

2015 IEEE Power and Energy Conference at Illinois (PECI 2015)

**Champaign, Illinois, USA
20-21 February 2015**

**IEEE Catalog Number: CFP1512J-POD
ISBN: 978-1-4799-7950-9**

2015 IEEE Power and Energy Conference at Illinois (PECI)

Table of Contents

Power Systems

Voltage Stability Preserving Invariants for Smart Grids

Tamal Paul, Harsha Ravindra, Michael Steurer and Jonathan W. Kimball..... 1

Numerically Stable, Computationally Efficient, Filter Bank Based Modeling of Transfer Functions for Power System Transient Simulation

Paraskevas E. Argyropoulos and Hanoch Lev-Ari..... 7

Synchrophasor Visualizer

Kenta Kirihaara and Karl E. Reinhard 15

Power system state estimation based on Iterative Extended Kalman Filtering and bad data detection using normalized residual test

Abubeker Alamin, Haris M. Khalid and Jimmy C. -H. Peng..... 19

High Impedance Fault Detection Method Efficiency: Simulation vs. Real-World Data Acquisition

Amin Ghaderi, Hossein Ali Mohammadpour and Herbert Ginn 24

Model Order Selection for Probing-based Power System Mode Estimation

Vedran S. Perić, Tetiana Bogodorova, Ahmet N. Mete and Luigi Vanfretti29

Active Fault Location in Distribution Network using Time-Frequency Reflectometry

Amin Ghaderi, Hossein Ali Mohammadpour and Herbert Ginn 34

Computationally Efficient Solvers for Power System Applications

L. L. Grant, M. L. Crow and M. X. Cheng 41

Parametric Steady-State Voltage Stability Assessment of Power Systems using Benchmark Scenarios of Geomagnetic Disturbances

Komal S. Shetye and Thomas J. Overbye 46

Improved Off-Nominal Operation of Phasor Measurement Units using Discrete Fourier Transformation

Salish Maharjan, Jimmy C. H. Peng and Jorge Elizondo Martinez..... 53

Low Voltage Micro-Phasor Measurement Unit (μ PMU)

Bogdan Pinte, Michael Quinlan and Karl Reinhard 58

PSSs Design Based on PMUs Signals to Enhance the Stability of Inter-Area Oscillations of Interconnected Power Systems

Ammar Ajamal, Mohammed Elthalathiny and Khaled Ellithy 62

A Two-Stage MIP Based Optimization Framework for Unit Commitment and Energy Pricing

Yu Xia, Muhammad Marwali and Joe H. Chow 67

Event Analysis of Distribution System Voltage Data

Desiree Phillips and Thomas Overbye 73

Optimization of UPFC Location and Capacity to Improve the Stability using ABC and GSA Algorithm

B.Vijay kumar, M.Ajay Kumar, N.V.Srikanth and Y.Chandra sekhar 78

Short-term Electricity Load Forecasting using Time Series and Ensemble Learning Methods Sokratis Papadopoulos and Ioannis Karakatsanis	85
An Interactive Tool for Measurement-Driven Modal Analysis of Large-Scale Power Systems Saurav Mohapatra and Thomas J. Overbye	91
Locational Effects of Variability of Injected Power on Total Cost Saman Cyrus and Bernard Lesieutre	99
The Effect Of Demand Response On Distribution System Operation Mohammad Rasoul Narimani, Jhi-Young Joo and Mariesa Louis Crow	104
Power Electronics	
Input-output Rearrangement of Isolated Converters Mickey P. Madsen, Milovan Kovacevic, Jakob D. Mønster, Jeppe A. Pedersen, Arnold Knott and Michael A. E. Andersen	110
Extending the Utilization of Dc-link Voltage In Multi-level Inverters Using a New Modulation Technique Parvin Moamaei, Hossein Iman-Eini, Hamid Mahmoudi and Reza Ahmadi	116
Low-Leakage Drive for Optically-Triggered HighPower SiC Emitter Turn-Off Thyristors Alireza Mojab, Hossein Riazmontazer, Adam Meyer, Sudip K. Mazumder and Milos Zefran	121
Model Predictive Decoupled Power Control for Single-phase Grid-tied Inverter Xiao Li, Mohammad B. Shadmand, Robert S. Balog and Haitham Abu Rub	126
Computed Current Control Method for Maximum Power Point Tracking of a Grid-Connected Photovoltaic System Phong Tran	133
Developing a Hierarchical Modular PV Array Model Using PLECS Block-set in MATLAB Kimia Memar, Parvin Moamaei and Reza Ahmadi	138
Power Electronics and Drives	
Fault-Tolerant Operation of Cascaded H-Bridge Inverters Using One Redundant Cell Parvin Moamaei, Hamid Mahmoudi and Reza Ahmadi	143
An optimization Based Method for Design of the Adaptive Mechanism Parameters in a Model Adaptive Reference System Estimator in a Sensorless Motor Drive System Ali Mohamed Alshawish, Reza Ahmadi and Arash Nejadpak	148
Simulation and Analysis of Switched Capacitor dc-dc Converters for Use in Battery Electric Vehicles Yue Cao and Zichao Ye	153
Battery and Distributed Generation	
Optimal placement and sizing of DGs at various load conditions using Shuffled Bat algorithm Chandrasekhar Yammani, Maheswarapu Sydulu and Sailaja Kumari Matam	159
Optimal Control of On-Board PEV Chargers Considering Distribution Line Capacity and Building Load Imbalance Do-hoon Kwon, Young-Jin Kim, Hyeon-Jin Moon and Seung-ill Moon	164
Microgrids	
Fault Tree Reliability Analysis of a Micro-grid Using Monte Carlo Simulations Xiaofang Shi and Ali M. Bazzi	171

Sliding Mode Control of A DC Distributed Solar Microgrid	
Dan Shen and Afshin Izadian.....	176

Renewables

An Improved Offshore Wind Turbine to MVDC Grid Interface using High Frequency Resonant Isolation and Input Power Factor Control	
Michael T. Daniel, Harish S. Krishnamoorthy and Prasad N. Enjet.....	182
Performance of Superconducting Fault Current Limiter in Offshore Wind Farm Connected VSC Based MTDC Transmission System	
M. Ajay Kumar, S. Suri Babu, N.V. Srikanth and Y. Chandrasekhar.....	190
Control Strategies of a Fuzzy Controlled Grid Connected Hybrid PV/PEMFC/Battery Distributed Generation System	
T.Praveen Kumar, Y. Chandrashekar, N. Subrahmanyam and M. Sydulu	196
A Smoothing Method for Wind Power Fluctuation Using Hybrid Energy Storage	
Taekwon Kim, Hyeon-jin Moon, Do-hoon Kwon and Seung-ill Moon	202
An Economic Valuation of Solar Energy Potential in Nigeria	
Oladipupo A. Ogunnubi and Thomas J. Overbye	208
Designing Solar Arrays to Account for Reduced Performance from Self-Shading	
Jason Galtieri and Philip T. Krein.....	215

Machines

Three-Dimensional Finite-Element-Model Investigation of Axial-Flux PM BLDC Machines with Similar Pole and Slot Combination for Electric Vehicles	
SeyyedMahdi JafariShiadeh, Mohammad Ardebili and Parvin Moamaei	223
Effects Of Positioning Of Permanent Magnet Axis Relative To Reluctance Axis In Permanent Magnet Synchronous Machines	
J. Y. Alsawalhi and S. D. Sudhoff.....	227
Non-Intrusive Parameter Estimation for Single-Phase Induction Motors Using Transient Data	
Phuc Huynh, Hao Zhu and Dionysios Aliprantis.....	235
Multi-Objective Optimization of an Actively Shielded Superconducting Field Winding	
David C. Loder and Kiruba S. Haran.....	243
