International Conference on Physical Mesomechanics of Multilevel Systems 2014

Table of Contents

Preface: International Conference on Physical Mesomechanics of Multilevel Systems 2014 Victor E. Panin, Sergey G. Psakhie, and Vasily M. Fomin	1
Application of discrete-continual finite element method for global and local analysis of multilevel systems Pavel A. Akimov, Alexandr M. Belostoskiy, Vladimir N. Sidorov, Marina L. Mozgaleva, and Oleg A. Negrozov	3
The influence of the layer sizes on the conversion regimes realizing at layered composite synthesis Kamila A. Aligozhina and Anna G. Knyazeva	7
Features of structure-phase state of multielement nanocomposite coatings based on amorphous carbon Alexander V. Andreev, Igor Yu. Litovchenko, Alexander D. Korotaev, and Dmitrii P. Borisov	11
Theoretical investigation of influence of pore pressure on mechanical response of gas-filled permeable materials Sergey Astafurov, Evgeny Shilko, Andrey Dimaki, and Sergey G. Psakhie	15
The influence of heat treatment on homogeneity of strength properties and structural peculiarities of low-carbon steel Fe–Mo–Nb–V–C processed by high-pressure torsion Elena G. Astafurova, Galina G. Maier, Vera S. Koshovkina, Galina V. Chomyakova, Marina S. Tukeeva, Eugene V. Melnikov, Eugene V. Naydenkin, Sergey V. Dobatkin, and Pavel D. Odessky	19
The effect of hydrogenation on structure and strength properties of austenitic stainless steel Fe–18Cr–9Ni–Ti Elena G. Astafurova, Eugene V. Melnikov, Galina G. Maier, and Marina S. Tukeeva	23
Thermal stability of nanostructured Hadfield steel produced by high-pressure torsion Elena G. Astafurova, Marina S. Tukeeva, Galina G. Maier, and Eugene V. Melnikov	27

Toxicity of the hybrid material based on low-dimensional structures of aluminum oxide Olga V. Bakina, Elena A. Glazkova, Natalia V. Svarovskaya, Aleksandr S. Lozhkomoev, Aleksandr M. Dygay, Aleksey A. Churin, Marat I. Lerner, and Sergey G. Psakhie	31
Synthesis of low-size flower-like AlOOH structures Olga V. Bakina, Elena A. Glazkova, Natalia V. Svarovskaya, Aleksandr S. Lozhkomoev, Elena G. Khorobraya, and Sergey G. Psakhie	35
Initial oxidation of TiAl: An ab-initio investigation Alexander V. Bakulin, Svetlana E. Kulkova, Qing-Miao Hu, and Rui Yang	39
A computational analysis of the interfacial curvature effect on the strength of a material with a modified surface layer Ruslan R. Balokhonov, Sergei A. Martynov, Varvara A. Romanova, and Aleksandr V. Zinoviev	43
Mesomechanical numerical modeling of the stress-strain localization and fracture in an aluminum alloy with a composite coating Ruslan R. Balokhonov, Eugen A. Schwab, Varvara A. Romanova, Aleksandr V. Zinoviev, and Sergey A. Martynov	47
A numerical simulation of the deformation and fracture of a material with a porous polysilazane coating Ruslan R. Balokhonov, Aleksandr V. Zinoviev, Varvara A. Romanova, and Sergei A. Martynov	51
Experimental study of crack initiation and propagation in high- and gigacycle fatigue in titanium alloys Mikhail Bannikov, Vladimir Oborin, and Oleg Naimark	55
Analysis of fragmentation statistics of alumina tubular specimens Irina Bannikova, Sergey Uvarov, and Oleg Naimark	59
Numerical and experimental study of the weld joints formation in welding foam materials Roman O. Bezginov, Raisa A. Krektuleva, Mikhail A. Mishin, Oleg I. Cherepanov, and Roman O. Cherepanov	63
Numerical simulation and experimental investigation of strain and damage localization in metals under dynamic loading Dmitry Bilalov, Mikhail Sokovikov, Vasilii Chudinov, Vladimir Oborin, Alena Terekhina, and Oleg Naimark	67

Determination of the thermal conductivity coefficient of inhomogeneous media S. A. Bochkareva, N. Yu. Grishaeva, P. A. Lyukshin, and B. A. Lyukshin	71
Ultrathin film of nickel on the Cu (100) surface: Atomic structure and phonons Svetlana D. Borisova and Galina G. Rusina	75
Vibron transport in macromolecular chains Dalibor Čevizović, Zoran Ivič, Slobodanka Galović, Alexei Chizhov, and Alexander Reshetnyak	79
Structural and phase transformation of apatite and quartz in the indentation process single crystals Marina Chaikina	83
A possibilities of dangerous dynamic phenomena prediction in a rock mass surrounding the excavations A. A. Cherepov, M. O. Eremin, P. V. Makarov, and A. Yu. Peryshkin	87
Plastic strain arrangement in copper single crystals in sliding Andrey V. Chumaevskii, Sergei Yu. Tarasov, and Dmitry V. Lychagin	91
The influence effect of coupling on solid-phase conversion in the plate from composition materials under condition of axial tension and shifting Yurii A. Chumakov and Anna G. Knyazeva	95
Properties of formation mechanism of the hydrothermally-synthesized ZrW_2O_8 Elena S. Dedova, Sergei N. Kulkov, and Fernando Pedrasa	99
Effect of severe plastic deformation on the structure, mechanical properties and fracture behavior of low-carbon steel 12GBA L. S. Derevyagina, N. M. Lemeshev, A. V. Korznikov, and S. V. Gladkovsky	103
Simulation of self-organization of mesoscopic plastic deformation of polycrystals Yevgeny Ye. Deryugin	107
Determination of fracture toughness for small-sized specimens with ultrafine grain structure Ye. Ye. Deryugin, V. E. Panin, and B. I. Suvorov	111

The computer-aided simulation of deformation and fracture of water-saturated elastic porous material with hybrid cellular automaton method Andrey V. Dimaki, Evgeny V. Shilko, Sergey V. Astafurov, and Sergey G. Psakhie	115
Features of formation of two-level structural states in pure metals and alloys under severe plastic deformation Ivan A. Ditenberg and Aleksander N. Tyumentsev	119
Some results of numerical study on the role of tribofilms formed during automotive braking Andrey I. Dmitriev, Heinz Kloß, and Werner Österle	123
Features of the behavior of symmetrical tilt grain boundaries in BCC and FCC metals under shear loading. Molecular dynamics study Andrey I. Dmitriev and Anton Yu. Nikonov	127
First-principles modeling of materials for nuclear energy applications Andrey I. Dmitriev, Alena V. Ponomareva, Anton Yu. Nikonov, Igor A. Abrikosov, and Svetlana A. Barannikova	131
Properties and features of structure formation CuCr-contact alloys in electron beam cladding Vasily G. Durakov, Bair V. Dampilon, and Sergey F. Gnyusov	135
Identification of nanosized defects using tribospectroscopy. Modeling by movable cellular automaton method Galina M. Eremina, Alexey Yu. Smolin, Valery V. Sergeev, and Sergey G. Psakhie	139
Wear resistance of steels under conditions of dry sliding friction and electric current of high density Viktor V. Fadin, Marina I. Aleutdinova, Aleksandr V. Kolubaev, and Valeriya A. Aleutdinova	143
Internal stresses and structure of multilayer coatings on the basis of Zr–Y–O / Si–Al–N Marina V. Fedorischeva, Victor P. Sergeev, Mark P. Kalashnikov, and Andrei V. Voronov	147
The fine structure of coatings on the basis Ni–Al formed by the magnetron method Marina V. Fedorischeva, Victor P. Sergeev, Mark P. Kalashnikov, and Andrei V. Voronov	151
Phase composition and structure of multilayered coatings of Ni–Al system Marina V. Fedorischeva, Victor P. Sergeev, Mark P. Kalashnikov, Andrei V. Voronov, and Irina A. Bozhko	155

Low-dimensional pseudoboehmite structures for microorganism adsorption Alla N. Fomenko, Irina N. Tikhonova, Olga V. Bakina, Elena A. Glazkova, Natalia V. Svarovskaya, Aleksandr S. Lozhkomoev, and Sergey G. Psakhie	159
Use of methods of wave processes modeling for control of defectiveness of non-metallic materials T. V. Fursa, B. A. Lyukshin, G. E. Utsyn, and M. V. Kuimova	163
Wear-resistant welding materials based on microdisperse refractory Ti compounds Nina K. Galchenko, Viktor P. Samartsev, Ksenia A. Kolesnikova, and Viktor V. Khamichonok	167
Molecular dynamics study of cluster structure and properties of rotational waves in solid nanostructures I. F. Golovnev, E. I. Golovneva, L. A. Merzhievsky, V. M. Fomin, and V. E. Panin	171
The numerical study of fracture and strength characteristics of heterogeneous brittle materials under dynamic loading Aleksandr S. Grigoriev, Eugeny V. Shilko, Vladimir A. Skripnyak, Alexey Yu. Smolin, Sergey G. Psakhie, Anatoly M. Bragov, Andrew K. Lomunov, and Leonid A. Igumnov	175
Investigation of features of plastic deformation and fracture of fine-crystalline V–4Ti–4Cr alloy Konstantin V. Grinyaev, Ivan A. Ditenberg, Ivan V. Smirnov, Alexander N. Tyumentsev, Vyacheslav M. Chernov, and Mikhail M. Potapenko	179
On the combined description of deformation and flow of continuous media Yurii V. Grinyaev and Nadezhda V. Chertova	183
Thermal properties simulation of multilayer pipe N. Yu. Grishaeva, B. A. Lyukshin, P. A. Lyukshin, A. I. Reutov, and Y. A. Reutov	187
Analysis of structure-phase states in-a-bulk hardened and a head-hardened rails V. E. Gromov, K. V. Morozov, Yu. F. Ivanov, and A. M. Glezer	191
Analysis of structure and phase composition of rails subjected to differential hardening at different regimes V. E. Gromov, K. V. Morozov, Yu. F. Ivanov, K. V. Volkov, S. V. Konovalov, K. V. Alsaraeva, and O. A. Semina	195
Obtaining composite Zr-Al-O coating on the surface of zirconium by microplasma oxidation Tatiana A. Gubaidulina, Oleg S. Kuzmin, Viktor P. Sergeev, Marina V. Fedorischva, and Mark P. Kalashnikov	199

Protective coatings on medical implants by reactive diffusion Elazar Y. Gutmanas and Irina Gotman	203
Computer simulation mesostructure of cluster systems Alexander Herega and Michael Ostapkevich	209
Molecular dynamics simulation study of normal vibrations of metal nanospheres Anton M. Igoshkin, Igor F. Golovnev, and Vasily M. Fomin	213
Surface hardening alloy VT6 of electric explosion and by electron beam Yu. F. Ivanov, T. Yu. Kobzareva, S. V. Raikov, V. E. Gromov, N. A. Soskova, and E. A. Budovskikh	217
Influence of intense bombardment of Cu⁺ ions on microhardness and structure of VT-23 titanium alloy Mark P. Kalashnikov, Victor P. Sergeev, and Vasilii V. Neyfeld	221
Porosity and mechanical properties of zirconium ceramics Ekaterina Kalatur, Svetlana Buyakova, Sergey Kulkov, and Anton Narikovich	225
Multilevel spatio-temporal structure formation mechanisms in a deformable crystal Petr P. Kaminskii and Yury A. Khon	229
Structural-phase states and wear resistance of surface formed on steel by surfacing Evgenie V. Kapralov, Sergey V. Raykov, Ekaterina S. Vaschuk, Yuri F. Ivanov, Evgenie A. Budovskikh, and Victor E. Gromov	233
Numerical simulation of effective mechanical properties of stochastic composites with consideration for structural evolution under intensive dynamic loading Valerii V. Karakulov, Igor Yu. Smolin, and Vladimir A. Skripnyak	237
Porous material for protection from electromagnetic radiation Olga Kazmina, Maria Dushkina, Valentin Suslyayev, and Boris Semukhin	241
New phase synthesis in surface layer in the conditions of ion implantation Asfandyar Khan and Anna G. Knyazeva	245

The effect of input parameters on the precision of DIC method Vladimir V. Kibitkin, Andrey I. Solodushkin, and Vasiliy S. Pleshanov	250
Crystallographic parameters in geometrically and topologically close-packed superstructures Evgeny A. Knestaypin, Maksim M. Morozov, Alexandr I. Potekaev, Anatoly A. Klopotov, Tatyana N. Markova, and Vladimir D. Klopotov	254
Model of evolution of surface grain structure under ion bombardment Anna G. Knyazeva and Olga N. Kryukova	259
Intermediate layer formation between inclusion and matrix during synthesis of unidirectional fibrous composite Anna G. Knyazeva, Olga N. Kruykova, Sergey A. Lurie, Yury O. Solyaev, and Andrey A. Shavnev	263
Numerical simulation of the fractures of anisotropic materials characterized by the high degree of anisotropy of elongation at break S. V. Kobenko, M. N. Krivosheina, M. A. Kozlova, E. V. Tuch, and I. Yu. Konysheva	267
Ultrasonic impact treatment of the welded joint of aluminum-magnesium alloy produced by friction stir welding Evgeny Kolubaev, Alexander Kolubaev, Olga Sizova, Valery Rubtsov, Aleksey Tolmachev, and Sergey Psakhie	271
Inelastic hot deformation of duplex steels N. S. Kondratev	275
Fragmented dislocation substructure in the deformed FCC Cu–Al alloys. Its parameters and influence on flow stress Nina Koneva, Ludmila Trishkina, and Eduard Kozlov	279
Numerical study of mechanical behavior of ceramic composites under compression loading in the framework of movable cellular automaton method Igor S. Konovalenko, Alexey Yu. Smolin, Ivan S. Konovalenko, Vladimir V. Promakhov, and Sergey G. Psakhie	283
On the dependence of effective mechanical properties of ceramics on partial concentrations of different size pores in its structure Igor S. Konovalenko, Alexey Yu. Smolin, Ivan S. Konovalenko, Vladimir V. Promakhov, and Sergey G. Psakhie	287

Microstructure and properties of pure and composite metal powders after mechanical activation in planetary ball mill	
Michail A. Korchagin, Ivan A. Ditenberg, Konstantin I. Denisov, and Alexander N. Tyumentsev	291
Influence of crystallographic orientation on the response of copper crystallites to nanoindentation	
Aleksandr V. Korchuganov, Dmitriy S. Kryzhevich, Konstantin P. Zolnikov, and Sergey G. Psakhie	295
Computer-aided simulation of gas adsorption processes in nanopores	
A. V. Korchuganov, K. P. Zolnikov, D. S. Kryzhevich, Yu. V. Grinyaev, and S. G. Psakhie	299
Experimental and numerical study of quasi-brittle fracture of rocks	
Yu. A. Kostandov, P. V. Makarov, and M. O. Eremin	303
Some aspects of erythrocyte preparation for AFM-study	
A. I. Kozelskaya and A. V. Panin	307
Numerical simulation of strain localization in multi-pass welded joints with account of residual stresses	
Raisa A. Krektuleva, Oleg I. Cherepanov, and Roman O. Cherepanov	311
Modelling of the deformation of highly porous metals and alloys under dynamic loading	
M. N. Krivosheina, E. V. Tuch, S. V. Kobenko, M. A. Kozlova, and I. Yu. Konysheva	315
Formation of 2D nanoparticles with block structure in simultaneous electric explosion of conductors	
Dmitriy S. Kryzhevich, Konstantin P. Zolnikov, Andrei V. Abdrashitov, Marat I. Lerner, and Sergey G. Psakhie	319
Crystallographic analysis of rock grain orientation at meso- and microscale levels	
A. S. Kulkov, A. I. Chernishov, D. V. Lychagin, P. A. Tishin, and S. N. Kulkov	323
Positron annihilation spectroscopy of vacancy-type defects hierarchy in submicrocrystalline nickel during annealing	
Pavel V. Kuznetsov, Yuri P. Mironov, Aleksey I. Tolmachev, Tanzilya V. Rakhmatulina, Yuri S. Bordulev, Roman S. Laptev, Andrey M. Lider, Andrey A. Mikhailov, and Alexander V. Korznikov	327
Identification of conditions for nanostructured burnishing and subsurface shear instability	
Viktor P. Kuznetsov, Sergey Yu. Tarasov, and Andrey I. Dmitriev	331

Calculation of deformation and stability of pillars in rocks Sergey V. Lavrikov and Alexander F. Revuzhenko	335
Investigation of the hemostatic action of low-dimensional electropositive structures Marat I. Lerner, Elena A. Glazkova, Sergey G. Psakhie, Viktor I. Tikhonov, and Ivan I. Tyutrin	339
Features of deformed structure of metastable austenitic steel after deformation-induced direct and reverse martensitic transformations Igor Yu. Litovchenko, Sergey A. Akkuzin, Alexander N. Tyumentsev, and Eugene P. Naiden	343
Porosity and biocompatibility study of ceramic implants based on ZrO₂ and Al₂O₃ Larisa Litvinova, Valeria Shupletsova, Vladimir Leitsin, Roman Vasylyev, Dmitry Zubov, Ales Buyakov, and Sergey Kulkov	347
Comparative impact analysis of laser radiation on steel grades 1045 and 5140 Olga V. Lobankova, Ilya Y. Zykov, and Alexander G. Melnikov	351
The influence of warm deformation on the structure and martensitic transformations in TiNi-based alloys Aleksandr Lotkov, Victor Grishkov, Oleg Kashin, Anatoly Baturin, Victor Timkin, and Dorzhima Zhapova	355
Effect of warm multipass caliber rolling on superelasticity and shape memory of Ti_{49.2}Ni_{50.8} at.% alloy Aleksandr I. Lotkov, Victor N. Grishkov, Dorzhima Yu. Zhapova, and Victor N. Timkin	359
Effect of heat treatment on superelasticity of NiTi-based intravascular implants Aleksandr I. Lotkov, Oleg A. Kashin, Andrey N. Kudryashov, Viktor N. Grishkov, and Ludmila L. Meisner	363
Antimicrobial activity of nanostructured composites produced in Al/Zn nanoparticle oxidation in aqueous-alcoholic solutions Aleksandr S. Lozhkomoev, Elena A. Glazkova, Natalia V. Svarovskaya, Olga V. Bakina, Elena G. Khorobraya, Sergey S. Timofeev, Vladimir V. Domashenko, and Sergey G. Psakhie	367
The effect of hydrogen on the parameters of plastic deformation localization in low carbon steel Aleksey G. Lunev, Mikhail V. Nadezhkin, Galina V. Shlyakhova, Svetlana A. Barannikova, and Lev B. Zuev	371

Effect of a hard sublayer on contact interaction and wear behavior of electrodeposited gold-based coatings	375
Alexander O. Lyazgin, Artur R. Shugurov, Alexey V. Panin, and Evgeniy V. Shesterikov	
Structure and constitution of glass and steel compound in glass-metal composite	379
Olga N. Lyubimova, Andrey V. Morkovin, Sergey A. Dryuk, and Pavel A. Nikiforov	
Design of composites with specified effective mechanical and thermophysical characteristics	383
B. A. Lyukshin, P. A. Lyukshin, S. A. Bochkareva, N. Yu. Matolygina, and N. Yu. Grishaeva	
Stress-strain state and loss of stability of anisotropic thermal coating under thermal shock	387
B. A. Lyukshin, P. A. Lyukshin, S. A. Bochkareva, N. Yu. Matolygina, and S. V. Panin	
Model of behavior of nitrides and their mixtures under high dynamic loads	391
Konstantin K. Maevskii and Sergey A. Kinelovskii	
Geomedium as a nonlinear dynamic system. An evolutionary concept of earthquake development	395
Pavel V. Makarov	
Influence of in-service degradation on strain localization in steel of main gas pipelines	399
Pavlo Maruschak, Roman Bishchak, Sergey Panin, Andriy Pylypenko, Abdellah Menou, and Iryna Danyliuk	
Analysis of surface relief evolution of polycrystalline aluminum alloy under static deformation	403
Pavlo Maruschak, Igor Konovalenko, Sergey Panin, and Roman Bishchak	
Gradient changes in structural condition of the B2 phase of NiTi surface layers after electron-beam treatments	407
Ludmila L. Meisner, Ekaterina Yu. Gudimova, Marina G. Ostapenko, and Aleksandr I. Lotkov	
Structural phase states in NiTi near-surface layers modified by electron and ion beams	411
Ludmila Meisner, Yurii Mironov, Stanislav Meisner, Oleg Kashin, Andrey Kudryashov, and Aleksandr Lotkov	
Structure of the near-surface layer of NiTi on the meso- and microscale levels after ion-beam surface treatment	415
L. L. Meisner, T. M. Poletika, S. N. Meisner, A. V. Tverdichebova, S. L. Girsova, and I. A. Shulepov	

Cellular automata modeling of microcrystalline structure formation Mikhail Mikolaychuk and Anna Knyazeva	419
Influence of porosity on the deformation behaviour of systems with nanostructured thermal barrier coatings D. D. Moiseenko, P. V. Maksimov, V. E. Panin, V. P. Sergeev, S. V. Panin, and F. Berto	423
Material fragmentation as dissipative process of micro rotation sequence formation: Hybrid model of excitable cellular automata D. D. Moiseenko, V. E. Panin, P. V. Maksimov, S. V. Panin, and F. Berto	427
Micro- and macrostresses in two level model of coating growth N. N. Nazarenko and A. G. Knyazeva	431
Nonequilibrium structural condition in the medical TiNi-based alloy surface layer treated by electron beam Aleksei A. Neiman, Ludmila L. Meisner, Aleksandr I. Lotkov, Nikolai N. Koval, Viktor O. Semin, and Anton D. Teresov	435
Features of the microstructure development under conditions, reproducing the process of friction stir welding. Molecular-dynamics study Anton Yu. Nikonov, Andrey I. Dmitriev, Evgeniy A. Kolubaev, and Valeriy E. Rubtsov	439
Scaling invariance of fracture in aluminum alloy under fatigue and dynamic loading Vladimir Oborin, Oleg Naimark, Mikhail Bannikov, Mikhail Sokovikov, and Dmitry Bilalov	443
The distinctive features of plastic deformation localization in polycrystalline aluminum by creep Dina V. Orlova, Natalya V. Zarikovskaya, Semen K. Mirgorodsky, Vladimir I. Danilov, and Lev B. Zuev	447
Phase composition in NiTi near-surface layers after electron beam treatment and its variation depending on beam energy density Marina G. Ostapenko, Ludmila L. Meisner, Aleksandr I. Lotkov, and Ekaterina Y. Gudimova	451
Structural state scale-dependent physical characteristics and endurance of cermet composite for cutting metal V. E. Ovcharenko, Yu. F. Ivanov, A. A. Mohovikov, Yu Baohai, and Yanhui Zhao	455
Bulk nanostructuring intermetallic composite material V. E. Ovcharenko, S. G. Psakhie, Yu. F. Ivanov, K. V. Ivanov, and E. N. Boyangin	459

Growth and deformation structure of gradient and layer-gradient Ti-Al-Si-Cu-N coatings Stanislav V. Ovchinnikov, Alexandr D. Korotaev, and Yurii P. Pinzhin	463
Surface modification of structural materials by low-energy high-current pulsed electron beam treatment A. V. Panin, M. S. Kazachenok, O. M. Borodovitsina, E. A. Sinyakova, Yu. F. Ivanov, and M. V. Leontieva-Smirnova	467
Increasing the wear resistance of ultra-high molecular weight polyethylene by adding solid lubricating fillers S. V. Panin, L. A. Kornienko, T. Nguen Suan, M. A. Poltaranin, and L. R. Ivanova	471
Fundamental role of local curvature of crystal structure in plastic deformation and fracture of solids Victor E. Panin and V. E. Egorushkin	475
The influence of vacancy generation at the initial stage of ion implantation Elena S. Parfenova and Anna G. Knyazeva	479
Phase state of matter during metal and binary alloy conductor dispersion by a pulse of current Alexander V. Pervikov, Marat I. Lerner, Elena A. Glazkova, and Vladimir V. Domashenko	483
Numerical simulation of tectonic plates motion and seismic process in Central Asia A. Yu. Peryshkin, P. V. Makarov, and M. O. Eremin	487
Elastic-plastic invariant of localized deformation autowaves Nikita Ploskov, Vladimir Danilov, and Lev Zuev	491
The microstructural stability of low-activation 12%-chromium ferritic-martensitic steel EK-181 during thermal aging N. A. Polekhina, I. Yu. Litovchenko, A. N. Tyumentsev, E. G. Astafurova, V. M. Chernov, M. V. Leontyeva-Smirnova, E. G. Mironova, and N. I. Budylnik	495
Multilevel approach to the experimental study of plastic deformation of HCP-zirconium alloys T. M. Poletika and S. L. Girsova	499
Reconstruction of the “phase separation – ordering” type and specific heat in carbon nanotubes Alexander N. Ponomarev, Valery E. Egorushkin, Natalia V. Melnikova, and Nadezda G. Bobenko	503

On the role of scales in elastomer friction Valentin L. Popov, Sergey G. Psakhie, and Mikhail Popov	507
Structure, strength and fracture of hot-pressed Al–Cr, Al–Cr–Si powder composites Gennady A. Pribytkov, Victoria V. Korzhova, and Arnold P. Savitskii	511
Criteria of limit state and failure of geomaterials based on the new system of invariants of stress tensor A. F. Revuzhenko and O. A. Mikenina	515
Plasticity and decomposition of whiskers on electric-induced deformation A. P. Rodzevich, L. V. Kuzmina, E. G. Gazenaur, and V. I. Krashenin	519
Formation of structure, phase composition and properties of electro explosion resistant coatings using electron-beam processing Denis A. Romanov, Kirill V. Sosnin, Evgenij A. Budovskikh, Viktor E. Gromov, and Alexander P. Semin	523
Numerical analysis of strain-induced surface phenomena in aluminum alloys Varvara Romanova, Ruslan Balokhonov, Olga Zinovieva, and Ekaterina Batukhtina	527
Numerical study of the surface-hardening effect on surface phenomena in 3D polycrystalline specimens Varvara Romanova, Ruslan Balokhonov, Olga Zinovieva, and Valeriy Shakhijanov	531
Thermography inspection of friction stir welding Valery E. Rubtsov, Evgeny A. Kolubaev, Sergei Yu. Tarasov, Peter A. Vasilyev, and Vladimir A. Bakshaev	535
Ultrasonic phase array and eddy current methods for diagnostics of flaws in friction stir welds Valery Rubtsov, Sergey Tarasov, Evgeny Kolubaev, and Sergey Psakhie	539
Mesomechanics of technological properties of powdered polymer compacts in lost wax casting Igor G. Sapchenko, Sergey G. Zhilin, Dmitrii A. Potianikhin, and Oleg N. Komarov	543
The influence of porosity on the elasticity and strength of alumina and zirconia ceramics Nickolai Savchenko, Irina Sevostyanova, Tatiana Sablina, László Gömze, and Sergei Kulkov	547

Nondestructive carbon content express-control in steels and alloys Andrey V. Sedov, Mikhail S. Lipkin, Semen M. Lipkin, Dmitry A. Onyshko, Nikolay A. Lytkin, and Natalya V. Rarova	551
X-ray diffractometry used for determination of autowave velocity at deformation Boris S. Semukhin	555
Changes in the structure and wear resistance of the surface layer of copper under treatment by nitrogen ion beams Victor P. Sergeev, Mark P. Kalashnikov, Evgeniya V. Rybalko, Alfred R. Sungatulin, Oleg V. Sergeev, and Stanislav Yu. Zharkov	559
Magnetron deposition of metal-ceramic protective coatings on glasses of windows of space vehicles Victor P. Sergeev, Victor E. Panin, Sergei G. Psakhie, Alexandr G. Chernyavskii, Valerii P. Svechkin, Yurii F. Khristenko, Mark P. Kalashnikov, and Andrei V. Voronov	563
Microstructure and mechanical properties of Ti40Nb alloy after severe plastic deformation Yury P. Sharkeev, Anna Yu. Eroshenko, Ivan A. Glukhov, Qifang Zhu, and Alexey I. Tolmachev	567
Theoretical study of peculiarities of unstable longitudinal shear crack growth in sub-Rayleigh and supershear regimes Evgeny V. Shilko and Sergey G. Psakhie	571
Mechanisms of stress generation and relaxation in thin films and coatings Artur R. Shugurov and Alexey V. Panin	575
The appearance of plasticity on the blocks surfaces in geological media Boris P. Sibiryakov	579
Structure and optical homogeneity of LiNbO₃:Zn (0.03–4.5 mol.%) crystals Nikolay Sidorov, Natalja Tepljakova, Aleksei Gabain, Aleksander Yanichev, and Mikhail Palatnikov	583
The microstructure of aluminum-magnesium alloy friction stir weld Olga Sizova, Alexander Kolubaev, Evgeny Kolubaev, Anastasiya Zaikina, Valery Rubtsov, Sergey Psakhie, Alexander Chernyavsky, and Vitaly Lopota	587

3D modeling of the mechanical behavior of ceramics with pores of different size Alexey Yu. Smolin, Galina M. Eremina, Igor S. Konovalenko, and Sergey G. Psakhie	591
Brittle porous material mesovolume structure models and simulation of their mechanical properties I. Yu. Smolin, M. O. Eremin, P. V. Makarov, E. P. Evtushenko, S. N. Kulkov, and S. P. Buyakova	595
Experimental and numerical study of plastic shear instability under high-speed loading conditions Mikhail Sokovikov, Vasilii Chudinov, Dmitry Bilalov, Vladimir Oborin, Sergey Uvarov, Oleg Plekhov, Alena Terekhina, and Oleg Naimark	599
Morphology of the surface of technically pure titanium VT1-0 after electroexplosive carbonization with a weighed zirconium oxide powder sample and electron beam treatment Kirill V. Sosnin, Sergey V. Raykov, Ekaterina S. Vaschuk, Yuri F. Ivanov, Evgenie A. Budovskikh, and Victor E. Gromov	603
Plastic and tribological properties of polytetrafluoroethylene (PTFE) under conditions of high pressure and shear Jasminka Starcevic, Roman Pohrt, and Valentin L. Popov	607
Dilatancy and compaction modes in shear zone Yu. P. Stefanov	611
Effect of the rock properties on the strike-slip fault structure Yu. P. Stefanov and R. A. Bakeev	615
Formation of dilatancy and compaction zones around wells Yu. P. Stefanov and R. A. Bakeev	619
Deformation and fracture of a layered VT6-based material under shock loading Natalya Surikova, Viktor Panin, Lyudmila Derevyagina, Ramile Lutfullin, and Aleksandra Sarkeeva	623
Friction stir processing on carbon steel Sergei Yu. Tarasov, Alexander G. Melnikov, and Valery E. Rubtsov	627
Radiographic detection of defects in friction stir welding on aluminum alloy AMg5M Sergei Yu. Tarasov, Valery E. Rubtsov, and Evgeny A. Kolubaev	631

The effect of friction stir welding tool wear on the weld quality of aluminum alloy AMg5M Sergei Yu. Tarasov, Valery E. Rubtsov, and Evgeny A. Kolubaev	635
A molecular dynamic study of charged nanofilm interaction with negative lipid bilayer Alexey A. Tsukanov and Sergey G. Psakhie	639
Effect of modes of thermomechanical treatments on structural-phase states and mechanical properties of V–Cr–Zr–W-system alloys Alexander N. Tyumentsev, Ivan A. Ditenberg, Konstantin V. Grinyaev, Ivan V. Smirnov, Vyacheslav M. Chernov, and Mikhail M. Potapenko	643
In situ formation of metal-ceramic composite coatings by detonation spraying of titanium V. Yu. Ulianitsky, D. V. Dudina, I. S. Batraev, N. V. Bulina, A. I. Kovalenko, M. A. Korchagin, and B. B. Bokhonov	647
Structural levels of deformation and failure of heat-resistant 12Cr1MoV steel modified by vacuum arc treatment by Zr⁺ ion beam I. V. Vlasov, S. V. Panin, V. P. Sergeev, and B. B. Ovechkin	651
Definition of nanostructural characteristics melting product of quartz sand Oleg G. Volokitin, Gennady G. Volokitin, Nelli K. Skripnikova, and Valentin V. Shekhovtsov	655
Geodynamic model of the appearance of gas-dynamic phenomena in tectonically disturbed technologically mutable coal-and-rock massives in mine Valery N. Zakharov, Olga N. Malinnikova, and German N. Feit	659
Development of the anvil blocks forms of impact machines as composition of different materials I. A. Zhukov, E. V. Sarakhanova, and Ya. A. Andreeva	663
A numerical analysis of formation of the surface relief: A single inclusion model Olga Zinovieva, Varvara Romanova, Ruslan Balokhonov, Valery Shakhijanov, and Tatiana Emelyanova	667
Properties of dusty plasma crystal accounting charge variety of dust particles Konstantin P. Zolnikov, Andrei V. Abdrashitov, Dmitriy S. Kryzhevich, and Sergey G. Psakhie	671
Investigation of defect nucleation in titanium under mechanical loading Konstantin P. Zolnikov, Aleksandr V. Korchuganov, Dmitriy S. Kryzhevich, and Sergey G. Psakhie	675
