9th North American Conference on  
**MULTIPHASE TECHNOLOGY**  
Banff, Canada: 11 – 13 June 2014

**CONTENTS**

<b>FOREWORD</b>	1
 <b>2 PHASE EXPERIMENTS</b>	
Liquid-liquid displacement in a horizontal and inclined pipe section <i>H Schümann, M Kazemihatemi, M Diaz, O J Nydal, Norwegian University of Science and Technology; Z Yang, Norwegian University of Science and Technology and Statoil ASA, Norway</i>	5
Experimental study of low concentration sand transport in low liquid loading water-air flow in horizontal pipes <i>K Najmi, B S McLaury, S A Shirazi, S Cremaschi, The University of Tulsa, USA</i>	17
Experiments on gas flow with wet pipe walls <i>A Shmueli, M Khatibi, T Arnulf, O J Nydal, Norwegian University of Science and Technology; B Djoric, Total EP, Norway</i>	29
Experiments and modelling of liquid accumulation in the low elbow of a gas/liquid pipeline <i>M Birvalski, G B Koren, Delft University of Technology; R A W M Henkes, Delft University of Technology and Shell Projects &amp; Technology, The Netherlands</i>	41
Two-phase flow splitting experiments in an impacting tee with two risers <i>W R van der Gronden, Delft University of Technology; G Haandrikman, C G A T'Joen, Shell Projects &amp; Technology; R A W M Henkes, Delft University of Technology and Shell Projects &amp; Technology, The Netherlands</i>	57
Spatio-temporal features of air-oil interface for stratified-wavy two phase flow in horizontal pipes with a 6-inch diameter <i>T B Aydin, C F Torres, H Karami, E Pereyra, C Sarica, The University of Tulsa, USA; E Schleicher, Helmholtz-Zentrum Dresden-Rossendorf, Germany</i>	71
 <b>ADVANCED MEASUREMENT TECHNIQUES</b>	
High salinity permittivity models to aid water cut meter design <i>M J Black, M N Noui-Mehidi, Saudi Aramco, Saudi Arabia</i>	87

Magnetic resonance technology: An innovative approach to measure multiphase flow 99  
*J Hogendoorn, A Boer, O Bousché, M Zoeteweij, Krohne New Technologies, The Netherlands; M Appel, H de Jong, Shell, USA; R de Leeuw, Shell, The Netherlands*

Characteristics of gas-viscous oil flows in a 0.1 m diameter pipeline measured by an X-ray CT system 115  
*L Liu, M Langsholt, Institute for Energy Technology; B Hu, Flow Capture AS; Z Yang, Statoil ASA, Norway*

Application of the ultrasonic technique for monitoring the void fraction in an experimental simulation of an electrical submersible pump 131  
*B D Oliveira, R D M Carvalho, J L Gonçalves, Universidade Federal de Itajubá, Brazil; H A Pineda, F A López, N R Ratkovich, Universidad de los Andes, Colombia*

#### **DRA, CORROSION AND EROSION**

Effect of drag-reducing polymers on Tubing Performance Curve (TPC) in vertical gas-liquid flows 149  
*P Shoeibi Omrani, J Veltin, D Turkenburg, TNO, The Netherlands*

Drag reduction in stratified oil-water flows 165  
*L C Edomwonyi-Otu, M Chinaud, P Angeli, University College London, UK*

Taking control of top of line corrosion in multiphase flowlines using early flow assurance and mitigation design 175  
*D Buswell, V Ponagandla, S Bufton, T Wood, INTECSEA Inc., USA*

#### **FLOW MODELING**

The benefits of a compositional thermal hydraulic integrated production model when investigating subsea processing 189  
*Y Rojas, S Barbeau, R Waring, FEESA-IPM Pty Ltd, Australia; M Watson, FEESA Ltd, UK*

Erosion in under-developed multiphase flows 205  
*D Vedapuri, Tridiagonal Solutions Inc., USA*

A new model for solids transport in multiphase flows 215  
*K Sambath, H Gao, H J Subramani, G E Kouba, Chevron Energy Technology Company, USA*

The use of single continuous-phase solids transport models for near-horizontal stratified liquid/gas flow 223  
*F B Soepyan, S Cremaschi, C Sarica, The University of Tulsa; H Gao, H J Subramani, G E Kouba, Chevron Energy Technology Company, USA*

Gas-liquid pipe flow patterns as directed graphs: Their creation and applications 237  
*P E Adames, Schlumberger, Canada*

## HEAVY OILS AND EMULSIONS

- A study of viscous oil and water pipe flow 255  
*Z Yang, Statoil ASA, Norway*
- Phase inversion in dispersed two phase oil-water pipe flow 271  
*J Plasencia, O J Nydal, Norwegian University of Science and Technology and the Multiphase Flow Assurance Innovation Centre, Norway*
- CFD for the motion of elongated gas bubbles in viscous liquid 283  
*R F Kroes, Shell Projects & Technology and University of Twente; R A W M Henkes, Shell Projects & Technology and Delft University of Technology, The Netherlands*

## HYDRATES AND WAXES

- The challenges of qualifying a Kinetic Hydrate Inhibitor for an offshore sour lean gas field 301  
*M A Rithauddeen, S Al-Adel, Saudi Aramco, Saudi Arabia*
- CSMFlow: A multiphase flow modeling tool for hydrates in flow assurance 313  
*G A Hegde, A K Sum, Colorado School of Mines; I Rao, Shell Global Solutions (US) Inc.; T J Danielson, ConocoPhillips, USA*
- Hydrate plug management using electrically trace heating pipe in pipe: A full scale experimental study 327  
*M Gainville, C Cassar, A Sinquin, IFP Energies nouvelles; Ch. Tzotzi, T Parenteau, Technip, France; D Turner, D Greaves, R Bass, ExxonMobil Development Company, USA; M-K Decrin, P Glénat, Fl. Gérard, Total E&P, France; J E P Morgan, E Zakarian, Woodside Energy Limited, Australia*
- Hydrate plug localization and characterization with ultrasonic and guided waves technologies 347  
*L Pomié, Ch Tzotzi, Technip; C Faderne, B Chapuis, F Jenson, CEA, France*

## HYDRODYNAMIC, TERRAIN AND SEVERE SLUGGING

- Feasibility of surfactants as severe slugging suppression agents 365  
*C Sarica, P Begen (currently with Mitsui Oil Exploration Co., Japan), E Pereyra, The University of Tulsa; G Kouba, Chevron Energy Technology Company, USA*
- Severe slugging with viscous liquids: experiments and simulations 377  
*M J C Diaz, M Khatibi, O J Nydal, Norwegian University of Science and Technology, Norway*
- Modeling slug flow in looped pipelines 389  
*L Liu, V Ponagandla, INTECSEA; S L Scott, Texas A&M University (now at Shell UAD); G E Kouba, Chevron ETC, USA*
- Experimental study to characterize slug flow for medium oil viscosities in horizontal pipes 403  
*R Brito, E Pereyra, C Sarica, The University of Tulsa, USA*

Terrain slugging in a high-pressure pipeline-riser system – large scale experiments and predictions with LedaFlow 419  
*J Kjølås, S T Johansen, SINTEF, Norway*

#### **SEPARATION, PUMPING AND EQUIPMENT**

Two-phase flow in a down-hole shut-in valve 435  
*S Edvardsen, C A Dorao, O J Nydal, Norwegian University of Science and Technology, Norway*

Characterization and analysis of fluid dynamic instabilities on a subsea pumping module 449  
*V Teixeira, T Gessner, O Borges, R Furtado, G Betônico, V Estevam, L C Tosta, Petróleo Brasileiro S.A., Brazil*

Control by design: mitigating foams in compact separators 465  
*S Appathurai, G E Kouba, Chevron Energy Technology Company, USA*

The severe slugging mitigation capability of a compact cyclonic gas/liquid separator 477  
*R Jones, Y Cao, Cranfield University; N Beg, C Wordsworth, Caltec Limited, UK*

Flow issues in – and around twin-screw multiphase pumps 489  
*D Müller-Link, G Rohlfing, J U Brandt, S Bienek, ITT Bornemann GmbH, Germany*

#### **SIMULATION AND VALIDATION**

Bypass pig modeling – a three phase gas condensate pipeline field case 499  
*Y Olaniyan, D Larrey, Total, France*

#### **AUTHOR INDEX**
