TABLE OF CONTENTS

CELLS UTILIZING HIGH CAPACITY CATHODES

Porous Silicon Anode and Graphene-wrapped Sulfur Cathode for High-capacity Lithium-ion Battery	1
<i>C. Zhou</i>	
Development of Lithium-Sulfur Batteries	17
<i>D. Wang</i>	
Electrode Material Enhancement Via Carbon Nanotube Incorporation	35
<i>B. Landi</i>	
Lithium/Air Battery Development at Liox	46
<i>D. Addison</i>	
A Novel SiF₄ Treatment to Prepare High Performance Lithium Metal Phosphate Cathodes with Low Moisture Adsorption Properties for Lithium-ion Batteries	55
<i>M. Theivanayagam</i>	

ANODE STRUCTURES AND ANODE/ELECTROLYTE INTERACTION FOR HIGH SPECIFIC ENERGY BATTERIES

Novel Organic Nanomaterials for Next-Gen Energy Storage Technologies	65
<i>G. Yu</i>	
Making Silicon Nanowire Battery Technology Ready for Commercialization: Materials, Processes & Cells	83
<i>Y. Zhu</i>	
Innovation with the Lithium-ion Anode: Finding Application Fits and Scale	96
<i>C. Laslau</i>	
Development of Large-Format Lithium-Ion Cells with Silicon Anode and Low Flammable Electrolyte	102
<i>J. Wu, D. Hernandez-Lugo, M. Smart, B. Ratnakumar, T. Miller, V. Lvovich, J. Lytle</i>	
First-Principles and Hybrid Quantum-Classical Simulation of Li Transfer in Solid-Electrolyte-Interface and Graphite-Anode	115
<i>S. Ogata</i>	
High Energy Density Silicon Anode Based Batteries	124
<i>K. Sun</i>	
The Cycling Performance and Surface Passivation Qualities of a Heterogeneous Amorphous Ni_xSiO_y/Polycrystalline NiSi₂ Core Shell Nanowire used as a Li-ion Battery Anode	134
<i>I. Lund</i>	
Alternatives to Lithium: Multivalent Metals and Flow Batteries	143
<i>T. Gregory</i>	

MODELING, SIMULATION, AND HIGH-THROUGHPUT TECHNIQUES FOR DEVELOPMENT OF ADVANCED BATTERIES

Practical Model-derived Metrics for Selection and Characterization of Battery Electrolytes	152
<i>K. Gering</i>	
Insights for Implementation of High Capacity Cathode Materials in High-Power and High-Energy Li-ion Cells	170
<i>B. Barnett, S. Sriramulu</i>	
Lithium-air Batteries: The Good, the Bad and the Ugly	192
<i>V. Viswanathan</i>	
Applying Simulation to Advanced Batteries	211
<i>S. Hartridge</i>	

THE BASIC SCIENCE/MANUFACTURING CONNECTION

Challenges for Battery Technology Commercialization in Consumer Electronics Applications	226
<i>J. Howard</i>	
Water-based Binder Electrodes for Safe LTO Large-Format Cells	236
<i>H. Buqa, G. Deghenghi, P. Blanc</i>	
Cracking the Silicon Case - A Brief History of 3M's Development of Si-Alloys for Li-ion Batteries	250
<i>V. Chevrier</i>	
Battery Manufacturing Challenges in the USA	263
<i>R. Brodd</i>	
Bridging the Gap Between Research and Manufacturing - A123's Approach	275
<i>L. Pinnell</i>	
"Commercializing" Nascent Energy Storage Technologies	283
<i>S. Babinec</i>	
Ceramic Separators for Lower Cost, Safer, and Lighter Lithium Ion Batteries	293
<i>S. Carlson, D. Avison</i>	

LITHIUM BATTERY POWER & BATTERY SAFETY PLENARY KEYNOTE SESSION

A Brief History of ARPA-E	296
<i>P. Liu</i>	

POSTERS

Effect of Crystallite Size of Sulfide Cathode on the Power Capability of Thermal Batteries	317
<i>H.-W. Cheong</i>	
Lithium-Impregnated Metal Foam Anode for Thermal Batteries	318
<i>Y. Choi</i>	
Development of LiNi_{1/3}Mn_{1/3}Co_{1/3}O₂ Synthesized by the Glycine Nitrate Combustion Method and Natural Vein Graphite as Electrodes for Li-Ion Batteries	319
<i>B.-E. Mellander</i>	
Fabrication and Electrochemical Performance of Lithium Ion Batteries for EV/HEV Applications	321
<i>R. Prakash</i>	
Nanostructured Micron-Sized Li₄Ti₅O₁₂ as High Performance Anode Material for Lithium Ion Batteries	322
<i>T. Rao</i>	
Porous Graphene from Polymer Templates and Their Use in Energy Storage Applications	323
<i>Y. Zhu</i>	
Ultrastrong, Thermally Stable Aramid Nanofiber (ANF) Membranes	324
<i>J. Hennessy</i>	
Battery Electrode Fabrication Through Innovative Powder Based Additive Manufacturing	325
<i>Y. Wang</i>	
The Perovskite La_{0.6}Sr_{0.4}CoO₃ Catalyst for Li-Air Battery	326
<i>Z. Yu</i>	
XG SIG™ Silicon-Graphene Anode for Li-Ion Batteries	327
<i>R. Privette</i>	
A Novel, Low Cost Technology for Fabricating High Capacity Nano-Structured Silicon Anodes	329
<i>D. Jawarani</i>	
Advancements in Soldier System Batteries and Lithium Battery Manufacturing Technology	330
<i>B. Craig</i>	

BREAKOUT DISCUSSIONS

Table 1: Stationary Batteries and Grid-Tied Energy Storage Applications and Challenges	331
<i>R. Byczek</i>	
Table 2: Thermal Runaway Propagation within a Large-Format Li-Ion Battery Module	333
<i>X. Feng</i>	
Table 3: Safety in Lithium Ion Batteries: State of the Art in Separators	336
<i>B. Morin</i>	

Table 4: Managing Cascading Failures - Pack or Cell? 340
J. Warner

ADDITIONAL PAPER

JCESR: Beyond Lithium-ion Batteries From Discovery to Commercialization 342
G. Crabtree
