Table of Contents

SPE-173191-MS

Generation of Hybrid Grids for Simulation of Complex, Unstructured Reservoirs by a Simulator with MPFA

M. Brewer, D. Camilleri, S. Ward, T. Wong, Halliburton pg. 1

SPE-173192-MS

Assisted History Matching of Channelized Models Using Pluri-Principal Component Analysis

C. Chen, Shell Intl E&P, Inc.; G. Gao, Shell Global Solutions US Inc.; B. Ramirez, Shell Intl E&P, Inc.; J.C. Vink, Shell Global Solutions US Inc.; A.M. Girardi, Shell Brasil Exploration and Production pg. 14

SPE-173193-MS

Simulation Of Instabilities And Fingering In Surfactant Alternating Gas (SAG) Foam Enhanced Oil Recovery

R. Farajzadeh, Shell Global Solutions Int.; A. Eftekhari, Delft University of Techonology; H. Hajibeygi, J. Van der Meer, Delft University of Technology; S. Vincent Bonnieu, Shell Global Solutions Int.; W.R. Rossen, Delft University of Technology pg. 37

SPE-173194-MS

Modeling and Optimization of Low Salinity Waterflood

C. Dang, University of Calgary; L. Nghiem, Computer Modelling Group Ltd.; N. Nguyen, Z. Chen, University of Calgary; Q. Nguyen, University of Texas At Austin pg. 55

SPE-173195-MS

Characterizing Reservoir Heterogeneities Using Magnetic Nanoparticles

A. Rahmani, S.L. Bryant, C. Huh, M. Ahmadian, University of Texas at Austin; W. Zhang, Q. Liu, Duke University pg. 74

SPE-173196-MS

A Unified Model of Matrix Permeability in Shale Gas Formations

H. Wang, University of Houston; M. Marongiu-Porcu, Schlumberger pg. 103

SPE-173197-MS

Quantification of Prediction Uncertainty: What Does it Mean and How Does it Evolve with History Matching

P. Likanapaisal, ConocoPhillips; H.A. Tchelepi, Stanford University pg. 123

SPE-173198-MS

Multilevel Field-Development Optimization Using a Sequence of Upscaled Models

E. Aliyev, L.J. Durlofsky, Stanford University pg. 163

SPE-173199-MS

A Multi-stage Linear Solution Method for Implicit Compositional Simulation

Q. Wang, Z. Gu, G. Fleming, Halliburton pg. 183

SPE-173200-MS

Algebraic Multiscale Solver for Flow in Heterogeneous Fractured Porous Media

M. Tene, Delft University of Technology; M. Al Kobaisi, Petroleum Institute; H. Hajibeygi, Delft University of Technology pg. 196

Table of Contents *(continued)*

SPE-173201-MS

Adsorbed Gas Surface Diffusion and Bulk Gas Transport in Nanopores of Shale Reservoirs with Real Gas Effect-Adsorption-Mechanical Coupling

K. Wu, University of Calgary; X. Li, China University of Petroleum; C. Guo, Missouri University of Science and Technology; Z. Chen, University of Calgary pg. 210

SPE-173202-MS

Numerical Simulation of Three-Hydrocarbon-Phase Flow with Robust Phase Identification

Z. Xu, R. Okuno, University of Alberta pg. 241

SPE-173203-MS

Optimized Design of Autonomous Inflow Control Devices for Gas and Water Coning

T.W. Stone, Schlumberger; T. Moen, Reslink AS; D.A. Edwards, A. Shadchnev, K. Rashid, Schlumberger; G.F. Kvilaas, K.R. Christoffersen, Det Norske Oljeselskap ASA pg. 263

SPE-173205-MS

Reduced Order Models for Rapid EOR Simulation in Fractured Carbonate Reservoirs

S.S. Agada, S. Geiger, A.M. El Sheikh, E.J. Mackay, Heriot-Watt University; S. Oladyshkin, University of Stuttgart pg. 276

SPE-173206-MS

Physics-Based and Data-Driven Surrogates for Production Forecasting

H.M. Klie, ConocoPhillips Co pg. 297

SPE-173207-MS

A Parallel Linear Solver Algorithm for Solving Difficult Large Scale Thermal Models

G. Li, Chevron Corporation; J. Wallis, Wallis Consulting; G. Shaw, Schlumberger pg. 315

SPE-173208-MS

Efficient Multi-stage Preconditioners for Highly Heterogeneous Reservoir Simulations on Parallel Distributed Systems

H. Liu, K. Wang, Z. Chen, University of Calgary; K.E. Jordan, IBM pg. 327

SPE-173209-MS

A New Look at Conflicting Multiple Objectives Optimization Using Fuzzy Rules-Based System

A. Mirzabozorg, L.X. Nghiem, H. Li, C. Yang, Computer Modelling Group Ltd.; Z. Chen, University of Calgary pg. 351

SPE-173210-MS

Simulation of Coupled Thermal-Hydrological-Mechanical Phenomena in Porous and Fractured Media

P.H. Winterfeld, Y. Wu, Colorado School of Mines pg. 369

SPE-173211-MS

A Robust Geochemical Simulator to Model Improved Oil Recovery Methods

H. Luo, University of Texas At Austin; E.W. Al-Shalabi, ADNOC HQ HR & Admin; M. Delshad, University of Texas At Austin; K.K. Panthi, The University of Texas At Austin; K. Sepehrnoori, University of Texas At Austin pg. 384

SPE-173212-MS

Upscaling for Compositional Reservoir Simulation

H. Li, L.J. Durllofsky, Stanford University pg. 411

Table of Contents *(continued)*

SPE-173213-MS

INSIM: A Data-Driven Model for History Matching and Prediction for Waterflooding Monitoring and Management with a Field Application

H. Zhao, Yangtze University; Z. Kang, China Petroleum and Chemical Corporation; X. Zhang, CNOOC Research Center; H. Sun, L. Cao, Yangtze University; A.C. Reynolds, University of Tulsa pg. 431

SPE-173214-MS

An Adaptive Ensemble Smoother with Multiple Data Assimilation for Assisted History Matching

D.H. Le, University of Tulsa; A.A. Emerick, Petrobras; A.C. Reynolds, University of Tulsa pg. 462

SPE-173216-MS

Multiobjective Optimization for Maximizing Expectation and Minimizing Uncertainty or Risk with Application to Optimal Well Control

X. Liu, A.C. Reynolds, University of Tulsa pg. 480

SPE-173217-MS

Ensemble-Based Optimization of the WAG Injection Process

B. Chen, A.C. Reynolds, University of Tulsa pg. 507

SPE-173218-MS

Adaptive Local-global Multiscale Simulation of the In-situ Conversion Process

F.O. Alpak, J.C. Vink, Shell International E&P Co. pg. 526

SPE-173219-MS

Closed-loop Field Development Optimization under Uncertainty

M. Gharib Shirangi, L.J. Durlofsky, Stanford University pg. 550

SPE-173220-MS

Stress Reorientation in Waterflooded Reservoirs

J. Hwang, E.C. Bryant, M.M. Sharma, The University of Texas At Austin pg. 572

SPE-173221-MS

Consistent Extrapolation of Black and Volatile Oil Fluid Properties Above Original Saturation Pressure for Tight and Conventional Reservoirs

B. Nojabaei, R.T. Johns, Pennsylvania State University pg. 597

SPE-173222-MS

Geomechanics Coupling Simulation of Fracture Closure and Its Influence on Gas Production in Shale Gas Reservoirs

C. Wang, Y. Wu, Y. Xiong, P.H. Winterfeld, Colorado School of Mines; Z. Huang, China University of Petroleum Huadong pg. 615

SPE-173223-MS

Will GPGPUs be Finally a Credible Solution for Industrial Reservoir Simulators?

A. Anciaux-Sedrakian, IFP Energies Nouvelles; J. Eaton, NVIDIA; J. Gratien, T. Guignon, P. Have, C. Preux, O. Ricois, IFP Energies Nouvelles pg. 631

SPE-173224-MS

Black Oil Modeling in a Next-Generation Integrated Production Simulator

M. Khoshkbarchi, B.F. Kohse, Computer Modelling Group Ltd.; F.E. Saaf, Shell Global Solutions US pg. 643

Table of Contents *(continued)*

SPE-173226-MS

A Real-Field Multiscale Black-Oil Reservoir Simulator

A. Kozlova, Z. Li, J.R. Natvig, S. Watanabe, Schlumberger; Y. Zhou, Chevron ETC; K. Bratvedt, Schlumberger; S.H. Lee, Chevron ETC pg . 663

SPE-173227-MS

An Efficient Nonlinearity Elimination Preconditioned Inexact Newton Method for Parallel Simulation of Thermal-Hydraulic-Mechanical Processes in Fractured Reservoirs

S. Wang, P.H. Winterfeld, Y. Wu, Colorado School of Mines pg . 680

SPE-173229-MS

Model-Based A Priori Evaluation of Surveillance Programs Effectiveness using Proxies

J. He, J. Xie, P. Sarma, X. Wen, W.H. Chen, J. Kamath, Chevron Energy Technology Company pg . 697

SPE-173230-MS

A Numerical Study of Benefits of Adding Polymer to WAG Processes for a Pilot Case

X. Kong, M. Delshad, M.F. Wheeler, University of Texas At Austin pg . 712

SPE-173231-MS

Efficient Preconditioning for Algebraic Multigrid and Red-Black Ordering in Adaptive-Implicit Black-Oil Simulations

G.L. Brown, D.A. Collins, Computer Modelling Group Ltd.; Z. Chen, University of Calgary pg . 729

SPE-173232-MS

Full Pressure Coupling for Geo-mechanical Multi-phase Multi-component Flow Simulations

F. Doster, Heriot-Watt University; J.M. Nordbotten, University of Bergen pg . 742

SPE-173233-MS

A History Matching Procedure for Non-Gaussian Facies Based on ES-MDA

D.H. Le, R. Younis, A.C. Reynolds, University of Tulsa pg . 754

SPE-173234-MS

Analysis of Narrow-Boiling Behavior for Thermal Compositional Simulation

D. Zhu, R. Okuno, University of Alberta pg . 770

SPE-173235-MS

Identifiability of Location and Magnitude of Flow Barriers in Slightly Compressible Flow

S. Kahrobaei, M. Mansoori Habibabadi, Delft University of Technology; G.J. Joosten, Shell Intl. E&P BV; P. Van den Hof, Eindhoven University of Technology; J. Jansen, Delft University of Technology pg . 788

SPE-173236-MS

Quantification of the Impact of Ensemble Size on the Quality of an Ensemble Gradient Using Principles of Hypothesis Testing

R. Fonseca, S. Kahrobaei, L. van Gastel, Delft University of Technology; O. Leeuwenburgh, TNO; J. Jansen, Delft University of Technology pg . 804

SPE-173237-MS

Rapid Reservoir Modeling: Prototyping Of Reservoir Models, Well Trajectories And Development Options Using An Intuitive, Sketch-Based Interface

M.D. Jackson, G.J. Hampson, Imperial College; D.P. Rood, Imperial College London; S. Geiger, Z. Zhang, Heriot-Watt University; M. Costa Sousa, R. Amorim, E. Vital Brazil, F.F. Samavati, University of Calgary; L. Nascimento Guimaraes, University of Pernambuco pg . 829

Table of Contents *(continued)*

SPE-173238-MS

Spatial-Temporal Tensor Decompositions for Characterizing Control-Relevant Flow Profiles in Reservoir Models

E. Insuasty, P. Van den Hof, S. Weiland, Eindhoven University of Technology; J. Jansen, Delft University of Technology pg. 846

SPE-173239-MS

Field Applications of a Multi-Scale Multi-Physics History Matching Approach

M. Khodabakhshi, Oxy Oil & Gas USA; B. Jafarpour, University of Southern California; M.J. King, Texas A&M University pg. 867

SPE-173240-MS

A New Multi-scale Computational Model for Flow and Transport in Shale Gas Reservoirs Rigorously Derived by Reiterated Homogenization

T.D. Le, LNCC Laboratorio Nacional de Computacao Cientifica; M.A. Murad, LNCC Laboratorio Nacional De Computacao Cientifica; P. Pereira, LNCC Laboratorio Nacional de Computacao Cientifica; C. Boutin, Ecole Nationale des Travaux Publics de L'Etat; E.L. Garcia, LNCC Laboratorio Nacional de Computacao Cientifica; S. Lima, UFRN Universidade Federal do Rio Grande do Norte pg. 887

SPE-173241-MS

Status of System-AMG for Reservoir Simulation Applications

S. Gries, H. Plum, Fraunhofer Institute SCAI pg. 906

SPE-173242-MS

An Effective Two-stage Quasiglobal Multiphase Scale-up Technique for Laminated Clastic Reservoirs

G. Xue, Shell Oil Co.; F.O. Alpak, Shell International E&P Co. pg. 920

SPE-173243-MS

An Unstructured Gridding Method for Simulating Faulted Reservoir Populated with Complex Wells

X. Ding, L.S. Fung, Saudi Aramco PE&D pg. 932

SPE-173244-MS

GPU Acceleration for Geomechanical Simulations

P. Woodhams, T. Jonsthoel, D. Walsh, A. Pearce, D. Preisser, Schlumberger Information Solutions pg. 948

SPE-173246-MS

Accelerating Tight Reservoir Workflows with GPUs

K. Mukundakrishnan, K. Esler, D. Dembeck, V. Natoli, J. Shumway, Y. Zhang, Stone Ridge Technology; J.R. Gilman, H. Meng, iReservoir.com, Inc. pg. 957

SPE-173247-MS

Integrated Field-scale Production and Economic Evaluation under Subsurface Uncertainty for the Pattern-driven Development of Unconventional Resources

G. Gao, J.C. Vink, Shell Global Solutions US Inc.; F.O. Alpak, Shell International E&P Co. pg. 974

SPE-173248-MS

A Multipoint Multiscale Modeling Method for Solid-based Thermal Reactive Flow, with Application to the In-situ Conversion Process

H. Li, Stanford University; J.C. Vink, F.O. Alpak, Shell International E&P Co. pg. 993

SPE-173249-MS

Study of Compositional Multi-Phase Flow Formulations with Cubic EOS

I. Ben Gharbia, E. Flauraud, A. Michel, IFP Energies Nouvelles pg. 1015

Table of Contents *(continued)*

SPE-173250-MS

Development of a Four-Phase Chemical-Gas Model in an IMPEC Reservoir Simulator

H. Lashgari, K. Sepehrnoori, M. Delshad, University of Texas At Austin; E.P. De Rouffignac, The University of Texas At Austin pg. 1026

SPE-173251-MS

A Fully Coupled Network Model, Practical Issues and Comprehensive Comparison With Other Integrated Models on Field Cases

H. Cao, Total E&P USA, Inc.; P. Samier, Total S.A.; H.M. Kalunga, Total CSTJF; E. DETIGE, Total S.A.; E. Obi, Total CSTJF pg. 1052

SPE-173252-MS

Retraining Criteria for TPWL/POD Surrogate Based Waterflooding Optimization

M. Fragoso, Petrobras S. A.; B. Horowitz, Federal University of Pernambuco; J. Rodrigues, Petrobras S.A. pg. 1071

SPE-173253-MS

A True Poroelastic Up and Downscaling Scheme for Multi-scale Coupled Simulation

J.J. Ita, Royal Dutch/Shell Group; F. Malekzadeh, Computer Modeling Group pg. 1085

SPE-173254-MS

Identification of “Big Hitters” with Global Sensitivity Analysis for Improved Decision Making Under Uncertainty

P. Sarma, W.H. Chen, X. Wen, Chevron Corporation pg. 1097

SPE-173255-MS

EOR Feasibility Study through an Integrated Laboratory Evaluation and Reservoir Simulation for a Large Carbonate Field in Kuwait

F. Koyassan Veedu, D.E. Thomas, P. Wang, K. Eskandari Dalvand, J.W. Hornbrook, DeGolyer and MacNaughton; G.A. Pope, University of Texas At Austin; E. Al-maraghi, B.S. Al-Matar, B.B. Singh, B.A. Al-Saad, M.M. Al-qahtani, S. Tiwari, Kuwait Oil Company pg. 1108

SPE-173256-MS

A Covariance Matrix Adaptation Algorithm for Simultaneous Estimation of Optimal Placement and Control of Production and Water Injection Wells

F. Forouzanfar, W.E. Poquioma, A.C. Reynolds, University of Tulsa pg. 1127

SPE-173257-MS

Multilevel Techniques Lead to Accurate Numerical Upscaling and Scalable Robust Solvers for Reservoir Simulation

M. Christensen, Technical University of Denmark; U. Villa, P. Vassilevski, Lawrence Livermore National Laboratory pg. 1156

SPE-173259-MS

Parallel Multiscale Linear Solver for Highly Detailed Reservoir Models

A.M. Manea, Stanford University; J. Sewall, Intel Corporation; H.A. Tchelepi, Stanford University pg. 1168

SPE-173260-MS

A Statistical Dual-Tube Model to Analyze Gas Production from Shale Formations

S.H. Lee, C. Jensen, Chevron ETC; I. Lunati, UNIL pg. 1194

SPE-173261-MS

A Compositional Model Fully Coupled With Geomechanics for Liquid-Rich Shale and Tight Oil Reservoir Simulation

Y. Xiong, P.H. Winterfeld, C. Wang, Y. Wu, Colorado School of Mines; Z. Huang, China University of Petroleum (East China) pg. 1211

Table of Contents *(continued)*

SPE-173262-MS

A Unified Finite Difference Model for the Simulation of Transient Flow in Naturally Fractured Carbonate Karst Reservoirs

J. He, J.E. Killough, Texas A&M University; M.M. Fadlelmula Fadlelseed, M. Frain, Texas A&M University At Qatar pg. 1229

SPE-173263-MS

An Adaptive Metropolis-Hasting Sampling Algorithm for Reservoir Uncertainty Quantification in Bayesian Inference

A. Abdollahzadeh, BP; M.A. Christie, D. Corne, Heriot-Watt University pg. 1243

SPE-173264-MS

Simulation of the Impact of Fracturing Fluid Induced Formation Damage in Shale Gas Reservoirs

N. Farah, Y.D. Ding, IFP Energies Nouvelles; Y. Wu, Colorado School of Mines pg. 1266

SPE-173265-MS

A Multiscale Method Based on Restriction-Smoothed Basis Functions Suitable for General Grids in High Contrast Media

O. Moyner, Sintef Applied Mathematics; K. Lie, SINTEF pg. 1285

SPE-173266-MS

A General Flow Equation Framework

K.B. Haugen, B.L. Beckner, ExxonMobil Upstream Research Co. pg. 1310

SPE-173267-MS

Numerical Trust Region Newton Solver for Multiphase Transport in Porous Media Based on Detailed Nonlinear Analysis

B. Li, H.A. Tchelepi, Stanford University pg. 1319

SPE-173268-MS

Ensemble-Based Multi-Objective Optimization of On-Off Control Devices Under Geological Uncertainty

R. Fonseca, Delft University of Technology; O. Leeuwenburgh, TNO; E. Della Rossa, ENI; P. Van den Hof, Eindhoven University of Technology; J. Jansen, Delft University of Technology pg. 1343

SPE-173269-MS

A Comprehensive Reservoir Simulator for Unconventional Reservoirs Based on the Fast Marching Method and Diffusive Time of Flight

Y. Fujita, A. Datta-gupta, M.J. King, Texas A&M University pg. 1361

SPE-173270-MS

Capturing Geologic Complexity in a Simulation Grid

L. Branets, ExxonMobil Upstream Research Co.; V. Kubyak, E. Kartasheva, V. Shmyrov, D. Kandybor, NeurOK Software pg. 1383

SPE-173271-MS

Fast Multiscale Reservoir Simulations using POD-DEIM Model Reduction

M. Ghasemi, Texas A&M University; Y. Yang, Texas A&M University - Mathematics Department; E. Gildin, Y. Efendiev, Texas A&M University; V.M. Calo, King Abdullah University of Science & Tech pg. 1393

Table of Contents *(continued)*

SPE-173272-MS

Incorporating Geological Uncertainty in Error Control for Linear Solvers

A. Nissen, University of Bergen; P. Pettersson, Uni Research; E. Keilegavlen, J.M. Nordbotten, University of Bergen pg. 1411

SPE-173273-MS

Hierarchical Multiscale Methods for Life-Cycle Production Optimization: A Field Study Case

D.F. Oliveira, Petrobras -Petroleo Brasileiro; A.C. Reynolds, University of Tulsa pg. 1430

SPE-173274-MS

Pareto Optimal Solutions for Minimizing Risk and Maximizing Expected Value of Life-Cycle NPV of Production Under Nonlinear Constraints

X. Liu, A.C. Reynolds, University of Tulsa pg. 1446

SPE-173275-MS

Sparse Geologic Dictionaries for Field-Scale History Matching Application

M. M. Khaninezhad, B. Jafarpour, University of Southern California pg. 1462

SPE-173276-MS

A Massively Parallel Coupled Reservoir and Surface Facilities Simulator

G.R. Bowen, T.R. Miller, B. Zineddin, Ridgeway Kite Software pg. 1479

SPE-173277-MS

Accurate Coarse-Scale AMG-Based Reservoir Simulations in Highly Heterogeneous Media

A.T. Barker, Lawrence Livermore National Laboratory; D.Z. Kalchev, University of Colorado; I.D. Mishev, ExxonMobil Upstream Research Co.; P.S. Vassilevski, Lawrence Livermore National Laboratory; Y. Yang, ExxonMobil Upstream Research Co. pg. 1491

SPE-173278-MS

Hybrid Optimization for Closed-Loop Reservoir Management

M.S. Pinto, State University of Campinas; M. Ghasemi, N. Sorek, E. Gildin, Texas A&M University; D.J. Schiozer, State University of Campinas pg. 1500

SPE-173279-MS

A Discontinuous Overlapping Control Volume Finite Element Method for Multi-Phase Porous Media Flow Using Dynamic Adaptive Unstructured Mesh Optimization

P. Salinas, J.R. Percival, D. Pavlidis, Z. Xie, Imperial College London; J. Gomes, University of Aberdeen; C.C. Pain, M.D. Jackson, Imperial College pg. 1511

SPE-173280-MS

Massively Distributed Simulation and Optimization on Commercial Compute Clouds

P. Sarma, J. Owens, W.H. Chen, X. Wen, Chevron Corporation pg. 1529

SPE-173281-MS

A Dynamic Mesh Approach for Simulation of Immiscible Viscous Fingering

P. Mostaghimi, F. Kamali, The University of New South Wales; M.D. Jackson, A.H. Muggeridge, C.C. Pain, Imperial College pg. 1537

SPE-173282-MS

Modeling of Magnetic Nanoparticle Transport in Shale Reservoirs

C. An, M. Alfi, B. Yan, K. Cheng, Z. Heidari, Texas A&M University; J.E. Killough, Texas A & M University pg. 1549

Table of Contents *(continued)*

SPE-173283-MS

An Efficient Optimisation Technique Using Adaptive Spectral High-Dimensional Model Representation: Application to CO₂ Sequestration Strategies

K.R. Petvipusit, Imperial College London; A.M. El Sheikh, Heriot-Watt University; P.R. King, M.J. Blunt, Imperial College pg. 1576

SPE-173284-MS

Modeling and Simulation of Near-Wellbore Asphaltene Remediation using Asphaltene Dispersants

H. Darabi, The University of Texas At Austin; K. Sepehrnoori, University of Texas At Austin pg. 1596

SPE-173285-MS

Model and Economic Uncertainties in Balancing Short-Term and Long-Term Objectives in Water-Flooding Optimization

M. Siraj, P. Van den Hof, Eindhoven University of Technology; J. Jansen, Delft University of Technology pg. 1610

SPE-173288-MS

Efficient Integration of Production and Seismic Data Into Reservoir Models Exhibiting Complex Connectivity Using an Iterative Ensemble Smoother

R. Tavakoli, S. Srinivasan, University of Texas At Austin; A. ElSheikh, Heriot-Watt University; M.F. Wheeler, University of Texas At Austin pg. 1623

SPE-173289-MS

Implementation of a Preprocessor for Embedded Discrete Fracture Modeling in an IMPEC Compositional Reservoir Simulator

J.D. Cavalcante Filho, The University of Texas at Austin; M. Shakiba, University of Texas At Austin; A. Moinfar, Computer Modelling Group Ltd.; K. Sepehrnoori, University of Texas At Austin pg. 1641

SPE-173290-MS

Fingering Function for Unstable Immiscible Flows

S. Doorwar, K.K. Mohanty, University of Texas At Austin pg. 1664

SPE-173291-MS

Multi-Objective Optimization Coupled With Dimension-Wise Polynomial-Based Approach in Smart Well Placement Under Model Uncertainty

Y. Chang, International Research Institute of Stavanger; K. Petvipusit, Imperial College London; D. Devegowda, University of Oklahoma pg. 1679

SPE-173293-MS

Novel Diffuse Source Pressure Transient Upscaling

K.C. Nunna, P. Zhou, M.J. King, Texas A&M University pg. 1692

SPE-173294-MS

Unconditionally Stable Sequential Schemes for Thermoporomechanics: Undrained-Adiabatic and Extended Fixed-Stress Splits

J. Kim, Texas A&M University pg. 1714

SPE-173295-MS

Method for Adaptive Optimization of EOR Performance under Uncertainty

N. Chugunov, T. Ramakrishnan, A. Lukyanov, W.J. Bailey, Schlumberger; D. Wilkinson, Efficient Solutions Inc. pg. 1732

Table of Contents *(continued)*

SPE-173296-MS

Three-Dimensional Coarse-Scale Simulation of Enhanced Oil Recovery Processes in Highly Heterogeneous Reservoirs

M. Evazi, Occidental Petroleum Corporation; K. Jessen, University of Southern California pg. 1750

SPE-173298-MS

A Surrogate-based Adaptive Sampling Approach for History Matching and Uncertainty Quantification

W. Li, Pacific Northwest National Laboratory; D. Zhang, Peking University; G. Lin, Purdue university pg. 1762

SPE-173299-MS

Comprehensive Simulation Model of Kerogen Pyrolysis for the Oil Shale In-situ Upgrading

K. Lee, Texas A&M University; G.J. Moridis, Lawrence Berkeley Laboratory; C.A. Ehlig-Economides, University of Houston pg. 1773

SPE-173301-MS

Bridging the Gap Between Deterministic and Probabilistic Uncertainty Quantification Using Advanced Proxy Based Methods

N.H. Goodwin, EssencePS Ltd pg. 1796

SPE-173302-MS

Breaking the Symmetry with the Multi-Point Well Connection Method

R. Pecher, Schlumberger pg. 1869

SPE-173303-MS

A Numerically Stable Sequential Implicit Algorithm for Finite-strain Elastoplastic Geomechanics Coupled to Fluid Flow

J. Kim, Texas A&M University pg. 1895

SPE-173305-MS

Reservoir Management Under Geological Uncertainty Using Fast Model Update

R.G. Hanea, G. Evensen, L. Hustoft, T. Ek, Statoil ASA; A.G. Chitu, F. Wilschut, TNO pg. 1912

SPE-173306-MS

Application of Flow Diagnostics and Multiscale Methods for Reservoir Management

K. Lie, O. Moyner, S. Krogstad, SINTEF pg. 1924

SPE-173308-MS

Modeling from Reservoir to Export: A Compositional Approach for Integrated Asset Model of Different Gas Fields in North Kuwait Jurassic Carbonate Reservoirs

R. Torrens, A.M. Daoud, M. Amari, A. Sharifzadeh-Najafi, R. Prakash, Schlumberger; B. Al-Enezi, Q. Dashti, KOC pg. 1943

SPE-173309-MS

Implementation of a Vertex Centered Method Inside an Industrial Reservoir Simulator - Practical Issues and Comprehensive Comparison with CPG and PEBI Grid Models on a Field Case

P. Samier, Total S.A.; R. Masson, University of Nice pg. 1961

Table of Contents *(continued)*

SPE-173312-MS

Control-volume Distributed Multi-point Flux Approximation Coupled With A Lower-dimensional Fracture Model

R. AHMED, M.G. Edwards, Swansea University; S. Lamine, B. Huisman, Shell Global Solutions International B.V.; M. Pal, Maersk Oil and Gas A/S pg. 1980

SPE-173313-MS

Boundary Aligned Grid Generation in Three Dimensions and CVD-MPFA Discretization

S.M. Toor, M.G. Edwards, Swansea University; A.H. Dogru, Saudi Aramco PE&D; T.M. Shaalan, Saudi Aramco pg. 2004

SPE-173314-MS

Direct Simulation Monte Carlo method in Porous Media through various Knudsen Numbers

C. Christou, K. Dadzie, Heriot-Watt University pg. 2037

SPE-173315-MS

Oil Rate Forecast by Inferring Fractional Flow Models from Field Data

F. Cao, The University of Texas at Austin; L.W. Lake, University of Texas At Austin pg. 2048

SPE-173316-MS

Development of a Full-Field Dynamic Model to Support Pressure Maintenance Projects in the World's Largest Clastic Oil Field, The Greater Burgan Field Complex, Kuwait

E.D. Ma, Kuwait Oil Company; S.A. Gheorghiu, Schlumberger; M.R. Banagale, L. Dashti, Kuwait Oil Company; D.J. Bond, D.J. Bond & Assocs. Ltd.; M. Ibrahim, Schlumberger; F.A. Abdulla, Kuwait Oil Company; O.M. Gurpinar, Schlumberger pg. 2068

SPE-173317-MS

MRST-AD, an Open-Source Framework for Rapid Prototyping and Evaluation of Reservoir Simulation Problems

S. Krogstad, K. Lie, O. Moyner, H.M. Nilsen, X. Raynaud, B. Skaflestad, SINTEF pg. 2080

SPE-173318-MS

A Generic Physics-based Numerical Platform with Hybrid Fracture Modelling Techniques for Simulating Unconventional Gas Reservoirs

J. Jiang, The University of Tulsa; R. Younis, University of Tulsa pg. 2106

SPE-173319-MS

Mimetic Finite Differences for Flow in Fractures from Microseismic Data

O.A. Al-Hinai, UT Austin; S. Srinivasan, The University of Texas At Austin; M.F. Wheeler, University of Texas At Austin pg. 2152

SPE-173320-MS

Localized Linear Systems for Sequential Implicit Simulation of Flow and Transport

S. Sheth, The University of Tulsa; R. Younis, University of Tulsa pg. 2167

SPE-173322-MS

A Four-Phase Flow Model to Simulate Chemical EOR With Gas

M. Lotfollahi, A. Varavei, M. Delshad, University of Texas At Austin; R. Farajzadeh, Shell Global Solutions International BV; G.A. Pope, University of Texas At Austin pg. 2190
