INVITED PAPERS (NOT PEER REVIEWED)

Toward Meaning and Scientific Thinking in the Traditional Freshman Laboratory: Opening the “Idea Space“	1
S. Allie and D. Demaree	
Structuring Classroom Discourse Using Formative Assessment Rubrics	5
D. T. Brookes and Y. Lin	
Using the Algebra Project Method to Regiment Discourse in an Energy Course for Teachers	9
H. G. Close, L. S. DeWater, E. W. Close, R. E. Scherr, and S. B. McKagan	
Developing Thinking and Problem Solving Skills in Introductory Mechanics	13
V. P. Coletta and J. A. Phillips	
Applying ISLE Ideas to Active Engagement in the Spins Paradigm	17
D. Demaree	
Uncovering the Hidden Decisions that Shape Curricula	21
D. B. Harlow	
Promoting and Studying Deep-level Discourse during Large-lecture Introductory Physics	25
S. Li and D. Demaree	
Using Analogy to Solve a Three-step Physics Problem	29
S.-Y. Lin and C. Singh	
nTIPERS: Tasks to Help Students “Unpack” Aspects of Newtonian Mechanics	33
D. P. Maloney, C. Hieggelke, and S. Kanim	
Upper-division Activities that Foster “Thinking like a Physicist”	37
C. A. Manogue, L. Cerny, E. Gire, D. B. Mountcastle, E. Price, and E. H. van Zee	
Using Reflection with Peers to Help Students Learn Effective Problem Solving Strategies	41
A. Mason and C. Singh	
Facilitating Students’ Problem Solving across Multiple Representations in Introductory Mechanics	45
D.-H. Nguyen, E. Gire, and N. S. Rebell	
Introducing Students to the Culture of Physics: Explicating Elements of the Hidden Curriculum	49
E. F. Redish	
What We Learned by Moving beyond Content Knowledge and Diversifying Our Research Agenda	53
M. S. Sabella	
Scientific Reasoning for Pre-Service Elementary Teachers	57
H. R. Sadaghiani	
Documenting and Interpreting Ways to Engage Students in ‘Thinking like a Physicist’	61
E. van Zee and C. Manogue	

PEER REVIEWED PAPERS

Constructing Definitions as a Goal of Inquiry	65
L. J. Atkins and I. Y. Salter	
Interpretation in Quantum Physics as Hidden Curriculum	69
C. Baily and N. D. Finkelstein	
Vector Addition: Effect of the Context and Position of the Vectors	73
P. Barniol and G. Zavala	

Generating Explanations for an Emergent Process: The Movement of Sand Dunes	77
L. Barth-Cohen	
Searching for Evidence of Student Understanding	81
T. Bartiromo, J. Finley, and E. Etkina	
Changing Participation through Formation of Student Learning Communities	85
E. Brewe, L. H. Kramer, and G. E. O'Brien	
Comparing Student Learning in Mechanics Using Simulations and Hands-on Activities	89
A. Carmichael, J. J. Chini, N. S. Rebello, and S. Puntambekar	
How Does Visual Attention Differ between Experts and Novices on Physics Problems?	93
A. Carmichael, A. Larson, E. Gire, L. Loschky, and N. S. Rebello	
Effects of a Prior Virtual Experience on Students' Interpretations of Real Data	97
J. J. Chini, A. Carmichael, E. Gire, N. S. Rebello, and S. Puntambekar	
Fluctuations in Student Understanding of Newton's 3rd Law	101
J. W. Clark, E. C. Sayre, and S. V. Franklin	
Energy in Action: The Construction of Physics Ideas in Multiple Modes	105
E. W. Close, H. G. Close, S. B. McKagan, and R. E. Scherr	
The Use of a Web-based Classroom Interaction System in Introductory Physics Classes	109
E. D. Corpuz, Ma. A. A. Corpuz, and R. Rosalez	
Beta-test Data on an Assessment of Textbook Problem Solving Ability: An Argument for Right/ Wrong Grading?	113
K. Cummings and J. D. Marx	
Why Do Faculty Try Research Based Instructional Strategies?	117
M. H. Dancy, C. Turpen, and C. Henderson	
TA Beliefs in a SCALE-UP Style Classroom	121
G. DeBeck, S. Settelmeyer, S. Li, and D. Demaree	
Are All Wrong FCI Answers Equivalent?	125
H. Dedic, S. Rosenfield, and N. Lasry	
Assessing Students' Attitudes in a College Physics Course in Mexico	129
J. de la Garza and H. Alarcon	
Sustained Effects of Solving Conceptually Scaffolded Synthesis Problems	133
L. Ding, N. W. Reay, A. Heckler, and L. Bao	
A Conceptual Approach to Physics Problem Solving	137
J. L. Docktor, N. E. Strand, J. P. Mestre, and B. H. Ross	
The Impact of the History of Physics on Student Attitude and Conceptual Understanding of Physics . .	141
S. Garcia, A. Hankins, and H. Sadaghiani	
Electric Field Concept: Effect of the Context and the Type of Questions	145
A. Garza and G. Zavala	
Investigating the Perceived Difficulty of Introductory Physics Problems	149
E. Gire and N. S. Rebello	
Development and Evaluation of Large-enrollment, Active-learning Physical Science Curriculum	153
F. Goldberg, E. Price, D. Harlow, S. Robinson, R. Kruse, and M. McKean	
Are Learning Assistants Better K-12 Science Teachers?	157
K. E. Gray, D. C. Webb, and V. K. Otero	
Learning Pedagogy in Physics	161
D. B. Harlow, L. H. Swanson, H. A. Dwyer, and J. A. Bianchini	
Students' Responses to Different Representations of a Vector Addition Question	165
J. M. Hawkins, J. R. Thompson, M. C. Wittmann, E. C. Sayre, and B. W. Frank	
Variables that Correlate with Faculty Use of Research-based Instructional Strategies	169
C. Henderson, M. H. Dancy, and M. Niewiadomska-Bugaj	
Writing Position Vectors in 3-d Space: A Student Difficulty with Spherical Unit Vectors in Intermediate E&M	173
B. E. Hinrichs	
Exploring Student Understanding of Atoms and Radiation with the Atom Builder Simulator	177
A. Johnson and A. Hafele	

Students' and Instructor's Impressions of Ill-structured Capstone Projects in an Advanced Electronics Lab	181
N. M. Juma, E. Gire, K. Corwin, B. Washburn, and N. S. Rebello	
An Evolving Model for Seeing Colored Objects: A Case Study Progression	185
E. C. Kahle, R. E. Scherr, and H. G. Close	
Instructional Explanations as an Interface: The Role of Explanatory Primitives	189
S. Kapon and A. A. diSessa	
Direct and Indirect Approaches to Increasing Conceptual Survey Gains	193
P. B. Kohl, C. Pearl, and H. V. Kuo	
Gender Differences in Physics 1: The Impact of a Self-affirmation Intervention	197
L. E. Kost-Smith, S. J. Pollock, N. D. Finkelstein, G. L. Cohen, T. A. Ito, and A. Miyake	
Frame Analysis as a Way to Understand the Complex Dynamic of Classroom Teaching Practice	201
M. Lau	
Survey Development for Assessing Learning Identity in an ISLE Classroom	205
S. L. Li, J. A. Roth, and D. Demaree	
Using Analogies to Learn Introductory Physics	209
S.-Y. Lin and C. Singh	
Investigating Student Understanding for a Statistical Analysis of Two Thermally Interacting Solids ...	213
M. E. Loverude	
Influence of Learning Styles on Conceptual Learning of Physics	217
T. Marin-Suarez and H. Alarcon	
Development of a Survey Instrument to Gauge Students' Problem-solving Abilities	221
J. Marx and K. Cummings	
Student Understanding of the Correlation between Hands-on Activities and Computer Visualizations of NMR/MRI	225
D. L. McBride, S. Murphy, and D. A. Zollman	
Losing It: The Influence of Losses on Individuals' Normalized Gains	229
K. Miller, N. Lasry, O. Reshef, J. Dowd, I. Araujo, and E. Mazur	
REU Students' Initial Perceptions of Scientific Ethics	233
S. Murphy and D. Zollman	
Pilot Testing of the Pathway Active Learning Environment	237
C. M. Nakamura, S. K. Murphy, D. A. Zollman, M. Christel, and S. Stevens	
Facilitating Strategies for Solving Work-energy Problems in Graphical and Equational Representations	241
D.-H. Nguyen, E. Gire, and N. S. Rebello	
Our Best Juniors Still Struggle with Gauss's Law: Characterizing Their Difficulties	245
R. E. Pepper, S. V. Chasteen, S. J. Pollock, and K. K. Perkins	
Understanding and Interpreting Calculus Graphs: Refining an Instrument	249
N. Perez-Goytia, A. Dominguez, and G. Zavala	
Who Becomes a Physics Major? A Long-term Longitudinal Study Examining the Roles of Pre-college Beliefs about Physics and Learning Physics, Interest, and Academic Achievement	253
K. K. Perkins and M. Gratny	
Characterizing Complexity of Computer Simulations and Implications for Student Learning	257
N. S. Podolefsky, W. K. Adams, K. Lancaster, and K. K. Perkins	
The Use of Concept Tests and Peer Instruction in Upper-division Physics	261
S. J. Pollock, S. V. Chasteen, M. Dubson, and K. K. Perkins	
Comparing Educational Tools Using Activity Theory: Clickers and Flashcards	265
E. Price, C. De Leone, and N. Lasry	
The Beginnings of Energy in Third Graders' Reasoning	269
J. Radoff, F. Goldberg, D. Hammer, and S. Fargason	
Improved Student Performance in Electricity and Magnetism Following Prior MAPS Instruction in Mechanics	273
S. Rayyan, A. Pawl, A. Barrantes, R. Teodorescu, and D. E. Pritchard	
Constructing a Model of Physics Expertise	277
I. Rodriguez, E. Brewe, and L. Kramer	

Pre-service Physics Teachers and Physics Education Research	281
D. Rosengrant	
Online Multimedia PreLab Tutorials in Conservation Laws	285
H. R. Sadaghiani	
Positive Impacts of Modeling Instruction on Self-efficacy	289
V. Sawtelle, E. Brewe, and L. H. Kramer	
“Energy Theater”: Using the Body Symbolically to Understand Energy	293
R. E. Scherr, H. G. Close, S. B. McKagan, and E. W. Close	
Surveying Instructors’ Attitudes and Approaches to Teaching Quantum Mechanics	297
S. Siddiqui and C. Singh	
Surveying Students’ Understanding of Quantum Mechanics	301
C. Singh and G. Zhu	
Addressing Student Difficulties with Statistical Mechanics: The Boltzmann Factor	305
T. I. Smith, J. R. Thompson, and D. B. Mountcastle	
Examining the Beliefs and Practice of Teaching Assistants: Two Case Studies	309
B. T. Spike and N. D. Finkelstein	
Design of a Synthesizing Lecture on Mechanics Concepts	313
N. E. Strand, J. L. Docktor, G. E. Gladding, J. P. Mestre, and B. H. Ross	
Physics Teacher Characteristics and Classroom Practices	317
M. S. Taylor and J. A. Phillips	
Toward an Integrated Online Learning Environment	321
R. E. Teodorescu, A. Pawl, S. Rayyan, A. Barrantes, and D. E. Pritchard	
Faculty Perspectives on Using Peer Instruction: A National Study	325
C. Turpen, M. Dancy, and C. Henderson	
Maximum Likelihood Estimation (MLE) of Students’ Understanding of Vector Subtraction	329
T. Wang and E. C. Sayre	
Understanding How Students Use Physical Ideas in Introductory Biology Courses	333
J. Watkins, K. Hall, E. F. Redish, and T. J. Cooke	
Impact of Informal Science Education on Children’s Attitudes about Science	337
R. Wulf, L. M. Mayhew, and N. D. Finkelstein	
Students’ Understanding of the Concepts of Vector Components and Vector Products	341
G. Zavala and P. Barniol	
Improving Students’ Understanding of Quantum Measurement	345
G. Zhu and C. Singh	
List of Participants and E-mail Addresses	349
Author Index	353
