

2015 16th International Scientific Conference on Electric Power Engineering

(EPE 2015)

**Kouty nad Desnou, Czech Republic
20 – 22 May 2015**

**IEEE Catalog Number: CFP1573X-POD
ISBN: 978-1-4673-6789-9**

Session Electrotechnology

Famous O. Igbinovia, Ghaeth Fandi, Jan Švec, Zdenek Müller, Josef Tlustý Comparative Review of Reactive Power Compensation Technologies	2
Pavel Posr, Monika Bartunkova, Petr Netolicky, Radek Polansky, Jiří Chvojka Using of statistical tools within optimalization of design of material for high-voltage applications	8
Jerzy Szkutnik, Bartosz Soroczyński New possibilities in electrical energy efficiency	13
David Rot, Stanislav Jirinec, Jiri Kožený, Igor Poznyak Electrical efficiency of induction furnace with cold crucible via different segments width	17
Jiří Pitron, Petr Mastný Design of Air-Water Heat Pump - Modeling operating conditions of the heat pump in a specific building	21
Ilona Lázníčková, Ivana Jakubková, Josef Šenk Experimental Investigation of an Arc Heater Operated on Low Gas Flow Rates	27
Tomáš Mozdřeň, Stanislav Rusek, Radomír Gono, Daniel Minařík, Petr Moldřík The Input Analysis of Parameters and Expected Operation Modes of Energetic Technologies in Technological Centre ENET	32
Roman Dubnicka, Anton Rusnak, Dionyz Gasparovsky Analysis of non-recoverable lighting loses of luminaires	37
Jan Škoda, Michal Krbal, Mikuláš Parma, Stanislav Sumec, Petr Baxant, Jaroslav Štěpánek Growth chamber illumination with a special luminaire	42
Zitouni Abdelkader, Abderrahmane Ouadi, Hamid Bentarzi Measurement Quality Enhancement using Digital Filter in Power Grid integrating TCSC	46
Zbyněk Janda, Karel Noháč Analysis of the electromagnetic influences of overhead lines on nearby pipelines	52
Marek Pavlik, Iraida Kolcunova, Lukáš Lisoň Measuring the shielding effectiveness and reflection of electromagnetic field of building material	56
Michal Osladil, Libor Kozubík Smart Asset Management in View of Recent Analytical Technologies	60
Obiora Sam Ezeora, Jana Heckenbergerova, Petr Musílek Analysis of Environmental Measurements Using Variograms	63

Session Electrical networks

Martin Kašpírek, Petr Krejčí, Pavel Santarius, Karel Procházka Flicker due to Operation of Industry Technology	N/A
Mirosław Kornatka, Anna Gawlak Energy losses in low-voltage networks	73
Robert Czechowski Cyber-physical security for Low-Voltage Smart Grids - HAN Security within Smart Grids	77
David Šimáček, Martin Kašpírek Active and Reactive Power Flows between the Distribution and the Transmission System	83
Vojtěch Wasserbauer, Tomáš Bajánek, Jaroslava Orságová, David Topolánek Ground faults simulation model in comparison with performed experiments	88
Petr Šimek, Viktor Valouch, Jiří Škramlík New Three Phase PLL and FLL Techniques for Converters Used in Distributed Sources	94
Kateřina Demjančuková, Luboš Piterka, Jiří Sedlák External Hazards and the Stability of the Electrical Power System in the Czech Republic	100
Kinan Wannous, Petr Toman The Development of The Impedance Measured by Distance Relay During Near-to-Generator Short Circuit	105
Lubomír Marciniak Detection of high resistance earth faults in medium voltage networks	111
Alexandru Băloi, Florin Molnar-Matei, Adrian Pană, Felicia Băloi, Flaviu Dilertea LabVIEW Implementation for Three-Phase Voltage Dip Classification	116
Adrian Pană, Alexandru Băloi, Florin Molnar-Matei Contributions on the Harmonic Analysis of a Transmission Overhead Line - A Case Study	122
Žaneta Eleschová, Boris Cintula, Anton Beláň Methodology of Global Assessment of Operational States of Power System using Deterministic Approach	127
Zsolt Čonka, Michal Kolcun, Martin Kanálik, Dušan Medved', Martin Vojtek Increasing Net Transfer Capacity (NTC) by UPFC in Central East Europe power system	132
Olegs Sliskis, Ilya Dvornikovs, Karlis Ketners, Dmitry Sobolevsky Specification of transmission tower structure for following surge protection simulation	137

Karel Noháč, Vladislav Sítař Reliability of Approximation Function Method for Modelling of Power Lines in Electric Power Systems	141
---	-----

Session Power plants

Dariusz Borkowski Small Hydropower Plant as a Supplier for the Primary Energy Consumer	148
Tomasz Popławski Long-term forecasts of peak power demand for planning the development of power systems in Poland	152
Jana Heckenbergerova, Petr Musilek, Marek Janata, Jianhui Wang Analysis of Wind Ramp Events Using Their Conditional Probabilities from PCA 3D Tables	158
Jan Moravek, Petr Mastny, Jiri Pitron Modeling the Energy Systems in Matlab Simulink – Problematics of Energy System Control	163
Ghaeth Fandi, Famous O. Igbinovia, Zdenek Müller, Jan Švec, Josef Tlustý Using Renewable MV Wind Energy Resource to Supply Reactive Power in MV Distribution Network	169
Emil Dvorský, Lenka Raková, Pavla Hejtmánková Primary and Secondary Frequency Regulation with Photovoltaic Generators	174
Grzegorz Dudek Short-Term Load Cross-Forecasting using Pattern-Based Neural Models	179
Aleš Skoták, Ladislav Štégner, Michal Feilhauer, Jindřich Veselý, Jiří Obrovský, Zdeněk Čepa Upgrading of 325 MW Pump Turbine at PSPP Dlouhé Stráně	184
Libor Kozubík, Richard Dobiš Cognitive systems in energy and utilities area	188
Victor Astapov, Jelena Shuvalova Factors Influencing Multicriteria Optimization Process	192
Iwona Klosok-Bazan, Anita Sowa, Mirosława Gono, Radomir Gono Nano-silver as a New Agent for Conditioning of Cooling Water in Power Stations - Technical and Economic Aspects of Technology Implementation	198
Mirosława Gono, Iwona Klosok-Bazan, Radomir Gono, Roman Portuzak Potential of Suitable Locations for Construction of Pumped Storage Hydroelectric Plants	203

Session Power engineering

Toomas Vaimann, Anouar Belahcen, Ants Kallaste, Viktor Bolgov Environmental Considerations in Lifecycle Based Optimization of Electrical Machines	209
Pudi Vasudeva Naidu, Banakara Basavaraja PSO based Optima PI Tunning of AHCC D-STATCOM	215
Krzysztof Solak, Waldemar Rebizant, Ludwig Schiel Differential Protection of Single-Core Symmetrical Phase Shifting Transformers	221
Bartosz Brusilowicz, Janusz Szafran Voltage Stability Estimation Based on Approximate Model and Voltage Measurement	227
Zhengcheng Dong, Yanjun Fang, Meng Tian The Cost and Robustness of Cyber-Physical Power Grid With a Novel Model	N/A
Pavel Trnka, Jakub Souček, Jaroslav Hornak, Michal Svoboda, Tomasz Koltunowicz, Miroslav Gutten Statistical Approach to Endurance Models - Data Processing Using Regression Models	238
Vaclav Kus, Tereza Josefova The Use of Voltage-Source Active Rectifier to Minimize the Effect of Supply Voltage Drops on Converters	242
Pavel Brandstetter, Martin Kuchar Rotor Flux Estimation Using Voltage Model of Induction Motor	246
Ivo Neborak, Vaclav Sladeczek, Martin Kuchar Modelling and Simulation of Induction Machine and Frequency Converter Considering Power Losses	251
Andrzej Rusek, Ihor Shchur, Marek Lis, Andrzej Gastolek, Jarosław Sosnowski, Karol Klatow Mathematical model for analysis of dynamical states of a drive system containing rolling mill and roller table including the selected parameters of a rolling process	256
Attila Kment, Marek Pípa, František Janíček Diagnostics of Medium-Voltage Motors	262
Petr Chlebis, Ales Havel, Martin Sobek, Katerina Baresova The Design and Operation of a Liquid Cooled Voltage Inverter for an Accumulation Unit	267
Petr Chlebis, Ales Havel, Martin Sobek, Katerina Baresova ZCS Concept of Single-Phase Traction Supply Converters	272

Short presentations I

Martin Kašpírek, David Mezera Harmonic Voltage Measurements in the Low Voltage Distribution Grid	277
David Mezera, David Šimáček Voltage Quality in the HV Distribution Grid	283
Maroš Ďurica Application of a Random Number Generator for Calculations of the Trolley Mains	289
David Mezera Voltage Quality in the Low Voltage Distribution Grids with the High Penetration of Distributed Energy Sources	292
Mirosław Kornatka Assessment of working conditions of 110 kV line - a case study	296
Tomáš Hrubý, Stanislav Kocman, Pavel Pečínka Using Active Filter for Harmonic Mitigation in Power Grid of Industry Plant	301
Pavel Hahn, Radek Polansky Estimation of the service lifetime of cable sheath materials designed for working in harsh operating environment	307
Michal Krbal, Petr Siuda Design and Construction Solution of Laboratory Tesla Coil	311
Anna Gawlak The Influence of Investment on Reducing Energy Losses in Distribution Networks	315
Jan Švec, Jakub Ehrenberger Analysis of Current Unbalance in Meshed Transmission System	320
Jakub Ehrenberger Use of Directional Overcurrent Protection Scheme for Distributed Generation Systems	325
Jan Jiříčka, David Mezera Electric Power Savers – Operating Measurements of Practical Installations	331
Mayada Daboul, Jaroslava Orsagová, Tomáš Bajánek, Vojtěch Wasserbauer Testing Protection Relays Based on IEC 61850 in Substation Automation Systems	335
Michal Spacek, Zdenek Hradilek, Petr Moldrik Cooperation between Photovoltaic and Biogas Power Plants within 22kV Network	341
Lukáš Harvánek, Tetjana Tomášková, Václav Mentlík, Pavel Trnka Modification of Epoxy Resin Used in High-Voltage Technology	346
Vladimír Kral, Stanislav Rusek, Radomir Gono Processing of Input Databases of Technical Condition and Importance and Definition of Order for Maintenance of 110 kV / MV Transformers	350

Ladislav Novosád, Zdeněk Hradílek Power Analysis of Co-Generation Units at Biogas Station	355
Tomáš Bajánek, Emil Kalina, Roman Pernica, Drahomír Tůma Experience with Pressure Rise Calculation in Medium Voltage Switchgear	359
Anton Cerman, František Janíček, Milan Kubala Resistive-type Network Model of Stray Current Distribution in Railway DC Traction System	364
Michal Váry, Terézia Janúšková Skoršepová, Jaroslav Lelák, Thorsten Ruhnke, Peter Kubinec HV Very Low Frequency Method for Evaluation of 6 kV Cable Type 6-AYKCY 3x240 Parameters Changes During the Thermal Aging	369
Bystrík Dolník Contribution to Analysis of Daily Diagram of Supply Voltage in Low Voltage Network: working days versus nonworking days	373
Martin Knenicky, Radek Prochazka Hight Voltage Test Circuit for Harmonic and Impulse Voltage Stress	377
Miroslav Müller, Zdeněk Müller, Josef Tlustý Icing Influence Simulation Using 3-DOF Overhead Line Modelling	381
Rudolf Bayer, Michal Brejcha, Zuzana Pelánová, Jan Zálešák Road Lighting Design by Means of Genetic Algorithm	385
Vit Houdek, Stanislav Rusek, Radomir Gono Analysis of Results for 110 kV Power Lines Restoration Methodology	391
Jozef Bendík, Attila Kment, Marek Pípa Enumeration of magnetic flux density generated by power transmission lines	396
Marek Pípa, Attila Kment, Jaroslav Lelák, František Janíček Assessment of Usability of Armoured Single-Core Low Voltage Power Cables	402
Matej Cenký, Marek Pípa, Attila Kment Computations of electrical parameters of untransposed overhead lines	406
Michal Regula, Alena Otcenasova, Roman Bodnar, Marek Hoger Digital Protection Relay for 22 kV Power Line Model with Partial Power Quality Measurement	412
Michal Kolcun, Martin Kanálik, Dušan Medved', Zsolt Čonka Measuring of Real Value of Short-circuit Power in Island Operation Condition	418
Jakub Kosmák, Stanislav Mišák, Lukáš Prokop Power Quality Dependence on Connected Appliances in an Off-Grid System	423
Frantisek Janicek, Anton Cerman, Milan Perny, Igor Brilla, Lubomir Marko, Stefan Motycak Applications of superconducting quantum interference device	429
Radim Čumpelík, Petr Krejčí Undefined Parameters And Two-Limit Parameters in Standard EN 50160 ED. 3	433

Short presentations II

Tadeusz Sikora, Jakub Vramba, Jindřich Stuchlý, Jan Dudek Wiring and Protection of an Off-Grid System	438
Oliver Marcincin, Zdenek Medvec Active charging stations for electric cars	444
Petr Vaculík, Jaroslav Frantík Mix of Energy Sources in Technology Centre of Ostrava	448
Radim Jilek, Jiri Gurecky, Stanislav Rusnok, Pavel Sobota Electricity Storage Systems Using Compressed Air	453
Martin Liska, Marian Ivanic, Vladimir Volcko, Peter Janiga Research on Smart Home Energy Management System	459
Petr Bos, Richard Baleja, Karel Sokanský, Tomáš Novák, Ivo Ullman Outdoor Lighting Versus Surveillance Camera Systems in Electrical Substations ČEPS	464
Ladislav Laštovka, Pavla Hejtmánková Behaviour of the Turbogenerator and its Control and Intercept Valves during the Switching into the Island Operation	468
Martin Gruss, Zdenek Hradilek Research of Hydrogen Storage System Using LabVIEW Software	473
Jiri Drholec, Radomir Gono Operation of Industrial Local Distribution System	478
Vladimír Šály, Michal Váry, Juraj Packa, Milan Perný Electrical Characterization of PV Modules after Three Years of Operation	484
Jan Vaculik, Zdenek Hradilek, Petr Moldrik, Daniel Minarik Utilisation of Thermography in the Field of PEM Fuel Cells	488
Tomas Mlcak, Roman Hrbac, Vaclav Kolar, Ivo Ullman Development and Implementation of an Intelligent System for Permanent Evaluation of Light Fixtures in a Lighting System of Transmission System Substations	493
Jan Fulneček, Veleslav Mach, Jakub Vramba Space Weather Effects on Power Grids	499
Jan Kamenicky, Jaroslav Zajicek Failure Rate Evaluation of the Pumps Used in Power Industry	503
Petr Kacor, Daniel Minarik, Petr Moldrik CFD Analysis of Temperature Distribution of PEM Type Fuel Cell	507

Andrzej Rusek, Ihor Shchur, Marek Lis, Andrzej Gastolek, Jarosław Sosnowski, Karol Klatow	513
Development of a method to determine the dependencies of load moments and elastic moments on element parameters during the rolling process for dynamical states of a drive system for the rolling machine- roller table	
Peter Janiga, Martin Liska, Vladimir Volcko, Branislav Pilat	519
Testing System for Smart Meters	
Tomas Pavelka, Michal Ptacek	523
Degradation of LED parameters during operation: Brief review of currently used models and measuring methods	
Ivan Šperlín, Jiří Gurecký	527
Network Support Using Reactive Power of Dispersion Sources in HV Network	
Jindrich Stuchly, Stanislav Misak, Lukas Prokop, Petr Krejci	532
A Power Quality Evaluating in Autonomous System Using Virtual Instrument Tool	
Martin Čerňan, Josef Tlustý	538
Study of the Susceptance Control of Industrial Static Var Compensator	
Jaroslav Stepanek, Jan Skoda	542
Dependence of Luminous Flux on Light Source Position	
Pavel Valíček, Tomáš Novák, Václav Kolář, Roman Hrbáč, Karel Sokanský	546
Suggestion of Long-term Measuring of Daylight Contributions in Interiors	
Roman Vykuka, Lucie Noháčová	551
Sensitivity Factors for Contingency Analysis	
Roman Dubnička, Anton Rusnák, Peter Janiga	555
Change of the Spectral Power Distribution of Luminaires Under Various Electrical Conditions	
Martin Koutný, Petr Kačor	560
Completion and Operational Testing of the Adams' Permanent Magnet Electric D.C. Motor-Generator	
Richard Baleja, Jan Sumpich, Karel Sokansky, Petr Bos, Barbara Helstynova, Tomas Novak	566
Comparison of LED properties, compact fluorescent bulbs and bulbs in residential areas	
Tomáš Výtisk, Radim Janalík	572
Experimental Determination of Technical Parameters in Order to Optimize the Operation of a Generator Achieving Electrical Output	
Jiri Jansa, Zdenek Hradilek, Petr Moldrik	575
Energy Supplied from Biogas Power Station to the Distribution Network	
Michal Kolcun, Martin Vojtek, Zsolt Čonka	579
The implementation of an ideal photovoltaic module in Matlab/Simulink using Simpowersystems Toolbox	

A. Senthil Kumar, Tomas Cermak, Stanislav Misak Short -Term Wind Power Plant Predicting With Artificial Neural Network	584
Jindrich Stuchly, Stanislav Misak, Lukas Prokop Prospects for Electric Vehicles Technology with Renewable Energy Sources in a Smart-Grid Environment - An Introduction	589
Marián Uher, Viktor Pokorný A New Tool for Reconfiguration of a Distribution System	595
Martin Kral, Radomir Gono, Petr Moldrik, Miroslava Gono Quality Analysis of Electricity Supply from Small Hydro Power Plants with Banki and Pump Turbines	601

Short presentations III

Vítězslav Stýskala, Dmitrii V. Kolosov, Yurii I. Zharkov, Yurii G. Semenov The operation principles and implementation of automated system for arc disturbances control for AC and DC electrified railway lines	606
Pavel Sobota, Stanislav Rusnok Small-Scale Wind Power in Off-Grid and its Controlling by Variable Load	610
Stanislav Rusnok, Pavel Sobota, Veleslav Mach, Petr Kačor, Stanislav Mišák Possibilities of Program EMTP – ATP to Analyze the Starting Current of Induction Motor in Frequent Switching	614
Petr Kadlec, Michal Čermák, Radek Polanský Influence of Halloysite nanotubes in low-density polyethylene on electric polarization	620
Stanislav Zajaczek, Stanislav Rusnok, Pavel Sobota, Lubomír Ivánek, Jitka Mohylová, Jiří Cigánek Analysis of current fields in the vicinity of railway SUDOP type of platform	626
Michal Svoboda, Milan Valecka Magnetic calculations using 3D FEM modeling for power transformers	631
Jakub Souček, Jaroslav Hornak, Michal Svoboda, Miroslav Gutten Comparison of the Electrical Properties of Canola Oil with Commercially Available Mineral Oil	634
Ladislav Slíva, Stanislav Mišák Optimization of the rotor part of a interior permanent magnets synchronous machine	638
Michal Ney, Zdenek Hradilek, Daniel Minarik, Petr Moldrik Research on Hydrogen Technologies in New Laboratory of VSB - TU Ostrava	642
Tomáš Nazarčík, Zdeňka Benešová Comparison of Joule's losses on transposed and non-transposed transmission line	647

Pavel Brandstetter, Jiri Hajovsky, Ondrej Petrtyl, Radek Sulak, Tomas Verner Software Support and Data Collection System for Induction Motor Drive	651
Vladimir Vajnar, Zdenek Vostracky, Jan Sedlacek Analysis of breaking capability within asymmetrical short circuits	657
Lukáš Varačka, Jozef Kúdelčík, Miroslav Gutten Dielectric frequency response of mineral oil impregnated pressboard	662
Jan Dudek, Roman Hrbáč, Tomáš Krenželok, Vladimír Březovský Point Estimate of Failure Intensity and Operational Availability of Electronic Signaling Railway Equipment	666
Milan Perný, Vladimír Šály, Miroslav Mikolášek, Michal Váry, Jozef Huran Solar cell heterojunction a-SiC:H/c-Si structure under dark and illumination	672
Michal Váry, Thorsten Ruhnke, Vladimír Goga, Juraj Paulech, Justín Murín Determining the Electrical Resistance of Polygonal Pole	676
Ielyzaveta Ishkova, Ondřej Vítek Diagnosis of eccentricity and broken rotor bar related faults of induction motor by means of motor current signature analysis	682
Martin Adamek, Zdenek Vostracky Interference from transmission lines to buried pipelines	687
Petr Bernat, Zdeněk Hytka, Petr Kačor Indication of failures of rotor bar on induction machine with squirrel cage rotor in its external electromagnetic field	691
Matouš Bartl, Pavel Rubáš Artificial neural network regulator implementation for 50kW half controlled thyristor rectifier	697
Andrej Kanovsky, Pavol Spanik, Michal Frivaldsky Detection of electronic counterfeit components	701
Ondrej Hock, Peter Drgona, Michal Frivaldsky, Rastislav Havrila Simulation of manipulator positioning methodology using inverse kinematics	706
Marek Piri, Viliam Jaros, Michal Frivaldsky Verification of a mutual inductance calculation between two helical coils	712
Boris Kozacek, Juraj Kostal, Michal Frivaldsky Analysis of Figure Of Merit – power transistor's qualitative parameter	718
Roman Hrbac, Tomas Mlcak, Jan Dudek, Stanislav Zajaczek The development of a modern heat treatment unit with embedded control ensuring minimal retroactive effects on the supply network	723
Martin Votava, Tomas Glasberger Comparative study of pulse width modulation techniques for three-level voltage source based on cascaded connection of two-level inverters	729

Martina Látková, Peter Braciník, Michal Baherník, Filip Suško Modeling of a DC boost converter behavior in PV system using finite state machines	733
Jaroslav Zajicek, Jan Kamenicky Operation and maintenance of simple backup system	739
Lukáš Lisoň, Iraida Kolcunová, Marek Pavlík The Influence of Accelerated Ageing on the Oil Impregnated Paper	743
Viktor Pokorný, Stanislav Mišák, Lukáš Prokop Digitalization of Methods for Active Elimination of the Noise of Energy Equipment	748
Abdelrahman, M., Abdellatif, O.E., Moawed, M., Eliwa, A., Stanislav Mišák The CFD Performance Analysis for Horizontal Axes Wind Turbine with Different Blade Shapes and Tower Effect	754
Dmitrii V. Kolosov, Yuri I. Zharkov, Jan Otýpka, Yuri G. Semenov The principals of operation of the automated current collection diagnostic system for electified railways	760
Vaclav Kolar, Roman Hrbac, Tomas Mlcak Measurement and simulation of stray currents caused by AC railway traction	764
Karel Kuchta Increasing the safety of nuclear power plants - the installation of diverse electricity sources	769
