Applications of Mathematics in Engineering and Economics (AMEE'14)

Table of Contents

Preface: Applications of Mathematics in Engineering and Economics (AMEE'14) George Venkov and Vesela Pasheva	1
Organizing Committees	2
MATHEMATICAL MODELING	
Optimal individual diet Cvetana Nedeva and Silvia Baeva	3
Mathematical model of the cylinder rotations in a viscous medium Dmitry Zavalishchin	11
Evaluation of payment flows based on Markov chain model with incomplete information Galina Timofeeva and Nikolay Timofeev	17
An experimental study and analysis of a new railway transport noise absorber Ivan Kralov, Ana Piskova, and Krasimir Nedelchev	23
Laguerre polynomial approximation and model order reduction for linear systems Kamen Perev	29
Mathematical model of testing of pipeline integrity by thermal fields Nataliia Vaganova	37
On transient departure process in a finite-buffer queuing model with probabilistic packet dropping Wojciech M. Kempa	42

Crack interaction in magnetoelastoelectric materials Yonko Stoyanov	50
Modeling data for tilted implants in grafted with bio-oss maxillary sinuses using logistic regression R. Shindjalova, K. Prodanova, and V. Svechtarov	58
Statistical analysis of content of Cs-137 in soils in Bansko-Razlog region R. G. Kobilarov	63
Plain apportionments: History, paradoxes, generalizations, new methods M. M. Konstantinov, G. B. Pelova, and K. D. Yanev	69
NUMERICAL METHODS	
High-quality light field interpolation in epipolar plane image domain by DCT-based shearing Leonid Bilevich, Suren Vagharshakyan, and Atanas Gotchev	77
Application problems for computing areas of figures by the alternative method Daniela Bímová and Daniela Bittnerová	85
A priori error estimates of the discontinuous Galerkin method for the MEW equation J. Hozman	93
Implementing the finite element analysis with service-oriented architectures and workflows Nikolay Mladenov	99
Shape optimization of the current body located in the cooling canal Petr Salač and Václav Dvořák	104
A note on wavelet methods for singularly perturbed problems Dana Černá and Václav Finěk	111
Numerical methods for advection equations with delay V. Pimenov and S. Sviridov	114
Mathematical modeling of the incompressible fluid flows Valentin A. Gushchin and Pavel V. Matyushin	122

Discrete Laplace-Beltrami operators for cortical bioelectric source imaging Ivats Dakov and Georgi Venkov	135
Data approximation using a blending type spline construction Rune Dalmo and Jostein Bratlie	147
Motion capture data represented using a blending type spline construction Jostein Bratlie and Rune Dalmo	153
Numerical method for determination of resonance electron velocities in periodic electric fields Khristo Tarnev	158
Fast explicit positivity-preserving schemes for the Black-Scholes equation Mariyan Milev, Aldo Tagliani, and Dessislava Koleva	164
DIFFERENTIAL EQUATIONS AND APPLICATIONS	
Riemann-Hadamard function for Darboux-Goursat problem and its multidimensional application Aleksy Nikolov and Nedyu Popivanov	175
Minimizing of weighted functional on trajectories of a linear system with delay integrally bounded impulse control M. A. Koreshnikova and A. N. Seseikin	181
Minimax approach problem with incomplete information for the two-level hierarchical discrete-time dynamical system A. F. Shorikov	188
On the possibility of the Cahn-Hilliard approach extension to the solution of gas dynamics problems (inner turbulence) E. A. Lukashev, N. N. Yakovlev, E. V. Radkevich, and V. V. Palin	197
One method of attraction to the solvability set in the convergence problem V. N. Ushakov, A. V. Ushakov, and G. V. Parshikov	209
Application of method of special series for solution of nonlinear partial differential equations Mikhail Filimonov	218

Startingless multistep methods approach for the numerical solution of the mixed functional differential equations Maksim A. Panachev	224
On the well-posedness of perturbed wave equation with nonlinearity vanishing at infinity: Linear theory Mirko Tarulli	230
Internal ellipsoidal estimates of reachable set of impulsive control systems Oksana G. Matviychuk	238
On the solvability of a second-order singular initial value problem P. Kelevedjiev, N. Popivanov, and L. Bekesheva	245
Singular solutions to Protter problem for Keldysh type equations Tsvetan Hristov	255
Third order convergence for singular boundary value problems on unbounded domains Tanya G. Melton and A. S. Vatsala	263
On the distributions of the zeros of some generalized equations of Liénard Z. Petrova	268
MATHEMATICAL ANALYSIS AND APPLICATIONS	
Affine trajectories in a field of strictly convex functions Daniela Bittnerová and Daniela Bímová	276
Generalized Euler decompositions of some six-dimensional Lie groups Danail S. Brezov, Clementina D. Mladenova, and Ivaïlo M. Mladenov	282
Distribution of points of interpolation of multipoint Padé approximants N. R. Ikononov and R. K. Kovacheva	292
Simplectic anticirculant decompositions. Integral representations Stancho Dimiev, Peter Stoev, Stanislava Stoilova, and Vladimir Todorov	297
Fatou theorems for multi-index Bessel series Jordanka Paneva-Konovska	303

ALGEBRA AND SCIENTIFIC COMPUTING

Autonomous portfolio investment by multi-stage selection procedure Angel Marchev Jr. and Angel Marchev	313
Approach for enhanced search and integration of semantic web services A. Rozeva	323
Public key cryptosystem based on endomorphism semirings of a finite chain Mariana I. Durcheva, Ivan D. Trendafilov, and Martin Rachev	330
An application of different dioids in public key cryptography Mariana I. Durcheva	336
Solution of sparse system for sensor location problem as function of non-strictly positive arc flow split ratios L. A. Pilipchuk, A. S. Pilipchuk, and Y. V. Ramanouski	344
Optimal location of sensors on a multigraph with zero split ratios of some arc flows L. A. Pilipchuk, A. S. Pilipchuk, and Y. V. Ramanouski	350
Some applications of the power series ring T. Zhelyazov	354
Advanced pagination of the result Peter Spaskovsky	362
Development of models for exchange of electronic documents Victor Glavev	369
Similarity transformations between some companion matrices Gyurhan H. Nedzhibov	375

On the epipolar geometry with two coincident projection planes and two coincident epipoles at infinity Georgi Hristov Georgiev and Vencislav Dakov Radulov	383
List of Participants	391
