

8th South African Conference on Computational and Applied Mechanics

(SACAM 2012)

**Johannesburg, South Africa
3-5 September 2012**

Editors:

**D.M. Madyira
A.L. Nel**

N. Janse van Rensburg

ISBN: 978-1-63439-715-5

Printed from e-media with permission by:

List of Papers

Paper ID	Paper Title	Page
7	Analysis of functionally graded actuator plates	1
12	Preliminary Experimental Performance of a Solar Biomass Briquette Dryer	11
13	Exact solutions and numerical simulation of longitudinal vibrations of the rayleigh-love rods with variable cross-section	17
19	Finite element modelling of corneal strip extensometry	24
20	Analysis of the porous structure of packed beds of spheres using computed X-ray tomography	31
22	Development of a Model-based Wheel Slip Control Using Feedback Linearisation	37
23	On the resonance behaviour of accreting rod	44
26	Propagation of Arbitrarily-Shaped Shock Waves	48
27	High Speed Autonomous Off-Road Vehicle Steering	52
28	Semi-active suspension control of an off-road vehicle for ride comfort optimization	59
29	A three dimensional static and free vibration analysis using RHT-spline formulation	66
32	Multi-Objective Optimisation of Friction Stir Welding Process Parameters	72
34	Experimental Evaluation of the Dependence of the Optical Properties of Glass on the Angle of Incidence	79
37	Measurement of Guided Ultrasonic Waves in Rails	88
38	Numerical Modelling of Defects in Rails	95
39	Guided Elastic Waves Produced by a Periodically Joined Interface in a Rock Mass	101
40	A Parameter for the Selection of an Optimum Balance Calibration Model by Monte Carlo Simulation.	106
42	Three-dimensional Curved Shock Wave Interactions with Slender Bodies at Incidence	118
53	The use of orientational order parameters for characterisation of coastal breakwaters	128
56	Simulation of the Vacuum Infusion Process	133
58	Dynamics of a Heaving Point Buoy for Extracting Sea Wave Energy	143
62	The Finite Element Method and its Link to the Finite Difference Method for Poisson's Equation	148
63	Tuning a Le Mans Car Suspension in ADAMS	154
67	Tutorial on state variable based plasticity: An Abaqus UHARD subroutine.	158
68	Numerical Simulation and Experimental Testing of a Le Mans Prototype Steering Column	166
75	Strongly Coupled Partitioned Fluid-Structure Interaction Algorithm Using Proper Orthogonal Decomposition	173
77	Studying the influence of hydrogel injections into the infarcted left ventricle using the Maximum Entropy approximation	181
88	A numerical investigation of the effect of the manufacturing process on the fatigue performance of conveyor pulleys	188
91	Stochastic effect of strain-rate sensitivity on nanomaterials mechanical properties	198
92	Tutorial on geometrically non-linear finite element analysis including an assumed stress formulation	203
93	The evaluation of MiL-Lx and Hybrid III Leg using Hybrid III and EUROSID2_re Anthropomorphic Test Devices	222
99	Conjugate Three-Dimensional Numerical Analysis of Heat Transfer in a Minichannel with Changing Geometrical Constraints and Thermal Conductivity	228
100	Analysis of Natural Convection in a Mono-Span Naturally Ventilated Greenhouse	234
104	Address TB Infection Prevention and Control in the Design Phase of Health Facilities: A Computational Fluid Dynamics Case Study	244
108	Molecular Dynamics Simulation of the Effect of Amine Functionalisation on the Elastic Properties of Single and Double Walled Carbon Nanotubes	249
112	Effect of Enhancing the Infusion Pressure on Compaction Behaviour of Preform in Vacuum Enhanced Zresin Infusion Technology Composite Manufacturing Process	256
114	The Future of SA Transport: Designing Road Trains using Multi body Dynamics Simulation	262
