

2014 Ubiquitous Positioning Indoor Navigation and Location Based Service

(UPINLBS 2014)

**Corpus Christi, Texas, USA
20-21 November 2014**

**IEEE Catalog Number: CFP1452K-POD
ISBN: 978-1-4799-6005-7**

Table of Contents

Use of Diversity Techniques for Weak GNSS Signal Tracking in Fading Environments Siddakatte R. K., Broumandan A. and Lachapelle G.	1
Weak GPS Signal Acquisition Using Antenna Diversity Mozaffari M., Broumandan A., O’Keefe K. and Lachapelle G.	11
Performance Evaluation of Carrier-to-Noise Density Ratio Estimation Techniques for BeiDou B1 Signal Bhuiyan M. Z. H., Söderholm S., Thombre S., Ruotsalainen L., Kirkko-Jaakkola M. and Kuusniemi H	19
Infrastructure for Benchmarking RF-based Indoor Localization Under Controlled Interference Lemic F., Büsch J., Chwalisz M., Handziski V. and Wolisz A.	26
Evaluation of Angle of Arrival Estimation for Localization in Multiple Indoor Environments Wielandt St., Van Nieuwenhuysse A., Nauwelaers B., Goemaere J.-P. and De Strycker L.	36
Experimental Evaluation of the Spatial Error Distribution of Indoor Localization Algorithms Adler St., Schmitt S. and Kyas M.	44
A new Non-Linear Filtering Algorithm for Road-Constrained Vehicle Tracking Peisker A., Morelande M. and Kealy A.	54
Performance of a MEMS IMU Deeply Coupled with a GNSS Receiver under Jamming Kirkko-Jaakkola M., Ruotsalainen L., Bhuiyan M. Z. H., Söderholm St., Thombre S. and Kuusniemi H.	64
Characterization of GNSS Measurement Distortions due to Antenna Array Processing in the Presence of Interference Signals Vagle N., Broumandan A., Jafarnia A. and Lachapelle G	71
Accelerated Collective Detection Technique for Weak GNSS Signal Environment Narula L., Petovello M. G. and K. P. Singh	81
Development of a Contextual Thinking Engine in Mobile Devices Chen R., Chu T., Wenchao X., Li X, Liu J., Chen Y., Chen L., Hyypä J. and Tang J.	90
Semantic Labeling of Places Based on Phone Usage Features Using Supervised Learning Rivero-Rodriguez A., Leppäkoski H. and Piché R.	97
Thinking Aloud in Search of Landmark Characteristics in an Indoor Environment Viaene P., Vanclooster A., Ooms K. and De Maeyer P.	103
Evaluation of an Autonomous Navigation and Positioning System for IAEA Safeguards Inspectors Finker D., Cai R., Kocjan J. and Rutkowski J.	111
Small-Scale UAS for Geoinformatics Applications on an Island Campus Starek M. J., Davis T., Prouty D. and Berryhill J.	120
Human-Subject Tracking and Localization for a Hand Hygiene Monitoring System Wan Y., Wang N. and Stombaugh T.	128
Ariadne’s Thread: Robust Turn Detection for Path Back-Tracing Using the iPhone? Flores G. H., Manduchi R. and Zenteno E. D.	133
Resolving Positions of Coherent Sources Using Linear Antenna Arrays at 2.4 GHz Van Nieuwenhuysse A., Wielandt St., Goemaere J.-P., De Strycker L. and Nauwelaers B.	141

Efficient WiFi Fingerprint Training Using Semi-Supervised Learning Yuan Y., Pei L., Xu Ch. Liu Q. and Gu T.	148
A Context Detection Approach Using GPS Module and Emerging Sensors in Smartphone Platform Xu W., Chen R., Chu T., Kuang L., Yang Y., Li X., Liu J. and Chen Y.	156
Modeling Acoustic Localization Accuracy for Scalable Energy Consumption in Wireless Sensor Swarms Chakraborty J., Ottoy G., Goemaere J. and De Strycker L.	164
Integrating Monocular Vision and Laser Point for Indoor UAV SLAM Zeng Q., Wang Y., Liu J., Chen R. and Deng X.	170
Non-Line-of-Sight Mobile Station Positioning Algorithm Using TOA, AOA, and Doppler-Shift Ramlall R., Chen J. and A. Lee Swindlehurst	180
Entropy-Based Non-Line of Sight Identification for Wireless Positioning Systems Alsindi N., Chaloupka Z. and Aweya J.	185
Evolutionary Optimization of Sensor Deployment for an Indoor Positioning System with Unknown Number of Anchors Domingo-Perez F., Lázaro Galilea J. L., Wieser A., Martín-Gorostiza E. and Salido-Monzú D.	195
Object Level Mapping of an Indoor Environment Using RFID Malla H., Purushothaman P., Rajan Sh. V. and Balasubramanian V.	203
Real-Time Indoor Mapping by Fusion of Structured Light Sensors Kusari A., Pan Z. and Glennie C.	213
Gyroscope Assisted Scalable Visual Simultaneous Localization and Mapping Babu B. W., Cyganski D. and Duckworth J.	220
Comparison of Multiple Fault Detection Methods for Monocular Visual Navigation with 3D Maps Li Z. and Wang J.	228
Infrared Local Positioning System Using Phase Differences Martín-Gorostiza E., Meca Meca F. J., Lázaro-Galilea J. L., Salido-Monzú D., Martos Naya E. and Wieser A.	238
To Wireless Fidelity and Beyond – CAPTURE, Extending Indoor Positioning Systems Cullen G., Curran K., Santos J. and Maguire G. and Bourne D.	248
Indoor Localisation for Wheeled Platforms Based on IMU and Artificially Generated Magnetic Field Hellmers H., Norrdine A., Blankenbach J. and Eichhorn A.	255
TDOA Navigation Using CDMA2000 Signals – Experimental Results Sadowski J.	265
Fast WiFi Access Point Localization and Autonomous Crowdsourcing Zhuang Y., Wright B., Syed Z., Georgy J. and El-Sheimy N.	272
Wifi-Based Indoor Localization and Tracking of a Moving Device Hernández N., Ocaña M. Alonso J. M. and Kim E.	281
