# Proceedings

## Session: SYSTEMS FOR SPACE APPLICATIONS

Paper ID	Author	Institute	Title
M1-1	Andrey Smirnov	P.N. Lebedev Physical Institute, Russia	<a href="#"><u>Millimetron: the next step of FIR Astronomy</u></a> ..... 1
M1-2	Jonathan Kawamura	Jet Propulsion Laboratory	<a href="#"><u>A Terahertz superconducting receiver instrumented on a low power space cryocooler</u></a> ..... 5
M1-3	Simon Rea	STFC Rutherford Appleton Lab., UK	<a href="#"><u>The Low-Cost Upper-Atmosphere Sounder (LOCUS)</u></a> ..... 7
M1-4	Andrey Baryshev	SRON, the Netherlands	<a href="#"><u>Kinetic Inductance Detectors for Space: SPACEKID perspective</u></a> ..... 10
M1-5	Pierre Kaufmann	Universidade Presbiteriana Mackenzie, Brazil	<a href="#"><u>Space and Ground-Based New Tools for THz Solar Flare Observations</u></a> ..... 11

## Session: HOT ELECTRON BOLOMETERS

Paper ID	Author	Institute	Title
M2-1	Sergey Cherednichenko	Chalmers University of Technology, Sweden	<a href="#"><u>Study of MgB<sub>2</sub> HEB mixers vs the LO frequency and the bath temperature</u></a> ..... 15
M2-2	Daniel Cunnane	Jet Propulsion Laboratory	<a href="#"><u>Josephson vs HEB Mixing in Superconducting MgB<sub>2</sub> THz Heterodyne Detectors</u></a> ..... 18
M2-3	Patrick Pütz	KOSMA, Germany	<a href="#"><u>1.9 THz Waveguide HEB Mixers for the upGREAT Low Frequency Array</u></a> ..... 22
M2-4	X. X. Liu	SRON, the Netherlands	<a href="#"><u>A 2 x 2 Array Receiver at 1.4 THz based on HEB mixers and a Fourier Phase Grating Local Oscillator</u></a> ..... 25

## Session: RECEIVERS

Paper ID	Author	Institute	Title
M3-1	Christophe Risacher	MPIfR Bonn, Germany	<a href="#"><u>upGREAT: Status of the 1.9 to 2.5 THz Heterodyne Array for SOFIA</u></a> ..... 28
M3-2	Alessandro Navarrini	IRAM, France	<a href="#"><u>The NOEMA Front-End</u></a> ..... 30
M3-3	Jamie Leech	Oxford University, UK	<a href="#"><u>An SIS mixer based focal-plane array at 230 GHz</u></a> ..... 34
M3-4	Eric Bryerton	Virginia Diodes, Inc.	<a href="#"><u>A Compact Low-Power 874 GHz Schottky Receiver for the IceCube Radiometer</u></a> ..... 38
M3-5	Jenna Kloosterman	Jet Propulsion Laboratory	<a href="#"><u>4x1-Pixel Heterodyne Array Development at 1.9 THz</u></a> ..... 40
M3-6	Theodore Reck	Jet Propulsion Laboratory	<a href="#"><u>A 230GHz MMIC-based Sideband Separating</u></a>

[Receiver](#) ..... 42

### Session: BOLOMETRIC SPECTROMETERS

Paper ID	Author	Institute	Title
M4-1	Christopher Thomas	Cambridge University, UK	<a href="#"><u>Progress on the Cambridge Emission Line Surveyor (CAMELS)</u></a> ..... 44
M4-2	George Che	Arizona State University	<a href="#"><u>WSPEC: A Waveguide Filter Bank Spectrometer</u></a> ..... 48
M4-3	Omid Noroozian	NASA Goddard Space Flight Center	<a href="#"><u>Submillimeter Spectroscopy with <math>\mu</math>-Spee</u></a> ..... 51

### Session: SOURCES

Paper ID	Author	Institute	Title
T1-1	Hugh Gibson	Gibson Microwave Design, France	<a href="#"><u>A 600GHz High Power Tripler for Space Applications</u></a> ..... 54
T1-2	Jeffrey Hesler	Virginia Diodes, Inc.	<a href="#"><u>Development of Sources and Receivers to Cover 1.25-1.51 THz</u></a> ..... 57
T1-3	Jose V Siles	Jet Propulsion Laboratory	<a href="#"><u>Development of High-Power Multi-Pixel LO Sources at 1.47 THz and 1.9 THz for Astrophysics: Present and Future</u></a> ..... 60
T1-4	Subash Khanal	Aalto University, Finland	<a href="#"><u>Characterisation of THz Schottky diodes for MetOp-SG instruments</u></a> ..... 63

### Session: QUANTUM CASCADE LASERS

Paper ID	Author	Institute	Title
T2-1	Yuan Ren	Cambridge University, UK	<a href="#"><u>Terahertz quantum cascade amplifier</u></a> ..... 68
T2-2	Heiko Richter	DLR, Germany	<a href="#"><u>4.7-THz Local Oscillator for GREAT</u></a> ..... 71
T2-3	Wei Miao	Purple Mountain Observatory, China	<a href="#"><u>A 2.7 THz integrated heterodyne receiver based on a low power consumption quantum cascade laser</u></a> ..... 74
T2-4	Jian Rong Gao	TU Delft/SRON, the Netherlands	<a href="#"><u>Fourier phase grating for THz multi-beam local oscillators</u></a> ..... 77
T2-5	Matthias Justen	KOSMA, Germany	<a href="#"><u>Waveguide Embedding of a Double Metal 1.9THz OCL into a Split Block with Diagonal Horn Antenna</u></a> ..... 79

### Session: INSTRUMENTATION FOR CMB OBSERVATIONS

<b>Paper ID</b>	<b>Author</b>	<b>Institute</b>	<b>Title</b>
T3-1	Roger O'Brient	Caltech	<a href="#"><u>Antenna coupled TES bolometers for BICEP-2 and 3, Keck Array, and SPIDER</u></a> ..... 81
T3-2	Jeffrey McMahon	University of Michigan	<a href="#"><u>The ACTPol and Advanced ACTPol instruments</u></a> ..... 82
T3-3	Johannes Hubmayr	NIST	<a href="#"><u>Feedhorn-coupled Transition-Edge Superconducting Bolometer Arrays for Cosmic Microwave Background Polarimeter</u></a> ..... 83
T3-4	Sean Bryan	Arizona State University	<a href="#"><u>Design of Dual-Polarization Horn-Coupled Kinetic Inductance Detectors for Cosmic Microwave Background Polarimetry</u></a> ..... 88
T3-5	Yutaro Sekimoto	NAOJ, Japan	<a href="#"><u>Design of an MKID focal plane array for LiteBIRD</u></a> ..... 91
T3-6	Vincent Reveret	CEA Saclay, France	<a href="#"><u>Progress on silicon bolometers for (sub)-millimeter astronomy: from ArTéMiS to future B-Mode detection space missions</u></a> ..... 95

#### **Session: HISTORY & CURRENT DEVELOPMENTS (Invited)**

<b>Paper ID</b>	<b>Author</b>	<b>Institute</b>	<b>Title</b>
W1-1	Robert Wilson	Harvard-Smithsonian CfA	<a href="#"><u>The discovery of Interstellar CO</u></a> ..... 98
W1-2	Alan Rogers	MIT Haystack Observatory	<a href="#"><u>Discoveries and technical developments in VLBI</u></a> ..... 101
W1-3	Sander Weinreb	Caltech	<a href="#"><u>Radio Astronomy - Past, Present, and Future</u></a> ..... 102
W1-4	Jonas Zmuidzinas	Caltech/JPL	<a href="#"><u>The Development of Superconducting Mixers and Detectors</u></a> ..... 103

#### **Session: DETECTION THEORY AND TECHNIQUES**

<b>Paper ID</b>	<b>Author</b>	<b>Institute</b>	<b>Title</b>
W2-1	Doug Henke	NRC Herzberg Astronomy & Astrophysics, Canada	<a href="#"><u>Full Sampling using a Dense Hexagonal Array of Coherent Multi-Beam Detectors</u></a> ..... 104
W2-2	Hajime Ezawa	NAOJ, Japan	<a href="#"><u>Towards the Intensity Interferometry at Terahertz Wavelengths</u></a> ..... 110
W2-3	Richard Lieu	University of Alabama, Huntsville	<a href="#"><u>Measuring the brightness of classical noise dominated light at the shot noise limit</u></a> ..... 113

**Session: DIRECT DETECTORS**

<b>Paper ID</b>	<b>Author</b>	<b>Institute</b>	<b>Title</b>
W3-1	Jason Austermann	NIST	<a href="#"><u>Development of Background-Limited MKID Systems for Millimeter-Wave and Far-Infrared Observations</u></a> ..... 118
W3-2	Tejas Guruswamy	Cambridge University, UK	<a href="#"><u>Quasiparticle effective temperature in superconducting thin films illuminated at THz frequencies</u></a> ..... 122
W3-3	Mark Sherwin	UC Santa Barbara	<a href="#"><u>A High-Mobility Tunable Antenna Coupled Intersubband Terahertz (TACIT) Detector</u></a> ..... 126
W3-4	Unil Perera	Georgia State University	<a href="#"><u>Tunable hot-carrier photodetectors for terahertz frequency operation</u></a> ..... 129
W3-5	Djelal Osman	Cambridge University, UK	<a href="#"><u>Elastic Interferometers as Phononic Filters for Thermal Isolation in Low-Noise Transition Edge Sensor</u></a> ..... 132
W3-6	Daniel Prober	Yale University	<a href="#"><u>Ultrasensitive Graphene Far Infrared Power Detectors</u></a> ..... 137

**Session: POSTERS**

<b>Paper ID</b>	<b>Author</b>	<b>Institute</b>	<b>Title</b>
P-1	Parisa Y. Aghdam	Chalmers University of Technology, Sweden	<a href="#"><u>On Specific Capacitance of SIS Junctions</u></a> ..... 139
P-2	Dominic Benford	NASA/Goddard Space Flight Center	<a href="#"><u>Focal Plane Arrays for HAWC+, SOFIA's upgraded High-resolution Airborne Wideband Camera and polarimeter</u></a> ..... 142
P-3	Jiajun Chen	University of Cambridge	<a href="#"><u>Modal Optical Modelling of a Test System for Ultra-Low-Noise Transition Edge Sensors for Space Science</u></a> ..... 143
P-4	Gert de Lange	SRON, the Netherlands	<a href="#"><u>A low-background test facility for spectral response measurements at 70 mK</u></a> ..... 148
P-5	Fabien Defrance	LERMA, Observatoire de Paris, France	<a href="#"><u>Non-periodic phase gratings</u></a> ..... 150
P-6	Vladimir Drakinskiy	Chalmers University of Technology	<a href="#"><u>Status and Progress of Schottky Technology Development for SWI and ISMA</u></a> ..... 152
P-7	Gregory Gay	LERMA, Observatoire de Paris, France	<a href="#"><u>Development of Membrane Based Quasi-optical HEB Mixers at 1.4 THz</u></a> ..... 154

P-8	Alvaro Gonzalez	NAOJ, Japan	<a href="#"><u>The need of compact profiled corrugated horns at longer mm-waves (ALMA band 1) and at around 1 THz (band 10) .....</u></a> 156
P-9	Paul Grimes	Smithsonian Astrophysical Observatory	<a href="#"><u>Testing an array of 350 GHz drilled smoothwall horns using a vector near-field beam scanner .....</u></a> 157
P-10	Quan Guo	National University of Defense Technology, China	<a href="#"><u>Fourfold Azimuthal Dependence of Terahertz Radiation from (100) Silicon .....</u></a> 161
P-11	Arvid Hammar	Omnisys Instruments AB, Sweden	<a href="#"><u>Optical Designs for a Multi-Beam 340 and 625/640 GHz Spaceborne Climate Research Instrument .....</u></a> 163
P-12	Andre Hector	University of Oxford, UK	<a href="#"><u>Investigating the Origin of Harmonics in a 230 GHz Local Oscillator .....</u></a> 167
P-13	Todd Hunter	National Radio Astronomical Observatory	<a href="#"><u>Statistical Topics Concerning Radiometer Theory .....</u></a> 171
P-14	Yoshihisa Irimajiri	National Institute of Information and Communications Technology, Japan	<a href="#"><u>Performance evaluation of phase-locking for THz-QCL using a HEB mixer .....</u></a> 175
P-15	Ling Jiang	Nanjing Forestry University, China	<a href="#"><u>Terahertz spectra of vitamins studied by terahertz spectroscopy and density functional theory .....</u></a> 177
P-16	Glenn Jones	Columbia University	<a href="#"><u>A Cryogenic Millimeter Wavelength Test Facility .....</u></a> 181
P-17	Boris Karasik	Jet Propulsion Laboratory	<a href="#"><u>Analysis of a normal metal nano-HEB THz array .....</u></a> 184
P-18	Akira Kawakami	National Institute of Information and Communications Technology, Japan	<a href="#"><u>Fabrication of 3 THz superconducting hot electron bolometer mixers .....</u></a> 186
P-19	Andrey Khudchenko	SRON, the Netherlands	<a href="#"><u>High Gap Nb-AlN-NbN SIS Junctions for Frequency Band 790-950 GHz .....</u></a> 188
P-20	Hyunjoo Kim	University of Bern, Switzerland	<a href="#"><u>Optical design study for Submillimeter Wave Instrument for the Jupiter mission .....</u></a> 191
P-21	Takafumi Kojima	National Astronomical Observatory of Japan	<a href="#"><u>Development of a Terahertz HEB Mixer-Amplifier with SiGe HBT .....</u></a> 192
P-22	Takafumi Kojima	National Astronomical Observatory of Japan	<a href="#"><u>Design of Superconducting On-chip Frequency Multiplexers for a Low-noise</u></a>

			<a href="#"><u>Multiband Receiver</u></a> ..... 193
P-23	Y. Kozuki	Osaka Prefecture University, Japan	<a href="#"><u>Development for a wideband 100GHz SIS mixer</u></a> ..... 194
P-24	Matthias Kroug	National Astronomical Observatory of Japan	<a href="#"><u>High Current Density SIS Junctions Based on Nb/Al,AlN/Nb Tri-layers</u></a> ..... 195
P-25	Jing Li	Purple Mountain Observatory, China	<a href="#"><u>Development of an 8~W8 CPW Microwave Kinetic Inductance Detectors (MKIDs) Array at 0.35 THz</u></a> ..... 196
P-26	Kuan-Yu Liu	ASIAA, Taiwan	<a href="#"><u>The Performance of an Integrated Dual Polarization SIS Mixer at 350 GHz</u></a> ..... 198
P-27	Yury Lobanov	Moscow Institute of Physics and Technology, Russia	<a href="#"><u>Antenna-Coupled 30 THz Hot Electron Bolometer Mixers</u></a> ..... 199
P-28	Sylvain Mahieu	IRAM, France	<a href="#"><u>Dual-Band SIS Receiver Design for Atmospheric Physics Research</u></a> ..... 202
P-29	Francois Mattiocco	IRAM, France	<a href="#"><u>Electronically Tuned Local Oscillators for the NOEMA Interferometer</u></a> ..... 204
P-30	Shirin Montazeri	University of Massachusetts Amherst	<a href="#"><u>Direct Integration of an SIS Mixer with a High-Impedance SiGe Low Noise Amplifier</u></a> ..... 208
P-31	Evgenii Novoselov	Chalmers University of Technology, Sweden	<a href="#"><u>Noise measurements of the low Tc MgB2 HEB mixer at 1.6THz and 2.6THz</u></a> ..... 211
P-32	Hawal Rashid	Chalmers University of Technology, Sweden	<a href="#"><u>Metamaterial-Like Properties of the Distributed SIS Tunnel Junction</u></a> ..... 217
P-33	Arne Schroeder	University of Bern, Switzerland	<a href="#"><u>Measurements, Simulations, and Optimization of an ALMA Band 5 Vacuum Window Prototype</u></a> ..... 221
P-34	Andrei Sergeev	SUNY Buffalo	<a href="#"><u>Engineering of electron and phonon processes in HEB sensors</u></a> ..... 225
P-35	Wenlei Shan	Purple Mountain Observatory, China	<a href="#"><u>Experimental Study of NbTiN Microstrip Lines</u></a> ..... 227
P-36	Alexander Shurakov	Moscow State Pedagogical University, Russia	<a href="#"><u>Performance of an HEB Direct Detector Utilizing a Microwave Reflection Readout Scheme</u></a> ..... 231
P-37	Boon Kok Tan	University of Oxford, UK	<a href="#"><u>Investigation of the Dynamic Range of Superconducting Nano-Bridge Switches</u></a> ..... 232
P-38	Boon Kok Tan	University of Oxford, UK	<a href="#"><u>A 220 GHz Finline Mixer with Ultra-Wide</u></a>

			<a href="#"><u>Instantaneous Bandwidth</u></a> ..... 236
P-39	Ivan Tretyakov	Moscow State Pedagogical University, Russia	<a href="#"><u>Noise and gain bandwidths of in situ NbN HEB mixer as functions of its bath temperature</u></a> ..... 239
P-40	Andrey Trifonov	Harvard-Smithsonian Center for Astrophysics	<a href="#"><u>An Investigation of the DC and IF Performance of Matrix HEB Mixer on Silicon Membrane</u></a> ..... 240
P-41	Jonathan Weintroub	Harvard-Smithsonian Center for Astrophysics	<a href="#"><u>20 gigasample per second analog-to-digital conversion for ultra-wideband radio astronomy</u></a> ..... 242
P-42	Jonathan Weintroub	Harvard-Smithsonian Center for Astrophysics	<a href="#"><u>SWARM: A compact high resolution correlator and wideband VLBI phased array upgrade for SMA</u></a> ..... 245
P-43	Matthaeus Wolak	Temple University	<a href="#"><u>Ultrathin MgB<sub>2</sub> Films for Hot Electron Bolometer Mixers Fabricated by HPCVD and Ion Milling</u></a> ..... 246
P-44	Lingzhen Zeng	Smithsonian Astrophysical Observatory	<a href="#"><u>Experimental Verification of the Fundamental Gaussian Beam Properties of Smooth-walled Feedhorns</u></a> ..... 250
P-45	Lingzhen Zeng	Smithsonian Astrophysical Observatory	<a href="#"><u>A Wideband Edge-Mode Isolator for Cryogenic Operation</u></a> ..... 253
P-46	Wen Zhang	Purple Mountain Observatory, China	<a href="#"><u>Characterization of superconducting Ti transition edge sensors with different microbridge length</u></a> ..... 255
P-47	John Vaillancourt	Universities Space Research Association	<a href="#"><u>The Stratospheric Observatory for Infrared Astronomy (SOFIA)</u></a> ..... 259
