# CONTENTS

---

## **DAY 1**

### **SESSION ONE – OPERATIONAL CASE STUDIES**

Slow Steaming – a look back at 5 year’s experience within the A.P.Moller-Maersk Group.....	29
Slow Steaming & Energy Optimisation.....	31
SEEMP – Sea trialled onboard M/V Bore Sea.....	37
As SEEMP regulation become mandatory in January 2013, what is the impact for today’s operators?.....	39

### **SESSION TWO – POWERING THE VESSELS: PROPELLERS**

Azipod XO – hydrodynamic improvements.....	47
Operational experiences with Feathering Propellers on twin screw vessels during slow steaming.....	51
Design optimisation of fuel efficient propulsion system.....	61

### **SESSION THREE – LNG POWERED VESSELS: CASE STUDIES**

Dual Fuel – LNGPac Wärtsilä LNG fuel vessel system: The Viking Grace success story.....	75
LNG Powered Vessels - Case Study of M/S Stavangerfjord.....	77

### **SESSION FOUR – HYBRID TECHNOLOGY: ELECTRIC DRIVES**

Battery powered ships - Economic and greener.....	85
Electric drive solutions.....	89
Diversity of diesel-electric propulsion plants – today’s selection criteria for a suitable application.....	91

### **SESSION FIVE – FUELLING AND LUBRICATING THE FLEET OF TODAY, IN 2015 AND BEYOND 2020**

Case study: Fuel availability – now and beyond 2020.....	105
Fuels of the future and the true role of lubricants.....	111

**DAY 2****SESSION SIX – SEEMP: SUBSTANTIAL SAVINGS TO THE OPERATOR – NOT JUST A PAPER EXERCISE**

Ship Energy Efficiency Management Plan, SEEMP.....	119
A decision-support system for the calculation of ship energy consumption, Energy Efficiency Design Index (EE DI) and exhaust gas emissions.....	125
Optimising Energy Efficiency in Operation.....	142

**SESSION SEVEN – LOW EMISSION CONTROL SOLUTIONS**

Case study 1: NO <sub>x</sub> Reduction using a unique EGR Technology on a Norwegian Ferry.....	155
Case study 2: Manufacturer’s perspective: Emission Control Technology for Engines and Boilers - Pays for Itself in Fuel Savings.....	162
Case study 2: Operator’s perspective: Pilot on-board fuel emulsion system for NO <sub>x</sub> , PM and fuel reductions.....	166
Case study 3: The economical way of scrubbing SO <sub>x</sub> without emitting more CO <sub>2</sub> .....	168

**SESSION EIGHT – COMPLIANCE, MANAGEMENT AND ENFORCEMENT**

What is behind the IMO NO <sub>x</sub> Tier III requirements in detail?.....	178
Experience in the Verification of Energy Efficiency Design Index.....	186
EEDI Implementation outcome – Minimum Propulsion Power Requirements.....	187

**SESSION NINE – WHAT’S NEXT?**

Monitoring, Reporting and Verification (MRV) of GHG Emissions from Ships.....	191
Green Ship of the Future – Ro/Pax Low Emission Case Study.....	199
Next generation of environmental requirements in Shipping.....	201
