TABLE of CONTENTS

Keynotes

Keynote abstracts and bio-sketches.....2

Controlled mechanical systems, robots, and adaptronics

Preventing the capsize of industrial vehicles: experimental tests on a scaled AGV 8
Benedetto Allotta, Fabio Bartolini, Riccardo Costanzi, Roberto Giusti, Niccolò Monni, Marco Natalini, Luca Pugi, Alessandro Ridolfi

Impedance Control in Wave-based Bilateral Teleoperation for Remote Interaction Tasks 16
Marco Mendoza, Isela Bonilla, Emilio González-Galván, Fernando Reyes, Ambrocio Loredo-Flores

Design of a Ball Screw Drive Wear Compensation Using Shape Memory Alloy Actuators..... 24
Tom Junker, André Bucht, Iñaki Navarro y de Sosa, Kenny Pagel, Welf-Guntram Drossel

Static friction modeling and identification for standard mechatronic systems..... 30
Szabolcs Fodor, Leonid Freidovich

Haptic Feedback for Touch Displays Using Piezoelectric Actuation of Flexible Plates 37
Georg Zenz, Manfred Nader, Wolfgang Berger

Hierarchical and Coupling Function sliding Mode Control for Underactuated Systems..... 44
Belal A. Elsayed

A Comparison of MRAC and L1- Adaptive Control for a Balancing Chair..... 51
Johannes Reuter, Florian Straußberger, Manuel Schwab

Autonomous Path Planning of Spray Painting Application for Bicycle-frame..... 61
Chyi-Yeu Lin, Zelalem Abay Abebe, Tao Ngoc Linh

Optimal Design of a Balancing System for a Serial Industrial Robot..... 68
Johan A. Persson, Johan Ölvander, Xiaolong Feng, Daniel Wappling

Dynamic Modeling of a Macro-Micro Manipulator Using Transfer Matrix Method..... 74
Xuping Zhang

Uncertainty-based mapping and planning strategies for safe navigation of robots with stereo vision 80
Martim Brandao, Kenji Hashimoto, Atsuo Takanishi

Robotic manipulator capable of sorting moving objects alongside human workers using a budget-conscious control system..... 86
Adela Wee, Christopher Willis, Victoria Coleman, Trevor Hooton, Andrew Bennett

Linear and non linear control of a flexible arm 91
Patrick Jodouin, Mohamad Saad, René Wamkeue

Power and data transmission in an underwater vehicle for the monitoring of Malta Channel and marine protected areas 97
A. Cammarata, M. Lacagnina, P.D. Maddio, R. Sinatra

Posture control of spherical joint antagonistic drive system using rubberless artificial muscle 102
Ayaka Suzuki, Naoki Saito, Toshiyuki Satoh

Drives and actuators

An Hydraulic Test Rig for the Testing of Quarter Turn Valve Actuation Systems 110
Luca Pugi, Giovanni Pallini, Andrea Rindi, Nicola Lucchesi

Design approach for Solid State Shape Memory Alloy Actuators 118
Pagel K., Drossel W.-G., Zorn W., Bucht A., Kunze H.

Case Study on Non-Ideal Current Tracking in Amplifiers for Voltage-Driven Manipulators 126
I Yungy, Stanislav Aranovskiyz, Leonid Freidovich

Energy-Efficient High-Pressure Pump 132
Stefan Niederberger, Lukas Kurmann

Analysis of Transient Processes of Actuator Device in a Hydraulic System With Digital Control 141
Ilcho Angelov, Alexander Mitov

A hydraulic Switching Control Concept Exploiting a Hydraulic Low Pass Filter 151
Rudolf Scheidl, Evgeny Lukachev, Rainer Haas

Sensors, measurement systems and signal processing, and pattern recognition

Cleaning Module for Hospital Robots 159
Tamas Szecsi, A.S.M. Mojahidul Hoque, Ciaran McCann, Andy Lau

Embedded gait parameter acquisition system for hemiplegic persons – HemiGaitEm 167
Tong Li, Gilbert Pradel

On-board navigation based on accelerometers and vision system 175
S.M.Sokolov, A.A. Boguslavsky, V.V. Sazonov, O.V. Triphonov

Winding fault diagnosis of a 3-phase induction motor powered by frequency-inverter drive using the current and voltage signals 182
Agusmian P. Ompusunggu, Zongchang Liuy, Hossein D. Ardakaniy, Chao Jiny, Frederik Petré, Jay Leey

MOEMS based micro-mechatronic module with closed-loop control 190
A. Tortschanoff, D. Holzmann, M. Lenzhofer, T. Sandner

Intelligent Automation Aiding Rapid Surface Defect Quantification in 3D 197
Mitul Tailor, Jon Petzing, Michael Jackson, Robert Parkin

Control of mechatronic systems

Experimental validation of iterative learning control for power shifts on a transmission with wet clutches in a heavy duty forklift 203
Maarten Witters, Arnout De Maré, Steve Vandenplas, Mark Versteyhe

Efficient State Estimation for Linear Multirate Sampled-Data Systems in a Linear Time-Invariant State Representation..... 210
Thorsten Voigt, Sebastian van de Hoef, Ulrich Konigorski

Model Predictive Control for Electro-hydraulic Actuated Dry Clutch in AMT Transmissions..... 218
Mario Pisaturo, Adolfo Senatore, Vincenzo D'Agostino, Nicola Cappetti

Experimental and Simulation-based Investigation of a Velocity Controller Extension on a Ball Screw System..... 226
Rico Münster, Michael Walther, Holger Schlegel, Welf-Guntram Drossel

Super-capacitors for load-leveling of industrial machines executing periodic tasks 233
Julian Stoev, Kris Vanvlasselaer, Wim Symens

Design and Development of a Quadrotor Flight Control System..... 239
Abubakar Surajo Imam, Robert Bicker

Automatic commissioning of machine tool drives with flexible load and state space control extension 247
Oliver Zirn, Lukas Katthän, Volkmar Welker

Model Predictive Control for Mechatronic Systems Based on Disturbance Observer and Time-Variant Input Constraints 255
Toshiyuki Satoh, Rié Abe, Naoki Saito, Jun-ya Nagase & Norihiko Saga

Dynamic straightness and position errors in machine tools due to axes acceleration..... 263
Minh Hop Nguyen, Natanael Lanz, Sascha Weikert, Konrad Wegener

Industrial wireless communications in mechatronics

A Testbed for Embedded Industrial Wireless Sensor and Actuator Networks Using Real Time Ethernet..... 270
Albert Pötsch, Gerhard Müller, Georg Möstl, Achim Berger, Andreas Springer

Mechatronic design

Holistically Integrated Design of a Haptic Steering Wheel..... 278
Daniel Malmquist, Jan Wikander

Hierarchical system modeling for an industrial gantry robot 286
Andreas Kellner, Peter Hehenberger

Applicability of Model-based System Lifecycle Management for Cyber-Physical Systems 294
Martin Eigner, Torsten Gilz, Andrea Denger, Johannes Fritz

Synthesis and Analysis of the Mechanism for Walking Assist Machine for Persons with Hemiplegia 303
Daisuke Matsuura, Ryuhei Funato, Yuta Chounan, Kunat Tharasrisuthi, Yukio Takeda

Mechatronic Design Optimization using Multi-agent Approach 310
Moncef Hammadi, Andreas Kellner, Jean-Yves Choley, Peter Hehenberger

Design Aspects Of An Open Platform For Underwater Robotics Experimental Research 318
Carlos R. Rocha, Rogério M. Branco, Lais A. da Cruz, Marcos V. Scholl, Matheus M. Cezar, Felipe D. Bicca

Design of Finger Rehabilitation Device for Pinching Motions using Pneumatic Actuator 326
Jun-ya Nagase, Kazuki Hamada, Takumi Ikeda, Toshiyuki Satoh, Norihiko Saga

Criteria for controller parameterization in the frequency domain by simulation based optimization 332
Kevin Hipp, Arvid Hellmich, Holger Schlegel, Welf-Guntram Drossel

Combining a Non-Invasive Identification Approach with Simulation Based Optimization for Accuracy Improvement 339
Arvid Hellmich, Kevin Hipp, Stefan Hofmann, Holger Schlegel, Welf-Guntram Drossel

Managing mechatronic products variability with a domain specific approach 347
Amir Hossein Ebrahimi, Pierre E. C. Johansson, Kristofer Bengtsson, Knut Åkesson

Basic Experiments on Four-Flapping-Wing Type Robot 354
Norihiko Saga, Yu Kinoshita, Jun-ya Nagase, Toshiyuki Satoh

Mechatronic education

Complex System Development for Mechatronics Education 362
István Nagy, Attila L. Bencsik

Embodied robotics

Embodying a gesture recognition system into a human friendly robot vehicle designed for carrying-medical tools 370
Jorge Solis, Teshome Delellegn Teshome

Development of automatic system to optimize the sound quality and sound pressure of the Waseda Flutist Robot 377
Jorge Solis, Kenichiro Ozawa, Klaus Petersen, Atsuo Takanishi

Mechatronics in manufacturing

A minimum energy trajectory algorithm for mechatronic systems with regenerative braking 385
Paolo Boscariol, Andrea Gasparella, Alessandro Gasparetto, Renato Vidoni

A new Guidance- and Trackingsystem to improve the accuracy of industrial robots used in inline measurement applications 391
Michael Kreutzer, Klaus Rinn, Klaus Wüst, Oliver Zirn

Utilizing Assembly Features for determination of Grasping Skill in Assembly System 399
Baha Hasan, Jan Wikander, Mauro Onori

Mechatronics in forestry and agriculture

On the design of a Mechatronic Mobile System for Laser Scanner Based Crop Monitoring 406
Marco Bietresato, Paolo Boscariol, Alessandro Gasparetto, Fabrizio Mazzetto, Renato Vidoni

Mechatronics in heavy and process industry

Preliminary Design and Validation of a Real Time Model for Hardware In the Loop Testing of Bypass Valve Actuation System 413
Carlo Carcasci, Emanuele Galardi, Luca Pugi, Andrea Rindi, Nicola Lucchesi

Advanced industrial applications of mechatronics

Advanced modeling and parameter identification of an automatic panel bender 422
Ch. Zehetner, R. Eder, F. Hammelmüller, W. Kunze, H.J. Holl, H. Irschik

Model-based design optimization of a press tending robot system 427
Rajendra Patel, Johan Wallmark, Daniel Zylberstein, Johan Ölvander, Roger Pons, Ramon Casanelles, Xiaolong Feng, Daniel Wäppling

Mechatronics for environmental sustainability

Current collector for heavy vehicles on electrified roads 436
Mohamad Aldammad, Anani Ananiev, Ivan Kalaykov

Other topics related to mechatronics

MEMS-Based Multi-Modal Vibration Energy Harvesters for Ultra-Low Power Autonomous Remote and Distributed Sensing 443
J. Iannacci, E. Serra, G. Sordo, M. Bonaldi, A. Borrielli, U. Schmid, A. Bittner, M. Schneider, T. Kuenzig, G. Schrag, G. Pandraud, P. M. Sarro

Controlling Pneumatic Artificial Muscles in Exoskeletons with Surface Electromyography 451
Vincent Groenhuis, Stefano Stramigioli, Mervin Chandrapal, XiaoQi Chen

Scaled test track: A novel approach for active safety system development, testing, and validation 458
Krister Wolff, Ola Benderius, Mattias Wahde

Adoption of model-based development for machine controller software 466
Johan Van Noten, Davy Maes

Function Block Approach for Adaptive Robotic Control in Virtual and Real Environments. 473
Göran Adamson, Lihui Wang, Magnus Holm, Philip Moore

Mechatronics & Design for All (Mini-symposium)

The Impact on System Design Strategies of the concepts of Cyber-Physical Systems and the Internet of Things 481
David W Russell, David A Bradley

Assisting the Autistic To Reduce Anxiety Caused By Their Environment 487
K R G Rotter, M A Atherton

Sustainability, Mechatronics and the Internet of Things 493
Allan MacLeod, Crina Oltean-Dumbrava, David Russell, David Bradley

Wireless Positioning (Mini-symposium)

Wireless distance estimation with low-power standard components in wireless sensor nodes 502
Thorbjörn Jörger, Fabian Höflinger, Gerd Ulrich Gamm, Leonhard M. Reindl

Around and Around: An Investigation of Signals for Acoustic Position Estimation of Moving Objects 510
Florian Hammer, Markus Pichler, Harald Fenzl, Andreas Gebhard

Multi-tag IR-UWB Wireless Positioning of a Badminton Robot 518
Risang Yudanto, María Luisa Ruiz de Arbulo Gubía, Frederik Petré

Robust positioning of livestock in harsh agricultural environments 527
Markus Pichler, Branislav Rudic, Sandra Breitenberger, Wolfgang Auer

An Alternative Positioning Method Against Indoor Fading Effects 535
Joerg Blankenbach, Abdelmoumen Norrdine

Sensor Fusion and Kalman Filter Tuning in GPS/INS Integration: Simulations and Hardware Implementation 542
Arild Moldsvor, Teo Jörlén, Anders Birgersson

Simplified Robot Mechanisms for Complex Tasks (Mini-symposium)

Biologically-inspired mechanism design for anthropomorphic musical performance robots 549
Jorge Solis, Klaus Petersen, Atsuo Takanishi

Mechanism Design and Control of a Simple and Low-Cost Walking Assist Machine 555
Yukio Takeda, Daisuke Matsuura, Masaru Higuchi, Shuta Sato, Tatsuro Iwaya, Makoto Ogata, Ryuhei Funato

Casting Manipulation: Grasping Motion with Obstacle Avoidance 563
Hitoshi Arisumi, Shin Kato

Assistance Apparatuses for the Elderly, Patients, and Care Workers by Inclusive Design 569
Eiichirou Tanaka

Kinetostatics Analysis and Motion Planning of Underactuated Wire-driven Mechanisms 577
Nobuyuki Iwatsuki, Naoki Itabashi

Intelligent Robots (Mini-symposium)

Actuation of Artificial Muscle Wire for MEMS Microrobot Using Current Output-Type Artificial Neural Networks IC Bare Chip 585
Ken Saito, Tomohiro Hidaka, Yuki Ishihara, Minami Takato, Shinpei Yamasaki, Kazuaki Maezumi, Yuka Naito, Kei Iwata, Yuki Okane, Yohei Asano, Fumio Uchikoba

Dynamic Modeling and Control of a Quadrotor Unmanned Aerial Vehicle..... 589
Heba ElKholy, Maki K. Habib

Mechatronic System Design (Mini-symposium)

Model-based gearbox synthesis..... 599
Kristof Berx, Klaas Gadeyne, Michiel Dhadamus, Goele Pipeleers, Gregory Pinte

Polynomial control integrated to mechatronic concept optimization..... 606
Daniel Frede, Jan Wikander, Daniel Malmquist

Model Dependency Maps for transparent concurrent engineering processes 614
Michael Friedl, Lukas Weingartner, Peter Hehenberger, Rudolf Scheidl

Agent-Based Approach for Partitioning the Mechatronic Design..... 622
Moncef Hammadi, Fäida Mhenni, Jean-Yves Choley, Andreas Kellner, Peter Hehenberger

SysML Geometrical profile development for physical integration of mechatronic systems 629
Aude Warniez, Olivia Penas, Régis Plateaux, Romain Barbedienne

Model based conceptual mechatronic design – reflections concerning research versus industrial needs for high performance systems..... 636
Carl During, Jan Wikander
