

2015 9th International Symposium on Medical Information and Communication Technology

(ISMICT 2015)

**Kamakura, Japan
24-26 March 2015**

**IEEE Catalog Number: CFP1541M-POD
ISBN: 978-1-4799-8073-4**

Program

2015 9th International Symposium on Medical Information and Communication Technology (ISMICT)

[Special Session I] ETSI SmartBAN

<i>ETSI TC SmartBAN: Overview of the Wireless Body Area Network Standard</i>	
Matti Hämäläinen (University of Oulu, Finland), Tuomas Paso (University of Oulu, Finland), Lorenzo Mucchi (University of Florence, Italy), Marc C. Girod-Genet (INT - GET, France), John Farserotu (CSEM, Switzerland), Hirokazu Tanaka (Hiroshima City University, Japan), Woon Hau Chin (Toshiba Research Europe Limited, United Kingdom), Lina Nachabe (Instructor & AUCE Lebanon, Lebanon)	1
<i>An Overview of ETSI TC SmartBAN's Ultra Low Power Physical Layer</i>	
Woon Hau Chin (Toshiba Research Europe Limited, United Kingdom), Hirokazu Tanaka (Hiroshima City University, Japan), Toshiyuki Nakanishi (TOSHIBA, Japan), Tuomas Paso (University of Oulu, Finland), Matti Hämäläinen (University of Oulu, Finland)	6
<i>An Overview of ETSI TC SmartBAN MAC Protocol</i>	
Tuomas Paso (University of Oulu, Finland), Hirokazu Tanaka (Hiroshima City University, Japan), Matti Hämäläinen (University of Oulu, Finland), Woon Hau Chin (Toshiba Research Europe Limited, United Kingdom), Ryoko Matsuo (Toshiba Corporation, Japan), Siva Subramani (Toshiba Research Europe Limited, United Kingdom), Jussi P Haapola (Centre for Wireless Communications, University of Oulu, Finland)	10
<i>On Spectrum Occupancy Evaluations From the Standpoint of Body Area Networks in ISM Band</i>	
Muhammad Hasnain Virk (University of Oulu, Finland), Risto Vuotoniemi (University of Oulu, Finland), Matti Hämäläinen (University of Oulu, Finland), Jari Iinatti (University of Oulu, Finland), Juha-Pekka Mäkelä (University of Oulu, Finland)	15
<i>Threshold Setting for the Evaluation of the Aggregate Interference in ISM Band in Hospital Environments</i>	
Lorenzo Mucchi (University of Florence, Italy), Alessio Carpini (University of Florence, Italy), Theo D'Anna (University of Florence, Italy), Muhammad Hasnain Virk (University of Oulu, Finland), Risto Vuotoniemi (University of Oulu, Finland), Matti Hämäläinen (University of Oulu, Finland), Jari Iinatti (University of Oulu, Finland)	20

Antennas and Propagation in Body Area Networks I

<i>Accuracy of Approximated WBAN Channel by Fundamental Modes of Spherical Wave Functions</i>	
Jun-ichi Naganawa (Tokyo Institute of Technology, Japan), Jun-ichi Takada (Tokyo Institute of Technology, Japan), Takahiro Aoyagi (Tokyo Institute of Technology & Graduate School of Decision Science and Technology, Japan), Minseok Kim (Niigata University, Japan)	25
<i>Development of a Tri-Polarized Dynamic Channel Sounder for Wireless Body Area Network</i>	
Gaochao Chen (Tokyo Institute of Technology, Japan), Jun-ichi Naganawa (Tokyo Institute of Technology, Japan), Minseok Kim (Niigata University, Japan), Jun-ichi Takada (Tokyo Institute of Technology, Japan)	30
<i>Analysis of Signal Propagation Loss on the Human Body in Intrabody Communication</i>	
Ibuki Yokota (Kyoto Institute of Technology, Japan), Yuichi Kado (Kyoto Institute of Technology & Graduate School of Science and Technology, Japan)	35
<i>A Thin, Flexible Receiving Coil for Wireless Power Transmission Based on Magnetic Induction to an Implantable Device</i>	
Ryutaro Iwashita (Tokyo University of Science, Japan), Masami Ishiwata (Tokyo University of Science, Japan), Yoji Takaguchi (Tokyo University of Science, Japan), Takashi Koike (Tokyo University of Science, Japan), Issei Hashimoto (Tokyo University of Science, Japan), Kenji Shiba (Tokyo University of Science, Japan)	40

<i>Measurement of Human Body Communication Transmission Characteristics At 20MHz</i> Thang Nguyen (The University of Tokyo, Japan), Dairoku Muramatsu (The University of Tokyo, Japan), Ken Sasaki (University of Tokyo, Japan)	45
--	----

[Special Session II] EMC

<i>Temperature Dependent on Electrical Properties of Swine Liver From 0.3 MHz to 30 MHz</i> S. Kon (Chiba University, Japan), Koichi Ito (Chiba University, Japan), Kazuyuki Saito (Chiba University, Japan)	49
<i>Electric Field Evaluation Around Radiation Sources Used for EMI Test with Medical Devices From Mobile Terminals</i> Satoshi Ishihara (NTT DOCOMO, INC., Japan), Teruo Onishi (NTT DOCOMO, Japan)	52
<i>Measurement and Analysis of the Electromagnetic Fields Radiated by the Medical Devices</i> Seungwoo Lee (Chungbuk National University, Korea), Nam Kim (Chungbuk National University, Korea)	56

Health-Care Systems and Applications

<i>The Human Movement Identification Using the Radio Signal Strength in WBAN</i> Sukhumarn Archasantisuk (Tokyo Institute of Technology, Japan), Takahiro Aoyagi (Tokyo Institute of Technology & Graduate School of Decision Science and Technology, Japan)	59
<i>Study for Acceptance on New Navigation Assistance by Visually Impaired People</i> Iikka Paajala (University of Oulu, Finland), Niina Keranen (University of Oulu, Finland)	64
<i>Using KINECT to Measure Joint Movement for Standing Up and Sitting Down</i> Hiroyuki Adachi (Kitasato University & Saibousosiki Saiseigaku, Japan)	68
<i>Biological Information Detection Using Ultra Wideband Signals</i> Aya Suzuki (Meiji University, Japan), Tetsushi Ikegami (Meiji University, Japan)	73
<i>Pulse Duty Factor and Transmission Power Evaluation of Direct Sequence Spread Spectrum Communication System for Body Area Network</i> Masayuki Sakata (Meiji University, Japan), Tetsushi Ikegami (Meiji University, Japan)	78

MAC Technologies for Body Area Networks

<i>Error Control Scheme Using Decomposable Codes for Various QoS in Multiple WBAN Environment</i> Kento Takabayashi (Yokohama National University, Japan), Hirokazu Tanaka (University of Oulu Research Institute Japan - CWC-Nippon, Japan), Chika Sugimoto (Yokohama National University, Japan), Ryuji Kohno (Yokohama National University & University of Oulu, Japan)	83
<i>Implantable Body Sensor Network MAC Protocols Using Wake-up Radio - Evaluation in Animal Tissue</i> Vignesh raja Karuppiiah ramachandran (University of Twente, The Netherlands), Berend Jan van der Zwaag (Adaptive Systems, The Netherlands), Nirvana Meratnia (University of Twente, The Netherlands), Paul Havinga (University of Twente, The Netherlands)	88
<i>Zone-Based Fuzzy Routing for WBANs</i> Harri Viittala (University of Oulu, Finland), Matti Hämäläinen (University of Oulu, Finland), Jari Iinatti (University of Oulu, Finland)	93

e-Health and Medical Information Systems

<i>Streamlining Medical Device Design Development Process From Research Laboratory to the Market</i>	
Tapani Koivukangas (Lewel Group Finland Oy, Finland), Junnu Lukkari (Lewel Group Finland Oy, Finland), Jussi P Haapola (Centre for Wireless Communications, University of Oulu, Finland), Ryuji Kohno (Yokohama National University & University of Oulu, Japan)	98
<i>Medical Image Protection Using Hyperchaos-based Encryption</i>	
Chong Fu (Northeastern University, P.R. China), Ye Lin (Northeastern University, P.R. China), Hui-yan Jiang (Northeastern University, P.R. China), Hong-feng Ma (TeraRecon, USA)	103
<i>Introduction of an RFID Tag System to a Large Hospital and the Practical Usage of the Data Obtained</i>	
Eisuke Hanada (Graduate school of Science and Engineering, Saga University, Japan), Makoto Hayashi (Shimane University Hospital, Japan), Akihiro Ohira (Shimane University School of Medicine, Japan)	108
<i>The Role of ICT, Healthcare Investment and eHealth Policy in Achieving Millennium Development Goals: A Cross-Country Comparison</i>	
Yoke Irawan (Institut Teknologi Bandung, Indonesia), Allya Paramita Koesoema (Australian School of Business, UNSW, Australia)	112

Antennas and Propagation in Body Area Networks II

<i>Experiments of a Polarization-controlled Active Antenna to Enhance BAN On-body Link in Human Dynamic Channels</i>	
Kun Li (University of Toyama, Japan), Kazuhiro Honda (University of Toyama, Japan), Koichi Ogawa (University of Toyama, Japan)	117
<i>Towards High On-Body Sensor Node Performance with the 3D Antennas for IR-UWB WBANs</i>	
Tommi Tuovinen (University of Oulu, Finland), Markus Berg (University of Oulu, Finland), Matti Hämäläinen (University of Oulu, Finland), Jari Iinatti (University of Oulu, Finland)	121
<i>Dynamic On-Body UWB Radio Channel Modeling</i>	
Timo Kumpulniemi (University of Oulu, Finland), Matti Hämäläinen (University of Oulu, Finland), Kamya Yekeh Yazdandoost (University of Oulu - Centre for Wireless Communications, Finland), Jari Iinatti (University of Oulu, Finland)	126
<i>Microwave Application in Medical Sensing</i>	
Yoshio Nikawa (Kokushikan University, Japan)	131

BAN Applications

<i>Elliptical Shape Estimation by Nonlinear Least-squares Method for Breast Cancer Using UWB Radar Technology</i>	
Yuta Okuyama (Yokohama National University, Japan), Pham Thanh Hiep (Yokohama National University, Japan), Kotaro Yamasue (Yokohama City University, Japan), Chika Sugimoto (Yokohama National University, Japan), Ryuji Kohno (Yokohama National University & University of Oulu, Japan)	134
<i>Performance Comparison Between TOA- And RSSI-Based Localization Methods for Wireless Capsule Endoscopy Systems</i>	
Takahiro Ito (Nagoya Institute of Technology, Japan), Daisuke Anzai (Nagoya Institute of Technology, Japan), Jianqing Wang (Nagoya Institute of Technology, Japan)	139
<i>Human Group Sensing and Networking: Scenario Development and Feasibility Study</i>	
Hiroyuki Yomo (Kansai University & Aalborg University, Japan), Daiki Nakamura (Kansai University, Japan), Shinsuke Hara (Osaka City University, Japan)	144
<i>New Method Measuring Effect of Medical Consultation Recommendation</i>	
Shigeaki Sakurai (Toshiba Corporation, Japan), Rumi Hayakawa (Toshiba Corporation, Japan), Hideki Iwasaki (Toshiba Solutions Corporation, Japan)	148

<i>Conceptual Design and Implementation of Indicator-based Smart Glasses</i>	
Aryan Firouzian (University of Oulu, Finland), Muhammad zeeshan Asghar (University of Oulu, Finland), Jari Tervonen (University of Oulu, Finland), Petri Pulli (University of Oulu, Finland), Goshiro Yamamoto (Nara Institute of Science and Technology, Japan)	153

PHY Technologies for Body Area Networks I

<i>Stochastic Spectral Occupancy Modeling: A Body Area Network Perspective in ISM Band</i>	
Muhammad Hasnain Virk (University of Oulu, Finland), Risto Vuottoniemi (University of Oulu, Finland), Matti Hämäläinen (University of Oulu, Finland), Jari Iinatti (University of Oulu, Finland), Juha-Pekka Mäkelä (University of Oulu, Finland)	157
<i>System Parameter Adjustment of FM-DCSK UWB for Different Medical Environments</i>	
Lin Wang (Xiamen University, P.R. China), Tingting Huang (Xiamen University, P.R. China), Weikai Xu (Xiamen University, P.R. China)	162
<i>An Energy-Efficient Switching Technique for 2-bit /Cycle SAR ADCs</i>	
Dune-Ting Fan (National Chung Cheng University, Taiwan), Ren-Hao Yeh (National Chung Cheng University, Taiwan), Yuan-Sun Chu (National Chung Cheng University, Taiwan), Tsung-Heng Tsai (National Chung Cheng University, Taiwan)	166
<i>Architecture and Communication Protocols for Cognitive Radio Network Enabled Hospital</i>	
Ishtiaq Al Mamoon (MJIIT, UTM, Malaysia), Akm Muzahidul Islam (University Teknologi Malaysia, Malaysia), Dr. Sabariah Baharun (Universiti Teknologi Malaysia, Malaysia), Komaki Shozo (Universiti Teknologi Malaysia (UTM), Malaysia), Ashir Ahmed (Kyushu University & Grameen Communications, Japan)	170
<i>Performance Evaluation on Transmit Polarization Diversity for Implant UWB-IR Communications</i>	
Yuto Shimizu (Nagoya Institute of Technology, Japan), Daisuke Anzai (Nagoya Institute of Technology, Japan), Jianqing Wang (Nagoya Institute of Technology, Japan)	175

Sensing and Signal Processing Techniques for Medical Healthcare Applications

<i>Regularizing Multi-bands Common Spatial Patterns (RMCSPP): A Data Processing Method for Brain-Computer Interface</i>	
Thang Quoc Le (King Mongkut's Institute of Technology Ladkrabang (KMITL), Thailand), Chivalai Temiyasathit (King Mongkut's Institute of Technology Ladkrabang (KMITL), Thailand)	180
<i>Reversible Blind Data Hiding for Verifying Integrity and Authenticating MRI and X-Ray Images</i>	
Angelos Fylakis (University of Oulu, Finland), Anja Keskinarkaus (University of Oulu, Finland), Vesa Kiviniemi (University of Oulu, Finland), Tapio Seppänen (University of Oulu, Finland)	185
<i>Estimating Surrounding Symptom Level of Dementia Patient by Sleep Stage</i>	
Shingo Tomura (The University of Electro-Communications, Japan), Tomohiro Harada (The University of Electro-Communications, Japan), Hiroyuki Sato (The University of Electro-Communications, Japan), Keiki Takadama (The University of Electro-Communications, Japan), Makoto Aoki (Aoki Hospital, Japan)	190
<i>Automatic Localization and Segmentation of Optic Disc in Fundus Image Using Morphology and Level Set</i>	
Ting Yu (Lanzhou University, P.R. China), Yide Ma (Lanzhou University, P.R. China), Wen Li (Lanzhou University, P.R. China)	195
<i>Breathing Motion Artifact Cancellation in PPG-Based Heart Rate Sensing</i>	
Takunori Shimazaki (Osaka City University, Japan), Shinsuke Hara (Osaka City University, Japan)	200

PHY Technologies for Body Area Networks II

<i>On IEEE 802.15.6 IR-UWB ED Receiver Performance in the Presence of Multiuser Interference</i> Kensuke Nakanishi (Osaka City University, Japan), Ville Niemelä (University of Oulu, Finland), Matti Hämäläinen (University of Oulu, Finland), Jari Iinatti (University of Oulu, Finland), Shinsuke Hara (Osaka City University, Japan)	204
<i>Loose Synchronization Method for Low-power Superregenerative Wake-up Receiver</i> Juha Petäjäjärvi (University of Oulu, Finland), Konstantin Mikhaylov (University of Oulu, Finland), Heikki Karvonen (University of Oulu, Centre for Wireless Communications, Finland), Risto Vuohtoniemi (University of Oulu, Finland), Matti Hämäläinen (University of Oulu, Finland)	209
<i>The Sensitivity of Joint Source-Channel Coding Based on Double Protograph LDPC Codes to Source Statistics</i> Lin Wang (Xiamen University, P.R. China), Huihui Wu (McMaster University, Canada), Shaohua Hong (Xiamen University, P.R. China)	213
<i>Interference Mitigation Method Using Orthogonal Matched Filter with Modified Hermite Pulse for UWB-BAN Assuming Multi-user and Multi-system Environment</i> Takumi Kobayashi (Yokohama National University & Graduate School of Engineering, Japan), Chika Sugimoto (Yokohama National University, Japan), Ryuji Kohno (Yokohama National University & University of Oulu, Japan)	218
<i>Uplink/Downlink Channels for the Dependable Medical Channel Coding Through the Cellular Standards 3G with End to End Connection of BAN</i> Emtithal Ahmed Talha (Yokohama National University, Japan), Ryuji Kohno (Yokohama National University & University of Oulu, Japan)	223
