

2014 Second RSI/ISM International Conference on Robotics and Mechatronics (ICRoM 2014)

**Tehran, Iran
15-17 October 2014**

**IEEE Catalog Number: CFP14RSI-POD
ISBN: 978-1-4799-6744-5**

Table of Contents

The Nonlinear Suboptimal Diving Control of an Autonomous Underwater Vehicle	1
The State-dependent Set-point Regulation and Tracking Control of Horizontal Motion of AUV.....	7
A Comparative Study on SMC, OSMC and SDRE for Robot Control.....	13
Nonlinear Control of a Non-Passive Bilateral Teleoperation in Presence of Unsymmetric Time Varying Delay	19
Robust Distance-Angle Leader-Follower Formation Control of Non-Holonomic Mobile Robots	24
High Precision Electro-Hydraulic Self Leveling Platform system	29
Push Recovery for NAO Humanoid Robot	35
Automated Synthesis of Optimal Controller Using Multi-Objective Genetic Programming For Two-Mass-Spring System.....	41
Comparison of Nearest Neighbor and Probabilistic Data Association Methods for Non-linear Target Tracking Data Association.....	47
Real-Time Haptic Simulation of Soft Tissue Deformation	53
Conceptual Design of a Lower Limb Motion Assist Robot with Bodyweight Support	59
Dynamic Balancing of Two Planar Parallel 3-DOF Mechanisms without Counter-Rotations.....	65
Gas Turbine Fault Detection and Identification by using Fuzzy Clustering Methods	70
Reduced Order Representation of Robust Multi-target Multi-agent Sensor Allocation.....	76
Study on the Effect of Axial Forces on Dynamic Stiffening of a 3-RPR Planar Parallel Manipulator with Flexible Intermediate Links	83
Coverage Control Considering Unknown Moving Obstacles Avoidance	89
Forbidden Region Virtual Fixture for Nonlinear Teleoperation Systems with Variable Time Delays...	9
Free Chattering Sliding Mode Control with Adaptive Algorithm for Ground Moving Target Tracking	101
Dynamics Modeling of a Biped Robot with Active Toe Joints.....	107
Singularity Analysis of a Novel Three Translational DoF Parallel Robot Considering Kinematic Asymmetric Property	113
Coverage Control in Non-Convex Environment Considering Unknown Non-Convex Obstacles	119
Experimental Study on Task Space Control during Physical Human Robot Interaction.....	125
Offline Path Planning, Dynamic Modeling and Gait Optimization of a 2D Humanoid Robot	131
Dynamics Model and Adaptive Control of Underwater Fish-Like Micro Mobile Robot with PZT Actuator	137
Robust Stability for Bilateral Teleoperation Systems Under Time-Varying Delay by Communication Disturbance Observer	143

Effect of Motion Parameters on Time Optimal Path of Biped Robot Using Pso Algorithm	149
Suppression of Dynamic Pull-in Instability in Electrostatically Actuated Strain Gradient Beams.....	155
A high-speed low-power multitask digital vision chip	161
Control of a Pneumatically Actuated 6-DOF Gough-Stewart Platform	166
FPGA Design and Implementation for Real Time Vision Applications on NTACO Mobile Robot.....	172
A Full Bio-Inspired Bipedal Gait Locomotion System	178
An RGB-D Based Social Behavior Interpretation System for a Humanoid Social Robot.....	185
A New Spatiotemporal Virtual Plane to Evaluate the Performance of the Border Coverage Scenarios	191
A Geometrical Approach for Aerial Cooperative Obstacle Mapping using RSSI Observations	197
Development of a Tactile Robot for Tumor Detection and Localization in Biological Liver Tissue	203
Sliding Impedance Control for Improving Transparency in Telesurgery	209
Video-Based Multiple Vehicle Tracking at Intersections	215
Networked Control of Mobile Robots Using Switched Systems Theory	221
Damping Control of a Quadrotor with Swinging Load Using Input Shaping Method	227
Dynamics Modeling of Fully-Actuated Humanoids with General Robot-Environment Interaction ...	233
Online Time-Optimal Trajectory Planning In Dynamic Workspace of Cable Suspended Robots.....	239
Low Speed Control of AC Servo Motors in No-Load Conditions	245
Improving Transparency in Macro-Micro Tele-manipulation by Means of External Force Estimation	250
Designing a 2-DOF Passive Mechanism for Dynamical Calibration of MEMS-based Motion Sensors	256
TL-OSR, a Low Cost Mobile Robot with Open-source Technology Based on Sensor Fusion.....	262
Modeling of a Two-Stage Flapper-Nozzle electro-hydraulic servo valve exposed to acceleration ...	268
Error Based Self-Regulating PID Angle Control of Variable Structure Redundant Brushed DC Motors	274
Dynamic Modeling and Computed Torque Control of a 3-DOF Spherical Parallel Manipulator	280
Indirect Optimal Trajectory Planning of Robotic Manipulators with Homotopy Continuation Technique.....	286
Ball Tracking with a 2-DOF Spherical Parallel Robot Based on Visual Servoing Controllers	292
Parameter Estimation of Hammerstein-Wiener ARMAX Systems Using Unscented Kalman Filter ...	298
Parallel Spring Simplifies Actuator Output Torque And Improves Feed-Forward Learning	304
Comparing Two Online Tip-Over Avoidance Algorithms for Mobile Manipulators	310
An Online Implementation of Robust RGB-D SLAM.....	316
Workspace Determination of Planar Parallel Robots via Progressive Growing Neural Gas Network	322
System Identification of a Humanoid Robot Power Transmission System	328

Range Image Denoising using a Custom Built Multiscale Transform	333
Design and Fabrication of a Robotic Tactile Device for Abdominal Palpation	339
Fuzzy Coordination Graphs and Their Application in Multi Robot Coordination under Uncertainty.	345
Cooperative Formation Control of Quadrotors with Obstacle Avoidance and Self Collisions Based on a Hierarchical MPC Approach.....	351
Coordinated trajectory tracking and collision-avoidance in dynamic environment for robots with double-integrated nonlinear dynamics.....	357
Stable Walking of a Quadruped Robot on Uneven Terrains with Friction Constraints.....	364
Energy Dissipation Rate Control for Planar quadruped bouncing Robot Based on the Property of Passive Dynamic Walking	370
A Robust Adaptive Linear Control for a Ball Handling Mechanism	376
Improving the stability of gait planning for quadruped robots	382
Coverage Control of a Dynamic Large-Scale Environment Using Sector-Based Sensors.....	388
Recursive Kane formulation for deriving the equations of motion a chain of robotic arms	393
Velocity alignment for multiple agents based on topological distance with external disturbances..	399
Visual Servoing Control of Robot Manipulator with Jacobian Matrix Estimation.....	405
Trajectory Tracking of the Quadrotor using Stabilizer Mechanisms.....	410
Control of Non-Linear Systems with Fast Varying-Parameters Using Adaptive-SMC Compensated by Short-Time Linear Quadratic Form Technique	416
On The Determination of the Maximal Inscribed Ellipsoid in the Wrench-Feasible Workspace of the Cable-Driven Parallel Robots.....	422
A Human Electrocardiogram Signal Processing Algorithm for Real-Time Control and Monitoring Applications.....	428
Design and impelmentation of a speaker verification system using i-vector and Support Vector Machines.....	434
Elbow Rehabilitation Robot with Cable Actuation: First Experimental Results	440
Design, Developement, Dynamic Analysis and Control of a 2-DOF Spherical Parallel Mechanism ...	445
A Region Based CAMShift Tracking with a Moving Camera	451
Paths of Two-Wheeled Self-Balancing Vehicles in the Horizontal Plane.....	456
Regrasp Planning through Throwing and Catching.....	462
Trajectory Tracking Control of Autonomous Underactuated Hovercraft Vehicles with Limited Torque	468
Statics Modeling of Planar Continuum Robots Using Virtual Energy Method	474
Finite Circular Elements for Modeling of Continuum Robots	480
Impedance Control of the 3RPS Parallel Manipulator	486

Empirical Study on Effect of Surface Texture and Grain Size on Displacement Measurement of Optical Flow Sensors	493
Design, Analysis and Optimization of a Novel Capacitive Pressure Sensor Based on Vertical Comb-Grid Configuration	498
Cooperative Object Transportation by Multiple Mobile Manipulators through a Hierarchical Planning Architecture.....	503
The fuzzy expert system for hip motion enhancement in gait trainer robot	509
Dynamics Synchronization of the Running of Planar Biped Robots with SLIP Model in Stance Phase	516
Mechatronics Modeling of a Branching Tendon-driven Robot.....	522
New reptile based omni-direction locomotion for a quadruped robot	528
Design of an Economical SCARA Robot for Industrial Applications	534
Attitude Control an Autonomous Octorotor	540
Multi Criteria Design of a Spherical 3-DoF Parallel Manipulator for Optimal Dynamic Performance	546
Modeling and adaptive sliding mode control of Samen SpaceCam	552
Optimal Path Planning for DRSSI based Localization of an RF Source by Multiple UAVs	558
Aerial Obstacle EstimationUsing RSSI Observations based on OHLOSS diffraction Model	564
Pattern Generation for Humanoid Robot with Natural ZMP Trajectory	570
Closed-Form Dynamic Formulation of Spherical Parallel Manipulators by Gibbs-Appell Method	576
An Improved Optimization Method for iSAM2	582
Learning of Gestures by Imitation using a Monocular Vision System on a Humanoid Robot.....	588
Dynamic behavior analysis of a planar four-bar linkage with three clearances joints	595
Geometric Design of 3R Manipulators for Three Precision Poses Using Dual Quaternions	601
A Vision-based Automatic Hotline Tracking Approach Using Unscented Kalman Filter	607
A Fuzzy Logic Based Motion Control for Nonholonomic Mobile Manipulator Robots	613
Design of a Fuzzy Controller by Minimum Controlling Inputs for a Quadrotor	619
Inverse Dynamics and Ground Reaction Force Estimation During Walking.....	625
Derivation of Dynamic Equations and Parametric Analysis for Dual Arm Mobile Manipulators using Recursive Gibbs-Appell Formulation	631
Adaptive Impedance Control of UAVs Interacting with Environment Using a Robot Manipulator ...	636
A Soccer Playing Humanoid Robot: Design, Algorithm and Prototype	642
The Design, Implementation, and Stability Analysis of a Human-Inspired Dome-Tethered Robot...	648
Numerical Study of a Novel Microfluidic Electroosmotic Mixer with High and Fast Throughput	654
Design, Simulation and Optimization of a Novel DC Electroosmotic Micro-infusion Pump	660

Management of Change propagation in Mechatronic Product Design Based on Minimum Cost of Changes	666
Mechanical Design, Implementation and Tracking Control of a Seven Degree of Freedom Redundant Manipulator using Discontinuous Lyapunov-based Controller.....	672
A Fast Kinematic-Based Control Method for Lower-limb Power Augmentation Exoskeleton.....	678
4-D body posture in sagittal plane for care-receiver patient can be estimated by using only two low-resolution tactile sensors mounted on robot arms	684
Implementation of Analytic Iterative Redundancy Resolution Technique on KNTU Cable Robot	690
Fuzzy Logic Technique to Control a Robot Based on Non-Invasive Brain Computer Interface by Human Group.....	695
A Real-time Coverage and Tracking Algorithm for UAVs based on Potential Field	700
Geometric control of the brachiation robot using controlled lagrangians method	706
RoboParrot: A Robotic Platform for Human Robot Interaction, case of Autistic Children	711
Determining Mood via Emotions Observed in Face by Induction	717
Computing a configuration skeleton for motion planning of two round robots on a metric graph	723
Adaptive H^∞ controller Based on GA-Hybrid Wavelet RBF for Robot Arm	730
Adaptive Position/Force Control of Robot Manipulators with Force Estimation	736
Robust Output Feedback Control for a Class of Nonlinear Systems	742
Effect of Utilizing a Humanoid Robot as a TherapyAssistant in Reducing Anger, Anxiety, and Depression	748
The Effect of Employing Humanoid Robots for Teaching English on Students' Anxiety and Attitude	754
Social Robots as Assistants for Autism Therapy: Research in Progress.....	760
Trajectory Tracking Control Law for a Tractor-Trailer Wheeled Mobile Robot	767
Actor-Critic Neural Network Reinforcement Learning for Walking Control of a 5-Link Biped Robot	773
Analysis of Tactile Imprints for Multi-Fingered Robot Hands.....	779
Synthesis of System for Automatic Formation of Multilink Manipulator Velocity.....	785
Detecting finger movement through classification of electromyography signals for use in control of robots	791
A system for feature classification of emotions based on Speech Analysis; Applications to Human-Robot Interaction	795
Two steps optimization path planning algorithm for robot manipulators using imperialist competitive algorithm.....	801
Identification of Flexible Link by a Novel Recursive Maximum Likelihood Method	807
Brain-Robot interface: distinguishing left and right hand EEG signals through SVM	813
A Mechatronic System Mounted on Insole for Analyzing Human Gait.....	817
Fast Object Tracking with Long-Term Occlusions Handling in Dynamic Scenes	823

Using Rapidly Random Trees and Linear Programming for Stable Operation of a Multi-Robot System on Domes	828
Control System Design of an Active Assistive Exoskeletal Robot for Rehabilitation of Elbow and Wrist	834
Stable Walking of Quadruped Robots Using Fuzzy Back-stepping Approach.....	840
A Control Approach for Five Bar Linkage Manipulator Based on Imperialist Competitive Algorithm	846
Gait Generation and Transition for a Five-Link Biped Robot by Central Pattern Generator	852
Fuzzy Supervisory Assisted Impedance Control to Reduce Collision Impact	858
Optimum Determination of Motor Mount locations for a Cable-driven Rehabilitation Robot	864
Adaptive Robust Sliding Mode Controller Design for Full Control of Quadrotor with External Disturbances.....	870
Nonlinear Optimal Control via Finite Time Horizon State-dependent Riccati Equation	878
Gait Analysis of Walking with Scottish Rite Orthosis	884
LQR Motion Control and Analysis of a Prototype Spherical Robot.....	890
Offset Free Adaptive Neural Network based Predictive Control for Pneumatic Servo System	896
Transformation Invariant 3D Object Recognition Based On Information Complexity.....	902
Trilateral Filtering of Range Images Using Normal Inner Products.....	908
Simulation and Analysis of a TET-Walker Robot Motion	914
Multi Scale CRF Based RGB-D Image Segmentation Using Inter Frames Potentials.....	920
Development of the Tuning Formula for Unstable First Order Processes with Time Delay	926
Attitude Control Using an Extended Classifier System Algorithm for Offline Auto-Tuning of a PID Controller	930
Adaptive Handshaking between Humans and Robots, Using Imitation; Based on Gender-Detection and Person Recognition.....	936
