SESSION ONE – ASPIRING TO HIGH PERFORMANCE: LOWER ENERGY CONSUMPTION: NEW ECO BUILDS & RETROFITTING

Market Survey on eco-shipping: innovation boost from eco-ships and retrofitting	33
Will advanced energy efficiency optimisation models be part of standard charter party agreements in the future?	43
Retrofitting older vessels: a sustainable approach and a sounder economic sense.....	45
Innovative financial models; the solution for driving uptake in scrubbers and LNG for ECA compliance.....	67

SESSION TWO – PREPARING FOR A MULTI-FUEL/ALTERNATIVE FUEL EFFICIENT FUTURE

Alternative fuels for shipping – pathways to 2050	75
Development and application of the MAN Diesel & Turbo two-stroke ME-GI and ME-LGI engines.....	87
Efficient hybrid power system for ships.....	99
Micro emulsion – a tool to reduce fuel consumption, CO ₂ , NO _x & SO _x	111

SESSION THREE – LUBRICANTS

Reducing the risk of cold corrosion through lubricant selection	127
As new engine technologies emerge, cylinder lubricants evolve to deliver additional protection and reliability	131
Practical experience of the impact of cold corrosion on cylinder lubrication in new engine designs	141
Measurement of metallic and corrosive wear within cylinders through onboard analysis of used scrape down oil.....	147

SESSION FOUR – ENERGY EFFICIENT TECHNOLOGY FOR SHIPS

The twin fin propulsion system	159
Delivering proven savings through co-operative thinking – a landmark in optimizing ship operations	169
A method for improving the overall efficiency of a marine vessel	187
“Hull Efficiency” – Improving fuel efficiency of the existing fleet without the need for retrofits or outside investment.....	201

SESSION FIVE – EEDI UPDATE – HOW HAS LIFE BEEN SINCE JANUARY 2013 FOR SHIPOWNERS?

Energy efficiency design index vs. safe manoeuvring in adverse conditions	207
Reflections on EEDI verification and implementation.....	219
Shipowners panel – feedback on EEDI	221

SESSION SIX – MONITORING OF EXHAUST EMISSIONS

A mandatory global system for Monitoring, Reporting and Verification of CO2 emissions – an update from the EU and IMO	225
Experience with Energy Efficiency Operational Indicators (EEOI) seen in the light of MRV (Monitoring, Recording and Verification)	229
Monitoring of air emissions on ships	239
Propeller efficiency measurement, overview and real life applications	247

SESSION SEVEN – BALLAST WATER CONVENTION REVIEW

US Coast Guard type approval of ballast water treatment systems from a supplier's perspective	255
Ballast Water Management – how concerned should we be about safety?.....	257

SESSION EIGHT - TIER III NOX REGULATIONS

Tier III NOx Abatement Technologies for Low Speed Diesel Engines	271
--	-----

SESSION NINE – PORT STATE ENFORCEMENT

Control Inspections on board seagoing vessels	291
Compliance – What does it really mean?	297
Shipowners panel – feedback on Port State Enforcement	N/A
