22nd International Conference on
WATER JETTING
Haarlem, The Netherlands: 3 – 5 September, 2014

CONTENTS

FOREWORD	1
KEYNOTE PAPERS	
The sciences of waterjet cutting <i>M Hashish, Flow International Corporation, USA</i>	5
Cutting edge water technology <i>B Geerken, Delft University of Technology, The Netherlands</i>	7
Twenty years of experience using the UHPW process for stripping thermal spray coatings <i>M van Wonderen, KLM Royal Dutch Airlines, The Netherlands</i>	9
FUNDAMENTALS	
Experimental study on cutting striation by abrasive waterjet <i>C-W Guo, China University of Mining and Technology; D-P Zhou, Huaibei Blasting Technology Research Institute; S Jiang, J Xia, Hoojet Co. Ltd, China</i>	13
Water jetting in bones: the influence of jet time on drilling depth variation <i>S den Dunnen, Delft University of Technology; G Tuijthof, Delft University of Technology and Academic Medical Centre, Amsterdam, The Netherlands</i>	21
Kinetic power density in waterjet cutting <i>M Hashish, Flow International Corporation, USA</i>	27
AEROSPACE	
Method for the material-specific repair preparation of carbon fiber reinforced plastic structures <i>D Zaremba, S Wachsmuth, H J Maier, T Hassel, Leibniz Universität Hannover; P Schneider, W Hufenbach, TU Dresden, Germany</i>	45
Improvement of fatigue strength of duralumin plate with a hole by a cavitating jet <i>H Soyama, Tohoku University, Japan</i>	57

Waterjetting of Carbon Fibre Reinforced Polymers with recycled abrasive 67
G A Escobar-Palafox, R S Gault, K Ridgway, University of Sheffield, UK

Tensile test specimen preparing three different cutting method influence on the AA 6061-T6 75
F Kartal, Z Yerlikaya, Kastamonu University; H Gokkaya, R Polat, Karabuk University, Turkey

Abrasive water jet machining (AWJ) of hybrid Titanium/Graphite composite laminate: Preliminary results 83
R Pahuja, M Ramulu, University of Washington; M Hashish, Flow International Corporation, USA

EQUIPMENT

New valve technology for AWSJ cutting 99
M Bauer, F Eiben, Fr-W Bach, H J Maier, T Hassel, Leibniz Universität Hannover, Germany

Effect of cutting parameters on vertical force in AWJ cutting 109
A I Hassan, Benha University, Egypt; R Kovacevic, Southern Methodist University, USA

The sign of high-end ultra-high pressure water jet cutting machine development level 119
S-X Xue, Z-W Chen, C-H Han, Q-L Ren, Hefei General Machinery Research Institute, China

Research that estimates perforation depth opened using abrasive water jet for concrete material by sound resonance propagation model 127
F Inoue, Shonan Institute of Technology; T Ogawa, Y Outa, Waseda University, Japan

Effect of pressure on abrasive waterjet cutting performance 137
A Henning, P Miles, OMAX[®] Corporation, USA

MACHINING

Roles of abrasives in AWJ meso-micro machining 151
H-T Liu, W Sagawa, OMAX[®] Corporation, USA

Machining of D2 heat treated steel using abrasive water jet: The effect of standoff distance and feed rate on kerf width and surface roughness 167
D Doreswamy, A Valavala, A Devineni, Manipal Institute of Technology, India; N Winitthumkul, Chulalongkorn University, Thailand

Abrasive recovery and recycle in AWJ and ASJ cutting operations	175
<i>R Ciccu, AQUAVIS srl and University of Cagliari, Italy</i>	
Effect of abrasive water jet turning parameters on depth of cut of AISI 1050 steel	189
<i>F Kartal, Kastamonu University; H Gökkaya, Karabuk University, Turkey</i>	
Quality and surface integrity of waterjet machined automotive composites	197
<i>M Ramulu, T Briggs, University of Washington; M Hashish, Flow International Corporation, USA</i>	
 CLEANING AND PREPARATION	
Material removal characteristics of an abrasive fan jet	215
<i>S Shimizu, T Suzuki, G Peng, Nihon University, Japan</i>	
Stripping of coatings and prepping of surfaces with waterjets: basic considerations	223
<i>M Vijay, A Tieu, W Yan, B Daniels, M Xu, VLN Advanced Technologies Inc., Canada</i>	
On-line HP water jet washing robot boosts the efficiency of the power plant	241
<i>N Chen, W Peng, China University of Mining & Technology, China</i>	
Experimental study on resist removal with pure water jet in air	249
<i>Y Sugimoto, K Sato, Kanazawa Institute of Technology, Japan</i>	
 SAFETY, FIRE AND RESCUE	
Research on hazard range of high-pressure water jet [Penetrating injury by abrasive jet]	259
<i>H Katakura, T Mita, Tokyo University of Technology, Japan</i>	
Abrasive suspension jets – fire, rescue and demolition but not precision machining?	269
<i>D S Miller, Miller Innovations UK</i>	
The design and engineering challenges of a water-abrasive cutting and misting system for fire suppression	277
<i>P Fuller, G McNulty, BHR Group, UK</i>	

PROCESSING

Nano-level processing of titanium oxide and platinum co-catalyst particles by cavitation to improve the photocatalytic properties **295**

T Yoshimura, K Shiraishi, T Takeshima, Tokyo University of Science; M Komura, T Iyoda, Tokyo Institute of Technology; K Sato, Babcock-Hitachi K. K., Japan

Micronization of carbonate copper ore with high-pressure water jet method **305**

P Borkowski, KGHM Cuprum Research & Development Centre; J Borkowski, M Bielecki, Koszalin University of Technology, Poland

The synthesis of waterjet cutting with 'hot-glass' for the creation of murrini **315**

S Doolan, V Cutler, University of Wales Trinity Saint David; O Johnson, Royal College of Art, UK
