Contents

Advanced SMA Forms and Functions I

Effects of Microstructure, Aging and Chemical Composition on the Shape Memory Properties of NiTiHPd Alloys	1
<i>E. Acar, H.E. Karaca, H. Tobe, and R.D. Noebe</i>	
SMA Actuators—A Viable Practical Technology	2
<i>Jeff Brown¹, Alan L. Browne², and Darel E. Hodgson³</i>	
<i>(1) Dynalloy, Inc.</i>	
<i>(2) Consultant</i>	
<i>(3) Nitinol Technology</i>	
Evolution of Two-Way Shape Memory Effect on Ni-Ti-Hf Shape Memory Alloy Torque Tubes via Thermomechanical Training	3
<i>C. Hayrettin, I. Karaman, and J.H. Mabe</i>	
Stable Crack Growth in Shape Memory Alloy Actuators	4
<i>Sameer Jape, Theocharis Baxevanis, and Dimitris C. Lagoudas, Texas A&M University</i>	
Multiple Memory Shape Memory Alloys	5
<i>M.I. Khan, A. Pequegnat, S.K. Tang, J. Wang, and Y. Zhou</i>	
On the Functional Stability of TiTa Shape Memory Alloys	6
<i>P. Krooß, T. Niendorf, E. Batyrsina, A. Paulsen, J. Frenzel, M. Schaper, and H.J. Maier</i>	
Cyclic Degradation Mechanisms in Iron-Based Shape Memory Alloys	7
<i>Thomas Niendorf, Philipp Krooß, Christoph Somsen, Mirko Schaper, Yuri I. Chumlyakov, and Hans J. Maier</i>	
Reducing Measurement Uncertainty in Characterizing SMA Actuators through New Mountings	8
<i>Christian Rathmann, Dennis Otibar, Konstantin Lygin, and Horst Meier</i>	
Further Numerical/Experimental Investigations of Nitinol Actuator Springs	9
<i>Ferdinando Auricchio, Giulia Scalet, and Marco Urbano</i>	
An Inclusion Size Based Fatigue Prediction Model for Nitinol	10
<i>M.F. Urbano¹, A. Coda¹, A. Cadelli¹, and S. Beretta²</i>	
<i>(1) SAES Getters</i>	
<i>(2) Politecnico di Milano</i>	

Production, Processing, and Joining

Effect of Silver Content on the Martensitic Transformation Temperatures in NiTiAg Shape Memory Alloys for Biomedical Applications to Differential Scanning Calorimetry Analysis	11
<i>G.H.T. Álvares da Silva, J.E. Matieli, and J. Otubo, Instituto Tecnológico de Aeronáutica</i>	
Microstructure of NiTi Thin Films on Planar Carbon Materials	12
<i>S. Hahn, I. Sen, M. Böhme, M. Pügner, and M.F.-X Wagner</i>	
Phase Stability in Ni-Rich Nitinol with Ternary Solute Additions	13
<i>B.C. Hornbuckle, T.T. Sasaki, R. Noebe, G. Bigelow, M.L. Weaver, and G.B. Thompson</i>	
Comparison of Inclusion Size and Area Distribution in Binary and Ternary NiTi Shape Memory Alloys	14
<i>R.M. Manjeri, Frank Sczerzenie, Clarence Belden, and Rich LaFond, SAES Smart Materials</i>	
Processing and Use of NiTiCo High Stiffness Alloys	15
<i>Dennis W. Norwich¹, Xu Huang¹, and Frank Sczerzenie²</i> <i>(1) Memry Corporation</i> <i>(2) SAES Smart Materials</i>	
Development of a Quality Management Method for the Production Process of Semi-Finished NiTi-SMA Materials	16
<i>D. Otibar, C. Rathmann, K. Lygin, and H. Meier</i>	
The Effect of Alloy Formulation, Cold Work, and Inclusion Content on Micro-Void Formation in NiTi Alloys	17
<i>Frank Sczerzenie, R.M. Manjeri, Clarence Belden, and Rich LaFond, SAES Smart Materials</i>	
Distribution of Material Characteristics in Sputter Deposited Nitinol	18
<i>Gerd Siekmeyer, Marius Augenstein, Andreas Schuessler, Rodrigo Lima de Miranda, and Eckhard Quandt</i>	

Surface Engineering, Corrosion, and Biological Response I

Effect of In-Situ Deformation on the Corrosion Behavior of Nitinol Wires	19
<i>Xu Huang, Dennis Norwich, and Michael Ehrlinspiel, Memry Corporation</i>	
in Vitro Leaching of Nitinol Medical Devices and Trace Metal Analysis by ICP-MS Spectrometry	20
<i>Mohsina Islam and Shi Liu, ChemTrace Analytical Services</i>	
Correlation of In-Vitro Assessments of Pitting Corrosion to Uniform Corrosion in Nitinol Stents	21
<i>S. Nagaraja, M. Dreher, J. Bouck, L. Chen, J. Zheng, K. Miyashiro, C. Trepanier, P. Saffari, and A. Pelton</i>	

Pit Initiation on Electropolished Nitinol	22
<i>Bruce G. Pound, Exponent</i>	
Thermomechanical Aspects of Short- and Long-Term Ni-Release from NiTi.....	23
<i>Andreas Undisz, Katharina E. Frieberg, and Markus Rettenmayr</i>	
Nitinol—Tubing versus Sputtered Foil: Microcleanliness and Corrosion Behavior	24
<i>M. Wohlschlägel, R. Steegmüller, and A. Schüßler</i>	

Advanced SMA Forms and Functions II

Accelerated Endurance Testing of SMA Actuators	25
<i>Leonid Foshansky, Vishnu Naidu, and Brian Douglas Hu, Autosplice, Inc.</i>	
Shape Memory Behavior of Highly Ni-Rich NiTi Alloys	26
<i>I. Kaya , H. Tobe , H.E. Karaca , M. Nagasako, and R. Kainuma</i>	
Processing and Properties of Ti-Ta High Temperature Shape Memory Alloys	27
<i>Alexander Paulsen, Ramona Rynko, Christoph Somsen, Jan Frenzel, and Gunther Eggeler, Ruhr-University</i>	
Tuning the Shape Memory Behavior of NiTiHf Alloys	28
<i>S.M. Saghaian, H. Tobe, H.E. Karaca, and R. Noebe</i>	
Using Electrical Resistance for Control of Partial Transformations of SMAs Based on Percolation Theory	29
<i>F. Sluis, R. Benedictus, R.C. Alderliesten, and H.E.N. Bersee</i>	
Mechanics of the Interactions between Elasticity, Phase Transformation, and Plasticity in Nickel-Titanium	30
<i>Aaron P. Stebner, Colorado School of Mines</i>	

Surface Engineering, Corrosion, and Biological Response II

The Application of Electrochemical Methods to Characterize NiTi Corrosion and Nickel Elution.....	31
<i>Santi Chrisanti, W.L. Gore & Associates, Inc.</i>	
Highly Effective Polishing Process for Braided NiTi Stents	32
<i>C. Janisch and A. Schüßler</i>	
A Comparison between In-Vitro and In-Vivo Measurements of the Open Circuit Potential of Nitinol with Respect to Changes in Media, Open Circuit Delay, and Oxide Thickness	33
<i>Melissa Lonn, Justin Metcalf, Ali Shamimi, and Brian Choules, MED Institute, Inc.</i>	

Limitations and Challenges in Corrosion Testing and Surface Characterization Protocols for Implantable Nitinol Medical Devices	34
<i>Shari Nathanson Rosenbloom</i>	

Surface Nitriding and Oxidation of Nitinol.....	35
<i>Guna Selvaduray¹, Edin Bazo² and Vince Crist³</i>	
<i>(1) San Jose State University</i>	
<i>(2) Intel Corporation</i>	
<i>(3) Nanolab Technologies</i>	

Fretting and Flow Characteristics of Nitinol Stents	36
<i>Elizabeth Trillo, James Dante, Erica Macha, and Xingguo Cheng</i>	

Directions for Future Development

Enhanced NiTi Alloys for X-Ray Visibility and Mechanical Performance	37
<i>James M. Carlson¹, Ali Shamimi¹, James Butler², Shay Lavell², Abbasi Gandhi³, and Syed A.M. Tofail³</i>	
<i>(1) MED Institute</i>	
<i>(2) Cook Ireland</i>	
<i>(3) University of Limerick</i>	

SMA Seismic Damping Devices—Fabrication, Testing, Analysis, and Projections.....	38
<i>Darel E. Hodgson¹, T. Kim Parnell², Emily Mccarthy³, and Jamie E. Padgett³</i>	
<i>(1) Nitinol Technology</i>	
<i>(2) Parnell Engineering & Consulting</i>	
<i>(3) Rice University</i>	

Development of Weight Transfer Type Heat Engine Using Shape Memory Alloy	39
<i>Kazuhiro Kitamura</i>	

Nitinol Thin Films for Medical Devices—Past Attempts and Vision for the Future.....	40
<i>Andreas Schuessler, Gerd Siekmeyer, Torsten Scheuermann, Giorgio Cattaneo, Rodrigo Lima de Miranda, and Eckhard Quandt</i>	

Caloric Effects in Shape Memory Alloys— Optimizing NiTi for Solid State Refrigeration	41
<i>A. Wieczorek, J. Frenzel, and G. Eggeler, Ruhr-University</i>	

Superelastic NiTiCu Foams Produced by Cast Replication.....	42
<i>Marcus L. Young, Hao Yu, John D. Defouw, Jan Frenzel, and David C. Dunand</i>	

Medical Applications

A Smart Guidewire for Smooth Navigation in Interventional Radiology.....	43
<i>Mattew M. Barry, Mahdis Shayan, Brian T. Jankowitz, Xinjie Duan, Anne M. Robertson, and Youngjae Chun</i>	

A Novel Mechanical Nitinol Prosthetic Tongue	44
<i>Neil Gildener-Leapman, Mahdis Shayan, Gabrielle Salazar, and Youngjae Chun</i>	
Nitinol Fatigue—The Effect of the Initial Loading Strain on the Fatigue Life of a Wire Formed Stent Specimen	45
<i>Todd Malsbary</i>	
A Novel Thin Film Nitinol/Silk Endograft for Treating Small-Caliber Vascular Diseases	46
<i>Mahdis Shayan, Sung Yeun Yang, WonHyoungh Ryu, and Youngjae Chun</i>	
Characterization of Stent Structures from Sputter Deposited Nitinol	47
<i>Gerd Siekmeyer, Andreas Schuessler, Rodrigo Lima de Miranda, and Eckhard Quandt</i>	
Considerations in the Selection of Superelastic Nitinol for Medical Device Design	48
<i>Richard Swift, James M. Carlson, Ali Shamimi, and Brandon Davis</i>	

Aerospace, Auto, and Other

Deforming Shape Memory Wire Using Continuous Axial Compression to Achieve Elongation on Heating	49
<i>A. Austen, Innovare Inc.</i>	
Capability of Sputtered Micropatterned NiTi Thick Films	50
<i>C. Bechtold, R. Lima de Miranda, C. Zamponi, and E. Quandt</i>	
Bridge-Cable Vibration Controlling by Using Superelastic Nitinol Damper	51
<i>Qingfu Chen, Xiaobao Zuo, and Aiqun Li</i>	
Development and Analysis-Driven Design Optimization of an SMA-Based Slat-Cove Filler for Airframe Noise Reduction in Transport Aircraft	52
<i>W. Scholten, D. Hartl, T. Turner, and R. Kidd</i>	
Shape Memory and Superelastic Properties of Small-Scale Zirconia Ceramics	53
<i>A. Lai, Z. Du, C.L. Gan, and C.A. Schuh</i>	
Flight Test of a Shape Memory Alloy Actuated Adaptive Trailing Edge Flap—Part 1	54
<i>J.H. Mabe, J.K. Brown, and F.T. Calkins</i>	
Flight Test of a Shape Memory Alloy Actuated Adaptive Trailing Edge Flap—Part 2	55
<i>F.T. Calkins, J.H. Mabe, and J.K. Brown</i>	

Macroscale Characterization I

Effect of Prestrain on the Fatigue Life of Nitinol Wire	56
<i>Gong, Siskey, Rau, and Anderson</i>	
Effects of the Aging-Induced Fine Tuning of Transformation Temperatures on Thermomechanical Properties and Fatigue Behavior of Superelastic Nitinol	57
<i>A. Cadelli and A. Coda, SAES Getters S.p.A.</i>	
On the Influence of Alloy Compositions on Martensitic Transformations in NiTi and NiTiCu Shape Memory Alloys	58
<i>J. Frenzel, M. Maaß, E.P. George, M. Wagner, and G. Eggeler, Ruhr University Bochum</i>	
On Deducing Stress-Strain Relations from Bending Test	59
<i>X.Y. Gong¹, B. Liu², Z.Y. Wang², and Z. Suo³</i>	
<i>(1) Medical Implant Mechanics, LLC</i>	
<i>(2) University of Nevada</i>	
<i>(3) Harvard University</i>	
Burst Character of Thermoelastic Deformation of Shape Memory Alloys in Single Crystal Ni-Fe-Ga-Co and Cu-Al-Ni	60
<i>V.I. Nikolaev, G.A. Malygin, P.N. Yakushev, S.A. Pulnev, and A.I. Averkin</i>	
Influence of Diverse Surface Finishes on the Frictional Resistance of Nitinol Wire	61
<i>L. Rolsen and D. Plumley, Fort Wayne Metals Research Products Corp.</i>	
Apex Forming Stresses and Strains in As-Drawn Cold-Worked Ni-Ti Wire	62
<i>S. Terry, J. Dahal, M. Kamarajugadda, and A. Gupta</i>	
Influence of Microstructure on Mechanical Properties and Fatigue Behavior on Next Generation Nitinol Materials	63
<i>Jochen Ulmer¹, Hans Nusskern², and Gerhard Sedlmayr²</i>	
<i>(1) Euroflex GmbH</i>	
<i>(2) G. Rau GmbH & Co.</i>	
High Strain Rate Deformation and Microstructure of Austenitic NiTi & NiTiFe Shape Memory Alloys	65
<i>Hao Yu, Xu Nie, and Marcus L. Young, University of North Texas</i>	

Joining and Machining Technologies

Ultrasonic Additive Manufacturing of NiTi—Aluminum Matrix Composites	66
<i>Adam Hehr, Joshua Pritchard, and Marcelo Dapino, The Ohio State University</i>	
Welding of Shape Memory Alloy and Stainless Steel Torque Tube	67
<i>Tim Frech¹, Mark Riggs², and Marcelo Dapino²</i>	
<i>(1) Edison Welding Institute</i>	
<i>(2) The Ohio State University</i>	

Surface Microtexture of Ni50.8Ti49.2 by Electrical Discharge Machining	68
<i>Y.B. Guo¹, J.F. Liu¹, C.H. Fu¹, A. Klink², and F. Klocke²</i>	
<i>(1) The University of Alabama</i>	
<i>(2) RWTH Aachen University</i>	
Laser Micromachining and Predictive Modeling for Shape-Setting of Nitinol.....	69
<i>Arash Golafshan¹, Ryan Wilson², Jared Speltz², and Ahsan Mian²</i>	
<i>(1) Wright State University</i>	
<i>(2) Mound Laser and Photonics Center</i>	
Cryogenic and Dry Machining of NiTi Shape Memory Alloys	70
<i>Y. Kaynak, H.E. Karaca, and I. Jawahir</i>	
Design of Rotatory SMA Actuators for Small Machine Tools	71
<i>H. Meier and J. Pollmann</i>	
SMA Feed Axis with Predictive Control Strategies	72
<i>H. Meier, J. Pollmann, and P. Gläß</i>	
Recent Progress in Laser Welding of NiTi Based Shape Memory Alloys	73
<i>Y. Zhou, A. Pequegnat, and M.I. Khan</i>	

Modeling and Novel Experiments I

Strain Amplitude Volume Fraction Method for Evaluation of Nitinol Fatigue Durability	74
<i>Craig Bonsignore and Payman Saffari, Nitinol Devices & Components</i>	
Finite Element Simulations of Localized Functional Fatigue in Pseudoelastic NiTi	75
<i>M. Pouya, T. Lampke, C. Großmann, C. Elibol, and M.F.-X Wagner</i>	
Constitutive Model for Fatigue Strain Limit.....	76
<i>Payman Saffari, Maximilien Launey, Karthikeyan Senthilnathan, and Alan R. Pelton, NDC</i>	
Influence of Inclusions on Localized Stress/Strain Distributions	77
<i>Karthikeyan Senthilnathan¹, Payman Saffari¹, Scott W. Robertson¹, Alan R. Pelton¹ and Janine Pfetzling²</i>	
<i>(1) Nitinol Devices & Components</i>	
<i>(2) Ruhr University Bochum</i>	
Parametric FEA Study of the Impact of the Diamond Shape Design on the Fatigue Performance of Nitinol Vascular Implants	78
<i>M. Wind, W. Wohlschlägel, U. Mürle, and A. Schüssler</i>	

Macroscale Characterization II

Progress on the Correlation between Inclusions and Fatigue Behavior in NiTi Shape Memory Alloys for Biomedical Applications—Refinement of the Statistical Approach	79
<i>A. Coda¹, M.F. Urbano¹, A. Cadelli¹, D.W. Norwich², F. Sczerzenie³, P. Luccarelli⁴, and S. Beretta⁴</i>	
<i>(1) SAES Getters S.p.A.</i>	
<i>(2) Memry Corp.</i>	
<i>(3) SAES Smart Materials</i>	
<i>(4) Politecnico of Milano</i>	
Active Af Test of Unconstrained Stents Using Machine Vision	80
<i>Bharat Arora, Shravan Bharadwaj, Travis Tonder, Kenneth Yuan, and Todd Dickson</i>	
Non-Zero Mean Fatigue Tests of Nitinol Wire	81
<i>X.Y. Gong¹, S. Fariabi², K. Pike², B. Liu³, and Z.Y. Wang³</i>	
<i>(1) Medical Implant Mechanics, LLC</i>	
<i>(2) Abbott Vascular, Inc.</i>	
<i>(3) University of Nevada</i>	
Abstract Deleted	82
Influence of High Strain Rate Deformation on Microstructure and Mechanical Properties of Martensitic NiTi Shape Memory Alloys	83
<i>Ying Qiu, Marcus L. Young, and Xu Nie, University of North Texas</i>	
Characterization of Welded Nitinol Joints by Nondestructive Testing	84
<i>Rainer Steegmüller, Markus Wohlschlägel, Gunter Gläsel, Alexander Dillenz, Peter Mayr, and Andreas Schüßler</i>	

Modeling and Novel Experiments II

Novel Experiments and Simulations to Study Transformation, Plasticity, and Precipitate Effects in Shape Memory Alloys	85
<i>Peter Anderson¹, Matthew Bowers¹, Xiang Chen¹, Daniel Coughlin¹, Harshad Paranjape¹, Sivom Manchiraju¹, Michael Mills¹, and Ronald Noebe²</i>	
<i>(1) The Ohio State University</i>	
<i>(2) NASA Glenn Research Center</i>	
Laser Cutting Simulation of Nitinol Stent Alloy with Moving Heat Flux	86
<i>C.H. Fu and Y.B. Guo</i>	
Efficient Analysis of Shape Memory Alloy Single Crystalline and Textured Polycrystalline Responses via Anisotropic Yield Surfaces	87
<i>D. Hartl, B. Kiefer, R. Schulte, and A. Menzel</i>	

Microscopic Modeling and Simulation of Martensite/Austenite Phase Transformations in Shape Memory Alloys	88
<i>P. Biscari¹, A. Zanzottera¹, G. Indelicato², M.F. Urbano³, and G. Zanzotto⁴</i>	
<i>(1) Politecnico di Milano</i>	
<i>(2) Universita di Torino</i>	
<i>(3) SAES Getters S.p.A.</i>	
<i>(4) Universita di Padova</i>	
Mechanics of Twin Boundaries and Elastic Anisotropy in NiTi	89
<i>M.F.-X. Wagner and S. Pfeiffer</i>	
Simulation of Advanced SMA Applications—Porous and Self-Healing Structures	90
<i>Pingping Zhu¹, L. Catherine Brinson¹, and Aaron P. Stebner²</i>	
<i>(1) Northwestern University</i>	
<i>(2) Colorado School of Mines</i>	

Macroscale Characterization III

Effect of Strain Rate on the Localization Behavior of Pseudoelastic NiTi during Simple Compression and Compression-Shear Testing	91
<i>C. Elibol and M.F.-X. Wagner</i>	
Laser Cut Nitinol Medical Device Material—Non Zero Mean Strain Fatigue Life	92
<i>Stephen J. Forcucci, MSME</i>	
Fatigue Enhancement of Shape Set NiTi Components via Micro Peening	93
<i>Brandon Liechty</i>	
A Torsion Based Approach for Fatigue Testing of Nitinol Tube	94
<i>Dennis W. Norwich¹, Michael Ehrlinspiel¹, and Marco Urbano²</i>	
<i>(1) Memry Corporation</i>	
<i>(2) SAES Getters</i>	

In Situ Testing and Characterization

Characterization and Modeling of Transformation-Induced Defects in Pseudoelastically-Deformed NiTi Microcrystals	95
<i>M.L. Bowers, X. Chen, P.M. Anderson, and M.J. Mills</i>	
Texture Evolution during Nitinol Martensite Detwinning and Phase Transformation	96
<i>S. Cai, J.E. Schaffer, Y. Ren, and C. Yu</i>	
Compositional Stability of the P-Phase in Ti11(Ni,Pd)13 Alloys	97
<i>Anne C. Coppa, B.C. Hornbuckle, Xiao-Xiang Yu, Gregory B. Thompson, Mark L. Weaver, and Ronald D. Noebe</i>	

Harnessing the Full Power of NiTiNOL in Orthopaedics— Beyond Guide Wires, Staples, and Anchors	98
<i>Kenneth Gall, Georgia Institute of Technology</i>	
Anisotropic Stress-Strain-Behavior and Elastic-Constant-Tensor of Monoclinic B19' NiTi	99
<i>P.M. Kadletz, M. Hoelzel, and W.W. Schmahl</i>	
Full Field, In-Situ Observations of Damage Accumulation in Superelastic NiTi under Low Cycle Fatigue	100
<i>Michael Kimiecik, J. Wayne Jones, and Sam Daly</i>	
In-Situ Studies during Cyclic Loading of NiTi-Based Shape Memory Alloy Actuators	101
<i>P. Sedmák, P. Šittner, and C. Curfs</i>	
Fatigue of Notched Superelastic Nitinol	102
<i>Alex S. Teiche and Kenneth E. Perry</i>	

Posters

Fracturing Simulation of Cruciform Joint under Biaxial Loads	103
<i>A.M. Al-Mukhtar</i>	
Microstructural Evolution and Transformation Behavior of an Aged Ti-Ni-Au Shape Memory Alloy	104
<i>T.M. Butler, G.B. Thompson, and M.L. Weaver</i>	
Analogies and Differences between Tensile and Free Recovery (TFR) and the Common Techniques for Superelastic Nitinol Characterization	105
<i>A. Cadelli¹, A. Coda¹, R.M. Manjeri², and F. Sczerzenie²</i>	
<i>(1) SAES Getters S.p.A.</i>	
<i>(2) SAES Smart Materials</i>	
Transformation and Deformation Mechanisms in High Temperature Shape Memory Alloys with Nanoprecipitates	106
<i>L. Casalena¹, F. Yang¹, D. Coughlin¹, M. Bowers¹, Y. Gao¹, X. Chen¹, H.M. Paranjape¹, M.J. Mills¹, Y. Wang¹, P. Anderson¹, R. Noebe², G. Bigelow², D. Gaydos², and S. Padula²</i>	
<i>(1) The Ohio State University</i>	
<i>(2) University of Duisburg-Essen, Germany</i>	
Effect of H-Phase Precipitates on the Performance of Ni-TiHf High-Temperature SMAs	107
<i>X. Chen¹, F. Yang¹, M.J. Mills¹, P.M. Anderson¹, D.R. Coughlin², R.D. Noebe³, and H.E. Karaca⁴</i>	
<i>(1) The Ohio State University</i>	
<i>(2) Los Alamos National Laboratory</i>	
<i>(3) NASA Glenn Research Center</i>	
<i>(4) University of Kentucky</i>	

Al-NiTi Metal Matrix Composites for Next Gen Zero CTE Materials— Modeling and Fabrication	108
<i>Adam Hehr, Xiang Chen, Marcelo Dapino, and Peter Anderson, The Ohio State University</i>	
Investigation of Shape Memory and Super Elasticity Effects of Ni-Ti Single and Bi-Layer Thin Films	109
<i>Maryam Mohri¹, Mahmoud Nili-Ahmadabadi¹, Mohammad Hassan Malekoshoaraie¹, and Horst Hahn²</i>	
<i>(1) University of Tehran</i>	
<i>(2) Karlsruhe Institute of Technology</i>	
Influence of Precipitation in 50.3Ni-32.2Ti-17.5Zr (at.%) on Microstructure and Shape Memory Behavior	110
<i>S. Kornegay, B.C. Hornbuckle, G. Bigelow, R. Noebe, M.L. Weaver, and G.B. Thompson</i>	
A Phase Field/Finite Element Approach to Model Coupled Phase Transformation and Plasticity in Shape Memory Alloys (SMA)	111
<i>Harshad Paranjape and Peter M. Anderson, The Ohio State University</i>	
Influence of Microstructure on the Fatigue Performance of Nitinol— A Computational Analysis	112
<i>F.M. Weafer and M.S. Bruzzi, National University of Ireland</i>	
Author Index	113
