Contents

History and Heritage

A Journey to Machu Picchu.....1
Dale Jacobson, Jeanette Brown, and Debra Leigh

Brunel: The Man Who Changed the World.....14
Robert Hulse

Changes in Management of Highland Lakes of Central Texas.....29
Chris Riley, J. David Walker, and Richard E. Brown

Dam Safety in Texas—An Owner's Journey 34
Gregor Forbes, Doug Witkowski, Les Boyd, Victor Vasquez, and John Wolfhope

Early Historical Floods in Central Texas 48
Melinda Luna

Geotechnical Engineering and Geological Engineering of the Golden Age of Texas Dam Building 54
John W. Johnston, James F. Phipps, and Robert S. Patton

Historic Civil Engineering in the U.K.: EWRI Friends Visit London, York, Edinburgh, Arbroath, and Glasgow for Titan Crane Landmark Ceremony 66
Bill Bulloch, Kathlie Bulloch, Jerry Rogers, Augustine Fredrich, and Roland Paxton

History of Federal Dam Construction in Texas 74
J. L. Cotter and J. S. Rael

James Pugh Kirkwood, ASCE Second President, Water Filtration Pioneer, and His Scottish and U.S. Engineering Practice 95
Roland A. Paxton and Jerry R. Rogers

Lake Livingston 107
W. H. Espey Jr., Kevin Ward, and Jun Chang

Leo R. Beard—The Father of Hydrologic Engineering.....117
David T. Ford and Augustine J. Fredrich

Overview of Wastewater Management through the Ages 125
Jeanette Brown and Giusy Lofrano

© ASCE

San Antonio River, Water and Drainage Improvements, and Historical Landmarks 136
Jack Furlong, Jerry R. Rogers, and Russell Persyn

The Failure of the Lower Colorado River Dam at Austin, Texas 147
J. David Rogers

The Hydrologic Engineering Center—50 Years of Hydrologic Engineering History 161
Darryl W. Davis and Augustine J. Fredrich

The Unique Medina Dam and Outstanding Texas Civil Engineer: C. Terrell Bartlett 171
Jerry R. Rogers

Traditional Knowledge of Rainwater Harvesting Compared to Five Modern Case Studies.....182
Santosh R. Ghimire and John M. Johnston

Water Management for the 17th Century French Royal Canal of the "Two Seas".....194
Georges Comair and Augustine J. Fredrich

12th Urban Watershed Management Symposium

1D/2D Modeling of Decentralized Stormwater Control Measures for Flood Mitigation in Austin, Texas.....204
Brandon Klenzendorf, Aaron Poresky, Mike Kelly, and Marty Christman

Alternative Treatment of Flow Monitoring Data to Evaluate the Impact of Green Infrastructure on Stormwater Volume Reduction in Combined Sewers 214
Azadeh Akhavan Bloorchian and Jianpeng Zhou

An Experimental Program to Evaluate Soil Mixes for Rain Gardens 221
Amanda Hess, Taylor DelVecchio, Andrea Welker, and Bridget M. Wadzuk

Application of the Hargreaves Equation for Green Roof Evapotranspiration.....231
G. Zaremba, B. M. Wadzuk, and R. G. Traver

TXHYETO.XLS: A Tool to Facilitate Use of Texas-Specific Hyetographs for Design Storm Modeling.....241
Caroline M. Neale, Cristal C. Tay, George R. Herrmann, and Theodore G. Cleveland

© ASCE

Estimating Swale Performance in Volume Reduction 255
Farzana Ahmed, John S. Gulliver, and John L. Nieber

Evapotranspiration and Infiltration in Rain Garden Systems.....261
Amanda Hess, Bridget Wadzuk, and Andrea Welker

Green Infrastructure Prioritization for Blacksnake Creek Stormwater Separation.....271
Andy Clements, Kristen Wiles, Scott Struck, and Jim Schlaman

Green Stormwater Infrastructure Suitability for CSO Communities in Montpelier, Vermont.....282
Tara Kulkarni

Hydraulic Characterization and Design of Permeable Interlocking Concrete Pavement 292
A. R. Leipard, J. T. Kevern, and J. R. Richardson

Hydraulic Design of Permeable Interlocking Concrete Pavement—Design Tool Development.....302
M. R. Stochl

Hydrologic Response of Sustainable Urban Drainage to Different Climate Scenarios.....312
Ariel Kexuan Wang, Sun Young Park, Shuyi Huang, and Arthur R. Schmidt

Implementing Low Impact Development in Urban Landscapes: A Policy Perspective.....322
Krishna P. Dhakal and Lizette R. Chevalier

Life Cycle Costs and Field Performance Studies of a Domestic Rainwater Harvesting Application in a Humid, Sub-Tropical, Metropolitan Environment.....334
James F. Sweeney and Michael Pate

Low Impact Development Placement Investigation Using a Multi-Objective Evolutionary Optimization Algorithm 344
Marcio H. Giacomoni

Neural Network Models for Captured Runoff Prediction of Permeable Interlocking Concrete Pavements 349
Ata Radfar and Thomas Doan Rockaway

© ASCE

Numerical Comparison of Multi-Criteria Decision-Making Techniques: A Simulation of Flood Management Multi-Criteria Systems.....359
Hamed Zamani Sabzi and James Phillip King

Physical-Economic Approach for Urban Stormwater Management: Applications in the City of Los Angeles, California 374
K. Majid Sadeghi, Hugo A. Loaiciga, and Shahram Kharaghani

Quantifying Benefits of Green Stormwater Infrastructure in Philadelphia.....409
Arthur McGarity, Fengwei Hung, Christina Rosan, Benjamin Hobbs, Megan Heckert, and Shandor Szalay

Investigation of Contamination Sources in a Small Urban Creek Using Microbial Source Tracking and Isotopic Analysis 421
Darshan Baral, Allison Speicher, Bruce I. Dvorak, David M. Admiraal, and Xu Li

Sustainability Enhancement for Improvement of a Storm Water Drainage System in Shanghai.....431
Tsun Kuan

Updated Rainfall Coefficients for Texas—The EBDLKUP-NEW.XLS Tool...442
Cristal C. Tay, Caroline M. Neale, George R. Herrmann, and Theodore G. Cleveland

Water Quality Associated with Permeable Interlocking Concrete Pavers 453
Michael Barrett

13th Groundwater Symposium

Assessment of Surface and Ground-Water Interactions Using Stable Isotope Fingerprinting Technique in Thailand.....464
Aksara Putthividhya and Jeerapong Laonamsai

Backward Probabilistic Model for Contaminant Source Identification in Thailand.....475
Thawat Ngamsritrakul, Piyatida Ruangrassamee, and Aksara Putthividhya

Comparing Simulations of Land Subsidence Using a 3-D Package NDIS and 1-D Subsidence Package SUB.....486
D. H. Kang and J. Li

Compatibility of Hydraulic Fracturing Additives with High Salt Concentrations for Flowback Water Reuse 496
Arielle Mimouni, Nicholas Kuzmyak, Eric van Oort, Mukul Sharma, and Lynn Katz

© ASCE

Droughts-Groundwater Relationship in Northern Great Plains Shallow Aquifers 510
Navaratnam Leelaruban and G. Padmanabhan

Effects of Waves on Subsurface Flow and Solute Transport in a Laboratory Beach 520
X. L. Geng, M. C. Boufadel, F. Saleh, and Chanyuan Ding

Efficient Modeling Methods for Estimating Stream Depletion 530
R. M. Neupauer

Evaluating Two Sparse Grid Surrogates for Bayesian Uncertainty Quantification 536
Xiankui Zeng, Ming Ye, and Jichun Wu

Geostatistical Assessment of Subsurface Heterogeneity and Groundwater Vulnerability in Thailand.....546
Chayamon Phongsinabhichart and Aksara Putthividhya

GIS-Based Statistical Analyses of Rainfall and Groundwater Depth Correlations in Thailand 565
Sasin Jirasirilak, Aksara Putthividhya, and Chayamon Phongsinabhichart

Improving Produced Water Management: A Case Study of Designing an Inland Desalination Pilot Project 576
E. Grubert, D. Kelly, B. Rumbelow, and J. Wilson

Modeling the Impact of CAFOs on Nitrate Contamination in the Middle Trinity Aquifer of Central Texas 585
Kartik Venkataraman, Jesse Crawford, and Keith Emmert

Numerical Modeling of Aquifer Radial Movement Caused by Groundwater Pumping.....595
H. J. Lee and J. Li

Pumping Saline Groundwater: An Effective Tool for Controlling Seawater Intrusion in Coastal Aquifers 606
Mohsen Sherif and Akbar Javadi

Reanalysis of Anecdotal Models of Recharge in Southwestern Alluvial Basins 613
Barry J. Hibbs, Bruce K. Darling, and Mercedes Merino

© ASCE

Study on Decision-Making Alternatives Evaluation System of Optimal Allocation of Water Resources Based on GIS 625
Ziru Wang, Tian Long, and Yunge Niu

Two Dimensional Model for In Situ Bioremediation of Groundwater Using Meshfree Point Collocation Method (PCM) and Particle Swarm Optimization (PSO) 634
Meenal Mategaonkar and T. I. Eldho

Variable Fuzzy Sets Method for Flood Seasonality of Catchments 643
Min Li, Ru-Rui Zhou, Yun-Tao Wang, and Dongmei Liu

17th Water Distribution Systems Analysis Symposium

Utilizing Discrete Choice Models for Fusing Alarms from Multiple Water Quality Indicators 652
Mashor Housh and Avi Ostfeld

Application of Water-Modeling Tools to Reconstruct Historical Drinking Water Contaminant Concentrations for Epidemiological Studies 658
Morris L. Maslia

Assessment of the Relation between Water Quality and Water Quantity for International Metropolitan Cities 669
Yousra Ahmed, Yun-Lun Huang, Alyssa Martin, and Brian Otten

Can Real-Time Modeling Be Useful for Emergency Planning and Response? 685
Tom Walski

Classification of Water Distribution Systems for Research Applications 696
Steven Hoagland, Stacey Schal, Lindell Ormsbee, and Sebastian Bryson

Cypress Lake Transmission Project: Regional Cooperation to Wheel Alternative Water Supplies 703
Edward Talton, Brian J. Megic, Kevin Felblinger, Deb Beatty, Michael Hudkins, Mark Addison, Ted McKim, Jonathan McCarthy, Brandon Bryant, and Oscar Vera

Data Collection for the Identifiability Analysis of Wall Decay Coefficients in Water Distribution Water Quality Model 713
M. Fayzul K. Pasha and Jeremy W. Rentch

Evaluation of Venturi to Destratify Water Tanks 724
Thomas Walski, Kelli Cummings, Allison Malloy, and Brian Whitman

© ASCE

Equitable Canal Water Allocation 736
Tonny T. de Vries and Arif A. Anwar

GA Based Multi-Objective Sensor Placement Approach for Contamination Detection in Water Distribution Networks.....745
Shweta Rathi, S. Santhini, and Rajesh Gupta

History of Pressure-Dependent Analysis of Water Distribution Networks and Its Applications 755
Rajesh Gupta

Microbial Activity in Stored Water Pipes 766
Brian Whitman, Thomas Walski, Michael Lewis, and Victoria Yakobosky

Minimum Pressure Criterion in Water Distribution Systems: Challenges and Consequences.....777
V. Ghorbanian, B. W. Karney, and Y. Guo

Mobile Sensors for Water Quality Management in Water Distribution Systems.....792
Nathan Sankary, Nurit Oliker, Avi Ostfeld, Amin Rasekh, Ruoxi Wu, M. Katherine Banks, and Marshall Porterfield

Model-Based Leakage Hotspot Detection with Optimized Pressure Logger Placement.....802
Zheng Yi Wu

Node Head Flow Relationships in Skeletonized Water Distribution Networks for Predicting Performance under Deficient Conditions 810
Suraj A. Vairagade, M. A. H. Abdy Sayyed, and Rajesh Gupta

Optimal Sensors Location Using Contamination Detailed Chemistry Reactions.....820
Ziv Ohar, Ori Lahav, and Avi Ostfeld

Optimizing Hydrant Selections for Conventional Flushing of Water Distribution Systems.....829
Zheng Yi Wu

Reducing System Wide Event Detection False Positive Alerts by Using Reversed Hydraulic Simulation.....838
Elad Salomons and Avi Ostfeld

Scenario Generation for Network Optimization with Uncertain Demands.....844
Bradley Eck, Francesco Fusco, and Nicole Taheri

© ASCE

Stochastic Performance Assessment and Optimization Strategies of the Water Supply Network Transition of Kiruna During City Relocation 853
J. Zischg, M. Mair, W. Rauch, and R. Sitzenfrei

The Behavior of Leaks in Plastic Pipes Displaying Viscoelastic Deformation.....863
E. N. Ssozi, B. D. Reddy, and J. E. van Zyl

USEPA's Distribution System Water Quality Modeling Program: A Historical Perspective.....871
Robert M. Clark

Effects of the Use of Hazen-Williams Equation on Large WDS Planning Models.....881
J. Uribe, J. Saldarriaga, and D. Páez

Valve Operation Optimization for Minimizing Transient Flow Effects in Water Distribution Systems (WDS): Application to Main Pipes in Bogota, Colombia.....890
J. Bohorquez and J. Saldarriaga

Water Quality Event Detection in Water Networks through Multiple Sensors Data 902
Nurit Oliker and Avi Ostfeld

What Can We Learn from Historical Water Network Transition? 907
R. Sitzenfrei, M. Mair, F. Tscheikner-Gratl, B. Hupfauf, and W. Rauch

2015 Hydroclimate Symposium

A Comparative Study of Stochastic and Conventional Deterministic Flood Frequency Analysis for Extreme Events in Thailand 917
Apiwit Jomvoravong, Aksara Putthividhya, and Ekvichit Vechpanich

Analysis of Precipitation Using Fine-Scale Dynamical Downscaling over a Sparsely-Gauged Small Watershed.....928
A. Dib, K. Ishida, M. L. Kavvas, S. Jang, and Z. Q. Chen

Analyzing the Trends of Monthly Great Lakes Water Levels Using Modified Mann Kendall Test 937
Miao He, Chandramouli Viswanathan, and Bipin Pai

Application of Dynamical Downscaling Technique to the Reconstruction of Hydro-Climate Data over Shasta Dam Watershed 944
T. Trinh, S. Jang, K. Ishida, J. Chen, N. Ohara, Z. Q. Chen, and M. L. Kavvas

© ASCE

Applications of Land Surface Model to Assess Impacts of Climate Change of Rainfall Pattern and Surface Runoff in the Chao Phraya River Basin of Thailand.....952
Ekvichit Vechpanich, Piyatida Ruangrassamee, Aksara Putthividhya, and Kenji Tanaka

Assessment of Channel Changes of the Lower Rio Grande River Section under Different Climate Conditions 962
Qin Qian and Kaiming Yan

Calibration of a Distributed Hydrologic Model Using Streamflow and Remote Sensing Snow Data.....973
Elizabeth M. Isenstein, Sungwook Wi, and Y. C. Ethan Yang

Climate Change Analysis on Extreme Precipitation over Three Watersheds in Northern California Based on 137-Year Long-Term Dynamical Downscaling.....983
K. Ishida, M. L. Kavvas, S. Ceyhan, N. Ohara, and Z. Q. Chen

Comparison of Performance on Watershed-Scale Precipitation between WRF and MM5 989
K. Ishida, M. L. Kavvas, and S. Jang

Dynamic Equilibrium Inter-Annual Snow Modeling Based on Energy-Balance Equations for the Bolivian Andes 994
Noriaki Ohara, Ryan Johnson, and Thomas Reichler

Evaluating the Relationship between Western U.S. Streamflow and Pacific Ocean Climate Variability 999
Soumya Sagarika, Ajay Kalra, and Sajjad Ahmad

Exploring Water Management Strategies in an Inland Arid Area Using Dynamic Simulation Model 1009
Chao Chen, Ajay Kalra, and Sajjad Ahmad

Historical Climatic and Hydrologic Modeling over a Watershed at Peninsular Malaysia 1019
M. Z. M. Amin, A. J. Shaaban, M. L. Kavvas, Z. Q. Chen, S. Jang, A. Ercan, and K. Ishida

Hydrologic Impact Assessment by a Physically-Based Hydro-Climate Model of Regional Climate Change for the Water Resources of the Upper Ping River Basin of Thailand 1026
S. Wuthiwongyothin, S. Jang, K. Ishida, and M. L. Kavvas

© ASCE

Impact of Sea Level Rise on the Fresh-Saltwater Interface in the Oxnard-Mugu Aquifer, California.....1031
Avdhesh K. Tyagi, William Logan Dyer, Abdelfatah K. Ali, and Mathew Hamilton

Insights into Reconstructing Sacramento River Flow Using Tree Rings and Pacific Ocean Climate Variability.....1040
Saria Bukhary, Ajay Kalra, and Sajjad Ahmad

Investigation of the Impact of Streamflow Temporal Variation on Dam Overtopping Risk: Case Study of a High-Hazard Dam.....1050
Ebrahim Ahmadisharaf and Alfred J. Kalyanapu

Meteorological and Hydrologic Regimes in California from 2011 to 2016: Hindsight Analysis and Prediction.....1058
Messele Zewdie Ejeta

Multisite Downscaling of Monsoon Precipitation over the Godavari River Basin under the RCP 4.5 Scenario.....1066
Jew Das and N. V. Umamahesh

Perspectives on Dry-Season Water Allocation Characteristics and Resilience to Climate Change Impacts in the Chao-Phraya River Basin, Thailand.....1076
M. Takeda and A. Putthividhya

Projected 21st Century Climate Change on Snow Fall and Snow Melt over Shasta Dam Watershed by Means of Dynamical Downscaling.....1095
T. Q. Trinh, S. Jang, K. Ishida, N. Ohara, and M. L. Kavvas

Regionalization and Spatial Analysis of Precipitation of the Urmia Lake Basin, Iran.....1101
Nasim Fazel, Ronny Berndtsson, Cintia Bertacchi Uvo, Bjørn Kløve, and Kaveh Madani

Short Term Prediction of Culex quinquefasciatus Population Carrying West Nile Virus in Central North Georgia, U.S.A., Based on the Climate Variability.....1108
Navideh Noori, Latif Kalin, Graeme Lockaby, and Krisztian Magori

Spatial and Temporal Evaluation of Hydroclimatic Variables in the Colorado River Basin.....1118
Ajay Kalra, Soumya Sagarika, and Sajjad Ahmad

Spatial Variability of Rainfall in the Milwaukee, Wisconsin, Area.....1128
Kimberly O. Siemens, Eric D. Loucks, Sydney J. Kase, and Steven R. Heinz

© ASCE

Spectral Analysis of Streamflow for Continental U.S.A. 1135
Kazi Ali Tamaddun, Ajay Kalra, and Sajjad Ahmad

Statistical Downscaling of Daily Precipitation Process at an Ungaged Location in the Context of Climate Change 1145
Van-Thanh-Van Nguyen and Myeong-Ho Yeo

Uncertainty in Flood Forecasting under Climate Change: Case Study of the Yom River Basin, Thailand 1155
Piyatida Ruangrassamee, Teerawat Ram-Indra, and Patinya Hanittinan

Using a Two-Dimensional Watershed Model to Estimate Flood Magnitude and Frequency under Changing Climate 1163
Yang Bai and Jennifer G. Duan

3rd Annual Symposium on Desalination and Water Reuse

A Critical Review of Water Reuse in North America: The Historical Shift from Technological Priorities to Public Perception Studies.....1173
D. Al-Ali and Y. Filion

Cost Analysis of Electro Dialysis Cell for Desalinating Brackish Water 1191
N. M. Eid

Development of a Multi-Category Decision-Making Framework to Identify Stormwater Reuse Design Factors in Mixed-Use Communities.....1201
D. Al-Ali and Y. Filion

Evaluation of Water Reuse Options through Stochastic Floods: A Case Study in the Diez Lagos Flood Catchment Area, South New Mexico.....1209
Hamed Zamani Sabzi and James Phillip King

Inland Desalination and Brine Management: Salt Recovery and Beneficial Uses of Brine.....1219
L. De Buren and A. Sharbat

Results of a National Survey about the Public Acceptability of Reclaimed Water 1231
Laura Garcia-Cuerva, Michelle Schmidt, Emily Z. Berglund, and Andrew R. Binder

Coastal Flood Risk Management and Resiliency

Computational Analysis of Wall Overtopping Due to Historical Typhoons—Towards a Disaster-Aware Rehabilitation of Roxas Boulevard Seawall 1238
E. C. Cruz and J. C. E. L. Santos

© ASCE

Multi-Criteria Decision Making for the Assessment of Coastal Flood Vulnerability 1248
V. T. G. Boulomytis, A. C. Zuffo, and T. Z. Gireli

Storm Surge and Wave Vulnerability Assessment of Coastal Bridges.....1256
P. E. Dompe, J. M. McBee, and H. Demir

Education

Revisiting the AAWRE Body of Knowledge for Water Resources Engineering 1264
Mark W. Killgore

Where Do Undergraduate Civil Engineering Students Fit In within Interdisciplinary Design Experiences? 1281
B. Boulanger, Charles Kim, D. Mikesell, and Joseph Tranquillo

Emerging and Innovative Technologies

Arc-BEST: A GIS-Based Tool for Bioaccumulation Risk Analysis.....1290
Fernanda Maciel and Joshua Peschel

Bathymetric Effects on Marine Hydrokinetic Turbine Array Optimization..1302
G. Peebles and E. Johnson

Deployment of STORM 3 Data Loggers to Monitor Water Quality 1312
Bo Sun, Frank Sun, and Qin Qian

Infrastructure Leakage Index and Challenges in Water Loss Management in Developing Countries.....1322
Mahendra S. Kadu and Rajendra R. Dighade

Predictive Scheme for Failures of Embankment Dams with High Overtopping Potential: Case Studies Using Remote Sensing Data 1332
Bahareh Shoghli and Yeo Howe Lim

The Integrated Watershed Protection Plan as an Information Sharing and Partnership Program for Aligning Resources and Maximizing Beneficial Watershed Uses.....1341
Robin Jester and E. Zia Hosseinipour

The Use of Drones in Environmental Management 1352
Kurt W. Smith

© ASCE

To Sewer or Not to Sewer: Incentivizing Decentralized Wastewater Treatment 1362
Alison Wood, Michael Blackhurst, and Desmond Lawler

Validating and Applying SNL-EFDC to Current Energy Capture Devices Simulation.....1368
S. C. James, M. Cardenas, and C. Hirlinger

Engineers Without Borders

Assessment of Flow Rate as a Quality Control Test for Ceramic Pot Filters 1378
E. P. White, J. K. Langenfeld, E. L. Bradford, H. G. Haywood, C. Salvinelli, and A. C. Elmore

Performance Characterization of a Simple Solar Still Used for Water Disinfection.....1388
J. Y. Huang and A. C. Elmore

Environmental

Citizen Science in Water Quality Monitoring: Mobile Crowd Sensing for Water Management in the Netherlands 1399
E. Minkman, P. J. van Overloop, and M. C. A. van der Sanden

Sustainable Gardening Initiatives in Previously Used Urban Soils 1409
Blanca M. Calderon, Chammi P. Attanayake, Mónica Palomo, and Ganga M. Hettiarachchi

Hydraulics and Waterways: Computational Hydraulics

An Experimental Design Based Methodology for Calibrating 2D Hidromorphodynamic Numerical Models for Rivers 1419
Guillermo Acuña and Humberto Ávila

Combined 1D and 2D Hydraulic Modeling within HEC-RAS.....1432
Gary W. Brunner, Steven S. Piper, Mark R. Jensen, and Ben Chacon

Comparative Effectiveness and Reliability of NEXRAD Data to Predict Outlet Hydrographs Using the GSSHA and HEC-HMS Hydrologic Models.....1444
Amirmasoud Hamedi and Hector R. Fuentes

© ASCE

Comparing the Trajectories of Shockwaves and Rarefaction Waves from CFD and Saint-Venant Models during Dambreak Events 1454
Jue Wang and Jose G. Vasconcelos

Development and Validation of a 2D Dam Break Process Model.....1466
Yafei Jia, Yaoxin Zhang, and Sherry Hunt

Energy Dissipation in a Thirty-Foot Drop Broken-Back Culvert under Open-Channel Flow Conditions 1480
Avdhesh K. Tyagi, Abdelfatah K. Ali, and Mathew Hamilton

Estimating the Effects of DEM Uncertainty through Two-Dimensional Spatial Stochastic Watershed Simulation.....1489
James Knighton

Gridded Surface Subsurface Hydrologic Analysis Modeling for Analysis of Flood Design Features at the Picayune Strand Restoration Project.....1500
David M. Weston, Brian E. Skahill, Charles W. Downer, Jaime A. Graulau-Santiago, Nawa Pradhan, and Aaron R. Byrd

Hindcasting Storm Surge and Waves in Hurricane Bob in the Gulf of Maine Using CCHE2D-Coast 1512
Afshin Gazerzadeh, Yan Ding, Yaoxin Zhang, Yafei Jia, and Mustafa S. Altinakar

Modeling Morphological Changes Due to Multiple Typhoons in the Danshui River Estuary.....1522
Yan Ding, Tung-Chou Hsieh, and Keh-Chia Yeh

Numerical Modeling of Rain Induced Overland Flows 1532
Tahmina Shirmeen, Yafei Jia, Martin A. Locke, and Richard E. Lizotte Jr.

Sand Dam Hydraulics, Hydrology, and GIS Modeling Simulation in Predicting River Behavior under Multiple Weather Conditions to Solve Water Shortage Problems.....1545
Erin Y. Huang and Venkatesh Merwade

SARA's Bexar County Flood Warning System 1555
Curtis Beitel, Anthony Henry, and Wayne Tschirhart

The Effect of Outliers on Flood Frequency Estimates 1565
Sharika U. S. Senarath

Three Dimensional Numerical Modeling of Temperature Distribution in a High Dam Reservoir on the Mekong River.....1575
Xiaobo Chao, Yun Deng, and Yafei Jia

© ASCE

Three-Dimensional Numerical Modeling of Flow, Sediment, and Mercury Distribution in Enid Lake, Mississippi 1585
Xiaobo Chao, A. K. M. Azad Hossain, James Cizdziel, and Yafei Jia

Two-Dimensional Unsteady Flow Modeling of Flood Inundation in a Leveed Basin.....1597
K. J. Carr, T. Tu, A. Ercan, M. L. Kavvas, and J. Nosacka

Using HAZUS-MH and HEC-RAS to Evaluate Real World Flooding Events in the Upper Alabama River Watershed 1607
J. L. Gutenson, A. A. Oubeidillah, P. Hicks, L. Durham, A. N. S. Ernest, L. Zhu, and X. Zhang

Water Quality Modeling and Mixing Mechanisms of Pollutant Discharge in a Sensitive Water Body 1628
M. H. Woo

Hydraulics and Waterways: Hydraulic Structures

Air Entrainment Effects on the Pressure Wave Celerities Following Rapid Filling Pipe Flows.....1638
Andrew C. Patrick and Jose G. Vasconcelos

An Evaluation of Reducing Elbow Characteristics versus Velocity Distribution at the Pump Inlet.....1648
Mark E. Allen, David E. Werth, and Charles C. Allaben

Baffle-Post Structures for Flow and Bed-Sediment Control in Open Channels 1655
Caroline Ubing, Robert Ettema, and Christopher Thornton

Design Development and Final Evaluation of an Air Entrainment Reduction Alternative for a Deep Well Tunnel Dewatering Pump Station 1665
Neal Bierman, Mohanlal Patel, Mark E. Allen, Chris Stillwell, Nabeel Mishalani, and David E. Werth

Laboratory Investigation of Embankment Soil Strength Influence on Abutment Scour: Early Findings Using Compacted Sand 1676
K. Ng, R. Chakradhar, R. Ettema, and E. W. Kempema

Oscillating Hydraulic Jump in a Stilling Basin.....1686
T. M. Champagne and B. D. Barkdoll

Stilling Basin Scour Topography with the Addition of an Extension Plate 1696
R. R. Barlock, B. D. Barkdoll, and J. A. González-Castro

© ASCE

Using Columns to Reduce Surface Turbulence in an Open Channel Flume Equipped with an Ultrasonic Sensor.....1705
J. A. Saez, R. Cifuentes, K. Covarrubias, N. Specht, and D. Tagawa

Hydraulics and Waterways: Sedimentation

3D Simulation of Softrock Erosion in Chuoshui Creek 1713
Yaoxin Zhang, Yafei Jia, Keh-Chia Yeh, Chung-Ta Liao, and Sam S. Y. Wang

Coupled Geo-Fluvial Channel Evolution and Bedrock Erosion Modeling on a River in Taiwan.....1724
Kuowei Wu, Yong G. Lai, Keh-Chia Yeh, and Chung-Ta Liao

Estimating Bed-Load Advection and Dispersion Coefficients with the Method of Moments.....1736
Kervi Ramos, Stanford Gibson, Levent M. Kavvas, Ronnie Heath, and Jeremy Sharp

Hydrodynamics of Confined Impinging Jets and the Assessment of Soil Erodibility.....1742
Seyed Mohammad Ghaneeizad, Maliheh Karamigolbaghi, Joseph F. Atkinson, and Sean J. Bennett

Methodological Considerations for Particle Tracking in Riverine Applications Using Radio Frequency IDentification (RFID) 1752
Achilleas G. Tsakiris, A. N. (Thanos) Papanicolaou, Iordanis V. Moustakidis, and Benjamin K. Abban

Model Studies of Singular and Multiple Step Rock Weirs: The Influence of Design Parameters on Scour Depths.....1760
Yeo Howe Lim and Brian Mager

Nonlinear Detachment Model for Soil Erodibility: Application and Incorporation into a Streambank Erosion and Stability Model 1769
A. Khanal, K. Klavon, G. A. Fox, and E. R. Daly

Power Spectral Density Analysis of Flow Field within a Boulder Array 1781
Micah A. Wyssmann, Achilleas G. Tsakiris, and A. N. (Thanos) Papanicolaou

Quantification of Uncertainty in a Sediment Provenance Model 1790
A. Karim, I. Ahmed, T. W. Boutton, K. B. Strom, and J. F. Fox

Quantifying the Spatial Variability of Stream Bed Grain Size Distribution ..1800
Ross Wickham and John Petrie

Orthogonal Dimension Reduction Search Algorithm for Optimal Operation of Hydropower Systems 1923
Zhongkai Feng, Wenjing Niu, Shengli Liao, Jianjian Shen, Chuntian Cheng, Mingqing Wang, and Huaying Su

Scheduling the Hydropower System of a Municipal Power Grid Considering Multistage Congestion Problems.....1932
Fu Chen, Gang Li, Chuntian Cheng, and Xiufeng Li

Simulation Based Optimal Practical Trajectory for Reservoir Operation 1944
Wang Jian, Wu Huijun, Shen Jianjian, Cheng Chuntian, and Luo Qingbiao

The Central Planner's Solution for Seawater Intrusion in the Batinah Region of Oman 1952
Slim Zekri, Mohammad Reza Bazargan-Lari, and Kaveh Madani

Model of Long-Term Optimal Operation of a Multi-Reservoir System under the Cascade Storage Energy Control.....1962
Wenjing Niu, Xinyu Wu, Zhongkai Feng, Jianjian Shen, and Chuntian Cheng

Irrigation and Drainage

A Comparison between Evapotranspiration Estimates Based on Remotely Sensed Surface Energy Balance and Ground-Based Soil Water Balance Analyses 1971
S. Taghvaeian, G. Paul, T. E. Ochsner, P. Gowda, and T. Marek

Agricultural Drainage and Nitrate Transport to Streams in the Humid Region of North America 1981
William F. Ritter

Agricultural Management Practices and Nitrate Concentration in Tile Drainage—Case Study 1988
M. Fayzul K. Pasha and Jennifer Skobrak

Analysis of Complete Mixing Length in a Non-Rectangular Channel 1998
S. Zebardast, S. H. Tabatabaei, F. Abbasi, M. Heidarpour, C. Gualtieri, E. Z. Hosseinipour, and K. Asgari

Evaluation of Pervious and Macro-Pervious Pavements as Harvesting Systems for Localized Landscape and Horticultural Irrigation 2004
Alan P. Newman, Ernest O. Nnadi, and Fredrick U. Mbanaso

Evaluation of the Effectiveness of Wrapping Filter Drain Pipes in Geotextile for Pollution Prevention in Response to Relatively Large Oil Releases 2014
Alan P. Newman, Ernest O. Nnadi, and Fredrick U. Mbanaso

Handheld Infra-Red Thermometry Calibration: Monitoring Crop Water Stress 2024
J. L. Chávez and E. Kullberg

Simulation of Dry Drainage to Determine the Ratio of the Width of Non-Cropped to Cropped Strip 2035
Abbas Sotoodehnia, Ahmad Doosti, AbdolMajid Liyaghat, and Peyman Daneshkar Arasteh

Municipal Water Infrastructure

Integrated Rehabilitation Management by Prioritization of Rehabilitation Areas for Small and Medium Sized Municipalities 2045
F. Tscheikner-Gratl, R. Sitzenfrei, C. Stibernitz, W. Rauch, and M. Kleidorfer

Planning and Management

"Wat-er" They Irrigating: Characterizing Irrigation of Individual Residential Water Customers 2058
Mackenzie Boyer and Michael Dukes

Agent-Based Modeling to Simulate Demand Management Strategies for Shared Groundwater Resources 2067
Shams Al-Amin, Emily Z. Berglund, and Kelli L. Larson

California and Drought—2014 and the Future 2073
Jay R. Lund and Josue Medellin-Azuara

Changing Surface Water Availability in Texas 2081
Ralph Wurbs and Yiwen Zhang

Converting Real-Time Water Management Models for Use in Water Resources Studies 2091
Christopher N. Dunn, and Penni R. Baker

Drought and Its Economical Impacts on the Brazilian Interconnected Power System 2101
Renato C. Zambon, Mario T. L. Barros, João E. G. Lopes, Alberto L. Francato, Paulo S. F. Barbosa, and William W-G. Yeh

Droughts in the Western United States and Methods to Improve the Reliability of Urban Water Supply 2111
Hugo A. Loáiciga

Evaluating Resource Management Strategies for Update 2013 of the California Water Plan 2129
Evan Bloom, Andy Draper, David Groves, Edmundo Molina-Perez, Brian Joyce, Rich Juricich, and Mohammad Rayej

Evaluating the Performance of Multiple Alternative Operating Rules under Climate Change: A Case Study of New York City 2147
L. DeCristofaro and R. N. Palmer

Hydro-Economic Model of South Florida's Water Resources 2157
Ali Mirchi, David Watkins, Jeffrey Czajkowski, and Christopher Martinez

Increasing Share of Wind Power and Its Complementarity with Hydropower in the Brazilian Interconnected Electricity System 2163
Juliana F. Chade, Renato C. Zambon, Ildo L. Sauer, and William W-G. Yeh

Managing Water Resources in the Lower Colorado River Basin, TX 2173
J. Furnans

Multi-Objective Optimizing Framework for Coordinating Dispatches of Water and Sediment in Reservoirs 2183
Fang-Fang Li and Jun Qiu

Optimal Flood Pre-Releases—Flood Hedging for a Single Reservoir 2192
Rui Hui and Jay R. Lund

Potential Additional Water Supply Yield of Texas Reservoirs 2202
Yujuin Yang

Risk-Based Levee System Design: Rational vs. Optimal 2208
Rui Hui, Kaveh Madani, and Jay R. Lund

Sanitary Sewer Overflow Reduction Optimization Using Genetic Algorithm.....2218
Olufunso Ogidan and Marcio Giacomoni

Water Supply Planning and Operation in the Metropolitan Region of São Paulo: Worst Drought in History, Conflicts, Response, and Resilience 2226
Aline H. Suzuki, Renato C. Zambon, and William W-G. Yeh

Student Paper Competition: Graduate Winners: 1st Place

Investigating the Role of DEM Resolution and Accuracy on Flood Inundation Mapping.....2236
Siddharth Saksena

© ASCE

Student Paper Competition: Graduate Winners: 2nd Place

Comprehensive Benefits of Green Roofs 2244
M. R. Gibler

Spatial Analysis of Actual Evapotranspiration Estimates from the iUTAH Climate Station Network.....2252
Kshitij Parajuli

Student Paper Competition: Graduate Winners: 3rd Place

Towards Sustainable Urban Stormwater Infrastructure: Improving the Estimation of Effective Impervious Area 2261
Ali Ebrahimian

Sustainability

A Process-Based Experimental Framework for Simulating Soil Organic Carbon Dynamics and Evaluating the Sustainability of Land Management Practices in Intensively Managed Landscapes.....2269
J. Boys, K. Wacha, C. G. Wilson, B. Abban, and A. N. Thanos Papanicolaou

A Quantitative Assessment of Temporally-Resolved Environmental Trade-Offs in the Power Sector.....2281
Rebecca A. M. Peer and Kelly T. Sanders

Critical Infrastructure—Preparing for the "Long Haul" 2293
Joe D. Manous Jr

Distance Based Water Sustainability Assessment Using SPI for the State of Chhattisgarh in India 2300
Mitthan Lal Kansal, Surendra Kumar Chandniha, and Aditya Tyagi

Optimization Water Allocation Model to Natural Resources Exploration.....2320
Adriano de Paula Fontainhas Bandeira and Carlos André Bulhões Mendes

Significant Environmental Factors and Their Impact on Wake County's Hydro-Climate 2330
Joseph Threadcraft

Water Sustainability Indicators for California Water Management 2341
Fraser Shilling, Abdul Khan, Rich Juricich, Vance Fong, and Don Hodge
