

XIX. The Application of Experimental and Numerical Methods in Fluid Mechanics and Energetics 2014

Proceedings of the International Conference

Liptovský Ján, Slovakia

9-11 April 2014

Editors

Richard Lenhard
Katarína Kaduchová

University of Žilina, Žilina, Slovakia

All papers have been peer reviewed.

Melville, New York, 2014

Proceedings of the International Conference

Table of Contents

Preface: Proceedings of the International Conference – XIX. The Application of Experimental and Numerical Methods in Fluid Mechanics and Energetics 2014 Richard Lenhard and Katarína Kaduchová	1
Reviewers	3
CONTRIBUTED ORAL PAPERS	
Solar ventilation and tempering Karel Adámek, Miloš Pavlů, and Milan Bandouch	5
Dependence of electric strength on the ambient temperature Alexander Čaja, Patrik Nemeč, and Milan Malcho	12
Power losses and the efficiency of industrially used gearboxes Mária Čarnogurská, Miroslav Příhoda, and Lubomíra Širillová	16
Micro-cogeneration units based on Stirling engine for heating and their real operation Jaroslav Čierny and Marek Patsch	22
Emission of nanoparticles during combustion of waste biomass in fireplace Vendula Drastichová, Kamil Krpec, Jiří Horák, František Hopan, Petr Kubesa, Lubomír Martiník, Jan Koloničný, Tadeáš Ochodek, and Michal Holubčík	27
Determination of initial conditions for heat exchanger placed in furnace by burning pellets Peter Ďurčanský, Jozef Jandačka, and Andrej Kapjor	33
Solution for the flow of the direct blade cascades David Fenderl, Jan Uher, and Robert Kalista	37

Chemical composition in relation with biomass ash structure Michal Holubcik and Jozef Jandacka	42
Differences between pellets from biomass made in manufactory and in domestic conditions Michal Holubcik, Ewa Jachniak, and Helena Smatanová	48
Type of condensers and their cooling effect in the loop thermosyphon Peter Hrabovský, Patrik Nemec, and Milan Malcho	54
Analysis of the heat transfer from horizontal pipes at natural convection Andrej Kapjor, Jozef Huzvar, Branislav Ftorek, and Helena Smatanova	58
POD decomposition of CFD data of flow controlled flow over hump Tomáš Hyhlík	63
Particle emissions from biomass combustion Jana Chabadová, Štefan Papučík, and Radovan Nosek	67
Biomass gasification for liquid fuel production Jan Najser, Václav Peer, and Martin Vantuch	71
Cooling through heat pumps powered by a combustion engine for natural gas Martina Janovcová, Jozef Jandačka, and Roman Kiš	76
The methodic for study of smart surfaces using PIV technique Darina Jasikova, Lucie Nemcova, and Vaclav Kopecky	80
Influence of working fluid amount and working position gravitational heat pipe on thermal performance Marián Jobb, Patrik Nemec, Ľuboš Kosa, and Milan Malcho	88
Adsorption of tetrahydrothiophene (THT) onto soils Martin Juriga, Róbert Kubinec, Ján Rajzinger, Karol Jelemenský, and Štefan Gužela	92
Dependence the amount of combustion air and its redistribution to primary and secondary combustion air and his depending on the boiler Štefan Papučík, Richard Lenhard, Katarína Kaduchová, Jozef Jandačka, Jan Koloničný, and Jiří Horák	98

Heat transfer by thermovision and CFD methods Andrej Kapjor, Tomas Gressak, Jozef Huzvar, and Martin Vantuch	103
Mathematical model of heat transport through gravity assisted heat pipe in order to set length of the pipe Martin Kasanický, Richard Lenhard, and Milan Malcho	108
Influence of biomass blending on pyrolysis process using TGA-FTIR technique Jakub Bibrzycki, Anna Katelbach-Woźniak, and Andrzej Szlęk	113
A behavior of flowing air through a measuring track with installed orifice plate Roman Kiš, Milan Malcho, and Martina Janovcová	118
The impact of contaminated biomass for the formation of emission in the combustion process of producer gas in the cogeneration unit Slávka Kočanová, Ladislav Lukáč, Dávid Széplaky, and Ladislav Lazić	123
Effect of working fluids on thermal performance of closed loop pulsating heat pipe Zuzana Kolková and Milan Malcho	128
Analysis thermal performance of capillary heat pipe Luboš Kosa, Patrik Nemeč, Milan Malcho, and Marián Jobb	132
Lump wood combustion process Petr Kubesa, Jiří Horák, Michal Branc, Kamil Krpec, František Hopan, Jan Koloničný, Tadeáš Ochodek, Vendula Drastichová, Lubomír Martiník, and Milan Malcho	137
Analysis of the fill amount influence on the heat performance of heat pipe Richard Lenhard, Katarína Kaduchová, and Štefan Papučík	146
Heat pipe power depending on its position Veronika Mancikova, Alexander Caja, and Milan Malcho	153
Structural design of Stirling engine with free pistons Jozef Matusov, Stanislav Gavlas, and Milan Malcho	158
The heat exchanger of small pellet boiler for phytomass Jozef Mičieta, Richard Lenhard, and Jozef Jandačka	163

Boiling heat transfer on meshed surfaces of different aperture Lukasz J. Orman	169
Mathematical model of a closed hot air engine cycle using MATLAB®/Simulink® Pavol Oršanský, Branislav Ftorek, and Peter Ďurčanský	173
Micro-cogeneration with fuel cells Marek Patsch and Jaroslav Čierny	177
Calculation of steam-water injector properties Petr Pavlicek and Jiri Linhart	182
Modifiers of the ash properties Vaclav Peer, Jan Najser, and Peter Pilat	187
Simulation of cracking cores when molding piston components Alena Petrenko and Josef Soukup	191
Heat transfer to the adsorbent in solar adsorption cooling device Peter Pilat, Marek Patsch, Stefan Papucik, and Martin Vantuch	197
Comparison of various laminar/turbulent transition models Jaromír Příhoda, Petr Straka, Jiří Fürst, and Lukáš Popelka	202
Determination of pressure drop coefficient by CFD simulation Blanka Skočilasová and Jan Skočilas	206
Aerosols and the methods of determining the characteristics of nanoparticles Mária Skřínková, Jiří Horák, Pavel Danhelka, Kamil Krpec, František Hopan, Zdeňka Kaličáková, Petr Kubesa, Lubomír Martiník, Vendula Drastichová, Jan Skřínský, Jan Koloničný, Tadeáš Ochodek, and Jozef Jandačka	211
Influence of wick properties in a vertical LHP on remove waste heat from electronic equipment Martin Smitka, Patrik Nemeč, and Milan Malcho	219
Influence of inlet nozzle on secondary flow in axial stator blade cascade Petr Straka, Jan Šimák, and Jaroslav Pelant	224

Adjustment of the flue gas path in small combustion appliances with regard to particulate matter reduction Katarína Sulovcová, Jozef Fandačka, and Radovan Nosek	229
Influence of gas temperature on temperature field in the area of transit gas-pipeline Dávid Széplaky, Augustín Varga, and Ján Rajzinger	234
Range of valid arguments for data reduction method in the steam flow fields Pavel Šafařík, Adam Nový, Miroslav Hajšman, and David Jícha	240
Experiments on the heat exchangers with the tubes of small diameters Urban F., Kubín M., and Kučák L.	245
Temperature measuring analysis of the nuclear reactor fuel assembly Urban F., Kučák L., Bereznai J., Závodný Z., and Muškát P.	249
Dynamics of reattachment of the flow behind backward-facing step in a narrow channel Václav Uruba	253
The influence of the radial diffuser geometry on the position of best efficiency point of the multistage pump Michal Varchola and Peter Hlbočan	257
Theoretical models on prediction of thermal property of nanofluids Veikko Shalimba and Blanka Skočilasová	267
Comparison of twin-fluid atomizers using a phase Doppler analyser Matouš Zaremba, Milan Malý, Jan Jedelský, and Miroslav Jícha	272
The measurement of abrasive particles velocities in the process of abrasive water jet generation Michal Zeleňák, Josef Foldyna, and Zdeněk Říha	276
Cooling molten salt reactors using "gas-lift" Pavel Zítek, Vaclav Valenta, and Marek Klimko	281
