1st Workshop on Vector Space Modeling for Natural Language Processing 2015

Held at NAACL HLT 2015

Denver, Colorado, USA
5 June 2015

ISBN: 978-1-5108-0432-6
Table of Contents

A Simple Word Embedding Model for Lexical Substitution
Oren Melamud, Omer Levy and Ido Dagan ............................................. 1

Unsupervised Text Normalization Using Distributed Representations of Words and Phrases
Vivek Kumar Rangarajan Sridhar ........................................................ 8

A Multi-classifier Approach to support Coreference Resolution in a Vector Space Model
Ana Zelaia, Olatz Arregi and Basilio Sierra ........................................ 17

Neural context embeddings for automatic discovery of word senses
Mikael Kågebäck, Fredrik Johansson, Richard Johansson and Devdatt Dubhashi ................. 25

Distributional Representations of Words for Short Text Classification
Chenglong Ma, Weiqun Xu, Peijia Li and Yonghong Yan ........................ 33

Relation Extraction: Perspective from Convolutional Neural Networks
Thien Huu Nguyen and Ralph Grishman ........................................... 39

Distributional Semantic Concept Models for Entity Relation Discovery
Jay Urbain, Glenn Bushee and George Kowalski .................................. 49

A Deep Architecture for Non-Projective Dependency Parsing
Erick Fonseca and Sandra Aluísio ....................................................... 56

Short Text Clustering via Convolutional Neural Networks
jiaming xu, peng wang, guanhua tian, bo xu, jun zhao, fangyuan wang and hongwei hao ...... 62

A Word-Embedding-based Sense Index for Regular Polysemy Representation
Marco Del Tredici and Núria Bel ....................................................... 70

Simple Semi-Supervised POS Tagging
Karl Stratos and Michael Collins ...................................................... 79

Learning Distributed Representations for Multilingual Text Sequences
Hieu Pham, Thang Luong and Christopher Manning .......................... 88

Combining Distributed Vector Representations for Words
Justin Garten, Kenji Sagae, Volkan Ustun and Morteza Dehghani .......... 95

Dependency Link Embeddings: Continuous Representations of Syntactic Substructures
Mohit Bansal .................................................................................. 102

DeepNL: a Deep Learning NLP pipeline
Giuseppe Attardi ............................................................................. 109

A Vector Space Approach for Aspect Based Sentiment Analysis
Abdulaziz Alghunaim, Mitra Mohtarami, Scott Cyphers and Jim Glass ............. 116
