

# **2014 Signal Processing: Algorithms, Architectures, Arrangements, and Applications**

## **(SPA 2014)**

**Poznan, Poland  
22-24 September 2014**

**IEEE Catalog Number: CFP1407D-POD**  
**ISBN: 978-1-4799-9980-4**

# Table of Contents

|                           |     |
|---------------------------|-----|
| General Information ..... | 5   |
| Program Summary .....     | N/A |

## TUTORIALS:

|                                                                                                                                   |    |
|-----------------------------------------------------------------------------------------------------------------------------------|----|
| 1. Georgios B. Giannakis, Signal Processing for Big Data .....                                                                    | 9  |
| 2. Heinrich Theodor Vierhaus, New Ways of Doctoral Education in the Age of Cyber Physical Systems .....                           | 10 |
| 3. Tuomas Virtanen, Compositional Models For Signal Processing - Perspectives from Audio Processing .....                         | 11 |
| 4. Rolf Kraemer, Wireless 100Gb/S and Beyond: Challenges and Approaches to Achieve Ultra-High Speed Wireless Communications ..... | 12 |

## SESSION 1: DSP Theory and Implementation

|                                                                                                                             |    |
|-----------------------------------------------------------------------------------------------------------------------------|----|
| 5. Andrzej Dobrucki, Maciej Walczyński, Wojciech Bożejko, Parallel LMS-based Adaptive Algorithms of Echo Cancellation ..... | 13 |
| 6. Zbigniew Piotrowski, Jarosław Wojtuń, Comparison of Selected Steganography Algorithms .....                              | 19 |
| 7. Felix Albu, Henri Coanda, A Fast Filtering Proportionate Affine Projection Sign Algorithm .....                          | 25 |
| 8. Jarosław Majewski, Ryszard Wojtyna, Neural Network Learning to Discover Laws Ruling Noisy Empirical Data .....           | 31 |

## SESSION 2: Image and Video Processing

|                                                                                                                                                     |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------|----|
| 9. Steffen Wulf, Udo Zölzer, Investigation of Distortion-Constrained Video Encoding and its Application to Visual Saliency Guided Compression ..... | 36 |
| 10. Felix Albu, Peter Corcoran, Transformed Integral Projection Method for Global Alignment of Second Order Radially Distorted Images .....         | 42 |
| 11. Michał Strzelecki, Andrzej Materka, On Sensitivity of Texture Parameters to Smooth Variations of Local Image Intensity and Contrast .....       | 48 |
| 12. Grzegorz Szwoch, Parallel Background Subtraction in Video Streams using OpenCL on GPU Platforms .....                                           | 54 |

## SESSION 3: Audio Processing

|                                                                                                                                      |    |
|--------------------------------------------------------------------------------------------------------------------------------------|----|
| 13. Piotr Bratoszewski, Janusz Cichowski, Andrzej Czyżewski, Examining Acoustic Emission of Engineered Ultrasound Loudspeakers ..... | 60 |
| 14. Edward Pórolniczak, Determination of Sonorous Timbre in a Singing Quality Computer Assessment .....                              | 66 |
| 15. Piotr Hoffmann, Tomasz Sanner, Bożena Kostek, Smart Virtual Bass Synthesis Algorithm Based on Music Genre Classification .....   | 71 |
| 16. Dawid Krawczyk, Stefan Brachmański, Influence of Sound on Perception of the Video Image .....                                    | 77 |

## SESSION 4: DSP Applications

|                                                                                                                                                                                              |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 17. Agnieszka Stankiewicz, Tomasz Marciniak, Adam Dąbrowski, Marcin Stopa, Elżbieta Marciniak, A New OCT-based Method to Generate Virtual Maps of Vitreomacular Interface Pathologies .....  | 83  |
| 18. Slimane Rezgui, Hassane Mohellebi, Mouloud Féliachi, AC Response of a High Temperature Superconducting Tube using Multidimensional Wave Digital Modeling .....                           | N/A |
| 19. Marianna Parzych, Agata Chmielewska, Tomasz Marciniak, Adam Dąbrowski, New Approach to People Density Estimation based on Video Surveillance .....                                       | 94  |
| 20. Julian Balcerek, Adam Konieczka, Tomasz Marciniak, Adam Dąbrowski, Krzysztof Maćkowiak, Karol Piniarski, Video Processing Approach for Supporting Pedestrians in Vehicle Detection ..... | 100 |
| 21. Karol Piniarski, Paweł Pawłowski, Adam Dąbrowski, Pedestrian Detection by Video Processing in Automotive Night Vision System .....                                                       | 104 |

|     |                                                                                                                                                                                                                                       |     |
|-----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 22. | Julian Balcerek, Adam Konieczka, Tomasz Marciniak, Adam Dąbrowski, Krzysztof Maćkowiak, Karol Piniarski, Automatic Detection of Traffic Lights Changes from Red to Green and Car Turn Signals in Order to Improve Urban Traffic ..... | 110 |
| 23. | Remigiusz Baran, Agnieszka Kleszcz, The Efficient Spatial Methods of Contour Approximation .....                                                                                                                                      | 116 |
| 24. | Dorota Kamińska, Tomasz Sapiński, Adam Pelikant, Review of Emotion Recognition from Speech .....                                                                                                                                      | N/A |
| 25. | Radosław Weychan, Tomasz Marciniak, Agnieszka Stankiewicz, Adam Dąbrowski, Real Time Speaker Recognition from Internet Radio .....                                                                                                    | 128 |
| 26. | Konrad Gromaszek, Andrzej Kotyra, Combustion Chamber Neural Adaptive Control using Optical Descriptors .....                                                                                                                          | 133 |

#### **SESSION 5: Communication Systems**

|     |                                                                                                                                       |     |
|-----|---------------------------------------------------------------------------------------------------------------------------------------|-----|
| 27. | Stephan Meyer, Optimization of the Stop-and-Go- and Dual-Mode-Algorithms for Real-time Baseband Transmission .....                    | 137 |
| 28. | Ahmed Desouky, Ahmed El-Mahdy, A Reduced-Complexity Partially-Coherent Decode and Forward Cooperative Communication Scheme .....      | 143 |
| 29. | Wassim Alexan, Ahmed El Mahdy, Relay Selection Based on the Log Likelihood Ratio for Cooperative Communication Networks .....         | 149 |
| 30. | Lamiaa Daoud, Ahmed El-Mahdy, Performance of Hybrid Relaying in Cooperative Wireless Systems in the Presence of Impulsive Noise ..... | 154 |

#### **SESSION 6: Medical Image Processing**

|     |                                                                                                                                                                    |     |
|-----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 31. | Krzysztof Karolczak, Artur Klepaczko, A Stereoscopic Viewer of the Results of Vessel Segmentation in 3D Magnetic Resonance Angiography Images .....                | N/A |
| 32. | Łukasz Karolczak, Andrzej Materka, Marcin Kozakiewicz, X-Ray Jaws Image Enhancement and Analysis for Numerical Evaluation of the Degree of Bone Regeneration ..... | 166 |
| 33. | Maria Strąkowska, Michał Strzelecki, Andrzej Kaszuba, Novel Methodology of Medical Screening using IR Thermography .....                                           | 172 |
| 34. | Przemysław Korohoda, Adam Dąbrowski, Paweł Pawłowski, Optical Coherence Tomography for Fingerprint Acquisition from Internal Layer - A Case Study .....            | 176 |

|                        |     |
|------------------------|-----|
| Index of Authors ..... | 181 |
