Contents

Blast

- Are Window Mullion Response Limits Too Conservative?1**
Carrie Davis, Ed Conrath, Matt Tomanek, and Aldo McKay
- Multi-Hazard Design of Facades: Important Considerations of Wind and Seismic Interaction with Blast Requirements13**
Aldo E. McKay, Cliff A. Jones, Ed Conrath, and Carrie Davis
- Protection of Cable-Stay Bridges from Accidental and Man-Made Fire Hazards: A Rational Physics-Based Approach to Analyzing Vulnerabilities and Mitigations24**
M. Woodworth, E. Hansen, C. McArthur, and N. Abboud
- Structural Silicone Effect on Window Frames Subjected to Blast Loading38**
David Holgado, John Puryear, Darrell Barker, and Manuel Diaz

Blast and Impact

- Comparison of the Approaches Used for the Evaluation of Accidental Load Drops in Nuclear Power Plant Structures50**
Asadollah Bassam, and Javad Moslemian
- Dynamics Simulations of Concrete and Concrete Structures through the Lattice Discrete Particle Model63**
Jovanca Smith, Congrui Jin, Daniele Pelessone, and Gianluca Cusatis
- Impact Assessment of SC Walls Using Idealized SDOF and TDOF Models75**
Jakob Bruhl, William H. Johnson, Damon G. Reigles, Jie Li, Amit H. Varma, and Joo Min Kim
- Mechanical Properties of Structural Steel under Post-Impact Fire87**
Mahsa Mirmomeni, Amin Heidarpour, Xiao-Ling Zhao, Jeffrey A. Packer, and Chengqing Wu
- Performance of Reinforcement Bar Mechanical Couplers at Low, Medium, and High Strain-Rates99**
Stephen P. Rowell

| | |
|--|------------|
| Retrofit of an Elevated Metal Building in an LNG Facility to Resist Blast Loading Resulting from an External Accidental Explosion | 115 |
| Song F. Jan, Andrew N. Hart, and Siddharth Kulkarnix | |
| Robustness and Energy Absorption Capacity of Laterally Unrestrained Reinforced Concrete Slabs..... | 127 |
| B. Herraiz and T. Vogel | |
| Secondary Debris Calculations for Protective Structures | 139 |
| J. M. Magallanes, M. K. Weaver, T. R. Brewer, J. Abraham, and J. E. Crawford | |
| Summary of Blast Tests on Steel-Plate Reinforced Concrete Walls..... | 151 |
| Jakob C. Bruhl, and Amit H. Varma | |
| <i>Bridge Practice</i> | |
| Analysis of the Influence of Structural Models in Fire Responses of Steel Girder Bridges | 160 |
| G. Peris-Sayol, I. Paya-Zaforteza, J. Alos-Moya, and A. Hospitaler | |
| Bridge Load Rating Practices for Cranes | 172 |
| Thomas North | |
| Estimating Wave Loads on Bridge Decks | 183 |
| Derek James, John Cleary, and Scott Douglass | |
| Fatigue Evaluation of a Steel Orthotropic Deck for a Lift Bridge by Laboratory Testing of a Full Scale Prototype | 194 |
| S. Mukherjee, and S. Roy | |
| Fatigue Performance of Bolted Single Support Bar Modular Bridge Joint Systems under Simulated Truck Traffic | 204 |
| Frank A. Artmont and Sougata Roy | |
| Heavy Rail below the 100-Year Flood Elevation—Innovations in Design: A Case Study | 213 |
| Brian S. Maxwell, and Howard A. Wells | |
| Hoover Mason Trestle: A Modern Steel Walkway on the Tracks of a Former Ore Train, Bethlehem Steel Plant, Bethlehem, PA..... | 226 |
| Matthew H. Johnson, Charlotte A. Bouvier, and Eric J. Twomey | |
| Innovative Design for the SFOBB I-80 WB Ramps at Yerba Buena Island..... | 242 |
| Hohsing Lee and Allen Ely | |

| | |
|--|------------|
| Structural Reliability Assessment of Long-Span Cable-Stayed Bridges Subjected to Cable Loss | 254 |
| Yufen Zhou and Suren Chen | |

| | |
|--|------------|
| Upgrading the Delair Bridge to Meet the Needs of the Future for Commerce..... | 266 |
| David Leymeister, Timothy Tierney, Stephen Schmidt, Jayne Yost, Ryan Hill, and Gerald Petroski | |

Bridge Practice Topics

| | |
|---|------------|
| A Field Assessment of Timber Highway Bridge Durability in the United States..... | 278 |
| J. P. Wacker, B. K. Brashaw, and F. Jalinoos | |

| | |
|--|------------|
| A New Look at Modern Timber Bridges | 287 |
| Paul C. Gilham | |

| | |
|---|------------|
| Coos Bay (McCullough Memorial) Bridge Rehabilitation | 299 |
| Ray Bottenberg | |

| | |
|--|------------|
| Forensic Investigation of the Route 61 Bridge | 309 |
| M.T. Yarnold and G. S. Wilson | |

| | |
|---|------------|
| Huey P. Long Bridge Widening and Truss Lift Monitoring | 322 |
| Thomas L. Weinmann | |

| | |
|--|------------|
| Interpretation and Reporting of Load Test Results from a Cantilever-Truss Bridge with Internal Movement Mechanisms..... | 332 |
| N. C. Dubbs | |

Bridge Research

| | |
|---|------------|
| Bridge Superstructure Design for Tsunamis: A State-of-the-Art Methodology for Tsunami Modeling, Load Simulation, and Structural Response Assessment..... | 345 |
| Mohsen Azadbakht and Solomon C. Yim | |

| | |
|---|------------|
| Condition Assessment of Bridges Using Terrestrial Laser Scanners | 355 |
| Burcu Guldur, Yujie Yan, and Jerome F. Hajjar | |

| | |
|--|------------|
| Implementation of a Fully Autonomous Platform for Assessment of Concrete Bridge Decks RABIT | 367 |
| N. Gucunski, S.-H. Kee, H. La, B. Basily, A. Maher, and H. Ghasemi | |

Inspection and Maintenance of Weathering Steel Bridges379
Douglas D. Crampton, and Kurt P. Holloway

**Integration of Element Inspection Data in Model Updating and Performance
Evaluation of In-Service Bridge Superstructures.....392**
Amir Gheitani and Devin K. Harris

Investigation on Bridge Assessment Using Unmanned Aerial Systems.....404
F. Khan, A. Ellenberg, M. Mazzotti, A. Kontsos, F. Moon, A. Pradhan, and
I. Bartoli

New Priorities for Bridge Rehabilitation: Leading the Way in Louisiana.....414
John Rathke and Amy Squitieri

Bridge Research Topics

**A Hybrid Data Interpretation Framework for Automated Performance
Monitoring of Infrastructure.....426**
M. Malekzadeh, G. Atia, and F. N. Catbas

**A Simplified Method for Modeling Soil-Structure Interaction for Rigid
Frame Structures435**
Hari Aamidala, and John Kim

**Analysis and Monitoring of Southington I-84 Bridges during Accelerated
Bridge Construction447**
Martin J. Pierce, and Merve Iplikcioglu Kirtan

**Bridges with Innovative Buckling Restrained SMA Expansion Joints
Having a High Symmetrical Tension/Compression Capacity452**
Chuang-Sheng Walter Yang and Reginald DesRoches

**Creative and Sustainable Timber Bridges Using Preservative Treated
Wood462**
Ted LaDoux and Butch Bernhardt

**Damping-Ductility Relationship for Performance Based Seismic Design of
Shape Memory Alloy Reinforced Concrete Bridge Pier474**
A.H.M. Muntasir Billah, and M. Shahria Alam

**Design Implementation of Buckling Restrained Braces for Seismic
Retrofitting of Reinforced Concrete Multi-Column Bridge Bents.....485**
Ramiro Bazaez and Peter Dusicka

| | |
|---|------------|
| Direct Displacement-Based Seismic Design and Validation for Hybrid Sliding-Rocking Bridge Substructure Systems | 497 |
| Sreenivas Madhusudhanan and Petros Sideris | |
| Earthquake Ground Motions for Design of the Sixth Street Viaduct | 514 |
| Patrick Wilson, and Hubert Law | |
| Evaluation of Ground Vibrations from Pile Driving Conducted for Bridge Construction..... | 526 |
| Mark R. Svinkin | |
| Extracting Structural Models through Computer Vision..... | 538 |
| Ali Khaloo and David Lattanzi | |
| High-Damage and Low-Damage Seismic Design Technologies for Accelerated Bridge Construction | 549 |
| M. Mashal and A. Palermo | |
| Numerical Simulations and Field Monitoring of Integral Abutment Bridges.. | 561 |
| James LaFave, Larry Fahnestock, Matthew Jarrett, Beth Wright, Joseph Riddle, and Jeffrey Svatora | |
| Performance-Based Seismic Design for the Vancouver Evergreen Line Rapid Transit Project—Process, Challenges, and Innovative Design Solutions..... | 573 |
| Saqib Khan, and Jianping Jiang | |
| Seismic Behavior of Hollow-Core FRP-Concrete-Steel Bridge Columns | 585 |
| Omar I. Abdelkarim, Ahmed Gheni, Sujith Anumolu, and Mohamed A. ElGawady | |
| Seismic Vulnerability Assessment of a Multi-Span Continuous Steel-Girder Bridge Isolated by SMA Wire-Based Natural Rubber Bearings (SMA-NRB) | 597 |
| F. Hedayati-Dezfuli and M. Shahria Alam | |
| UAS-Based Inspection of the Placer River Trail Bridge: A Data-Driven Approach | 607 |
| K. Cunningham, D. Lattanzi, R. Dell’Andrea, M. Riley, T. Huette, R. Goetz, and R. Wilson | |
| <i>Building Case Studies</i> | |
| Case Study: Four Story Assisted Living Facility Alleges Unacceptable Design and Construction Defects; What Can We Learn? | 616 |
| William J. Kirkham | |

| | |
|---|------------|
| Converting Air Rights Challenges into Significant Development Opportunities in NYC, Manhattan West, and Hudson Yards | 627 |
| C. Besjak, B. Kim, A. Ble, and A. Thewis | |
| Communication and Coordination in Residential Concrete Construction with a 2-Day Cycle | 648 |
| Ramon Gilsanz, Yun Jennifer Lan, and Petr Vancura | |
| Engineering Plans versus Construction Practice: When Just Calling It Out Is Not Enough..... | 656 |
| Felix Martin | |
| Evaluating Crowd Induced Dynamic Loads through Field Measurement and Analytical Methods | 667 |
| Nicholas Aitken, Eric J. Wheeler, Ken R. Maschke, and William D. Bast | |
| Evolution of an Iconic Dome in San Diego | 680 |
| Paul Endres | |
| International Existing Building Code Implementation and Associated Challenges: Case Studies Related to the Repair of Damaged Structures..... | 690 |
| Ross J. Smith, and Matthew E. Lewis | |
| Full-Scale Cyclic Testing of an Ordinary Concentrically-Braced Frame | 702 |
| C. Bradley, L. A. Fahnestock, E. M. Hines, and J. Sizemore | |
| Modern Examples of Structural Art in Metals | 714 |
| S. R. Arwade, B. W. Schafer, D. F. Schafer, and S. T. Schafer | |
| Performance Problems and Failures in Non-Engineered Wood-Frame Buildings | 730 |
| Leonard J. Morse-Fortier | |
| The Bay Adelaide Centre: Twenty-Five Years of Structural Innovation | 742 |
| Barry Charnish and Shelley Finnigan | |
| The Creative Designer: Educating Divergent Thinkers in a Convergent Climate..... | 755 |
| A. E. Surovek, D. H. Cropley, D. H. Jensen, and J. L. Benning | |
| Tilt | 769 |
| Christian DeFazio, John Peronto, and Robert Sinn | |
| When No Perimeter Columns Meet the Ground: 111 South Main, Salt Lake City | 781 |
| M. Sarkisian, P. Lee, A. Tsui, L. Handzhiyski, A. Beghini, and A. Lago | |

| | |
|---|------------|
| Back to the Future: Renovation of a 1930s Apartment Building into an Art Gallery | 795 |
| Matt Thomas, Ken Maschke, and William D. Bast | |

Building Codes and Standards

| | |
|---|------------|
| ASCE/SEI 7 Appendix E Proposal: Performance-Based Design Procedures for Fire Effects on Structures | 807 |
| Therese P. McAllister, Kevin J. LaMalva, and Maria E. Moreyra Garlock | |

| | |
|---|------------|
| Determination of Temperature Histories for Analysis of Structural Response to Fire | 819 |
| Kevin J. LaMalva and Morgan Hurley | |

| | |
|---|------------|
| Historical Study of the Wind Design Provisions of ASCE 7 | 829 |
| Vincent F. Fratinaro and Scott A. Schroeder | |

| | |
|---|------------|
| Proposed Refinements to Design Snow Load Derivation..... | 840 |
| Jan Dale, Scott Gamble, and Albert Brooks | |

Building Topics

| | |
|---|------------|
| A Study on Effective Mass of One Way Joist Supported Systems | 852 |
| Onur Avci, and Brad Davis | |

| | |
|--|------------|
| An Impedance Model Approach to Predicting Train-Induced Vibrations in Buildings | 864 |
| Kayiparambil P. Anish, James A. Moore, Cory R. Brett, and Masoud Sanayei | |

| | |
|---|------------|
| Behavior of Deconstructable Steel-Concrete Shear Connection in Composite Beams | 876 |
| Lizhong Wang, Mark D. Webster, and Jerome F. Hajjar | |

| | |
|--|------------|
| Consideration of Shear Stud Slip in the Design of Partially Composite Beams | 888 |
| Kristi L. Selden, Amit H. Varma, and J. R. Mujagic | |

| | |
|---|------------|
| Construction and Anchorage Considerations for Steel-Concrete Composite Floor Systems | 900 |
| T. Francisco and J. Liu | |

| | |
|---|------------|
| Identification of Mass-Spring-Damper Model of Walking Humans | 912 |
| E. Shahabpoor, A. Pavic, and V. Racic | |

Development and Testing of an Innovative Fastener for Use with Cladding over Foam Sheathed Wood Framed Walls.....924
David A. Deress, and Zeno Martin

Integrating Environmental Impacts as Another Measure of Earthquake Performance for Tall Buildings in High Seismic Zones933
K. Simonen, S. Merrifield, I. Almufti, K. Strobel, and J. Tipler

New Heights in Sustainability—Pertamina Energy Tower945
Charles Besjak, Preetam Biswas, Georgi I. Petrov, Gavin Meinschein, and Alexander Jordan

Business and Professional Practice

Structural Observation, Special Inspection, or Building Inspection: Where Does Responsibility for Quality Assurance Lie?.....961
J. A. Villamil and M. M. Haddix

Concrete Composite and Cold Formed Topics

Advanced Analysis and Seismic Design of Concrete-Filled Steel Tube Structures972
Mark D. Denavit, Jerome F. Hajjar, Roberto T. Leon, and Tiziano Perea

Assessment of First Generation Performance-Based Seismic Design Methods: Case Study of a 4-Story Reinforced Concrete Special Moment Frame Building984
Siamak Sattar and Anne M. Hulsey

Enabling Cold-Formed Steel System Design through New AISI Standards.....995
B. W. Schafer, H. Chen, B. E. Manley, and J. W. Larson

Optimization of Cold-Formed Steel Framed Shear Wall Sheathed with Corrugated Steel Sheets: Experiments and Dynamic Analysis1008
Cheng Yu, Guowang Yu, and Jie Wang

Outline of Specification for Composite SC Walls in Nuclear Facilities.....1021
Saahastaranshu R. Bhardwaj, Amit H. Varma, and Taha Al-Shawaf

P-M Interaction Equations for Design of CFT Beam-Columns1032
Zhichao Lai, Amit H. Varma, and Lawrence G. Griffis

Rectangular SC Wall Piers: Summary of Seismic Behavior and Design1042
Efe G. Kurt, Amit H. Varma, Siamak Epackachi, and Andrew S. Whittaker

| | |
|---|-------------|
| Using an Alternative Method of Analysis to Evaluate Punching Shear Capacity in Existing Post-Tensioned Shear Reinforced Concrete Floor Slabs | 1052 |
| R. W. Kritzler, O. C. Guedelhoefer, B. T. Lammert, and W. J. Macicak | |

Disproportionate Collapse

| | |
|---|-------------|
| Analysis of a Half-Scale Composite Floor System Test under Column Loss Scenarios | 1065 |
| J. A. Main, J. M. Weigand, E. S. Johnson, T. W. Francisco, J. Liu, J. W. Berman, and L. A. Fahnestock | |

| | |
|--|-------------|
| Collapse Analysis and Testing of an Existing Building | 1078 |
| Halil Sezen and Ebiji A. Akah | |

| | |
|--|-------------|
| Experimental Dynamic Response of Reinforced Concrete Flat Plate Sub-Structure under Collapse Scenario | 1090 |
| Zhonghua Peng, Sarah Orton, and Ying Tian | |

| | |
|---|-------------|
| Experimental Study on Precast Beam Column Connections Constructed Using RC Corbel and Steel Billet under Progressive Collapse Scenario | 1101 |
| R. B. Nimse, D. D. Joshi, and P. V. Patel | |

| | |
|---|-------------|
| Framing Strategies for Robustness in Steel Buildings | 1118 |
| G. Cortes, J. Liu, and T. Francisco | |

| | |
|---|-------------|
| Improved Value for Load Increase Factor in Disproportionate Collapse | 1130 |
| Y. Ghaffari, S. Pezeshk, and A. Abdelnaby | |

| | |
|--|-------------|
| Improving the Resistance to Progressive Collapse of Steel and Composite Moment Frames | 1138 |
| David Nethercot and Carolos Vidalis | |

| | |
|--|-------------|
| New Steel Gravity Connection Details for Enhanced Integrity | 1150 |
| J. M. Weigand and J. W. Berman | |

| | |
|--|-------------|
| Simple Methods for Evaluating Localized Collapse and Falling Debris under Column Loss Scenarios | 1161 |
| Leslie Quiter, Jessie Godinho, and Shalva Marjanishvili | |

| | |
|--|-------------|
| System Response of Full-Scale Reinforced Concrete Framing Systems to Column Removal and Blast Loading | 1173 |
| K. B. Morrill, J. E. Crawford, T. R. Brewer, M. K. Weaver, J. P. Hatfield, and P. J. Vonk | |

Use of Ring Beams for Progressive Collapse Retrofit1183
Dara Naderi, Macarena Schachter Adaros, and Scott Wood

**Vulnerability of RC Buildings to Progressive Collapse Based on 2003 and
2013 GSA Guidelines1195**
Farzad Rouhani, Lan Lin, and Khaled Galal

Emerging Technologies

**Application of Importance Factor for Classification of Bridges for
Mitigating Fire Hazard1206**
M. Z. Naser and V. K. R. Kodur

Biobased FRPs for Retrofit and Rehabilitation of Civil Infrastructure.....1215
Kristen Hess, Sean Hinchcliffe, and Wil V. Srubar III

**Cyclic Performance of Hollow Structural Sections Filled with High
Damping, Light Weight Materials1225**
Dan Wei, Tasha Tardieu, and Jason McCormick

Design and Component Testing of an SMA-Based Seismic Control Device ...1237
O. E. Ozbulut, B. Silwal, and R. Michael

Design and Delivery of Structural Material Innovations.....1253
Shaina Saporta, Frances Yang, and Matthew Clark

**Earthquake Damage-Resistant Tall Buildings at Near Fault Regions Using
Base Isolation and Rocking Core Walls.....1266**
Y. Lu and M. Panagiotou

**Environmental Effects on Material and Bond Durability of CFRP and
AFRP for Prestressed Concrete Bridge Applications1278**
Mohamad Shawki Amine, Jonathon Tanks, Devin K. Harris, and Monique Head

**Identification and Repair of Microbiologically-Influenced Corrosion at the
Jamestown-Verrazzano Bridge1290**
Michael J. Abrahams, and Steven Kaufman

**Inertial Force-Limiting Anchorage System for Seismic Resistant Building
Structures1302**
Robert Fleischman, Jose Restrepo, Arpit Nema, Dichuan Zhang, Ulina Shakya,
Zhi Zhang, Richard Sause, Georgios Tsampras, and Giorgio Monti

| | |
|--|-------------|
| Investigation of the Effects of Graphene on the Micro- and Macro-Properties of Cementitious Materials | 1314 |
| Teng Tong, Zhou Fan, Qiong Liu, Sen Wang, and Qiang Yu | |
| Large-Scale Experimental Results for Self-Centering Beams with Resilient Seismic Performance | 1326 |
| A. Maurya and M. R. Eatherton | |
| Lateral Load Response of Unbonded Post-Tensioned Cast-in-Place Concrete Walls | 1338 |
| Leary Pakiding, Stephen Pessiki, Richard Sause, and Moises Rivera | |
| Live-Load Testing of a Steel Cantilevered Deck Arched Pratt Truss Bridge..... | 1350 |
| Matt Laurendeau, Paul J. Barr, Arek Higgs, and Marvin W. Halling | |
| Measured Behavior of a Reinforced Concrete Coupled Wall with Fully Post-Tensioned Coupling Beams | 1361 |
| Steven M. Barbachyn, Yahya C. Kurama, Michael J. McGinnis, and Richard Sause | |
| Multi-Hazard Life-Cycle Analysis of Flood-Scour Effects on Seismic Bridge Performance..... | 1370 |
| ZhiQiang Chen and Xuan Guo | |
| Performance Based Seismic Design of Reinforced Concrete Structures with ACI 318-14..... | 1380 |
| Andrew W. Taylor | |
| Performance-Based Hurricane Risk Assessment of Residential Structures with Consideration of Multiple Hazard Sources | 1389 |
| Vipin U. Unnikrishnan and Michele Barbato | |
| Probabilistic Performance Based Design Multi-Objective Optimization for Steel Structures | 1401 |
| Sanaz Saadat, Charles V. Camp, Shahram Pezeshk, and Christopher M. Foley | |
| Rehabilitation of Steel Bridge Girders with Corroded Ends Using Ultra-High Performance Concrete..... | 1411 |
| Kevin Zmetra, Arash E. Zaghi, and Kay Wille | |
| Steel Sliding-Controlled Coupled Beam Modules for Advanced Resilience of Moment Resisting Frame Building Systems | 1423 |
| Ying-Cheng Lin | |

Structural Response of Joints Made with Generic UHPC1435
Mouhamed Alkaysi and Sherif El-Tawil

The ASCE 7 Tsunami Loads and Effects Design Standard.....1446
Gary Y. K. Chock

Time-Dependent Probabilistic Capacity Assessment of a Prestressed Concrete Pile in a Spatially Varying Corrosive Marine Environment Using Detailed Finite Element Methods1457
Daniel T. Schmuhl and Abdollah Shafieezadeh

Time-Dependent Reliability Analysis on the Flexural Behavior of Corroded RC Beams before and after Repairing.....1470
Siavash Sajedi and Qindan Huang

Natural Disasters and Resilience

A First Step towards a General Methodology for the Performance-Based Design of Wind-Excited Structures.....1482
S. M. J. Spence, E. Bernardini, and A. Kareem

A Many-Objective Framework to Design the Restoration of Damaged Bridges on a Distributed Transportation Network1494
Mehmet Unal and Gordon P. Warn

Agent-Based Model for Pedestrians' Evacuation after a Blast Integrated with a Human Behavior Model1506
S. Pluchino, C. M. G. Tribulato, A. Caverzan, A. Mc Quillan, G. P. Cimellaro, and S. Mahin

Community Resilience of the Built Environment.....1518
Therese P. McAllister

Design of a Tsunami Vertical Evacuation Refuge Structure in Westport, Washington.....1530
Cale Ash

Earthquake Rapid Loss Assessment Using Communication Systems to Improve Resilience of Emergency Responders1538
A. Vallero, G. P. Cimellaro, and S. Mahin

Emergency and Disaster Preparedness through Collaboration and Community Outreach.....1550
Edward H. Stehmeyer III

| | |
