8th INTERNATIONAL
**WATER SENSITIVE
 URBAN DESIGN**
 CONFERENCE | 25–29 NOVEMBER 2013

Paper Title	Page
A comparative socio-technical discourse analysis of Water Sensitive Urban Design for Melbourne, Australia and Copenhagen, Denmark	1
A Decade of Bioretention Research	21
A Dual-mode Biofilter Pilot System in Kfar Sava, Israel	32
An efficient and sustainable stormwater management approach to Infill Development where existing drainage runs "at capacity"	40
Assessing nature of clogging in zeolite based stormwater filters	63
Boundary spanning for WSUD up-scaling: a preliminary conceptual framework	74
Designing Urban Cool Pools	81
Determination of operational and challenge conditions for validation of stormwater biofilters and wetlands	87
Exploring transdisciplinary practice in local government	95
Framework for prioritising IWM options for new communities	100
How to harvest stormwater sustainably	109
Long-term Phosphorus Accumulation in Stormwater Biofiltration Systems at the Field Scale	114
Mainstreaming WSUD: Indicators of Institutional Change	129
Resilience approach to Urban Flood Risk Management systems using Real in Options—a review	134
Same attitudes, different risks: Social identity, attitudes and perceived risks of stormwater harvesting systems	147
Stormwater biofiltration—the challenges of inorganic and organic nitrogen removal	153
The business case for pro-active WSUD maintenance	161
UrbanBEATS: A strategic planning tool for exploring water sensitive futures	168
Urban Creek Flow, Re-aeration and Microbial Processes Determine Ecological Health	176
Urban Water ToolKit: translating water engineering to urban design	184
Value of SuDS beyond urban flood management: The Ecosystem services value of green/blue solutions	192
Water quality in Dajarra, Northwest Queensland	203
Water sensitive urban design in a European context	209
Water(way) sensitive urban design: Addressing the causes of channel degradation through catchment-scale management of water and sediment	220
Web model environment for challenging land use planning of volcanic lake basins in the Lazio Region	227
WSUD and Green Infrastructure: A cost-effective and sustainable strategy for urban re-development	237

8th International Water Sensitive Urban Design Conference

(WSUD 2013)

Full papers: Non-peer review

**Gold Coast, Australia

8th INTERNATIONAL
**WATER SENSITIVE
 URBAN DESIGN**
 CONFERENCE | 25–29 NOVEMBER 2013

Paper Title	Page
A clear vision for urban water bodies – the benefit of defining benchmark levels of service	1
A Methodology to Assess the Effectiveness of Bioretention Basins for Frequent Flow Management	6
An Analysis of the Use of Buoyant Flow Control Devices to Mitigate the Effects of Urban Runoff	18
An experimental set-up and monitoring program for full-scale tests of six permeable pavements systems in Copenhagen, Denmark	30
Assessing the Resilience of Water Bodies to the Stormwater-Related Effects of Urban Development	41
Blue Mountains Sewer Tunnel Improvement Project - Geomorphology Assessment	52
Defining Stormwater Harvesting's Complementary Contribution towards Flow Regime Management	69
Designing and Implementing Green Roofs for WSUD in Australasia	78
Design of the time; setting a new standard	92
Development 'Control', or opportunity? Realisation of privately funded WSUD: experience from the UK	100
Economics of WSUD — challenges in the field, and a proposed assessment framework	111
Embedding WSUD in the UK: Transferability and Results	117
Flood resilience incorporation and application in the context of water sensitive cities	122
Holistic planning providing a template for future catchment transformations	129
How to improve the uptake of Water Sensitive Urban Design	135
Integrated Water Management Opportunities for Inner Suburban Areas	147
Managing soil moisture to deliver high value landscape services and optimise the urban water cycle	161
Off the hook?! An examination of the appropriateness of stormwater offsets in South East Queensland	176
Outcomes and Lessons Learned from the International Water Sensitive Cities Study Tour (WSCST) 2012	185
Perceiving wsud: how different lenses can change perception	201
Selling greener streets: Community responses to retrofitting sustainable drainage in London	211
Snapping Toronto: Community empowerment and innovative urban renewal in Canada's largest city	214
Stormwater Quality – Lessons from the Past, Looking to the Future	221
Stormwater Quality Offsets –the end or a new beginning for WSUD?	232
The benefits of constructing an undersized wetland	236
The impact of urbanisation on hydrology in areas with significant groundwater surface water interactions: three case studies	250
The ripple effect: A cost benefit analysis of using WSUD to adapt city centres to climate change	264
The school with no stormwater: Noosa Flexi-Learning Centre	269
Vegetated Stormwater Assets – Finding the Positive Deviants	280
Water sensitive development in Kunshan, China	292
What are the secrets to successfully implementing water management initiatives?	303
