Application of Mathematics in Technical and Natural Sciences

6th International Conference for Promoting the Application of Mathematics in Technical and Natural Sciences – AMiTaNS '14

Albena, Bulgaria
26 June –1 July 2014

Editor
Michail D. Todorov
Technical University of Sofia, Sofia, Bulgaria

Sponsoring Organization
Euro-American Consortium for Promoting the Application of Mathematics in Technical and Natural Sciences DZZD

All papers have been peer reviewed.

AIP Publishing

Melville, New York, 2014
AIP Proceedings

Volume 1629

Table of Contents

Preface: Application of Mathematics in Technical and Natural Sciences - 6th International Conference - AMiTaNS'14
M. D. Todorov 1

Program Committee 3

List of Participants 4

Photographs AMiTaNS ’14 11

PLENARY LECTURES

A semi-Lagrangian approach in the finite element method for the Navier-Stokes equations of viscous heat-conducting gas
V. Shaidurov, G. Shchepanovskaya, and M. Yakubovich 19

Some properties of Hermite finite elements on rectangles
V. Shaidurov, S. Shut, and L. Gileva 32

Investigation of aircraft vortex wake structure
N. A. Baranov and L. I. Turchak 44

Numerical simulation of the aluminum production
P. A. Popov and P. N. Vabishchevich 56

SYMPOSIUM: DISCRETE SINGULARITIES METHODS IN MATHEMATICAL PHYSICS

Numerical simulation of separated flow over three-dimensional complex shape bodies with some vortex method
A. A. Aparinov, A. V. Setukha, and A. I. Zhelannikov 69

The problem of impulse control for the string equation with an external load with two fixed endpoint in the space of the functions of bounded *p*-variation
Y. M. Donchyk 77

Generalized mathematical model of thermal diffusion in powder metallurgy
V. Lyashenko and T. Hryhorova 85

Control of heat source in a heat conduction problem
V. Lyashenko and E. Kobilskaya 94

Mathematical and computational modeling of the diffraction problems by discrete singularities method
K. V. Nesvit 102

Asymptotic method of modeling of thin walled shells based on 2D Padé approximations
V. Olevskyi 110

On one numerical scheme of the solution of a three-dimensional problem of diffraction of an electromagnetic wave on thin ideally conductive screens
G. V. Ryzhakov 127

Numerical simulation of gas dynamics and heat exchange tasks in fuel assemblies of the nuclear reactors
S. V. Zhuchenko 135

SPECIAL SESSION: THEORETICAL AND NUMERICAL ANALYSIS OF GENERALIZED WAVE EQUATIONS

Four-photon parametric mixing and interaction between filaments
D. A. Georgieva and L. M. Kovachev 146

The in-phase states of Josephson junctions stacks as attractors
I. Hristov, S. Dimova, and R. Hristova 154

Solutions of the Klein-Gordon equation with equal scalar and vector harmonic oscillator plus inverse quadratic potential
B. I. Ita, H. P. Obong, C. O. Ehi-Eromosele, A. Edobor-Osoh, and A. I. Ikeuba 162

The light filament as vector solitary wave
L. M. Kovachev 167

Global behavior of the solutions to Boussinesq type equation with linear restoring force
N. Kutev, N. Kolkovska, and M. Dimova 172

Modeling interactions of soliton trains. Effects of external potentials
M. D. Todorov, V. S. Gerdjikov, and A. V. Kyuldjiev 186

Explicit parametrizations of Willmore surfaces
V. M. Vassilev, P. A. Djondjorov, E. Atanassov, M. Ts. Hadzhilazova, and I. M. Mladenov 201

A numerical investigation of stability of 1D soliton solutions of Boussinesq paradigm equation in the 2D case
D. Vasileva 207

Ac-driven nonlinear Schrödinger equation and double sine-Gordon equation: Numerical study of complexes of localized states
E. V. Zemlyanaya, N. V. Alexeeva, and P. Kh. Atanasova 217

APPLIED PHYSICS

Two-axes decompositions of (pseudo-)rotations and some of their applications
D. S. Brezov, C. D. Mladenova, and I. M. Mladenov 226

Solutions of the Schrödinger equation with inversely quadratic effective plus Mie-type potential using Nikiforov-Uvarov method
B. I. Ita, C. O. Ehi-Eromosele, A. Edobor-Osoh, A. I. Ikeuba, and T. A. Anake 235

BIOMATHEMATICS

On the excitation of Goodwin's oscillations
A. O. Antonova, S. N. Reznik, and M. D. Todorov 239

The effect of consumption delay on the excitation of Goodwin's oscillations
A. O. Antonova, S. N. Reznik, and M. D. Todorov 247

Stochastic resonance in a generalized Von Foerster population growth model
N. Lumi and R. Mankin 253

Sensitive response of a model of symbiotic ecosystem to seasonal periodic drive
A. Rekker, N. Lumi, and R. Mankin 262

COMPUTER SCIENCE

Frequency-dependent performance analysis of a parallel DSP-based computer system
Ch. S. Christou 270

Multicriteria analysis of ontologically represented information
K. Wasielewska, M. Ganzha, M. Paprzycki, C. Bădică, M. Ivanovic, and I. Lirkov 281

CONTINUUM MECHANICS

Thermoacoustic waves in a cylindrical Couette rarefied gas flow
P. Gospodinov, V. Roussinov, and D. Dankov 296

Numerical simulation of the dynamics of a liquid crystal in the case of plane strain using GPUs
O. V. Sadovskaya 303

Equations of the dynamics of a liquid crystal under the influence of weak mechanical and thermal perturbations
V. M. Sadovskii 311

Strouhal number analysis for a Karman vortex gas flow past a square in a microchannel at low Mach number
K. Shterev and S. Stefanov 319

Dynamic fracture of functionally graded magnetoelectroelastic composite materials
Y. Stoynov and P. Dineva 327

Carreau model for oscillatory blood flow in a tube
S. Tabakova, E. Nikolova, and St. Radev 336

MATHEMATICAL PHYSICS AND APPLIED ANALYSIS

Transformations preserving nonsingularity, trace and spectrum of matrices
R. Brociek, M. Pleszczyński, R. Wituła, and P. Lorenc 344

A non-radial model for evaluating multiperiod aggregative efficiency
A. Hadi-Vencheh and A. Esmaeilzadeh 349

Generalization of Eulerian numbers and their application
E. Hetmaniok, M. Pleszczyński, R. Wituła, and P. Lorenc 354

Solutions of the Schrödinger equation with inversely quadratic Hellmann plus inversely quadratic potential using Nikiforov-Uvarov method
B. I. Ita, C. O. Ehi-Eromosele, A. Edobor-Osoh, and A. I. Ikeuba 360

Some estimates below the modulus of some integrals of the unit circle
T. S. Stoyanov 363

On certain approximation problem in normed spaces
R. Wituła, E. Hetmaniok, K. Kaczmarek, and D. Słota 368

NUMERICAL METHODS

Recovery of a boundary function by observation data in a problem for the shallow water model
E. Dementyeva, E. Karepova, and V. Shaidurov 373

A numerical solution of Falkner-Skan equation via a shifted Chebyshev collocation method
M. T. Kajani, M. Maleki, and M. Allame 381

A nonclassical Radau collocation method for solving the Lane-Emden equations of the polytropic index $4.75 \leq \alpha < 5$
M. D. Tirani, M. Maleki, and M. T. Kajani 387

SCIENTIFIC COMPUTING

Solution of Falkner-Skan equation with heat transfer using a Legendre collocation method
M. Allame, M. Maleki, and M. T. Kajani 394

Implementation of the Euler-Lagrange and poisson equations to extract one connected region
A. Bowden, M. D. Todorov, and N. M. Sirakov 400

Application of the homotopy analysis method for solving the two-dimensional steady-state heat conduction problem
R. Brociek, E. Hetmaniok, and D. Słota 408

Renewable energy potential in Bulgaria – Some computer simulations results
K. Ganev, G. Jordanov, G. Gadzhev, N. Miloshev, D. Syrakov, and M. Prodanova 414

Mathematical modeling of heat transfer problems in the permafrost
V. F. Gornov, S. P. Stepanov, M. V. Vasilyeva, and V. I. Vasilyev 424

Modified Chebyshev map based pseudo-random bit generator
K. M. Kordov 432

Elastic spirals
I. M. Mladenov, P. I. Marinov, and M. Ts. Hadzhilazova 437

Numerical analysis of nematic liquid crystals as applied to tunable antennas
N. C. Papanicolaou, M. A. Christou, and A. C. Polycarpou 444

Patch-fitting on triangular surface holes
A. Savva and V. Stylianou 452

Using circle map in pseudorandom bit generation
B. P. Stoyanov 460
