

2015 IEEE Electric Ship Technologies Symposium

(ESTS 2015)

**Old Town Alexandria, Virginia, USA
21-24 June 2015**

**IEEE Catalog Number: CFP15ESH-POD
ISBN: 978-1-4799-1858-4**

TABLE OF CONTENTS

* Presentation only, no paper appears in the proceedings

Power System Control Methods and Architectures

Chair: Antonello Monti, Aachen University

Shipboard Power Management using Constrained Nonlinear Model Predictive Control	1
<i>Philip Stone, Daniel F. Opila, Hyeongjun Park, Jing Sun, Steve Pekarek, Ray Decarlo, Eric Westervelt, James Brooks, Gayathri Seenumani</i>	

Design and Validation of a High Power Hybrid Energy Storage Module (HESM) using Active Fuzzy Logic Control (FLC)	*
<i>Isaac Cohen, Caroline Westenhov, David Wetz, John Heinzl, Qing Dong</i>	

Agent-Based Real-Time Coordination of Power Converters in a DC Shipboard Power System	8
<i>Maryam Nasri, Md Rishad Hossain, Herbert L. Ginn III, Mehrdad Moallem</i>	

MPC-Based Power Management in the Shipboard Power System	14
<i>S. Paran, T.V. Vu, T. El Mezyani, C.S. Edrington</i>	

Real-Time Distributed Coordination of Power Electronic Converters for Optimization of DC Shipboard Distribution Systems	19
<i>Md Rishad Hossain, Herbert L. Ginn III</i>	

Active Current Limiting and Protection for MVDC

Chair: Karl Hobart, Naval Research Laboratory

Experimental Verification of Limiting Fault Currents in MVDC Systems by using Modular Multilevel Converters	27
<i>K. Sun, D. Soto, M. Steurer, M.O. Faruque</i>	

Converter Topological and Solid State Protective Device Trade-Offs for Future Shipboard MVDC Systems	34
<i>Robert M. Cuzner, Vikas Singh, Mohammad Rashidi, Adel Nasiri</i>	

Primary and Backup Protection for Fault Current Limited MVDC Shipboard Power Systems	40
<i>Qiu Deng, Xing Liu, Ruturaj Soman, Michael Steurer, Roger A. Dougal</i>	

Studies on Asymmetrical Short Circuit Currents in Shipboard Medium Voltage Direct Current Distribution Systems fed by AC Generators	48
<i>A. Vicenzutti, F. Tosato, E. De Din, G. Sulligoi</i>	

Active Fault-Current Foldback Control in Thyristor Rectifier for DC Shipboard Electrical System	54
<i>Dong Dong, Rixin Lai, Yan Pan, Xinhui Wu, Konrad Weeber</i>	

Analysis and Design of Electrical Machines for Maritime Applications

Chair: Amir Etemadi, George Washington University

Dual Wound Machines for Electric Ship Power Systems	62
<i>C.G. Hodge, J. F. Eastham</i>	

Design of Wound Rotor and Permanent Magnet Synchronous Machines for MVDC Ship Power Generation	68
<i>P.R. O'Regan, S.D. Pekarek, S.D. Sudhoff, R. Wang</i>	
FPGA-Accelerated Simulink Simulations of Electrical Machines	74
<i>Kurtis Kredo II, John Zenor, Richard Bednar, Roy Crosbie</i>	
An Inner-Rotor Flux-Modulated Permanent-Magnet Synchronous Machine for Low-Speed High-Torque Applications	*
<i>Jonathan Crider, Scott Sudhoff</i>	
 Electric Ship Design Tools, Methods, and Guidelines I	
Chair: Mohamad Zahzah, L3 Communications	
Refinements in Generalized Immittance based Stability Analysis of DC Power Electronics based Distribution Systems	80
<i>H. Suryanarayana, S.D. Sudhoff</i>	
Stability Analysis and Control Design for an All-Electric Ship MVDC Power Distribution System using a Passivity based Stability Criterion and Power Hardware-in-the-Loop Simulation	86
<i>Jonathan Siegers, Enrico Santi</i>	
Reliability Analysis of Three-Dimensional Shipboard Electrical Power Distribution Systems	93
<i>Anamika Dubey, Surya Santoso, Aristotle Arapostathis</i>	
Test Environment for a Novel Medium Voltage Impedance Measurement Unit	99
<i>Ferenc Bogdan, John Hauer, James Langston, Karl Schoder, Michael Steurer, Igor Cvetkovic, Zhiyu Shen, Marko Jaksic, Christina DiMarino, Fang Chen, Dushan Boroyevich, Rolando Burgos</i>	
 Poster Session	
Hardware-in-the-Loop Simulation of Marine Electric Propulsion System	104
<i>Zhiguo Lin, Hui Chen, Haibo Gao, Keyi Zhan</i>	
Thermal Management of Air-Core Stator for a Large-Capacity HTS Motor	109
<i>Yong Zhou, Qi Dong, Jun Zheng</i>	
Evaluation of Lead Acid, Lithium-Ion, and NiMH Energy Storage Technologies at Cell, Module, and Battery Levels Under High Pulsed and Continuous C Rates	*
<i>Matthew Martin, Christopher Williams, David Wetz, Clint Gnegy-Davidson, Isaac Cohen, Caroline Westenhov, Derek Wong, John Heinzl, Qing Dong</i>	
Isolated Modular Multilevel (IMM) DC/DC Converter with Energy Storage and Active Filter Function for Shipboard MVDC System Applications	113
<i>Ran Mo, Rui Li, Hui Li</i>	
Real-Time Distributed Power Optimization in the DC Microgrids of Shipboard Power Systems	118
<i>T.V. Vu, S. Paran, T. El Mezyani, C.S. Edrington</i>	
Development and Implementation of a Dynamic Vapor Compression Refrigeration Model into vemESRDC Ship Thermal Management Tool	123
<i>Sam Yang, Jose VC Vargas, Tallita Nunes, Juan C. Ordonez</i>	
Development of a Control-Based Performance Management System for Shipboard Power Systems	129
<i>Jian Shi, Sherif Abdelwahed, Wanlu Zhu, Ranjit Amgai</i>	

Control Strategies of a Multiport Power Electronic Transformer (PET) for DC Distribution Applications	135
<i>Chunyang Gu, Zedong Zheng, Yongdong Li</i>	
A Comparative Study on the Optimal Combination of Hybrid Energy Storage System for Ship Power Systems	140
<i>Ahmed T. Elsayed, Osama A. Mohammed</i>	
Development of a Hybrid Model for Shipboard Power Systems	145
<i>Maziar Babaei, Jian Shi, Nasibeh Zohrabi, Sherif Abdelwahed</i>	
Design for Safety and Energy Efficiency of the Electrical Onboard Energy Systems	150
<i>Konstantinos Sfakianakis, Dracos Vassalos</i>	
Modeling of Common Mode Currents on Electric Ship Hull using Scattering Parameters	156
<i>Maryam Rahmani, Michael Mazzola</i>	
Investigation of Series DC Active Filter and Hybrid AC Active Filter Performance in Medium Voltage DC Amplifier	161
<i>Richard Beddingfield, Alex Davis, Hesam Mirzaee, Subhashish Bhattacharya</i>	
Energy Storage and Pulsating Loads - Integration, Control, and Impact on System Performance	
Chair: Giorgio Sulligoi, <i>University of Trieste</i>	
Analysis of Experimental Rapid Power Transfer and Fault Performance in DC Naval Power Systems	167
<i>Michael Steurer, Matthew Bosworth, Dionne Soto, Scott Sudhoff, Steve Pekarek, Rob Swanson, John Herbst, Scott Pish, Angelo Gattozzi, Doug Wardell, Mark Flynn, Tom Fikse</i>	
Progress in the Development of a Battery-based Pulsed Power System	175
<i>Brett Huhman, David Wetz</i>	
Large Scale Energy Storage Module for Surface Combatants: Transmission and System Transient Characteristics	180
<i>Stephen Kuznetsov</i>	
Power System and Energy Storage Models for Laser Integration on Naval Platforms	186
<i>A.L. Gattozzi, J.D. Herbst, R.E. Hebner, J.A. Blau, K.R. Cohn, W.B. Colson, J.E. Sylvester, M.A. Woehrman</i>	
Smart Management of Demand in Naval Application: Prospects and Technologies for Distributed Control of Loads	194
<i>F. D'Agostino, M. Saviozzi, F. Silvestro, A. Fidigatti, E. Ragaini</i>	
Ship Design Integration	
Chair: Norbert Doerry, <i>Naval Sea Systems Command</i>	
Space Reservation for Shipboard Electric Power Distribution Systems	200
<i>Chrysostomos Chrysostomidis, Chathan M. Cooke</i>	
Approach to Develop Ship Design Evaluation Rule-Base	206
<i>R.R. Soman, M. Andrus, M. Bosworth, I. Leonard, M. Steurer</i>	
Optimal Retrofitting of a Hybrid Propulsion System using NSGA-II Algorithm for Trailing Suction Hopper Dredger	214
<i>Keyi Zhan, Haibo Gao, Hui Chen, Zhiguo Lin</i>	

Adding Simulation Capability to Early-Stage Ship Design	220
<i>Matthew Ferrante, Julie Chalfant, Chryssostomos Chryssostomidis, Blake Langland, Roger Dougal</i>	
Operational Vignette-Based Electric Warship Load Demand	226
<i>John D. Stevens, Daniel F. Opila, Aaron M. Cramer, Edwin L. Zivi</i>	
Hybrid Power Architecture Integration	
Chair: Zareh Soghomonian, <i>HII Newport News Shipbuilding</i>	
Novel Permanent Magnet Systems for High Efficiency Electric Ships	232
<i>Heeju Choi, Melania Jasinski, Jinfang Liu</i>	
Performance Evaluation of Delta Connected 9-Phase Induction Machine for Electric Propulsion Application	237
<i>Omonowo Momoh</i>	
Relative MTTF Evaluation for Present and Future MV VFD Topologies on Ships	243
<i>Kathleen Lentijo</i>	
High Slew Rate Power Supplies for Support of Large Pulsed Loads	247
<i>John Herbst, Joseph Beno, Abdelhamid Ouroua, Scott Pish, Jonathan Hahne, Bob Hebner</i>	
Commercially Derived Hybrid Electric Drive (HED) Systems for Efficiency and Power Generation on Naval Ships	254
<i>Timothy J. McCoy, Aydin Mohtashamian</i>	
Electric Ship Design Tools, Methods, and Guidelines II	
Chair: Dwight Alexander, <i>Northrop Grumman</i>	
Design of a Notional Ship for use in the Development of Early-Stage Design Tools	259
<i>Julie Chalfant, Matthew Ferrante, Chryssostomos Chryssostomidis</i>	
Equivalent Circuits for Common-Mode Analysis of Naval Power Systems	265
<i>A.D. Brovont, S.D. Pekarek</i>	
Comprehensive System-Level Thermal Modeling of All-Electric Ships: Integration of SMCS and vemESRDC	271
<i>Sam Yang, Juan C. Ordonez, Jose VC Vargas, Hessam Babae, Julie Chalfant, Chryssostomos Chryssostomidis</i>	
Power Management and Energy Storage Experiments on a MW-Scale Naval Power System Test-Bed	276
<i>Scott Pish, John Herbst, Doug Wardell, Angelo Gattozzi, Mark Flynn</i>	
Comparison of Ship Power Systems from an Optimal Economic Operation Point of View	282
<i>P. Michalopoulos, G.J. Tsekouras, J.M. Prousalidis, F.D. Kanellos</i>	
Electrical Power Conversion for MVDC	
Chair: Mike Mazzola, <i>Mississippi State University</i>	
Experimental Investigation of the Performance of Two New Types of Soft-Switching Power Converters for Electric Ships	287
<i>F.D. Engelkemeir, A.L. Gattozzi, J.D. Herbst, R.E. Hebner, G.A. Hallock</i>	

Megawatt-Scale Power Hardware-in-the-Loop Simulation Testing of a Power Conversion Module for Naval Applications	294
<i>James Langston, Ferenc Bogdan, John Hauer, Karl Schoder, Michael Steurer, Donald Dalessandro, Tom Fikse, Jignas Cherry, Scott Gonstead</i>	
An Investigation into Current Source Inversion	302
<i>S. Nash</i>	
MW-Scale Power Hardware-in-the-Loop Experiments of Rapid Power Transfers in MVDC Naval Shipboard Power Systems	307
<i>Matthew Bosworth, Dionne Soto, Mike Sloderbeck, John Hauer, Michael Steurer</i>	
Performance Projection and Scalable Loss Model of SiC MOSFETs and SiC Schottky Diodes	312
<i>Kang Peng, Enrico Santi</i>	
Advances in Circuit Protection Technology	
Chair: Matthew Superczynski, Northrop Grumman	
1MW Bi-Directional DC Solid State Circuit Breaker based on Air Cooled Reverse Blocking-IGCT	318
<i>Francesco Agostini, Umamaheswara Vemulapati, Daniele Torresin, Martin Arnold, Munaf Rahimo, Antonello Antoniazzi, Luca Raciti, Davide Pessina, Harish Suryanarayana</i>	
The Z-Source Breaker for Ship Power System Protection	324
<i>Atif Maqsood, Keith A. Corzine</i>	
Ultrafast Autonomous Solid State Circuit Breakers for Shipboard DC Power Distribution	330
<i>Z. John Shen, Aref M. Roshandeh, Zhenyu Miao, Gourab Sabui</i>	
Design and Development of a 7.2 kV/200A Hybrid Circuit Breaker based on 15 kV SiC Emitter Turn-Off (ETO) Thyristor	337
<i>Alex Huang, Chang Peng, Xiaoqing Song</i>	
A New Class of High Speed Disconnect Switch based on Piezoelectric Actuators	343
<i>L. Graber, S. Smith, D. Soto, I. Nowak, J. Owens, M. Steurer</i>	
Measurement, Interface, and Testbed for Naval DC Systems	
Chair: Lisa Qi, ABB Corporate Research Center	
A Reduced Scale Naval DC Microgrid to Support Electric Ship Research and Development	349
<i>Scott Sudhoff, Steve Pekarek, Rob Swanson, Veda Duppalli, Dan Horvath, Andrew Kasha, Ruiyang Lin, Bryan Marquet, Peter O'Regan, Harish Suryanarayana, Yimajian Yan</i>	
DC Voltage Interface Standards for Naval Applications	357
<i>Norbert Doerry, John Amy</i>	
Modular Scalable Medium-Voltage Impedance Measurement Unit using 10 kV SiC MOSFET PEBBs	365
<i>Igor Cvetkovic, Zhiyu Shen, Marko Jaksic, Christina DiMarino, Fang Chen, Dushan Boroyevich, Rolando Burgos</i>	
Fast, Configurable Over-Current Protection for High-Power Modules	371
<i>Ryan Graves, Andrew Lemmon, Levi Gant</i>	
PHIL Implementation of a MVDC Fault Management Test Bed for Ship Power Systems based on Megawatt-Scale Modular Multilevel Converters	376
<i>M. Andrus, H. Ravindra, J. Hauer, M. Steurer, M. Bosworth, R. Soman</i>	

Power Distribution, Cabling, and Grounding

Chair: Chris Edrington, *Florida State University / CAPS*

Performance Assurance for DC Cables for Electric Ships	382
<i>Robert E. Hebner, Angelo L. Gattozzi, Steve D. Pekarek</i>	
Early Stage Design Tool for Marine Power Interconnect Systems	388
<i>Angela Card, Michael Mazzola, Greg Henley</i>	
How Scattering Parameters Can Benefit the Development of All-Electric Ships	392
<i>L. Graber, B. Mohebbali, M. Bosworth, M. Steurer, A. Card, M. Rahmani, M. Mazzola</i>	
Shipboard Electrical System Grounding	397
<i>Sergio Panetta</i>	
High Voltage Ship-to-Shore Connection for Electric Power Supply Support in Landing Operations: an Analysis	403
<i>A. Vicenzutti, F. Tosato, G. Sulligoi, G. Lipardi, L. Piva</i>	

Systems Modeling and Analysis

Chair: Norbert Doerry, *Naval Sea Systems Command*

System-Level Analysis of Chilled Water Systems Aboard Naval Ships	409
<i>Hessam Babae, Julie Chalfant, Chrysostomos Chrysostomidis, Amiel B. Sanfiorenzo</i>	
Electrical Characteristics and Transient Analysis of HTS DC Power Cables for Shipboard Application	415
<i>Jin-Geun Kim, M. Amin Salmani, Lukas Graber, Chul H. Kim, Sastry V. Pamidi</i>	
Early-Stage Shipboard Power System Simulation of Operational Vignettes for Dependability Assessment	421
<i>Aaron M. Cramer, Xiao Liu, Yuqi Zhang, John D. Stevens, Edwin L. Zivi</i>	
Modeling and Data Exchange in a Concurrent and Collaborative Design Environment for Electric Ships	427
<i>Blake Langland, Rod Leonard, Richard Smart, Roger A. Dougal</i>	
Reachability Analysis of Shipboard Power Systems with Uncertain Pulsed Loads	434
<i>Hugo N. Villegas Pico, Dionysios C. Aliprantis, Scott D. Sudhoff</i>	

Considerations for the Design of Shipboard Distribution and Protection

Chair: Matthew Superczynski, *Northrop Grumman*

Design Issues and Practical Application Challenges of DC Shipboard Distribution System Protection	442
<i>Li Qi, Jiaqi Liang</i>	
Fault Isolation and Reconfiguration in a Three-Zone System	448
<i>Mark W. Rose, Robert M. Cuzner</i>	
Investigation of the Feasibility of a Superconducting "Self-Healing" DC Grid on a LNG Carrier	454
<i>P. Katsiroumpas, D. Spathis, S. Dallas, J. Prousalidis, T. Kourmpelis, M. Korn</i>	
Analysis of Various Power Quality Phenomena in a Highly Electrified Vessel	459
<i>D. Spathis, E. Nikolopoulou, S. Dallas, J. Prousalidis, A. Kladas, E. Tatakis, I. Pallis, M. Beniakar, F. Kanellos, A. Sarigiannidis, I. Gonos, V. Kontargyri, G. Tsekouras, T. Kourmpelis, M. Korn</i>	
Modular Multilevel DAB (M2DAB) Converter for Shipboard MVDC System with Fault Protection and Ride-Through Capability	466
<i>Ren Xie, Yanjun Shi, Hui Li</i>
