

2013 7th International Workshop on the Analysis of Multi-temporal Remote Sensing Images

(Multi-Temp 2013)

**Banff, Alberta
25 – 27 June 2013**

IEEE Catalog Number: CFP13608-POD
ISBN: 978-1-4799-2414-1

TABLE OF CONTENTS

Accuracy Assessment of Annual Land Cover Time Series Derived from Change-based Updating	1
<i>D. Pouliot, R. Latifovic</i>	
Application of Multi-resolution Remotely Sensed Imagery for the Monitoring of Land Cover Change	4
<i>A. Cunningham, R. Lucas, P. Bunting</i>	
Aquistore Project: Ground Deformation Retrieved by InSAR During May 2012 - May 2013	8
<i>S. Samsonov, D. White, M. Craymer</i>	
Comparison of Leaf Area Indices for Grasslands Within the Alpine Upland Based on Multi-scale Satellite Data Time Series and Radiation Transfer Modeling	12
<i>S. Asam, L. Pasolli, C. Notarnicola, D. Klein</i>	
A Conceptual Approach for the Impact of the day of Observation of Image Composites on Time Series Generation.....	16
<i>R. Colditz</i>	
Continual Refinement of Lake Carbon Estimates Using Historical, Current, and Future Field and Satellite Data	20
<i>J. Cardille, P. Del Giorgio, M. Crowley, J. Boisvert-Chouinard</i>	
Grassland Identification Using Multi-temporal RapidEye Image Series.....	24
<i>E. Zillmann, H. Weichelt</i>	
Integration of Topographic Correction in a Pixel-based Compositing Algorithm in the Romanian Carpathians.....	28
<i>S. Vanonckelen, S. Lhermitte, A. Rompaey, P. Griffiths</i>	
Investigating the Potential of GIMMS and MODIS NDVI Data Sets for Estimating Gross Primary Productivity in Harvard Forest	31
<i>X. Yu, Z. Wu, X. Guo</i>	
A Kernel Regression Approach to Cloud and Shadow Detection in Multitemporal Images.....	35
<i>J. Amoros-Lopez, E. Izquierdo-Verdiguier, L. Gomez-Chova, J. Munoz-Mari, G. Camps-Valls</i>	
Land Surface Phenology from Modis Data in Germany	39
<i>C. Kubert, C. Conrad, D. Klein, S. Dech</i>	
The Local Mutual Information Invariance: Application to Change Detection Between Multispectral Images.....	43
<i>L. Gueguen, F. Pacifici</i>	
Mapping of Grassland Using Seasonal Statistics Derived from Multi-temporal Satellite Images	47
<i>E. Zillmann, H. Weichelt, T. Esch, M. Keil, E. Herrero, J. Wolvelaer</i>	
Multi-sensor / Multi-Beam InSAR Ground Deformation Monitoring of Water-flood Oil Fields.....	50
<i>B. Deschamps, M. Henschel, G. Walter, J. Chen, S. Sato, S. Gravelle</i>	
A Multisensor, Multitemporal Approach for Monitoring Herbaceous Vegetation Growth in the Amazon Floodplain.....	52
<i>T. Silva, M. Costa, E. Novo, J. Melack</i>	
Multiset Kernel CCA for Multitemporal Image Classification.....	56
<i>J. Munoz-Mari, L. Gomez-Chova, J. Amoros, E. Izquierdo, G. Camps-Valls</i>	
Natural and Anthropogenic Ground Deformation Monitored Using High Spatio-Temporal Resolution MSBAS Time Series Method	60
<i>S. Samsonov, N. d'Oreye, B. Smets</i>	
Near Real-Time Tropical Forest Disturbance Monitoring Using Landsat Time Series and Local Expert Monitoring Data	63
<i>B. DeVries, A. Pratihast, J. Verbesselt, L. Kooistra, S. Bruin, M. Herold</i>	
GEOV2/VGT: Near Real Time Estimation of Global Biophysical Variables from VEGETATION-P Data.....	67
<i>A. Verger, F. Baret, M. Weiss</i>	
Predicting Live and Dead Basal Area from LandTrendr Variables in Beetle-affected Forests.....	71
<i>A. Hudak, B. Bright, R. Kennedy</i>	
Unsupervised Change Detection from Multitemporal Multichannel SAR Images Based on Stationary Wavelet Transform.....	75
<i>B. Chabira, T. Skanderi, A. Belhadj</i>
