
<i>Kaisheng Wu<sup>1</sup>, Paul Mason<sup>1</sup>, Gustaf Sterner<sup>2</sup>, and Qing Chen<sup>2</sup></i>	
<i>(1) Thermo-Calc Software Inc., McMurray, PA, USA</i>	
<i>(2) Thermo-Calc Software AB, Stockholm, Sweden</i>	
<b>Novel Method of Removal and Tightening of Bolts.....</b>	<b>210</b>
<i>Tom Decker<sup>1</sup> and Eric Sjerve<sup>2</sup></i>	
<i>(1) Thermal Technologies International Inc., Claremore, OK, USA</i>	
<i>(2) IRISNDT Corp., AB, Canada</i>	
<b>Protective Atmospheres, Measurement Technologies, and Troubleshooting Tools.....</b>	<b>213</b>
<i>Damian Bratcher, Super Systems, Inc., Cincinnati, OH, USA</i>	
<b>How important is Accuracy in Today's World! Technology and Improvements in Analog and Digital Control.....</b>	<b>217</b>
<i>Steve Miller, Invensys Eurotherm, Ashburn, VA, USA</i>	
<b>Technology to Connect and Enhancements to Improve.....</b>	<b>220</b>
<i>Chris Mooney, Invensys Eurotherm, Ashburn, VA, USA</i>	

## **Quenching and Cooling**

<b>Characterizing Water Quenching Systems with A Quench Probe.....</b>	<b>224</b>
<i>B. Lynn Ferguson, Zhichao Li, and Andrew M. Freborg</i>	
<i>Deformation Control Technology, Inc., Cleveland, OH, USA</i>	
<b>Agitated Quench Heat Transfer—An Experimental Characterization.....</b>	<b>228</b>
<i>Andrew L. Banka, William H. Newsome, and Jeffrey D. Franklin</i>	
<i>Airflow Sciences Corp., Livonia, MI, USA</i>	
<b>Comparison of Nozzle versus Impeller Agitation in Quench Systems.....</b>	<b>232</b>
<i>Andrew L. Banka and Tiffany M. Lee</i>	
<i>Airflow Sciences Corp., Livonia, MI, USA</i>	

<b>Design and Optimization of Fixture for High Pressure Gas Quenching of Transmission Components.....</b>	<b>236</b>
<i>Junsheng Wang<sup>1</sup>, Xuming Su<sup>1</sup>, Mei Li<sup>1</sup>, Ronald Lucas<sup>2</sup>, and William Dowling<sup>2</sup></i>	
<i>(1) Ford Research and Advanced Engineering Lab, Dearborn, MI, USA</i>	
<i>(2) Powertrain Manufacturing Engineering, Livonia, MI, USA</i>	
<b>Development of Quench Tank Agitation Design Using CFD Modeling.....</b>	<b>241</b>
<i>Andrew L. Banka<sup>1</sup>, John D. Nitz<sup>1</sup>, and Jeffery Nystrom<sup>2</sup></i>	
<i>(1) Airflow Sciences Corp., Livonia, MI, USA</i>	
<i>(2) Corry Forge Company, Corry, PA, USA</i>	
<b>Fixture Hardening of Large Components.....</b>	<b>245</b>
<i>Gerd Müller-Laessig</i>	
<i>HEESS GmbH &amp; Co KG, Lampertheim, Germany</i>	
<b>Flexible Controlled Atmosphere Hardening Processes Utilizing Atmosphere Furnaces and Salt Quenching Systems.....</b>	<b>249</b>
<i>Charles Hartwig<sup>1</sup> and John W. Gottschalk<sup>2</sup></i>	
<i>(1) Therm-Tech of Waukesha, Inc., Waukesha, WI, USA</i>	
<i>(2) Surface Combustion, Inc., Maumee, OH, USA</i>	
<b>Numerical Investigation of Immersion Quenching Process for Cast Aluminum Parts Using An Eulerian Multi-Fluid Approach.....</b>	<b>251</b>
<i>R. Kopun<sup>1</sup>, D. Greif<sup>1</sup>, Z. Kovačič<sup>1</sup>, and R. Tatschl<sup>2</sup></i>	
<i>(1) AVL – Advance Simulation Technology d.o.o., Maribor, Slovenia</i>	
<i>(2) AVL List GmbH, Graz, Austria</i>	
<b>The Mechanism of Quench Oil Oxidation.....</b>	<b>255</b>
<i>D. Scott MacKenzie</i>	
<i>Houghton International, Valley Forge, PA, USA</i>	
<b>Progress on The Development of A Comprehensive Heat Transfer Model for Industrial Liquid Quenching Processes.....</b>	<b>259</b>
<i>Jeffrey Franklin, Andrew Banka, and William Newsome</i>	
<i>Airflow Sciences Corp., Livonia, MI, USA</i>	
<b>Redefining Quenching Technology.....</b>	<b>265</b>
<i>Aymeric Goldsteinas and Jake Hamid, Ipsen, Inc., Cherry Valley, IL, USA</i>	
<b>Some New Phenomena Discovered During Immersion of Steel Parts Into Liquid Quenchants.....</b>	<b>269</b>
<i>Nikolai I. Kobasko, IQ Technologies Inc., Kyiv, Ukraine</i>	
<b>Vacuum Technology</b>	
<b>In Situ Oxidation of Steels as an Effective and Economical Pretreatment for Uniform and Consistent Vacuum Gas Nitriding Results.....</b>	<b>N/A</b>
<i>Trevor M. Jones, Solar Atmospheres Inc., Souderton, PA, USA</i>	

<b>Modeling Gas and Low Pressure Carburizing of Steel.....</b>	<b>273</b>
<i>Xiaolan Wang, Mei Yang, Yingying Wei, Lei Zhang, Liang He, and Richard D. Sisson, Jr. Worcester Polytechnic Institute, Worcester, MA, USA</i>	
<b>Modern Heat Treatment of Large Dies in HPGQ Vacuum Furnaces.....</b>	<b>277</b>
<i>Maciej Korecki<sup>1</sup>, Jozef Olejnik<sup>1</sup>, Piotr Kula<sup>2</sup>, Emilia Wolowiec<sup>2</sup> (1) SECO/Warwick S.A., Swiebodzin, Poland (2) Lodz University of Technology, Lodz, Poland</i>	
<b>Synchronized Heat Treatment for Totally Integrated Manufacturing-Lines.....</b>	<b>279</b>
<i>Volker Heuer and Klaus Loeser ALD Vacuum Technologies GmbH, Hanau, Germany</i>	
<b>Vacuum and Atmosphere Heat Treating Overview.....</b>	<b>283</b>
<i>Josh McCaughey, C.I. Hayes, Cranston, RI, USA</i>	
<b>Considering Emissivity Factors of A Workload When Projecting Heating Rates in a Vacuum Furnace.....</b>	<b>285</b>
<i>Real Fradette and Trevor Jones Solar Manufacturing, Souderton, PA, USA</i>	
<b>Vacuum Tempering at Higher Pressures.....</b>	<b>289</b>
<i>Ralph P. Poor, Surface Combustion, Inc., Maumee, OH, USA</i>	
<b>Welding Behavior of Molybdenum Tubing with and without Lanthanum Oxide.....</b>	<b>291</b>
<i>Todd Leonhardt</i>	
<b>Trial to Determine the Suitability of the New Heat Treat Facility at Corry Forge Company for Processing Blowout Preventer Bodies.....</b>	<b>295</b>
<i>Jared C. Alexander</i>	
<b>In Situ Oxidation of Steels as an Effective and Economical Pretreatment for Uniform and Consistent Vacuum Gas Nitriding Results.....</b>	<b>304</b>
<i>Trevor M. Jones</i>
