Table of Contents

Applied Business Mechanics

Evaluating the Cause of Understrength Concrete during Construction of Multiple Tower Mat Foundations	1
Scott J. DiFiore and R. Brett Holland	
Integrated Structural Practices via Emerging Methods	10
Ryan L. Solnosky	
Task Management Tools for the Structural Engineer	22
Randall P. Bernhardt	
A Case Study in Drifting Snow Behavior	34
Paul J. Bennett, Jon A. Peterka, and James R. Harris	
Integration Insights from the Field: Views from Architectural Practitioners	46
M. S. Uihlein	
An Analytical Modeling Framework for the Seismic Risk Assessment of Unreinforced Masonry Structures	56
A. P. O'Donnell and Y. C. Kurama	

Blast and Impact

On the Influence of Charge Shape, Orientation, and Point of Detonation on Air-Blast Loadings	68
Pushkaraj Sherkar, Andrew Whittaker, and Amjad Aref	
New Deformation-Controlled Design of Reinforced Concrete Flexural Members Subjected to Blast Loadings	74
Bing Li and Kai Qian	
Improved Blast Protection of Buildings through Implementation of Ductile Building Envelope Connectors	86
Daniel Lavarney and Michael Pollino	
Blast Loads Behind Blast Walls: Are They Low Enough?	97
Yousef Alostaz	
Preliminary Study of Blast Response of Steel-Plate Reinforced Concrete Walls	105
Jakob C. Bruhl and Amit H. Varma	
Comparison of SDOF Analysis Results to Test Data for Different Types of Blast Loaded Components	117
Chuck Oswald and Marlon Bazan	
Protective Design for Columns against Close-In Blast Effects	131
John E. Crawford, Kenneth B. Morrill, and Joseph M. Magallanes	
Performance and Blast Design for Non-Load Bearing Precast Concrete Panels	143
Charles J. Oswald and Marlon Bazan	

PPG Mil-Tough Façade Panels: Research to Design	155
Carrie Davis, Cliff Jones, Kirk Marchand, Jim Peters, and Brian Kornish	
Dynamic Analysis of Mullions and Connections Subjected to Blast Loading	165
David Holgado, Darrell Barker, and Manuel Diaz	
Current Engineering Models and Capabilities in the Vulnerability Assessment and Protection Option (VAPO) Software	176
J. F. Nichols and G. Doyle	
Testing and Simulation of a Cased Charge in a Confined Blast	188
Michael G. Oesterle, Joseph M. Magallanes, Joseph Abraham, and Casey O’Laughlin	
Balanced Design for Blast-Mitigating Window Retrofits for Historical Structures	198
Quincy G. Alexander, Shelly N. Brock, and Larry M. Bryant	
Evaluation of Building Columns Subjected to Near-Contact Explosives	210
Leonardo M. Torres, Joseph Abraham, and Jason Yang	
Blast Analysis of Dual Glazed Curtainwall System to Achieve Minimal Standoff Distances	222
Quincy G. Alexander, Shelly N. Brock, James T. Brokaw, Charles C. Ellison, Peter Dzwilewski, Joel Huddleston, and James M. Lorenzo	
High Fidelity Computations of Grain Silo Explosions and Resulting Blast/Debris Loads on Nearby Structures	234
Joseph Abraham, Joseph Valancius, and Joseph M. Magallanes	
Steel Shear Tab Connection Performance at Large Rotations during Blast Loading	246
T. J. Mander, L. Magenes, and T. H. Anderson	
Empirical Evaluation of Glazing Systems in Response to Blast Loads	258
J. S. Idriss and M. J. Lowak	

Bridges—Emerging Trends

Dynamic Performance Evaluation of Through Type Arch Bridge for Moving Loads	270
Milind T. Palav and Ravindra S. Desai	
Seismic Behavior of SMA Retrofitted RC Bridges Subjected to Strong Main Shock-Aftershock Sequences	280
Wanching Huang and Bassem Andrawes	
Optimization of Bridge Deep Foundation Design in Seismic and Tsunami Zones	291
Amanda (Yu) Bao, Joshua Lawrence, Van Hopson, and Matthew Puzio	
Flexural Strength of Corroded Lapped Spliced RC Bridge Column Section	303
S. Sotoud and R. S. Aboutaha	
Seismic Behavior of Bridges with Deep Foundations under Effects of Scouring	313
A. Fioklou and A. Alipour	
Damage Detection on Structures Using Texture Mapped Laser Point Clouds	324
Burcu Guldur and Jerome F. Hajjar	
Post-Fire Strength Assessment of Steel Bridges Based on Residual Out-of-Plane Web	335

Deformations

Jonathan D. Glassman and Maria E. Moreyra Garlock

- Structural Health Monitoring of Delaware’s Indian River Inlet Bridge: Year One Update** 345
Harry W. Shenton III, Michael J. Chajes, Gary Wenczel, Nakul Ramanna, Hadi Al-Khateeb, Kent Davidson, and Pablo Marquez
- Displacement-Based Seismic Design Integrating AASHTO and IBC Codes** 356
Jane Li
- Threat Mitigation Options in the Design of Cable Stayed Bridges** 365
Rob Smith, Aysegul Gogus, David Cormie, and Payman Khalili-Tehrani
- Fatigue Retrofitting of Web Stiffeners in Steel Bridges Using Pultruded FRP Sections** 376
K. Ghahremani, S. Walbridge, and T. Topper
- Reliability-Based Fatigue Assessment and Inspection Protocols for Sign Support Structures** 386
Christopher M. Foley and Joseph A. Diekfuss
- Design of Orthotropic Decks for the San Francisco-Oakland Bay Self-Anchored Suspension Bridge** 401
Marwan Nader and George Baker
- Quantification of Fuse Capacity for Elastomeric and Low-Profile Steel Fixed Bridge Bearings in Regions with High-Magnitude Earthquakes at Long Recurrence Intervals** 411
J. S. Steelman, J. F. Hajjar, J. M. LaFave, and L. A. Fahnestock
- Performance Evaluation of Reinforced Concrete Bridge Columns after Fire Exposure** 423
A. E. Echevarria, A. E. Zaghi, and R. Christenson
- Reinforced Concrete Bridge Columns Repaired with Fiber Reinforced Polymer Jackets** 429
Pardeep Kumar, Khalid Mosalam, Sid Abbasi, Neil Abbasi, and Mohsen Kargahi
- Applicability of Concrete Filled FRP Tube (CFFT) System for Multihazard Resilient Bridge Columns** 441
A. E. Echevarria, A. E. Zaghi, and M. Saiidi
- Performance Evaluation of Reinforced Concrete Bridge Columns through Experimental Blast Testing** 453
A. E. Echevarria, A. E. Zaghi, V. Chiarito, and R. Christenson
- Toward Next Generation LRFD Extreme Event Design Limit States** 463
George C. Lee, Chao Huang, Zach Liang, and Wen-Huei Philip Yen

Bridges—Current Practice

- Historical Masonry Bridge Rehabilitation** 473
Peter M. Babaian
- When Is a Historical Bridge No Longer a Historical Bridge?** 494
Brian R. Brenner, Darren Conboy, and Nicholas A. Scenna
- Scour Related Vermont Bridge Damage from Tropical Storm Irene** 505
Ian A. Anderson, Mandar M. Dewoolkar, Donna M. Rizzo, and Dryver R. Huston

Deck Replacement of the Angus L. Macdonald Suspension Bridge	516
D. Radojevic, J. Eppell, K. F. Kirkwood, and P. G. Buckland	
Evaluation and Rating of Masonry Arch Bridges	528
C. Citto and D. Woodham	
Evaluating the Variations in Use of Steel Intermediate Diaphragms for Precast Concrete Girder Bridges throughout the United States	540
S. E. Dupaquier, J. D. Marshall, and J. M. Stallings	
Load Rating of Steel Girder Structures	552
Ken Lee and Greg Dreeszen	
Analysis and Design for the Replacement of the Burns Bridge	565
Brian Brenner, Leonard Dzengelewski, Thomas Densford, Peter Moser, Nicholas Scenna, and Ryan Marshall	
Study of Circular Reinforced Concrete Bridge Piers Subjected to Vehicular Collisions	577
N. L. Gomez and A. Alipour	
Rehabilitation of the Rocks Village Bridge	588
Joseph Wasielewski, Bradley Nicoll, and Shaun St. Hilaire	
Fore-Ever Innovative	600
Sean-Philip H. Bolduc, Seth H. Condell, and Daniel A. Warren	
What Are Your Real Barrier Requirements?	611
Charles C. Ellison and James T. Brokaw	
Effect of Deck Deterioration on Overall System Behavior, Resilience, and Remaining Life of Composite Steel Girder Bridges	623
Amir Gheitasi and Devin K. Harris	
Investigating the Effect of Nonstructural Mass on Impact Forces from Elastic Debris	635
P. Piran Aghl, C. J. Naito, and H. R. Riggs	
Rehabilitation of the Duck Bridge	645
Jason C. Varney and S. D. Daniel Lee	
Nonlinear Analysis of Bridge Piers under Barge Collision Load	657
Kemal Sarp Arsava and Yeesock Kim	
Nonlinear Analysis of Bridge Piers under High Impact Vehicle Collision	667
Nuoyi Zhu, Yeesock Kim, and Tahar El-Korchi	
Design of Bridges with Unequal Pier Heights	677
Majid Mohammadi-Tamanani, Yen Gian, and Ashraf Ayoub	
Field Load Test of a Curved Steel I-Girder Bridge during Construction and Comparison with 2D Grid Modeling Approach	687
Lawrence Rolwes, Jr.	
Inspection Planning Based on Risk Analysis	699
G. Washer, R. Connor, A. Ciolko, P. Fish, R. Kogler, D. Forsyth, and M. Nasrollahi	
Seismic Design of Circular Concrete Filled Tube Bridge Pier Connections for Accelerated Bridge Construction	711

Max T. Stephens, Lisa Berg, Dawn E. Lehman, and Charles W. Roeder

- Rehabilitation of the Anderson Memorial Bridge** 723
P. F. Harrington, R. Y. Khalil, and J. C. Varney

Building Case Studies

- The Federation of Korean Industries Headquarters** 734
John Peronto, Wonil Sunu, Robert Sinn, and Matthew Huizinga
- Pearl River Tower: Design Integration toward Sustainability** 747
W. Baker, C. Besjak, B. McElhatten, and X. Li
- Integrated Design and Construction at the 250 West 55th Street Tower** 758
Matt Jackson and Berkay Baykal
- 510 m Super-Tall Busan Lotte Town Tower: Engineering the Architecture to Minimize Extreme Winds** 769
C. Besjak, B. Kim, and D. Kong

Concrete Topics

- Structural Capacities of Spherically Voided Biaxial Slab (SVBS)** 785
Wondwosen B. Ali and Girum S. Urgessa
- Bond between Smooth Prestressing Wires and Concrete: Finite Element Model and Transfer Length Analysis for Pretensioned Concrete Crossties** 797
Hailing Yu and David Y. Jeong
- Finite Element Analysis of a Reinforced Concrete Slab-Column Connection Using ABAQUS** 813
A. S. Genikomsou and M. A. Polak
- Why Change the Code? Comparing the Strut-and-Tie Procedure to ACI 318-99** 824
Robin Tuchscherer
- Reliability Analysis of a Reinforced Concrete Slab-Column Connection without Shear Reinforcement** 835
Georgios Balomenos, Maria Anna Polak, and Mahesh Pandey

Disproportionate Collapse

- Assessment of the Progressive Collapse Potential in Tall Buildings with 3D FE Method** 847
Feng Fu
- Are the Frail Designed to Fail? Assessing the Collapse Risk of Existing Structures** 857
Bing Li and Kai Qian
- Experimental Study on the Progressive Collapse Resistance of RC Slabs** 868
Peiqi Ren, Yi Li, Yulong Zhou, Xinzheng Lu, and Hong Guan
- Robustness of Older Flat Plate Buildings against Dynamic Progressive Collapse** 880
Jinrong Liu, Ying Tian, and Sarah L. Orton
- Development of the Design Specification for the Collapse Prevention of Buildings in China** 891

Yi Li, Peiqi Ren, and Xinzheng Lu

Canadian Disproportionate Collapse Design Provisions and Recent Research Developments	901
Robert G. Driver	
Progressive Collapse Experiments, Modeling, and Analysis of Existing Frame Buildings	909
C. Wood, M. S. Lodhi, and H. Sezen	
Integrity, Robustness, and Progressive Collapse Resistance of RC Structures Designed for Different Levels of Seismic Loads	919
Elisa Livingston and Mehrdad Sasaki	
Full-Scale Tests on Shear Connections of Composite Beams under a Column Removal Scenario	931
A. Jamshidi and R. G. Driver	
Effects of In-Plane Lateral Restraint and Post-Punching Capacity on Load-Carrying Capacity of Slab-Column Connections against Disproportionate Collapse	943
Sarah Orton, Ying Tian, Zhonghua Peng, Chris Henquient, and Jinrong Liu	
Lessons Learned from the Design of Steel and RC Structures against Progressive Collapse Using Nonlinear Alternate Path Analysis	954
P. Khalili-Tehrani, A. Masroor, S. Dogruel, D. Cormie, M. Gallo, and I. Almufti	
Experimental Characterization of Composite Slab Collapse Resistance for Steel Gravity Frames	966
T. Francisco, J. M. Weigand, E. S. Johnson, L. A. Fahnestock, J. Liu, and J. W. Berman	
Large-Scale Testing of a Steel-Concrete Composite Floor System under Column Loss Scenarios	978
E. S. Johnson, J. M. Weigand, T. Francisco, L. A. Fahnestock, J. Liu, and J. W. Berman	
Robustness Assessment of RC Frame Buildings under Column Loss Scenarios	988
Yihai Bao, Joseph A. Main, H. S. Lew, and Fahim Sadek	

Durability and Materials

Behavior of Hybrid FRP-Concrete-Steel Double-Skin Tubular Columns Subjected to Cyclic Axial Compression	1002
Omar I. Abdelkarim and Mohamed A. ElGawady	
Life-Time Risk Assessment of Reinforced Concrete Highway Bridges under Deterioration Processes	1014
B. Shafei and A. Alipour	
Application of Bamboo for Flexural and Shear Reinforcement in Concrete Beams	1025
Nathan Schneider, Weichiang Pang, and Mengzhe Gu	
Staged Failure Mechanism of Aged RC Beam-Columns Subjected to Corrosion Loads Using Simplified Nonlinear Finite Element Model	1036
A. Mohammed and H. Almansour	
Finite Element Modeling of Carbon Nanofiber Concrete Structural Members	1048
Faezeh Faghieh and Ashraf Ayoub	

- An Efficient Methodology That Simulates a Multi-Dimensional Non-Gaussian Field to Evaluate the Effect of the Spatial Distribution of Corrosion in a Steel Beam** 1059
Vasileios Christou and Paolo Bocchini

Emerging Trends in Structural Engineering Education

- Engineering Informatics** 1070
Ian F. C. Smith
- Engineering Architectural Creativity** 1078
Bernd Domer
- Exploring Complex Spatial Arrangements and Deformations in Virtual Reality** 1089
J. Fogarty and S. El-Tawil
- A First Course in BIM for Civil Engineering Majors** 1097
Harry W. Shenton III, Philip R. Conte, and Josh Bonzella
- Defining Misconceptions in Earthquake Engineering Education** 1106
K. McMullin
- Challenges in Educating the Millennial Civil Engineers** 1114
E. Aktan, A. Pradhan, K. Sjoblom, F. Moon, I. Bartoli, Y. Bayleyegn, B. Cohen, and A. Kotsos
- Innovative Education in Engineering: A Social and Multi-Dimensional Exploration of Structures** 1126
Branko Glisic, Maria Garlock, and Sigrid Adriaenssens

Fire

- Numerical Assessment of Connections with Reduced Beam Sections under Fire Following an Earthquake Using Continuously Updated Boundary Conditions** 1138
Hussam Mahmoud and Collin Turbert
- Ductile Fire-Resistive Material for Enhanced Fire Safety under Multi-Hazards—A Feasibility Study** 1148
Qian Zhang and Victor C. Li
- Through-Thickness Thermal Behavior of Two RC Bearing Walls under Fire** 1159
K. A. Mueller and Y. C. Kurama
- Advanced Fire Testing of a Composite Beam with Shear Tab Connections** 1170
Kristi L. Selden, Erica C. Fischer, and Amit H. Varma
- New Fire Resistance Test for Loaded Unrestrained Beams** 1175
R. M. Berhinig and F. Alfawakhiri

Innovations in Structural Testing

- Investigations of the Use of Multiple Tuned Liquid Dampers in Vibration Control** 1185
Ali Ashasi-Sorkhabi, James Kristie, and Oya Mercan
- Substructure Shake Table Testing with Force Controlled Actuators** 1197
N. Nakata and M. Stehman

Modeling and Simulation of Resetting Semi-Passive Stiffness Damper	1209
K. K. Walsh and G. Sallar	
Seismic Response Prediction of Self-Centering Concentrically Braced Frames Using Genetic Programming	1221
A. H. Gandomi and D. A. Roke	

Masonry and Wood Topics

Structural Performance of the Second Oldest Glued-Laminated Structure in the United States	1233
Douglas R. Rammer, Jorge de Melo Moura, and Robert J. Ross	
The Hamptons at MetroWest: A Case Study of Structural Repairs to Rot Damaged Wood Condominium Buildings	1244
Felix Martin	
Timber Tower Research: Concrete Jointed Timber Frame	1255
W. F. Baker, D. R. Horos, B. M. Johnson, and J. A. Schultz	
Repair of Decayed Heavy Timber Roof Truss Columns at a 135-Year-Old Cathedral	1267
Richard J. Kristie, Kevin A. Kalata, and Heidi L. Mase	
Design and Fabrication of a Timber Trellis with Complex Geometry	1303
Erich Oswald, Brett H. Schneider, and Lucile Walgenwitz	

Natural Disaster Mitigation

Sea Level Rise and Climate Change Impacts in Coastal Areas: Case Studies from the Greater Boston Area	1315
Lisa Dickson and Indrani Ghosh	
Damage Reconnaissance and Seismic Response Prediction of an East Coast U.S. Building Subjected to 2011 Virginia Earthquake	1324
Xin Chu, James Ricles, Shamim Pakzad, James Martin, and Golnaz Shahidi	
Structural Design of Affordable and Energy Efficient Earth Masonry Dwellings for Tornado Wind Loads	1336
M. C. Cuéllar-Azcárate and F. Matta	
Three-Dimensional Loading Effects of Tsunamis on Bridge Superstructures	1348
M. R. Motley, G. I. Lemoine, and S. N. Livermore	
Regional Combined Hurricane Wind and Flood Loss Estimation—A FEMA HAZUS-MH Implementation	1359
Bin Pei, Weichiang Pang, Firat Testik, and Nadarajah Ravichandran	
Assessing the Joint Wind and Temperature Hazards for the United States	1371
Franklin T. Lombardo, Hung Nguyen Sinh, Chris Letchford, and David V. Rosowsky	
Lessons Learned: How Changes in Code, Construction, and Preparedness Affected Tornado Damage in Moore, Oklahoma, 1999 to 2013	1383
Vincent F. Fratinardo and Scott A. Schroeder	

The Influence of Community-Wide Hurricane Wind Hazard Mitigation Retrofits on Community Resilience	1392
J. Michael Grayson and Weichiang Pang	
Missile Impact on SC Walls: Global Response	1403
William H. Johnson, Jakob Bruhl, Damon G. Reigles, Jie Li, and Amit H. Varma	
Component Level Framework for Developing Storm Surge Damage Functions for Application in Catastrophe Models	1415
K. Ramanathan and C. Kafali	
Assessing Climate Change Impact on the U.S. East Coast Hurricane Hazards: Wind and Rain	1426
Lauren Mudd, Yue Wang, Chris Letchford, and David Rosowsky	
Optimal Bridge Restoration Sequence for Resilient Transportation Networks	1437
Aman Karamlou and Paolo Bocchini	
Failure Progression Analysis of Observed Residential Structural Damage within a Tornado Wind Field	1448
Thang N. Dao, Andrew J. Graettinger, Christine Alfano, Rakesh Gupta, Fred L. Haan, David Prevatt, James Richardson, and Alireza G. Kashani	
Structural Response of Low-Rise New York City Buildings during Storm Sandy	1460
Dan Eschenasy	
Using Tornado Damage Surveys to Improve Laboratory Tornado Simulations	1472
Fred L. Haan, Jr., Partha P. Sarkar, David Prevatt, David Roueche, Andrew Graettinger, Thang N. Dao, and Patrick Shane Crawford	
Influence of Lateral Load Bracing Systems on Damage and Survivability of Residential Structures Impacted by the Moore, Oklahoma, Tornado of May 20th, 2013	1484
Chris Ramseyer, Royce Floyd, Lisa Holliday, and Seth Roswurm	
Extra-Tropical and Tropical Cyclone Vulnerability in Canada: Two Comprehensive Models	1508
B. Kordi and K. Butler	
Quantification of the Economic Resilience from the Community Level to the Individual Business Level: The Bay Area Case Study	1518
D. Martinelli, G. P. Cimellaro, and Chris S. Renschler	
Insights into Building Damage and Vulnerability from the Recent Severe Thunderstorm Outbreaks: Analyses of Post-Damage Surveys and Insurance Claims Data	1530
A. Dagneu, J. Luo, and C. Kafali	
 Non-Building and Special Structures	
Design of Nuclear Island Fill Concrete	1541
D. D. Liou	
Synopsis of Buckling-Restrained Braced Frame Design	1551
D. D. Liou	
Expansion of PCA Rectangular Concrete Tank Plate Tables	1563
Jordan Morris, Alan Hahn, and Leonel Almanzar	

Application of Contemporary Technology to the Rehabilitation of Deteriorated Cooling Towers	1574
Phillip L. Gould	
Nonlinear Analysis of Flue Gas Ductwork for Power Plant	1585
Zhong (John) Liu	
When Will This Tank Stop Sinking?	1597
Yousef Alostaz	
Fatigue Life Model Including Crack Propagation for Wind Turbine Tower Base Connections	1606
T. Q. Do, J. W. van de Lindt, and H. N. Mahmoud	
A Comparison of Wind Loads on Circular Bins, Silos, and Tanks	1616
Xiapin Hua and Chris Letchford	
Dynamic Analysis of Onshore Modules Supporting Heavy Machines	1630
Naru Gopal Gorai, William Bounds, Silky Wong, and Tracy Sun	
Design of Pipe Racks Using Pre-Assembled Units or Modules	1638
Xiapin Hua	
Offshore Wind in the Northeast	1652
E. M. Hines and W. H. White, Jr.	
Bulkhead Design for the New Bedford Marine Commerce Terminal	1664
John DeRuggeris and Susan Nilson	
Design of Conical Steel Wind Turbine Towers Manufactured with Automated Spiral Welding	1675
Angelina Jay and Andrew Myers	
The Impact of the Peak Spectral Period in the Design of Offshore Wind Turbines for the Extreme Sea State	1684
V. Valamanesh, A. T. Myers, S. R. Arwade, and J. F. Hajjar	
Design Optimization of Lattice Wind Turbine Towers Subjected to Earthquake Forces	1694
B. Gencturk, A. Attar, and C. Tort	
Static and Dynamic Buckling of Cylindrical Tanks	1704
S. Jerath and Mark Lee	
Graphitization Effects on High Temperature Ductwork	1717
Austin A. Meier, Dain M. Hammerschmidt, and Eric R. Skibbe	
Eccentric Discharge from Silos: Bulk Solids Behavior, Loads, and Structural Implications	1729
J. Chavez Sagarnaga	
Modularization in the Petrochemical Industry	1741
Dawar Naqvi, Eric Wey, Jayesh Patel, and Glenn Siegert	
Modularization in Regions of High Seismic Risk	1752
Dawar Naqvi, Eric Wey, Ankur Sapaha, and Naga Swamy	
A Technical Overview of ASCE/AWEA RP2011: Recommended Practice for Compliance of	1759

Large Land-Based Wind Turbine Support Structures

Nestor A. Agbayani

Transportation Considerations in Module Design

Dawar Naqvi, Eric Wey, Justin Morgan, Matthew Miller, and Tony Nguyen

1771

Non-Structural Components

Introduction to the *Guideline for the Structural Design, Evaluation, and Testing of Permanent Building-Supported Facade Access Equipment and Commentary*

J. E. Lewis, L. M. Joseph, J. Abruzzo, and G. R. Searer

1782

Structural Design Recommendations for Building-Supported Facade Access Equipment

G. R. Searer, K. J. Rubenacker, D. Bonowitz, and K. Mosalam

1790

Evaluation and Testing of Building-Supported Facade Access Equipment

H. Hill, R. A. Larson, F. Laux, and G. R. Searer

1798

Case Studies and Practical Examples Related to Facade Access Equipment

R. A. Larson, R. A. Dethlefs, and G. R. Searer

1808

Seismic Response of Ceiling/Piping/Partition Systems in NEESR-GC System-Level Experiments

E. Rahmanishamsi, S. Soroushian, and E. M. Maragakis

1824

Shake Table Tests for the Seismic Assessment of Hollow Brick Internal Partitions

C. Petrone, G. Magliulo, and G. Manfredi

1836

Seismic Performance Evaluation of Plasterboard Partitions via Shake Table Tests

G. Magliulo, C. Petrone, V. Capozzi, G. Maddaloni, P. Lopez, and G. Manfredi

1846

Analytical Simulation of the Performance of Ceiling-Sprinkler Systems in Shake Table Tests Performed on a Full-Scale 5-Story Building

Siavash Soroushian, Manos Maragakis, Craig Jenkins, Arash E. Zaghi, and Alicia Echevarria

1857

Static Experimental Testing to Define Force-Deformation Relationships of Precast Concrete Cladding Building Façade Systems

K. McMullin, M. Ortiz, S. Yarra, P. Nagar, L. Patel, and T. Ma

1869

A New Simple Formula to Evaluate the Risk of Furniture Overturning

G. P. Cimellaro, M. Chiriatti, and Bing Qu

1880

Studies of a Rooftop Cooling Tower and Its Seismic Protective System

C. Marin-Artieda, K. Kea, and T. Valencia

1892

Poster Session

Estimating Peak Inelastic Displacement of Steel SMRF Structures Subjected to a Single or Series of Strong Ground Motions with Scaled Response Spectra

P. Khajehhesameddin, A. Irfanoglu, and T. J. Hacker

1904

Wind Uplift of Concrete Roof Pavers

Maryam Asghari Mooneghi, Peter Irwin, and Arindam Gan Chowdhury

1915

Tall Structures Virtual Work Automated Optimization

1926

Alfonso Oliva

A Method to Reduce Plastic Shrinkage Cracking of Concrete Using the Re-Vibration Technique	1942
M. Aldalinsi, C. Ferregut, C. Carrasco, V. Tandon, and M. Alderette	
Impact of Intermediate Buildings on Interference Effects for Tall Buildings	1955
T. G. Mara and B. K. Terry	
Performance of Isolated Buildings with Superelastic-Friction Base Isolators under High Seismic Hazards	1967
O. E. Ozbulut and B. Silwal	
Non-Linear Modelling of Reinforced Concrete Columns Subject to Internal Explosions and Uplift Effects: CFD and Applied Element Methods	1978
M. G. L. Wijesundara, S. K. Clubley, and M. D. Hahn	
Numerical Analysis of Pressurized Cold Bend Pipes under Bending to Investigate the Transition from Compression to Tension Side Failures	1990
C. Cakiroglu, S. Adeeb, J. J. R. Cheng, and M. Sen	
A Detailed Finite-Element Approach for Performance Assessment of Corroded Reinforced Concrete Beams	2002
Z. Cui and A. Alipour	
Enhancement of Post-Earthquake Resilience of Bridge Networks with Prioritization and Accelerated Repair Strategies	2014
M. N. Furtado and A. Alipour	
Performance-Based Blast Resistant and Seismic Design of Reinforced Concrete Buildings in Industrial and Petrochemical Facilities	2025
Song F. Jan and Siddharth Kulkarni	
Navigating the Complexities of Rooftop Sky Bridge Construction	2037
John Hand and Patrick McCafferty	
Concrete Material Flow during Projectile Penetration	2048
Robert Sobeski and Girum Urgessa	
Soil-Structure Interaction for Gravity Caissons in Bridge Seismic Design	2060
Hubert Law, I. Po Lam, and Patrick Wilson	
Mitigation of Soft-Story Failures in Multi-Story Steel Concentrically Braced Frames through Implementation of Stiff Rocking Cores	2073
Francisco Sanchez-Zamora, Juan Carlos Sanchez, Bing Qu, Michael Pollino, and Gilberto Mosqueda	
Detailing and Erection of a Steel Building in the Remote Arctic with Materials Sourced from the U.S. and Europe	2084
Cory R. Brett, Paul J. Cheever, Scott J. DiFiore, and Dominic J. Kelly	
Statistical Models of a Concrete Bridge: Changes in Modal Parameters Due to Temperature	2093
Nickolas R. Foust, Marvin W. Halling, and Paul J. Barr	
The Allowable Stress, Load Factor, and Load and Resistance Factor Evaluation of the Historical Swing Steel Truss Riverside-Delanco Bridge	2104

Wisam Kaskas

Fatigue Reliability Assessment of Deteriorated Bridges under Vehicle Dynamic Impacts 2118

Wei Zhang, Hao Yuan, and C. S. Cai

Professional Practice

Engineers above the Law 2130

G. R. Searer, T. F. Paret, and R. A. Dethlefs

Reducing Errors When Using Structural Software 2139

Ryan Solnosky, Brian Quinn, and Lisa Willard

Progressive Collapse

Reliability Analysis of Shear Tab Connections under Progressive Collapse Scenario 2151

Amir Jamshidi, Smitha Koduru, and Robert G. Driver

Validation of a Finite Element Approach to Modeling of Structural Collapse of Steel Structures 2162

Vitaliy V. Saykin, Tam H. Nguyen, Jerome F. Hajjar, Derya Deniz, and Junho Song

Numerical Analysis of Strengthened Steel Stud Bearing Walls to Resist Disproportionate Collapse 2174

Ismail Mohamed, Nabil A. Rahman, and R. Seracino

Development of an Innovative Load-Bearing Steel Stud Wall System for Blast Protection of Building Envelopes 2186

A. Aviram, C. O'Laughlin, R. L. Mayes, R. O. Hamburger, and J. Nielsen

Experimental Resistance Function Development of Steel Studs under Combined Axial and Flexural Loads Using Load-Tree Testing 2198

C. O'Laughlin, A. Aviram, Brett Agee, and Jeffrey Nielsen

Robustness of Precast Concrete Frames: Experimental and Computational Studies 2210

Joseph A. Main, Yihai Bao, H. S. Lew, and Fahim Sadek

Disproportionate Collapse Design Considerations—A Comprehensive Approach 2221

Cliff D. Bishop and Ellen H. McInerney

Risk Resilience and Reliability

Life-Cycle Performance of Structural Systems under Uncertainty 2233

Fabio Biondini and Dan M. Frangopol

A General Framework for Probabilistic Risk-Based Optimization of Life-Cycle Management of Infrastructure Systems under Gradual and Sudden Deterioration 2245

Dan M. Frangopol and Mohamed Soliman

A Review of Challenges and Strategies for Modeling Structural Degradation 2257

M. Sanchez-Silva, J. Riascos-Ochoa, and R. Akhavan-Tabatabaei

The Performance of Essential Facilities in Superstorm Sandy 2269

Therese McAllister

Optimal Bridge Maintenance of a Large Number of Bridges Using a Robust Genetic Algorithm	2282
Hitoshi Furuta, Koichiro Nakatsu, Ken Ishibashi, and Noriaki Miyoshi	
ASCE First Generation Testbed for Evaluating Resilience of Structures	2292
G. P. Cimellaro, S. Moretti, M. Piqué, A. C. Trozzo, Chris S. Renschler, and A. M. Reinhorn	
Incorporating Risk-Based Security Elements in Highway Project Planning	2304
Steve Ernst	
Disaster Resilience of Drinking Water Infrastructure Systems to Multiple Hazards	2312
John C. Matthews, Kalyan Piratla, and Elizabeth Matthews	
Toward Risk-Based Multi-Hazard Resistant Design of Bridges	2318
S. Kameshwar and J. E. Padgett	

Seismic

Current Practice and Future Trends for Seismic Design for Buildings in New England	2330
D. J. Kelly and J. J. Zona	
Seismic Performance of Buildings Designed for Wind	2342
J. P. Judd and F. A. Charney	
Performance-Based Design in the Central and Eastern United States	2355
J. P. Judd and F. A. Charney	
Seismic Behavior of Low-Ductility Concentrically-Braced Frames	2369
J. Sizemore, A. Davaran, L. Fahnestock, R. Tremblay, and E. Hines	
Cyclic Experimental Behavior of Angles and Applications for Connection Design and Modeling	2381
J. Nelson, A. Davaran, T. Beland, C. Bradley, E. M. Hines, R. Tremblay, and L. A. Fahnestock	
Structural and Nonstructural Performance Evaluation of Self-Centering Concentrically Braced Frames under Seismic Loading	2393
Mojtaba Dyanati, Qindan Huang, and David A. Roke	
Experimental Behavior of Bolted Angles and Beam-to-Column Connections	2405
Thierry Beland, Cameron Bradley, Jessalyn Nelson, Ali Davaran, Eric M. Hines, Robert Tremblay, and Larry A. Fahnestock	
Large-Scale Testing of Low-Ductility Concentrically-Braced Frames	2417
C. Bradley, J. Sizemore, J. Nelson, R. Tremblay, E. M. Hines, and L. A. Fahnestock	
Experimental Behavior of Low-Ductility Brace Connection Limit States	2429
A. Davaran, R. Tremblay, T. Beland, L. A. Fahnestock, and E. M. Hines	
Self-Centering Beams with Resilient Seismic Performance	2442
A. Maurya and M. R. Eatherton	
Behavior of Post-Tensioning Strand Systems Subjected to Inelastic Cyclic Loading	2454
T. L. Bruce and M. R. Eatherton	

Special Building Topics

Three-Dimensional Nonlinear Dynamic Analysis of Modular Steel Buildings	2466
A. Fathieh and O. Mercan	
Numerical and Experimental Investigation of the In-Plane Behavior of Rectangular Steel-Plate Composite Walls	2478
Siamak Epackachi, Nam H. Nguyen, Efe G. Kurt, Andrew S. Whittaker, and Amit H. Varma	
Effective Stiffness of Steel Plate-Concrete Composite Shear Wall Structures under Normal Status	2488
Jian-Guo Nie and Xiao-Wei Ma	
Active Vibration Control of a Multi-Panel Floor Area	2500
E. J. Hudson, P. Reynolds, and D. Nyawako	
A Performance-Based Methodology for the Topology Design of Tall Buildings	2512
S. Bobby, S. M. J. Spence, E. Bernardini, and A. Kareem	
Shenzhen Shum-Yip Tower One—Gravity and Lateral Load Resisting System Optimization	2524
Charles Besjak, Preetam Biswas, Syed Uzair Ullah, Xiaoyu He, and Jing Zhuang	
Buckling and Stiffness Optimization of Tall Buildings	2537
Alessandro Beghini, Lauren L. Beghini, William F. Baker, and Glaucio H. Paulino	
Simplified Vibration Response Prediction for Slender Monumental Stairs	2548
Brad Davis and Onur Avci	
Testing of a Post-Tensioned Coupled Shear Wall Structure	2558
Steven M. Barbachyn and Yahya C. Kurama	
Novel Method for Improving Shear Capacity of Slabs with Intermediate Beams Using FRP	2569
Mohsen Kargahi, Sid Abbasi, Neil Abbasi, and Saum K. Nour	
Enhanced Seismic Design of the New San Diego Central Courthouse	2579
M. Sarkisian, P. Lee, R. Garai, A. Tsui, and L. Handzhiyski	
Vibration Serviceability Assessment of Floors in a Multi-Use Multi-Storey Industrial Complex	2595
James Brownjohn, Christopher Middleton, Tso-Chien Pan, and Su-Chern Tan	
Analysis and Design of Steel-Concrete Composite Frame Systems	2605
Mark D. Denavit, Jerome F. Hajjar, Roberto T. Leon, and Tiziano Perea	

Steel Topics

Prediction of Fracture of Welded Moment Connection under Varying Amplitude Cyclic Loading	2617
K. Suita, K. Takatsuka, and T. Tanaka	
Gusset Plate Stability Using Variable Stress Trajectories	2629
Bo Dowswell	
Seismic Performance of Steel MRFs with Partially-Restrained Bolted Beam-to-Column Connections through FE Simulations	2640

E. Brunesi, R. Nascimbene, and G. A. Rassati

Moment-Rotation Behavior of “Pinned” Connections in Low-Rise Metal Buildings 2652

F. Kavoura, M. Gurbuz, B. Gencturk, M. Dawood, J. Hatch, and J. Navarro

Effect of Slab Stiffness on EBF Link Rotation Demands and Implications for Link Ultra Low-Cycle Fatigue Susceptibility 2664

G. S. Prinz and A. de Castro-e-Sousa

Three-Dimensional Finite Element Simulation of the Seismic Behavior of Multitier Concentrically Braced Frames 2675

C. D. Stoakes and L. A. Fahnestock

The AISI Direct Strength Method for Cold-Formed Steel Design: A Practicing Engineer’s Introduction 2687

C. Grey and M. Detwiler

Thin-Walled Cold-Formed Steel Welded Tube Design in a Long Span Dome 2699

A. Chatterjee, A. Algara, F. Castano, and C. D. Moen

A New Seismic Design Method for Steel Multi-Tiered Braced Frames 2707

Ali Imanpour, Robert Tremblay, and Ali Davaran

Behavior and Design of Cold-Formed Steel Framed Shear Walls Using Structural Composite Panels 2721

Cheng Yu, Chao Li, and Carleton Elliott

Structural Optimization and Monitoring

A Slotted Patch Antenna for Wireless Strain Sensing 2734

Xiaohua Yi, Chunhee Cho, Benjamin Cook, Yang Wang, Manos M. Tentzeris, and Roberto T. Leon

Structural Identification of an Elevated Water Tank 2744

J. T. Norris and K. A. Grimmelman

Considering Constructability in Structural Topology Optimization 2754

Mu Zhu, Yang Yang, Andrew T. Gaynor, and James K. Guest

Integration of Automated and Robotic Systems with BIM for Comprehensive Structural Assessment 2765

Dryver R. Huston, Dylan Burns, and Mandar M. Dewoolkar

Advanced Sensing Techniques for Damage Detection in Reinforced Concrete Structures 2777

K. A. Peterson, S. N. Pakzad, S. G. Shahidi, S. M. Barbachyn, and Y. C. Kurama

An Optimality Criteria-Based Method for Discrete Design Optimization under Buildability Constraints 2789

Mattias Schevenels, Sean McGinn, Anke Rolvink, and Jeroen Coenders

Cost Optimization in Bridge Construction: Application to Launched Bridges 2801

S. Hernandez and A. N. Fontan

Design of a Museum Facade Bracing System for Changing Performance Requirements Using Multiobjective Optimization 2813

James N. Richardson, Sigrid Adriaenssens, Guy Nordenson, Rajan Filomeno Coelho, and Rebecca Laberenne

In-Service Vibration Monitoring of a Tall Building Structure Using Wireless Sensor Networks	2826
Siavash Dorvash, Shamim Pakzad, and Clay Naito	
Comparison of Wireless and Wired Structural System Identification	2839
Navid Zolghadri, Marvin W. Halling, and Paul J. Barr	
Bridge Deflection Monitoring Using Small, Low-Cost Radar Sensors	2853
Shanyue Guan, Jennifer Rice, Changzhi Li, and Guochao Wang	

Wood Topics

Distributed Knee-Braced (DKB) System As a Complete or Supplemental Retrofit of Soft-Story Wood-Frame Buildings	2863
M. Gershfeld, C. Chadwell, J. van de Lindt, W. Pang, E. Ziaei, M. Amini, S. Gordon, and E. Jennings	
Overview of the NEES-Soft Experimental Program for Seismic Risk Reduction of Soft-Story Woodframe Buildings	2875
John W. van de Lindt, Pouria Bahmani, Steven E. Pryor, Gary Mochizuki, Mikhail Gershfeld, Weichi Pang, Ershad Ziaei, Elaina N. Jennings, Michael D. Symans, Xiaoyun Shao, Jingjing Tian, and Doug Rammer	
Tall Cross Laminated Timber Building: Design and Performance Session WW300 Experimental and Modeling Studies on Wood Frame Buildings	2886
J. Daniel Dolan, Vincent Bordry, Shiling Pei, and John van de Lindt	
Laboratory Testing of Energy-Efficient Wood-Framed Shear Walls	2894
T. Rodriguez-Nikl and R. Gupta
