2014 AMOS CONFERENCE PROCEEDINGS

CONJUNCTION ASSESSMENT

Session Chair: Lauri Newman, National Aeronautics and Space Administration (NASA)

Scalable Conjunction Processing Using Spatiotemporally Indexed Ephemeris Data.....	10
<i>Irene Budianto-Ho, Stellar Science Ltd Co</i>	
Probability Forecasting Using Monte Carlo Simulation.....	20
<i>Matthew Duncan, SpaceNav</i>	
Evolution and Implementation of the NASA Robotic Conjunction Assessment Risk Analysis Concept of Operations	34
<i>Lauri Newman, National Aeronautics and Space Administration (NASA)</i>	
JAC Software, Solving Conjunction Assessment Issues	48
<i>Francois Laporte, Centre National d'Etudes Spatiales (CNES)</i>	

ORBITAL DEBRIS

Session Chair: Thomas Schildknecht, Astronomical Institute, University of Bern

GEO Belt Survey with WFCAM	57
<i>Rick Kendrick, Lockheed Martin Advanced Technology Center</i>	
Improved Space Object Orbit Determination Using CMOS Detectors.....	67
<i>Thomas Schildknecht, Astronomical Institute, University of Bern</i>	
High Resolution Radar for NASA and Space Situational Awareness for Observation and Monitoring	76
<i>Barry Geldzahler, National Aeronautics and Space Administration (NASA)</i>	
Implications of Hierarchies for RSO Characterization, Recognition, and Identification	92
<i>Matthew Wilkins, Applied Defense Solutions</i>	
LightForce Photon-Pressure Collision Avoidance: Updated Efficiency Analysis Utilizing a Highly Parallel Simulation Approach.....	103
<i>Jan Stupl, SGT</i>	
A Deterministic Approach to Active Debris Removal Target Selection.....	117
<i>Aleksander Lidtke, University of Southampton</i>	

SPACE SITUATIONAL AWARENESS

Session Chair: Lindsay Millard, DARPA

Joint UK-Australian Space Surveillance Target Tracking, Cueing and Sensor Data Fusion Experiment.....	127
<i>Pat Donnelly, Defence Science Technology Laboratory</i>	
Technical Description of Radar and Optical Sensors Contributing to Joint UK-Australian Satellite Tracking, Data-fusion and Cueing Experiment	137
<i>Jon Eastment, STFC Chilbolton Observatory</i>	
Orbit Determination Analysis for a Joint UK-Australian Space Surveillance Experiment	147
<i>Mark Rutten, Defence Science and Technology Organisation</i>	
Proto-Type Development of Optical Wide-field Patrol Network and Test Observation.....	157
<i>Jang-Hyun Park, Korea Astronomy & Space Science Institute</i>	

Multi-phenomenology Observation Network Evaluation Tool (MONET)	165
<i>Dan Oltrogge, Analytical Graphics Inc.</i>	
Space Situational Awareness of Large Numbers of Payloads from a Single Deployment	190
<i>Alan Segerman, Naval Research Laboratory</i>	
Next Generation Space Surveillance System-of-Systems	200
<i>Bill McShane, Lockheed Martin</i>	

ASTRODYNAMICS

Session Chair: Paul Schumacher, Air Force Research Laboratory

Validation of Accuracy and Efficiency of Long-Arc Orbit Propagation Using the Method of Manufactured Solutions and the Round-Trip-Closure Method	204
<i>Robyn Woollands, Texas A&M University</i>	
Terminal Convergence Approximation Modified Chebyshev Picard Iteration for Efficient Orbit Propagation	214
<i>Austin Probe, Texas A&M University</i>	
Catalog Build-up for Geostationary Orbit Using Simulated Short-arc Tracklets	224
<i>Jan Siminiski, DLR/GSOC</i>	
Simplified Propagation of Uncertainty in the Non-Keplerian Problem	231
<i>Inkwan Park, University of Colorado at Boulder</i>	
A Comparison of JPDA and Belief Propagation for Data Association in SSA	250
<i>Mark Rutten, Defence Science and Technology Organisation</i>	
Information Theoretic Criteria for Observation-to-Observation Association	260
<i>Islam Hussein, Applied Defense Solutions</i>	
Uncorrelated Track Classification, Characterization, & Prioritization using Admissible Regions and Bayesian Inference	275
<i>Marcus Holzinger, Georgia Institute of Technology</i>	
An AEGIS-CPHD Filter to Maintain Custody of GEO Space Objects with Limited Tracking Data	304
<i>Steven Gehly, University of Colorado at Boulder</i>	
Maneuver Detection and Estimation with Optical Tracklets	314
<i>Keric Hill, Pacific Defense Solutions, Integrity Applications Inc.</i>	

SPACE SYSTEMS

Session Chair: Pat Patterson, Space Dynamics Laboratory

The Case for GEO Hosted SSA Payloads	324
<i>Carol Welsch, Orbital Sciences Corp.</i>	
Concepts for an Enhanced CubeSat GEO Space Situational Awareness Architecture	333
<i>Keith Morris, Lockheed Martin Space Systems Company</i>	
Flexible Next-Generation Space-Based SSA Payload	343
<i>Alan Scott, COM DEV International</i>	
The Near Earth Object Surveillance Satellite: Mission Status and CCD Evolution After 18 Months On-orbit	351
<i>Brad Wallace, Defence Research and Development Canada</i>	

NON-RESOLVED OBJECT CHARACTERIZATION

Session Chair: Matt Hejduk, a.i. solutions

Interpretation of Spectrometric Measurements of Active Geostationary Satellites	360
<i>Donald Bedard, Royal Military College of Canada</i>	
Bi-static Optical Observations of GEO Objects	376
<i>Patrick Seitzer, University of Michigan Astronomy</i>	
Optical Characterization of Deep-Space Object Rotation States	384
<i>Doyle Hall, Boeing</i>	
Effects of Optical and Geometrical Properties on YORP Effect for Inactive Satellites	394
<i>Antonella Albuja, University of Colorado, Boulder</i>	
Propagation of Bayesian Belief for Near-real Time Statistical Assessment of Geosynchronous Satellite Status Based on Non-Resolved Photometry Data	403
<i>Anil Chaudhary, Applied Optimization, Inc.</i>	
Comparison of Unscented Kalman Filter and Unscented Schmidt Kalman Filter in Estimating Attitude and Associated Uncertainty of Geosynchronous Satellite	440
<i>Charles Wetterer, Integrity Applications Incorporated-PDS</i>	

ADAPTIVE OPTICS AND IMAGING

Session Chair: Charles Matson, Air Force Office of Scientific Research

A Wavefront Sensor to Detect Dim Objects.....	450
<i>Mala Mateen, Air Force Research Laboratory</i>	
Gemini Planet Imager First Light: Advancing High Contrast Adaptive Optics	457
<i>S. Mark Ammons, Lawrence Livermore National Laboratory</i>	
Research into a Single-aperture Light Field Camera System to Obtain Passive Ground-based 3D Imagery of LEO Objects	465
<i>Kenneth Bechis, Northrop Grumman Information Systems</i>	
Optimal Dictionaries for Sparse Solutions of Multi-frame Blind Deconvolution	474
<i>Bobby Hunt, Integrity Applications Inc.-PDS</i>	
Demonstration of Uncued Optical Surveillance of LEO	482
<i>Peter Zimmer, J.T. McGraw & Assoc., LLC</i>	
The Navy Precision Optical Interferometer for SSA: A Progress Report.....	497
<i>Sergio Restaino, US Naval Research Laboratory</i>	

DAYLIGHT IMAGING

Session Chair: Stacie Williams, Air Force Research Laboratory

The Daniel K. Inouye Solar Telescope: A Project Update	501
<i>Thomas Rimmele, National Solar Observatory</i>	
Inertially-Aided Image Stabilization.....	511
<i>Steve Griffin, Boeing</i>	
Daylight Imaging of SSA Targets Through Distributed Volume Non-Kolmogorov and Anisotropic Deep Turbulence at Low Elevation Angles	516
<i>Jeremy Bos, Air Force Research Laboratory</i>	
Automating Image Enhancement Optimization Using Image Quality Metrics	524
<i>David Gerwe, Boeing Phantomworks Adv. Network and Space Systems</i>	

SPACE WEATHER

Session Chair: Randall Alliss, Northrop Grumman

Automated Recognition of Type III Solar Radio Bursts Using Mathematical Morphology	529
<i>James Jones, Northrop Grumman</i>	
Propagation of Forecast Errors from the Sun to LEO Trajectories: How Does Drag Uncertainty Affect Conjunction Frequency?	536
<i>John Emmert, Naval Research Laboratory</i>	
LSP Simulation and Analytical Results on Electromagnetic Wave Scattering on Coherent Density Structures.....	546
<i>Vladimir Sotnikov, Air Force Research Laboratory</i>	
Numerical Simulations of Optical Turbulence Using an Advanced Atmospheric Prediction Model: Implications for Adaptive Optics Design	547
<i>Randall Alliss, Northrop Grumman Corporation</i>	

SENSOR PROCESSING

Session Chair: Paul Sydney, IAI-PDS

Improvements in Space Surveillance Processing for Wide Field of View Optical Sensors	558
<i>Paul Sydney, Integrity Applications Incorporated-PDS</i>	
Ground Optical Signal Processing Architecture for Contributing SSA Space Based Sensor Data	568
<i>Darin Koblick, Millennium Space Systems</i>	
Serendipitous Acquisition of Space Situational Awareness from Astronomical and Survey Sensors (SASSAFRASS)	580
<i>Mark Bolden, Pennsylvania State University</i>	
Faint Debris Detection by Particle Based Track-Before-Detect Method	587
<i>Masahiko Uetsuhara, The Institute of Statistical Mathematics</i>	
Track-Before-Detect Algorithm for Faint Moving Objects based on Random Sampling and Consensus	597
<i>Phan Dao, Air Force Research Laboratory</i>	
Image Stacking Techniques for GEO Satellites.....	607
<i>Grant Privett, Defence Science and Technology Laboratory</i>	
Measuring Close Binary Stars with Speckle Interferometry.....	615
<i>Keith Knox, Air Force Research Laboratory</i>	

POSTER PRESENTATIONS

SSA Modeling and Simulation with DIRSIG	626
<i>David Bennett, Lockheed Martin Advanced Technology Center</i>	
An Analysis of Debris Orbit Prediction Accuracy from Short-arc Orbit Determination Using Optical and Laser Tracking Data	633
<i>James Bennett, RMIT University / EOS Space Systems</i>	
Optical Survey of the Tumble Rates of Retired GEO Satellites	642
<i>Christopher Binz, Naval Research Laboratory</i>	
GEODSS Overview.....	660
<i>Robert Bruck, BAE Systems</i>	

The Falcon Telescope Network	669
<i>Francis Chun, Air Force Academy, Department of Physics</i>	
Rotation Rates of Inactive Satellites Near Geosynchronous Earth Orbit.....	675
<i>Rita Cognion, Oceanit</i>	
Determining Satellite Rotation Rates for Unresolved Targets Using Temporal Variations in Spectral Signatures	684
<i>Joseph Coughlin, Stinger Ghaffarian Technologies (SGT)</i>	
NASA's Optical Measurement Program 2014 H.....	697
<i>Heather Cowardin, Jacobs</i>	
Measuring Geosynchronous Satellites from Stellar Appulses with AO	707
<i>Jack Drummond, Air Force Research Laboratory</i>	
Computer Vision Techniques Applied to Space Object Detect, Track, ID, Characterize.....	714
<i>Brien Flewelling, Air Force Research Laboratory</i>	
Use of Hierarchical Mixtures of Experts to Detect Resident Space Object Attitude	724
<i>David Gaylor, University of Arizona</i>	
Compliant Baffle for Large Telescope Daylight Imaging.....	734
<i>Steven Griffin, Boeing</i>	
SOFIA Cycle 2 Science Status and Targets of Opportunity	739
<i>Helen Hall, University Space Research Association</i>	
Quantitative Measurements of the Daytime Near Infrared Sky Brightness at the AEOS 3.6 m Telescope	745
<i>Michael Hart, Hart Scientific Consulting International, LLC</i>	
A New Approach to Computing Information in Measurements of Non-resolved Space Objects by the Falcon Telescope Network	753
<i>Douglas Hope, United States Air Force Academy</i>	
Probabilistic Admissible Region for Short-Arc Angles-Only Observations	761
<i>Islam Hussein, Applied Defense Solutions</i>	
Collision Avoidance: Coordination of Predicted Conjunctions between NASA Satellites and Satellites of other Countries.....	771
<i>Angelita Kelly, National Aeronautics and Space Administration</i>	
Spacecraft Orbit Anomaly Representation Using Thrust-Fourier-Coefficients with Orbit Determination Toolbox.....	779
<i>Hyun Chul Ko, University of Colorado Boulder</i>	
NASA's Newest Orbital Debris Ground-based Telescope Assets: MCAT and UKIRT	789
<i>Susan Lederer, National Aeronautics and Space Administration</i>	
Characterization of Inactive Rocket Bodies via Non-Resolved Photometric Data	798
<i>Richard Linares, Los Alamos National Lab</i>	
An Adaptive, Agile, Reconfigurable Photonic System for Handling Analog Signals.....	813
<i>Charles Middleton, Harris Corporation</i>	
Relative Cost and Performance Comparison of GEO Space Situational Awareness Architectures.....	821
<i>Keith Morris, Lockheed Martin Space Systems Company</i>	
The Joint Space Operations Center (JSpOC) Mission System (JMS) and the Advanced Research, Collaboration, and Application Development Environment (ARCADE)	832
<i>Jeremy Murray-Krezan, AFRL</i>	
Fast Tomographic Reconstruction of Atmospheric Turbulence from Micro-lens Imagery	844
<i>James Nagy, Emory University</i>	

Fusion of Telescopic and Doppler Radar Data	853
<i>Mirko Navara, Czech Technical University in Prague, Faculty of Electrical Engineering</i>	
SpinSat Mission Preliminary Results	862
<i>Andrew Nicholas, Naval Research Laboratory</i>	
Optical Observation, Image-processing, and Detection of Space Debris in Geosynchronous Earth Orbit	868
<i>Hiroshi Oda, Japan Aerospace Exploration Agency (JAXA)</i>	
Parametric Characterization of SGP4 Theory and TLE Positional Accuracy	876
<i>Dan Oltrogge, Analytical Graphics, Inc.</i>	
Data Reduction Algorithm for Optical Wide Field Patrol (OWL)	894
<i>Sun-young Park, Korea Astronomy & Space Science Institute (KASI)</i>	
A Community Format for Electro-Optical Space Situational Awareness (EOSSA) Data Products.....	900
<i>Tamara Payne, Applied Optimization Inc.</i>	
Identifying On-Orbit Test Targets for Space Fence Operational Testing.....	908
<i>Daniel Pechkis, Institute for Defense Analyses</i>	
Doublet Pulse Coherent Laser Radar for Orbital Debris Tracking of Resident Space Objects	917
<i>Narasimha Prasad, NASA Langley Research Center</i>	
Development and Analysis of a Waffle Constrained Reconstructor (WCR) for Fried Geometry Adaptive Optics Systems.....	927
<i>Robert Praus, MZA Associates Corporation</i>	
Simulation of Telescope Detectivity for Geo Survey and Tracking.....	935
<i>Pascal Richard, CNES</i>	
Clients of SSA Net-Ready Data	943
<i>David Richmond, Lockheed Martin</i>	
Diagnostic Comparisons of Near-Earth Object Identification using Slit Spectroscopy and Slitless Grating Methods	954
<i>Eileen Ryan, New Mexico Institute of Mining and Technology</i>	
On LEO Debris Orbit Prediction Performance Using Tracking Data from a Single Station	962
<i>Jizhang Sang, Wuhan University</i>	
Manyscale Computing for Sensor Processing in Support of Space Situational Awareness.....	963
<i>Mark Schmalz, University of Florida</i>	
Practical Issues Related to the Interferometric Imaging of Geosats	964
<i>Henrique Schmitt, Naval Research Laboratory</i>	
Using a Smartphone Camera for Nanosatellite Attitude Determination.....	973
<i>Rogan Shimmin, SGT</i>	
Optical and UV Sensing Sealed Tube Microchannel Plate Imaging Detectors with High Time Resolution	986
<i>Oswald Siegmund, University of California, Space Sciences Lab</i>	
A Short Evaluation of Triangulated Range from Multiple Angles-Only Sites	996
<i>Zach Slatton, 614 AOC/SSD</i>	
Interchange and Flow Velocity Shear Instabilities in the Presence of Finite Larmor Radius Effects.....	1006
<i>Vladimir Sotnikov, Air Force Research Laboratory</i>	
Follow-up Observatory for Low Earth Orbit Objects with a Detection Algorithm Using Streaks	1007
<i>Makoto Tagawa, Kyushu University</i>	

Joint Processing of Visible and Long-Wave Infrared Imagery 1012
Daniel Thompson, Boeing

Exploiting the Magnetic Origin of Solar Activity in Forecasting Thermospheric Density Variations..... 1019
Harry Warren, Naval Research Laboratory

Recent Developments in Advanced Automated Post-Processing at AMOS 1028
Michael Werth, Boeing

Comparison of Radiation Pressure Perturbations on Rocket Bodies and Debris at
 Geosynchronous Earth Orbit 1034
Charles Wetterer, Integrity Applications Incorporated-PDS

AMORE: Applied Momentum for Orbital Refuse Elimination 1044
Mark Wolfson, Lockheed Martin

Emerging Technologies: Small Satellite and Associated TPED 1050
Robert Zitz, Leidos

APPENDIX

Conference Program 1052

List of Participants 1068
