18th International Conference on
HYDROTRANSPORT
Rio de Janeiro, Brazil: 22–24 September 2010

CONTENTS

FORTY YEARS ON: Hydrotransport Conferences 1970-2010	ix
Sponsors	xxix

FOREWORD	1
-----------------	---

**LONG DISTANCE PIPELINES:
ECONOMICS, DESIGN, CONSTRUCTION AND OPERATION**

Specific energy consumption and desirable operating conditions for fine-particle slurries <i>S A Hashemi, R S Sanders, University of Alberta; K C Wilson, Consultant, Canada</i>	5
A technical comparison of coal pipeline options <i>N T Cowper, A D Thomas, Slurry Systems Pty Limited, Australia; J Sobota, Wroclaw University of Environmental and Life Sciences, Poland</i>	17
ESSAR'S iron ore slurry pipe line operations in India – a case study <i>M K Sampath, A S Prasad, M V B Murali, Essar Steel Ltd, India</i>	31
Savage River pipeline – 43 years of operation <i>F Salt, Consultant, Australia</i>	53

COARSE PARTICLE TRANSPORT

Vertical conveying of coarse particles in pipelines with non-Newtonian carriers <i>L J W Graham, J Wu, CSIRO Process Science and Engineering; L Pullum, Private Consultant, Australia</i>	67
New method of coal hydro transportation, process philosophy <i>B Enkhbold, E-Trans Company, Mongolia</i>	81
Semi-empirical formulae for upper plane bed friction <i>J Krupička, V Matoušek, Academy of Sciences of Czech Republic, Czech Republic</i>	95

Determining the maximum coarse particle concentration (C^∞) for slurry pipeline flows <i>D Gillies, R S Sanders, University of Alberta; R G Gillies, Saskatchewan Research Council, Pipe Flow Technology Centre, Canada</i>	105
Behaviour of intermediate-particle slurries in pipelines <i>K C Wilson, Consultant, Canada; A Sellgren, Lulea University of Technology, Sweden</i>	117
In situ performance and potential applications of a thermal bed-load measurement method <i>H J Ilgner, CSIR, Centre for Mining Innovations; P Goosen, Paterson & Cooke Consulting Engineers (Pty) Ltd; S Dumbu, Stoner (Pty) Ltd, South Africa</i>	129
Modeling of settling-slurry flow around deposition-limit velocity <i>V Matoušek, J Krupička, Academy of Sciences of Czech Republic, Czech Republic</i>	143
Deposition velocities and concentration distributions of apatite slurry <i>T C Souza Pinto, L S Leal Filho, University of São Paulo; D Moraes Junior, Santa Cecilia University, Brazil; P T Slatter, RMIT University, Australia</i>	155

OPEN CHANNEL FLOWS

Flow of highly concentrated, extended particle size distribution slurries in open channels in laminar, transition and turbulent flow <i>L Fernández, A González, R Fuentes, JRI Engineering; J Martínez, AUSENCO-PSI, Chile</i>	167
Limit velocity for coarse solids transport in launders <i>M Zegpi, R Janssen, Bechtel Chile Limitada, Chile</i>	183
Laminar non-Newtonian open channel flow: investigating velocity, wall shear stress and fluid depth <i>J Burger, R Haldenwang, Cape Peninsula University of Technology, South Africa; N Alderman, BHR Group Ltd, UK</i>	193

SOLIDS SEDIMENTATION

Sedimentation and erosion of sediment at high solids concentration <i>C van Rhee, A M Talmon, Delft University of Technology, The Netherlands</i>	211
A comprehensive methodology to predict particle sedimentation and solids concentration along the time in gelled drilling fluids <i>R Abensur Gandelman, G H Vieira Pereira Pinto, A Leibsohn Martins, Petrobras, Brazil</i>	223
Settling lengths for coarse particles in solid-liquid pipe flow <i>T F Jones, TFJ Consulting Ltd; C Ariyaratne, University of Sussex, UK</i>	237
Sedimentation velocity of grinded particles: a new, explicit semi-empirical formula for its determination <i>R Fuentes, F Calle, A González, P Koch, JRI Engineering, Chile</i>	249

Bed establishment lengths under laminar flow 261
L Pullum, Private Consultant; L Graham, J Wu, CPSE, CSIRO, Australia

SLURRY RHEOLOGICAL ASSESSMENT

Viscous scaling and flow behaviour of a phosphate clay slurry 277
G R Addie, GIW Industries Inc, USA; L Pullum, Private Consultant, Australia; A Sellgren, Lulea University of Technology, Sweden

Design, construction, commissioning and testing of a portable tube viscometer and pump rig 287
R Haldenwang, V Fester, A Sutherland, R du Toit, Cape Peninsula University of Technology, South Africa; R Holm, INNVENTIA, Sweden

The sheet flow viscometer 299
P Slatter, RMPC, RMIT, Australia; R Haldenwang, IMST, CPUT, South Africa; R Chhabra, IIT, Kanpur, India

Pressure loss and discharge coefficients for non-Newtonian fluids in long orifices 309
V G Fester, M R Chowdhury, Cape Peninsula University of Technology, South Africa; F Iudicello, IHS-ESDU, UK

Method of determining the inherent viscosity of a slurry and other rheological trends as illustrated by a data bank of over 200 different slurries 325
A D Thomas, Slurry Systems Pty Limited, Australia

FLOW BEHAVIOUR OF COARSE & FINE PARTICLE MIXTURES

The effect of coarse particle addition on the rheology of fine clay slurries 343
E Paulsen, Cameco Corporation, Canada; R J Sumner, BHP Billiton Uranium, Australia; R S Sanders, University of Alberta, Canada

Studies on flow characteristics of fly ash-bottom ash mixture slurry at high concentrations 363
P K Senapati, B K Mishra, A Parida, Council of Scientific & Industrial Research, India

Flow behaviour of sand-water slurries 383
P Vlasak, Z Chara, Institute of Hydrodynamics ASCR, Czech Republic

PIPELINE INTEGRITY ASSESSMENT

Leak detection and other intelligence software for slurry pipelines <i>J Martinson, Ausenco PSI, USA</i>	395
Oversized HDPE liners to combat internal corrosion and erosion in mining industry pipelines <i>J Thorne, NBS Incorporated, USA</i>	407
Optimisation and monitoring of valves for GEHO piston diaphragm pumps <i>V Quites, Samarco Mineracao, Brazil; J Kuenen, J Sloesen, WEIR Minerals Netherlands b.v., The Netherlands; J Abreu, WEIR Minerals Netherlands b.v., Brazil</i>	423
Development of a pilot-scale facility for evaluating wear in slurry pipeline systems <i>B Fotty, M Krantz, J Been, J Wolodko, Alberta Innovates – Technology Futures (AITF), Canada</i>	431

PASTE AND HIGH DENSITY TAILINGS PUMPING

Newmont's Boddington Gold Mine tailings pipelines. Hydraulic design issues and comparisons with operating data <i>A D Thomas, Slurry Systems Pty Ltd; S Hart, Newmont Boddington Gold; B Parker, I Edwards, Chemech Consulting Pty Ltd, Australia</i>	447
GLORES, the gateway to piston diaphragm pumps for high volume applications <i>R van Rijswijk, J Kuenen, A Wilmsen, J Sloesen, WEIR Minerals Netherlands b.v., The Netherlands</i>	463
Cost-effective pumping of paste and tailings at maximum solids concentration <i>H M Nägel, FELUWA Pumpen GmbH, Germany</i>	477
Energy induced rheology reduction of flocculated slurries <i>J M Treinen, R Cooke, Paterson & Cooke, USA; C Salinas, Paterson & Cooke, Chile</i>	487

SEWAGE SLUDGE HANDLING

Assessment of 387 mm ID Mersey Valley sludge pipeline (MVSP) for transfer of primary digested and thermally-hydrolysed digested sludge mixtures <i>N Heywood, N Alderman, BHR Group Ltd; M Rush, United Utilities, UK</i>	503
Flow of Newtonian and non-Newtonian fluids through static screens <i>S S Chandrawanshi, R P Chhabra, Indian Institute of Technology, Kanpur, India</i>	517
