

# **2015 IEEE Information Theory Workshop**

## **(ITW 2015)**

**Jerusalem, Israel**  
**26 April – 1 May 2015**

**IEEE Catalog Number: CFP15ITW-POD**  
**ISBN: 978-1-4799-5527-5**

# TABLE OF CONTENTS

|                                                                                                                                                         |            |
|---------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>CEO PROBLEM FOR BELIEF SHARING .....</b>                                                                                                             | <b>1</b>   |
| <i>Vempaty, Aditya ; Varshney, Lav R.</i>                                                                                                               |            |
| <b>A CONSTRAINED-DICTIONARY VERSION OF LZ78 ASYMPTOTICALLY ACHIEVES THE<br/>FINITE-STATE COMPRESSIBILITY WITH A DISTORTION MEASURE.....</b>             | <b>6</b>   |
| <i>Ziv, Jacob</i>                                                                                                                                       |            |
| <b>ON COMPLEXITY AND RANDOMNESS OF MARKOV-CHAIN PREDICTION.....</b>                                                                                     | <b>10</b>  |
| <i>Ratsaby, J.</i>                                                                                                                                      |            |
| <b>TIGHT BOUNDS FOR SYMMETRIC DIVERGENCE MEASURES AND A NEW INEQUALITY<br/>RELATING <math>f</math>-DIVERGENCES.....</b>                                 | <b>15</b>  |
| <i>Sason, Igal</i>                                                                                                                                      |            |
| <b>POLAR CODING FOR THE GENERAL WIRETAP CHANNEL .....</b>                                                                                               | <b>20</b>  |
| <i>Wei, Yi-Peng ; Ulukus, Sennur</i>                                                                                                                    |            |
| <b>DEGRADED BROADCAST CHANNEL: SECRECY OUTSIDE OF A BOUNDED RANGE.....</b>                                                                              | <b>25</b>  |
| <i>Zou, Shaofeng ; Liang, Yingbin ; Lai, Lifeng ; Shamai, Shlomo</i>                                                                                    |            |
| <b>UNIQUE FACTORIZATION AND CONTROLLABILITY OF TAIL-BITING TRELLIS<br/>REALIZATIONS VIA CONTROLLER GRANULE DECOMPOSITIONS.....</b>                      | <b>30</b>  |
| <i>Forney, G.David</i>                                                                                                                                  |            |
| <b>ERASURE/LIST RANDOM CODING ERROR EXPONENTS ARE NOT UNIVERSALLY<br/>ACHIEVABLE .....</b>                                                              | <b>35</b>  |
| <i>Weinberger, Nir ; Huleihel, Wasim ; Merhav, Neri</i>                                                                                                 |            |
| <b>CROSS-PACKING LATTICES FOR THE RICIAN FADING CHANNEL .....</b>                                                                                       | <b>40</b>  |
| <i>Sakzad, Amin ; Trautmann, Anna-Lena ; Viterbo, Emanuele</i>                                                                                          |            |
| <b>CODING FOR NETWORK-CODED SLOTTED ALOHA.....</b>                                                                                                      | <b>45</b>  |
| <i>Yang, Shenghao ; Chen, Yi ; Liew, Soung Chang ; You, Lizhao</i>                                                                                      |            |
| <b>UPPER BOUND ON FUNCTION COMPUTATION IN DIRECTED ACYCLIC NETWORKS .....</b>                                                                           | <b>50</b>  |
| <i>Huang, Cupjin ; Tan, Zihan ; Yang, Shenghao</i>                                                                                                      |            |
| <b>REFINED UPPER BOUNDS ON STOPPING REDUNDANCY OF BINARY LINEAR CODES .....</b>                                                                         | <b>55</b>  |
| <i>Yakimenka, Yauhen ; Skachek, Vitaly</i>                                                                                                              |            |
| <b>ENCODING AND DECODING ALGORITHMS FOR LP-DECODABLE MULTIPERMUTATION<br/>CODES .....</b>                                                               | <b>60</b>  |
| <i>Liu, Xishuo ; Draper, Stark C.</i>                                                                                                                   |            |
| <b>LATTICE INDEX CODING FOR THE BROADCAST CHANNEL .....</b>                                                                                             | <b>65</b>  |
| <i>Natarajan, Lakshmi ; Hong, Yi ; Viterbo, Emanuele</i>                                                                                                |            |
| <b>THE APPROXIMATE OPTIMALITY OF SIMPLE SCHEDULES FOR HALF-DUPLEX MULTI-<br/>RELAY NETWORKS.....</b>                                                    | <b>70</b>  |
| <i>Cardone, Martina ; Tuninetti, Daniela ; Knopp, Raymond</i>                                                                                           |            |
| <b>THROUGHPUT SCALING FOR RANDOM HYBRID WIRELESS NETWORKS WITH<br/>PHYSICAL-LAYER NETWORK CODING .....</b>                                              | <b>75</b>  |
| <i>Chang, Yunyan ; Stanczak, Slawomir ; Zhou, Chan</i>                                                                                                  |            |
| <b>ZERO-LATENCY ZERO-ERROR CODES FOR PARALLEL ASYNCHRONOUS CHANNELS<br/>WITH ARBITRARY SKEWS.....</b>                                                   | <b>80</b>  |
| <i>Engelberg, Shlomo ; Keren, Osnat</i>                                                                                                                 |            |
| <b>ON THE CAPACITY OF MULTIHOP DEVICE-TO-DEVICE CACHING NETWORKS .....</b>                                                                              | <b>84</b>  |
| <i>Jeon, Sang-Woon ; Hong, Song-Nam ; Ji, Mingyue ; Caire, Giuseppe</i>                                                                                 |            |
| <b>COMPUTE-AND-FORWARD USING NESTED LINEAR CODES FOR THE GAUSSIAN MAC .....</b>                                                                         | <b>89</b>  |
| <i>Zhu, Jingge ; Gastpar, Michael</i>                                                                                                                   |            |
| <b>BROADCAST CHANNELS WITH COOPERATION: CAPACITY AND DUALITY FOR THE<br/>SEMI-DETERMINISTIC CASE .....</b>                                              | <b>94</b>  |
| <i>Goldfeld, Ziv ; Permuter, Haim H. ; Kramer, Gerhard</i>                                                                                              |            |
| <b>CAPACITY RESULTS FOR THE MULTICAST COGNITIVE INTERFERENCE CHANNEL .....</b>                                                                          | <b>99</b>  |
| <i>Benammar, Meryem ; Piantanida, Pablo ; Shamai, Shlomo</i>                                                                                            |            |
| <b>THE GAUSSIAN INTERFERENCE CHANNEL WITH LACK OF CODEBOOK KNOWLEDGE<br/>AT ONE RECEIVER: SYMMETRIC CAPACITY TO WITHIN A GAP WITH A PAM INPUT .....</b> | <b>104</b> |
| <i>Dytso, Alex ; Tuninetti, Daniela ; Devroye, Natasha</i>                                                                                              |            |
| <b>ACHIEVING SECRECY CAPACITY OF THE WIRETAP CHANNEL AND BROADCAST<br/>CHANNEL WITH A CONFIDENTIAL COMPONENT .....</b>                                  | <b>109</b> |
| <i>Gulcu, Talha Cihad ; Barg, Alexander</i>                                                                                                             |            |

|                                                                                                                                               |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>ASYMPTOTIC DISTANCE PROPERTIES OF PROTOGRAPH-BASED SPATIALLY COUPLED LDPC CODES OVER GF(Q)</b> .....                                       | 114 |
| <i>Huang, Kechao ; Mitchell, David G.M. ; Ma, Xiao ; Costello, Daniel J.</i>                                                                  |     |
| <b>ON THE TRANSMISSION OF A BIVARIATE GAUSSIAN SOURCE OVER THE GAUSSIAN BROADCAST CHANNEL WITH FEEDBACK</b> .....                             | 119 |
| <i>Murin, Yonathan ; Kaspi, Yonatan ; Dabora, Ron ; Gunduz, Deniz</i>                                                                         |     |
| <b>ONE-TO-ONE LOSSLESS CODES IN THE VARIABLE INPUT-LENGTH REGIME: BACK TO KRAFT'S INEQUALITY</b> .....                                        | 124 |
| <i>Weinberger, Marcelo J.</i>                                                                                                                 |     |
| <b>SOME "GOODNESS" PROPERTIES OF LDA LATTICES</b> .....                                                                                       | 129 |
| <i>Vatedka, Shashank ; Kashyap, Navin</i>                                                                                                     |     |
| <b>POINT-WISE ANALYSIS OF REDUNDANCY IN SWLZ ALGORITHM FOR <math>\emptyset</math>-MIXING SOURCES</b> .....                                    | 134 |
| <i>Jain, Ayush ; Bansal, Rakesh K</i>                                                                                                         |     |
| <b>EXPONENTIAL RATES OF CONVERGENCE FOR WAITING TIMES AND GENERALIZED AEP</b> .....                                                           | 139 |
| <i>Jain, Ayush ; Bansal, Rakesh K</i>                                                                                                         |     |
| <b>WOM CODES WITH UNINFORMED ENCODER</b> .....                                                                                                | 144 |
