

The Fourth Conference on Nuclei and Mesoscopic Physics 2014

East Lansing, Michigan, United States

5–9 May 2014

Editors

Pawel Danielewicz

Alex Levchenko

Vladimir Zelevinsky

Michigan State University, Michigan, USA

Sponsoring Organizations

National Superconducting Cyclotron Laboratory, Michigan State University

Department of Physics and Astronomy, Center for Complex Materials,
Michigan State University

Office of Information and Technology, Michigan State University

All papers have been peer reviewed.

Melville, New York, 2014
AIP Proceedings

Volume 1619

The Fourth Conference on Nuclei and Mesoscopic Physics 2014

Table of Contents

Preface: Fourth Conference on Nuclei and Mesoscopic Physics Pawel Danielewicz, Alex Levchenko, Linna Leslie, and Vladimir Zelevinsky	1
Program	3
Photo Collection Felix Izrailev	8
Nuclear energy density functionals: What we can learn about/from their global performance? A. V. Afanasjev, S. E. Agbemava, D. Ray, and P. Ring	13
Mesoscopic superconductivity in ultrasmall metallic grains Y. Alhassid and K. N. Nesterov	24
Resonant control of spins in the quasi-one-dimensional channel by interplay of confinement and Zeeman splitting D. H. Berman, M. Khodas, and M. E. Flatté	33
Highly frustrated spin-lattice models of magnetism and their quantum phase transitions: A microscopic treatment via the coupled cluster method R. F. Bishop, P. H. Y. Li, and C. E. Campbell	40
Unconventional states and geometric effects in mesoscopic systems of ultra-cold atomic Fermi gases C. J. Bolech	51
A superradiance-based biological switch Fausto Borgonovi and Giuseppe L. Celardo	54
Superradiance, disorder, and the non-Hermitian Hamiltonian in open quantum systems G. L. Celardo, A. Biella, G. G. Giusteri, F. Mattiotti, Y. Zhang, and L. Kaplan	64

Pairing in bulk nuclear matter beyond BCS D. Ding, S. J. Witte, W. H. Dickhoff, H. Dussan, A. Rios, and A. Polls	73
Low-energy magnetic radiation: Deviations from GOE S. Frauendorf, R. Schwengner, and K. Wimmer	81
Resonance at the Rabi frequency in a superconducting flux qubit Ya. S. Greenberg, E. Il'ichev, G. Oelsner, and S. N. Shevchenko	89
Superconductivity and superfluidity as universal emergent phenomena in diverse physical systems Mike Guidry	99
Quantum states built on classical nonlinear resonances for slowly deforming billiards Nandan Jha and Sudhir R. Jain	109
The Magnus expansion and the in-medium similarity renormalization group T. D. Morris and S. K. Bogner	117
Open quantum systems and random matrix theory Declan Mulhall	126
Spectral fluctuations of quantum graphs Z. Pluhař and H. A. Weidenmüller	135
Multiparticle-multihole configuration mixing description of nuclear many-body systems C. Robin, N. Pillet, J. Le Bloas, J.-F. Berger, and V. G. Zelevinsky	138
On spectroscopic factors of magic and semimagic nuclei E. E. Saperstein, N. V. Gnezdilov, and S. V. Tolokonnikov	145
Statistical approach to nuclear level density R. A. Sen'kov, V. G. Zelevinsky, and M. Horoi	152
Microscopic out-of-equilibrium analysis of the zero-bias conductance peak in a one-dimensional topological superconductor Nayana Shah	159

Superradiance in a two-channel quantum wire A. Tayebi and V. Zelevinsky	162
Isolated many-body quantum systems far from equilibrium: Relaxation process and thermalization E. J. Torres-Herrera and Lea F. Santos	171
Exploring dynamics of unstable many-body systems Alexander Volya and Vladimir Zelevinsky	181
