

# **2014 Eighth Brazilian Symposium on Software Components, Architectures and Reuse**

**(SBCARS 2014)**

**Alagoas, Brazil  
29-30 September 2014**

**IEEE Catalog Number: CFP1434L-POD  
ISBN: 978-1-4799-7861-8**

# 2014 Eighth Brazilian Symposium on Software Components, Architectures and Reuse

## SBCARS 2014

### Table of Contents

Message from Program Chair .....	vii
Conference Organization.....	viii
Program Committee.....	ix
Reviewers .....	xi
Steering Committee .....	xii
Keynotes.....	xiii
Best Paper Awards .....	xv

---

#### Technical Session 1: Dynamic Adaptation

A Self-Adaptation Strategy for Service-Based Architectures .....	1
<i>Nuno Oliveira and Luís S. Barbosa</i>	
An Approach for Managing Quality Attributes at Runtime Using Feature Models .....	11
<i>Luis Emiliano Sánchez, J. Andrés Díaz-Pace, Alejandro Zunino, Sabine Moisan, and Jean-Paul Rigault</i>	
Reference Architectures for Self-Managed Software Systems: A Systematic Literature Review .....	21
<i>Frank J. Affonso, Katia R.F. Scannavino, Lucas B.R. Oliveira, and Elisa Y. Nakagawa</i>	

#### Technical Session 2: Process

Is Exception Handling a Reusable Aspect? .....	32
<i>Adauto Almeida, Emanuel Barreiros, Juliana Saraiva, Fernando Castor, and Sérgio Soares</i>	

SPLICE: A Lightweight Software Product Line Development Process for Small and Medium Size Projects .....	42
<i>Tassio Vale, Bruno Cabral, Loreno Alvim, Larissa Soares, Alcemir Santos, Ivan Machado, Iuri Souza, Ivonei Freitas, and Eduardo Almeida</i>	
Domain Engineering: A Practical Application in Analysis and Design of a Generative Query Language .....	53
<i>Daniella Rodrigues Bezerra and Raimundo da Silva Barreto</i>	
<b>Technical Session 3: Secondary Studies</b>	
How to Describe SPL Variabilities in Textual Use Cases: A Systematic Mapping Study .....	64
<i>Ismayle Sousa Santos, Rossana M.C. Castro Andrade, and Pedro A. Santos Neto</i>	
Development of Critical Embedded Systems Using Model-Driven and Product Lines Techniques: A Systematic Review .....	74
<i>Paulo Gabriel Gadelha Queiroz and Rosana Teresinha Vaccare Braga</i>	
Bad Smells in Software Product Lines: A Systematic Review .....	84
<i>Gustavo Vale, Eduardo Figueiredo, Ramon Abílio, and Heitor Costa</i>	
<b>Technical Session 4: Formal Composition, Concurrency and Reliability</b>	
On the Formal Interpretation of SysML Blocks Using a Safety Critical Case Study .....	95
<i>Jaco Jacobs and Andrew Simpson</i>	
Analysis of the Impact of Implied Scenarios on the Reliability of Computational Concurrent Systems .....	105
<i>Alexandre Vaz Roriz, Genáína Nunes Rodrigues, and Luiz A. Laranjeira</i>	
<b>Author Index</b> .....	115
