Table of Contents

Part 1

Basin & Range

Hinz, N. H., J. E. Faulds, and M. F. Coolbaugh	3
<i>Association of Fault Terminations With Fluid Flow in the Salt Wells Geothermal Field, Nevada, USA</i>	
Mowbray, L. A., and M. L. Cummings	11
<i>Supply-Limited, Climate-Driven Model for Holocene Spring Activity at Mickey Springs, Oregon, USA</i>	
Shevenell, L., G. Johnson, and K. Ryan	19
<i>Geothermal Assessment of the Reno-Tahoe Airport, Nevada</i>	
Shevenell, L., M. Coolbaugh, R. Zehner, G. Johnson, W. Ehni, and D. Noel	29
<i>Geothermal Exploration at Emerson Pass, Pyramid Paiute Tribal Lands, Nevada</i>	
Siler, D. L., B. M. Kennedy, and P. E. Wannamaker	39
<i>Regional Crustal Discontinuities as Guides for Geothermal Exploration</i>	

Business Development

Dykema, A.	51
<i>Geothermal vs. Wind & Solar: Time to Level the Playing Field</i>	
Edmunds, T. A., P. Sotorrio, J. M. Bielicki, and T. A. Buscheck	55
<i>Geothermal Power for Integration of Intermittent Generation</i>	
Grainey, M. W.	65
<i>Geothermal Energy in Oregon: Job Creation and Other Benefits From New Geothermal Technologies</i>	
Thompson, A., F. Bakhteyar, and G. Van Hal	71
<i>A Qualitative Assessment of Major Barriers Facing the Geothermal Industry in Canada</i>	

Case Studies

Crowell, J., and A. M. Crowell	77
<i>The History of Lightning Dock KGRA: Identifying a Blind Geothermal Resource</i>	
Mink, L. L., S. K. Pezzopane, and E. L. Culp	85
<i>Surprise Valley Electric Paisley, Oregon Geothermal Power Project</i>	
Orenstein, R., and B. Delwiche	91
<i>The Don A. Campbell Geothermal Project</i>	

Sifford, A.	99
<i>Geothermal Energy in Oregon 2014</i>	
Takayama, J., R. Itoi, and S. Morita	107
<i>Eighteen Year History of Reservoir Development in the Ogiri Geothermal Field, Japan</i>	

Dave Blackwell Special Session

Coolbaugh, M., C. Sladek, R. Zehner, and C. Kratt	115
<i>Shallow Temperature Surveys for Geothermal Exploration in the Great Basin, USA and Estimation of Shallow Aquifer Heat Loss</i>	
Erkan, K.	123
<i>Basin Depth Distribution in Western Anatolia Using EGM2008 Gravity Model</i>	
Gosnold, W. D., and A. Crowell	127
<i>Heat Flow and Geothermal Research in the Mid-Continent</i>	
Kelley, S., M. Tewelde, J. Witcher, and M. Person	133
<i>Structural Control of Warm Springs and Wells in the Hillsboro-Lake Valley-Palomas Basin Region of South-Central New Mexico</i>	
McLing, T., M. McCurry, C. Cannon, G. Neupane, T. Wood, R. Podgorney, J. Welhan, G. Mines, E. Mattson, R. Wood, C. Palmer, and R. Smith	143
<i>David Blackwell's Forty Years in the Idaho Desert, The Foundation for 21st Century Geothermal Research</i>	
Morgan, P., and P. Scott	155
<i>New Geothermal–Gradient Maps for Colorado’s Sedimentary Basins</i>	
Moulding, A., and T. Brikowski	163
<i>Three Dimensional Heat and Mass Balance Modelling of Convection in Structurally Controlled Conduits in Basin and Range Geothermal Systems</i>	
Shevenell, L.	171
<i>Special Acknowledgement for the Work of Dr. David Blackwell: Influence and Contributions to Countless Geothermal Assessments and Products</i>	
Stutz, G. R., E. Shope, G. A. Aguirre, M. Williams, Z. Frone, T. J. Reber, C. A. Whealton, J. D. Smith, M. Richards, D. Blackwell, J. W. Tester, J. R. Stedinger, and T. E. Jordan	179
<i>Geothermal Energy Characterization in the Appalachian Basin of New York and Pennsylvania</i>	
Waibel, A. F.	185
<i>A Consideration of Geological Settings for and the Structural Morphology of Terrestrial Hydrothermal Systems</i>	

Direct Use/Heat Pumps

Büscher, E.	197
<i>Development of Geothermal District Heating in Germany</i>	
Dell, R., R. Unnthorsson, C. S. Wei, and W. Foley	201
<i>Enhanced Agricultural Production From an Intensive Bottom Heat System Using Waste Geothermal Hot Water and Steam Condensate in Iceland</i>	
Geyer, J. D.	215
<i>Conductivity and Cost Comparison for Vertical and Horizontal Ground Loops</i>	
Geyer, J. D.	219
<i>Construction of a “Slinky” Style Ground-Coupled Heat Exchanger</i>	
Lei, H., and C. Dai	221
<i>Study of Thermal Performance of Coaxial Type Borehole Heat Exchangers With Different Backfill Materials</i>	
Wang, B., H. Wang, and Y. Wang	227
<i>Thermal Performance of a Borehole Heat Exchanger Under a High Geothermal Gradient and Strong Groundwater Flow</i>	

Drilling

Bello, K., and M. Radonjic	233
<i>The Effect of Geofluids on Wellbore Cement Under Thermal Cycle Loading Conditions</i>	
Brambilla, N., and F. Martini.	241
<i>Downhole Power Source for Geothermal Drilling and Well Development Enabled by a Novel Extreme High Temperature (200°C+) Ultracapacitor</i>	
Chatterjee, K., A. Dick, H. Grimmer, J. Herlitzius, M. Otto, S. Klotzer, D. Epplin, J. Schroder, and J. Macpherson	245
<i>High-Temperature, 300°C Directional Drilling System Including Drill Bit, Steerable Motor, and Drilling Fluid</i>	
Kuyumcu, Ö. Ç., O. Atalay, E. Sari, T. Velibaşoğlu, and Y. Sümer	249
<i>Ensuring Stability of Conventional Geothermal Well Using Slim Hole Cored-Well Pre-Consolidation Method: Case Study in Gümüşköy Geothermal Field</i>	
Pyatina, T., and T. Sugama.	251
<i>Set Controlling Additive for Thermal-Shock-Resistant Cement</i>	
Yang, S., and X. Zheng	259
<i>Organic / Inorganic Hybrid Fluid Loss Agent for Geothermal Drilling Fluid</i>	
Zheng, X., S. Yang, H. Ye, H. Liu, C. Duan, Z. Bai	261
<i>The Pressures and Drilling Fluids for Geothermal Fields in Tibet</i>	

Enhanced Geothermal Systems

Baujard, C., A. Genter, V. Maurer, E. Dalmais, J-J. Graff, and J. Schmittbuhl	267
<i>The ECOGI EGS Project in Rittershoffen, France</i>	
Fox, D. B., D. L. Koch, and J. W. Tester	271
<i>Modeling Discretely Fractured Geothermal Reservoirs: A Focus on Thermal Recovery, Fracture Intersections, and Fracture Roughness</i>	
Hand, M., P. Bedrikovetski, C. Huddleston-Holmes, A. Badalyan, Z. You, D. Brautigan, A. Dillinger, T. Carageorgos, H. F. A. Khair, and C. Matthews	281
<i>Case Study: Reservoir Quality in Sedimentary Geothermal Settings in Australia</i>	
Kaieda, H.	295
<i>Hijiori HDR Reservoir Evaluation by Micro-Earthquake Observation</i>	
Kaneta, K., Y. Mukuhira, and T. Ito.	301
<i>Numerical Thermo-Elastic Simulation for Change in Fracture Aperture Associated With Cold Fluid Injection</i>	
Lei, H., and T. Xu	305
<i>TOUGH2Biot: A Coupled Thermal-Hydrodynamic-Mechanical Model for Geothermal Development</i>	
Li, T., S. Shiozawa, and M. McClure	313
<i>Thermal Breakthrough Calculations to Optimize Design of a Multiple-Stage Enhanced Geothermal System</i>	
Riahi, A., J. Furtney, and B. Damjanac	325
<i>Evaluation of Optimum Well Positioning in Enhanced Geothermal Reservoirs Using Numerical Modeling</i>	
Sugama, T., and T. Pyatina.	331
<i>Utilization of PVA Flakes in Promoting Self-Degradation of Temporary Cementitious Fracture Sealing Material</i>	
Toth, A. N.	339
<i>Using CO₂ as an EGS Fluid in Hungary</i>	
Yanagisawa, N.	343
<i>Isotope Behavior During Circulation Test at the Hijiori EGS Site, Japan</i>	

Exploration

Bédard, K., J. Raymond, M. Malo, E. Konstantinovskaya, and V. Minea	351
<i>St. Lawrence Lowlands Bottom-Hole Temperatures: Various Correction Methods</i>	
Bellani, S., and F. Gherardi	357
<i>Thermal Features of the Pisa Plain, a Neogenic Basin in Central Italy</i>	

Bouchot, V., A. Gadalia, H. Traineau, and S. Caritg	363
<i>Toward a Continuum Geothermal Model to Explain Coexistence of Medium to High (100 to 250°C) Temperature Geothermal Systems in Martinique and Guadeloupe, French West Indies</i>	
Forson, C., J. E. Faulds, and P. Wannamaker	369
<i>Prospecting for a Blind Geothermal System Utilizing Geologic and Geophysical Data, Seven Troughs Range, Northwestern Nevada</i>	
Hickson, C., and R. Yehia	377
<i>The Geothermal Exploration and Development Process: Graphical Representation Path to Optimal Decision Making</i>	
Libbey, R. B., A. E. Williams-Jones, B. L. Melosh, and N. R. Backeberg	381
<i>Geological and Geochemical Reconnaissance of a Non-Volcanic Geothermal Prospect in Guatemala — Joaquina Geothermal Field</i>	
Sophy, M., and S. Kelley	391
<i>Hydrogeologic Investigation of the Ojo Caliente and Chise Warm Springs of the Winston Graben, Rio Grande Rift, New Mexico</i>	
Vargas, S. T., and W. T. Dewhurst	401
<i>Reconnaissance Analysis of a Geothermal System Within the Central Cordillera of Colombia: Nevado Del Ruiz</i>	

Finance/Economics

Ram, H., and A. I. Letvin.	409
<i>Using Financial and Policy Tools to Address Exploration/Drilling Risk</i>	
Richard, C.	413
<i>Master Limited Partnerships: A Geothermal History With Accompanying Economic Analysis</i>	
Silverman, R. L., M. Z. Lukawski, and J. W. Tester	419
<i>Uncertainty Analysis of Geothermal Well Drilling and Completion Costs</i>	

Geochemistry

Cannon, C., T. Wood, G. Neupane, T. McLing, E. Mattson, P. Dobson, and M. Conrad	425
<i>Geochemistry Sampling for Traditional and Multicomponent Equilibrium Geothermometry in Southeast Idaho</i>	
Dilley, L. M., and K. Blake	433
<i>Fluid Inclusion Stratigraphic Analysis of Geothermal Test Holes at Three US Navy Geothermal Prospects</i>	

Gherardi, F., E. Droghieri, and G. Magro	439
<i>Hydrothermal Processes at Aluto-Langano (Ethiopia): Insights From the Stable Carbon Isotope Composition of Fluid Inclusions</i>	
Kipng'ok, J., L. Ochieng, I. Kanda, and J. Suwai	445
<i>Characterization of the Menengai High Temperature Geothermal Reservoir Using Gas Chemistry</i>	
Palmer, C. D., S. R. Ohly, R. W. Smith, G. Neupane, T. McLing, and E. Mattson	453
<i>Mineral Selection for Multicomponent Equilibrium Geothermometry</i>	
Reed, M. H., J. Palandri, V. Clemente, and R. Cabahug	461
<i>Computation of Reservoir Geochemical Conditions From Excess-Enthalpy Wellhead Samples</i>	
Shevenell, L., G. Johnson, K. Ryan, and A. Reid	465
<i>CO₂ Surveys in Nevada: Two Example Cases</i>	

Geology

Benoit, R., C. Pike, and G. Holdmann	479
<i>The Pilgrim Thermal Anomaly</i>	
Benoit, R., C. Pike, and G. Holdmann	487
<i>Fluid-Entry Temperatures, Depths, and Water Chemistry at Pilgrim Hot Springs, Alaska</i>	
Elders, W. A., G. I. Montalvo, A. A. Aguilar, R. T. Aguado, and M. F. Armenta	497
<i>Significance of Deep Zones of Intense Bleaching and Silicification in the Los Humeros High-Temperature Geothermal Field, Mexico: Evidence of the Effects of Acid Alteration</i>	
Karki, S., S. K. Nawotniak, H. C. Bottenberg, M. McCurry, and J. Welhan	503
<i>Determination of Geothermal Anomalies Through Multivariate Regression of Background Variables at Yellowstone National Park Using Landsat 5 TM Thermal Band Data</i>	
Milicich, S. D., I. Chambefort, G. Bignall, and J. Clark	511
<i>Overprinting Hydrothermal Systems in the Taupo Volcanic Zone</i>	

Geophysics

Hutchings, L., B. Bonner, S. Jarpe, and A. Singh	519
<i>Micro-Earthquake Analysis for Reservoir Properties at the Prati-32 Injection Test, The Geysers, California</i>	
Lindsey, N. J., E. A. Bertrand, T. G Caldwell, E. Gasperikova, G. A. Newman	527
<i>Imaging the Roots of High-Temperature Geothermal Systems Using MT: Results From the Taupo Volcanic Zone, New Zealand</i>	
McDonald, M. R., and W. D. Gosnold	533
<i>Gravity Modeling of the Rye Patch Known Geothermal Resource Area, Rye Patch, Nevada</i>	

Instrumentation

- Hess, R. F., T. J. Boyle, S. Limmer, W. G. Yelton, S. Bingham, G. Stillman, and G. Cieslewski543
Real-Time Downhole Measurement of Ionic Tracer Concentration and pH in Geothermal Reservoirs

Part 2

- Holbein, B., J. Isele, and L. Spatafora549
Test-Stand for Geothermal Borehole Probes
- Normann, R.555
Platform for Testing New HT Aircraft Sensors for Geothermal Logging
- Normann, R. A., and D. A. Glowka.559
Designing Logging Tools for Future High Entropy Geothermal Power
- Sisler, J. R., S. J. Zarrouk, and R. Adams563
Improving Down-Hole Working Time of PTS Probes Used in Geothermal Wells

International

- Ahmad, J.571
*The Geothermal Energy Potential of Pakistan
Clean Sustainable Solution for Our Energy Future*
- Boissavy, C., and O. Grière577
New Geothermal Targets in the Paris Basin (France)
- Harada, A., R. Itoi, and B. Yoseph583
Numerical Simulation of Ground Water, Heat and Stable Isotope in Cidanau Geothermal Area, Indonesia
- Kebede, S.589
Opportunities and Challenges in Geothermal Exploration and Development in Ethiopia
- Lindsey, N. J.593
Open-Source Geothermal Training Course for U.S.–East Africa Geothermal Partnership
- Shnell, J., G. Hiriart, J. Orcutt, and J. Iovenitti595
The Advantages of Clustering Geothermal Generators on Ocean Rift Zones
- Ussher, G., C. Parker, L. Urzua, J. P. Catane, and T. Mills.599
Geothermal Water for Mining
- Wood, S. H., and F. S. Singharajwarapan607
Geothermal Systems of Northern Thailand and Their Association With Faults Active During the Quaternary

Nevada

- Banta, M. D. 619
Alternatives to Reduce the High Cost and Risk of Exploration Drilling for Geothermal Development Case Study – Northern Nevada 2010 to 2012
- Chandrasekharam, D., C. Varun, G. Garg, H. K. Singh, and G. Trupti 625
High Heat Generating Granites of Siwana, Rajasthan
- Hanson, H., R. Wood, C. Augustine, G. Mines, A. Lopez, and D. Hettinger 629
Development of a Geothermal Well Database for Estimating In-Field EGS Potential in the State of Nevada
- Lashin, A., D. Chandrasekharam, N. A. Arifi, A. A. Bassam, and C. Varun 635
High Heat Generating Granites of Western Saudi Arabia

Oil & Gas

- Augustine, C. 641
Analysis of Sedimentary Geothermal Systems Using an Analytical Reservoir Model
- Kweik, R., D. Blackwell, M. Hornbach, and M. Richards 649
Thermal and Mass History of Fairway Field in East Texas
- Walsh, W., and A. Tu 655
Geothermal Potential Within Devonian Carbonates in the Clarke Lake Gas Field, Northeastern British Columbia, Canada

Plant Chemistry

- Baltazar Jr., A. D., F. S. See, R. C. de Guzman, R. P. Solis, N. D. Salonga, M. S. Ogena, S. Patel, L. Lee, and A. Ooi 663
Geothermal Silica Scale Inhibition and Control Using Phosphino Carboxylic Acid Copolymer in Bacon-Manito Geothermal Business Unit
- Hillard, C., and B. Benn 669
Improvements in Residence Time and Air Oxidation for H₂S Abatement in The Geysers' Geothermal Power Plants with Direct-Contact Condensers and Crossflow Cooling Towers
- Mamrosh, D. L., K. E. McIntush, A. Douglas, K. S. Fisher, B. M. Júlíusson, I. Gunnarsson, S. H. Markússon, K. V. Matthíasdóttir, and M. Arnarson. 673
Removal of Hydrogen Sulfide and Recovery of Carbon Dioxide From Geothermal Non-Condensable Gas Using Water
- Muller, L., J. S. Gill, D. Rodman, K. Brown, and R. Robinson 681
Control and Online Removal of Metal Sulfide Deposits

Plant Designs

- Fukuda, N., S. Saito, and N. Katsuki689
Optimum Configuration for Geothermal Power System
- Fishman, M., and W. Harvey695
Optimization of NCG System Lineups
- Legmann, H.....701
The 100-MW Ngatamariki Geothermal Power Station: A Purpose-Built Plant for High Temperature, High Enthalpy Resource
- Read, M., I. Smith, and N. Stosic705
Effect of Air Temperature Variation on the Performance of Wet Vapour Organic Rankine Cycle Systems
- Richardson, J. C., and J. Devinney713
Optimization of Hybrid Noncondensable Gas Removal System for a Flash Steam Geothermal Power Plant

Plant Operations

- Archambeault, D., G. Larsen, and M. Layton721
Increased Reliability and Availability of a Geothermal Steam Turbine
- Dell, R., C. S. Wei, R. Unnthorsson, W. Foley, M. Cady, M. Dell, M. Isakov, and A. Livermore729
Web Accessible Security Camera System Independently Powered by a Point of Use Thermoelectric Generator Using Geothermal Pipes as a Heat Source
- García-Gutiérrez, A., J. I. Martínez-Estrella, R. Ovando-Castelar, I. Canchola-Félix, and P. Jacobo-Galvan735
Energy Analysis of the Cerro Steam Gathering System
- Hoyer, D.743
Improve Resource and Plant Operations Management With Key Performance Indicators

Plant Turbine

- Liu, C., P. Chen, and K. Li749
A 1 kW Thermoelectric Generator for Low-temperature Geothermal Resources
- Spadacini, C., L. Xodo, M. Quaia, M. Frassinetti, and D. Rizzi755
The Geothermal Radial Outflow Turbine
- Tamaya, Y., and T. Muto759
Unique Steam Turbine for Kizildere Geothermal Power Plant in Turkey

Power Cycle

- Dai, B., and W. Fu765
Theoretical Study on Absorption Heat Transformer Coupled with KCS34 System
- Dunford, T., B. Lewis, K. Wallace, and W. Harvey.....771
Combined Cycle Strategies for High Enthalpy, High Non-Condensable Gas Resources
- Kalina, Dr. A., M. Kalina, J. Dickson, and S. Moore777
Evaluation and Comparisons of Currently Available Binary Cycle Geothermal Power Systems

Power Operations

- Fu, W.....791
Design and Optimization of Kalina Cycle for Geothermal Energy in Kenya
- Li, T., Q. Wang, J. Zhu, and W. Fu.....797
System Improvement and Thermodynamic Optimization of an Organic Rankine Cycle Based Geo-Plant in an Oilfield in China

Power Solar

- Kuyumcu, O. C., O. Serin, C. C. Özalevli, D. K. Baker, and S. K. Somek811
Design and Implementation of the Gümüşköy Hybrid Geothermal and Solar Thermal Power System
- Turchi, C., G. Zhu, M. Wagner, T. Williams, and D. Wendt817
Geothermal / Solar Hybrid Designs: Use of Geothermal Energy for CSP Feedwater Heating
- Wendt, D. S., and G. L. Mines825
Use of a Geothermal-Solar Retrofit Hybrid Power Plant to Mitigate Declines in Geothermal Resource Productivity

Regulatory/Environmental/Policy

- Anderson, A., L. Allison, S. Richard, C. C. Daugherty, and K. Patten835
National Geothermal Data System: Case Studies on Exploration and Development of Potential Geothermal Sites Through Distributed Data Sharing
- Clark, C. E., J. N. Schroeder, A. Anderson, and C. B. Harto839
Consumption of Water in Geothermal Development, NEPA, and the National Geothermal Data System
- Dewhurst, K. S.....847
*Social and Political Consequences of Geothermal:
A Case Study From the Nereidas Valley, Nevado del Ruiz, Colombia*

Levine, A., and K. Young	851
<i>Geothermal Development and the Use of Categorical Exclusions Under the National Environmental Policy Act of 1969</i>	
Mutia, T. M.	861
<i>Monitoring Protocol for Potential Hydrogen Sulfide Effects on the Moss (<i>Racomitrium lanuginosum</i>) Around Geothermal Power Plants in Iceland</i>	
Nyairo, B., L. Shako, and T. Mutia.	865
<i>Environmental Suitability Analysis for Geothermal Development: A Case Study for Suswa Geothermal Prospect, Kenya</i>	
Schroeder, J. N., C. E. Clark, and C. B. Harto	871
<i>Geothermal Water Consumption and Life Cycle Water Analysis</i>	
Thorsteinsson, H., and G. Gunnarsson	879
<i>Induced Seismicity — Stakeholder Engagement in Iceland</i>	
Young, K. R., and A. Levine.	883
<i>Geothermal National Environmental Policy Act Database on Publicly Available Open Energy Information Website</i>	
Young, K. R., and A. Levine.	887
<i>Regulatory and Permitting Information Desktop (RAPID) Toolkit</i>	
Young, K. R., K. Witherbee, A. Levine, A. Keller, J. Balu, and M. Bennett.	893
<i>Geothermal Permitting and NEPA Timelines</i>	

Reservoir Engineering

Abdel Azim, R., N. G. Doonechaly, S. S. Rahman, S. Tyson, and K. Regenauer-Lieb	907
<i>3D Poro-Thermo-Elastic Numerical Model for Analysing Pressure-Transient Response to Improve the Characterization of Naturally Fractured Geothermal Reservoirs</i>	
Bjornsson, G., A. Arnaldsson, and J. Akerley	917
<i>A 3D Numerical Reservoir Model for Steamboat, Nevada</i>	
Ungemach, P., C. Piemonte, M. Antics, M-P. Promis	927
<i>A Reservoir Engineering Approach of Low Enthalpy Geothermal Heat Reclamation</i>	

Resource Assessment

Aragón-Aguilar, A., G. Izquierdo-Montalvo, and S. López-Blanco.	941
<i>Methodology for Stored Heat Evaluation That Could Be Applied In Geothermal Systems: A Case of a Mexican Field</i>	
Crowell, A. M., and W. Gosnold.	947
<i>Geothermal Resource Assessment of the Michigan and Illinois Basins: How Deep is Too Deep?</i>	

Du Frane, W., J. Vericella, E. Duoss, M. Smith, R. Aines, and J. Roberts	951
