

2015 IEEE Conference on Prognostics and Health Management (PHM 2015)

**Austin, Texas, USA
22-25 June 2015**

**IEEE Catalog Number: CFP15PHM-POD
ISBN: 978-1-4799-1895-9**

Table of Contents 2015 IEEE International Conference on Prognostics and Health Management

Powertrains T.1.A

Reliability Enhance Powertrain Using ANFIS Base prognostics Model - 1

Alireza Alghassi, *(United Kingdom)*; Payam Soulatiantork, *Politecnico di Milano Department of Energy (Italy)*; Mohammad Samie, *IVHM & Boeing Center, Cranfield University (United Kingdom)*; Suresh Perinpanayagam, *IVHM & Boeing Center, Cranfield University (United Kingdom)*; Marco Faifer, *Politecnico di Milano (Italy)*

Life Prognostics of Braking System using Bond Graph Modeling - 7

Gang Niu, *(China)*; Xiaofan Huang, *(China)*

Mechanical fault diagnosis of rolling bearing based on locality-constrained sparse coding - 13

Yang Li, *(China)*; Shuhui Bu, *(China)*; Zhenbao Liu, *Northwestern Polytechnical University (China)*; Chao Zhang, *Northwestern Polytechnical University (China)*

Energy Systems-1 T.1.B

Application of Diagnosis and Prognosis to Wind Turbine System Based on Fatigue Load - 20

Nejra Beganovic, *University of Duisburg - Essen (Germany)*; Jackson Njiri, *University of Duisburg - Essen (Germany)*; Sandra Rothe, *University of Duisburg-Essen, Chair of Dynamics and Control (Germany)*; Dirk Söffker, *University of Duisburg - Essen (Germany)*

Nacelle Orientation based Health Indicator for Wind Turbines - 26

YanJun Yan, *(United States)*

Prognostics of lithium-ion batteries using deterministic Bayesian approach - 33

Fangdan Zheng, *(United States)*

Electronics Prognostics-1 T.1.C

Prognostication of LED Remaining Useful Life and Color Stability in the Presence of Contamination - 37

Pradeep Lall, *Auburn University (United States)*; Hao Zhang, *Auburn University (United States)*; Lynn Davis, *(United States)*

An improved exponential model for predicting the remaining useful life of lithium-ion batteries - 45

Peijun Ma, *Harbin Institute of Technology (China)*; **Shuai Wang**, *Harbin Institute of Technology (China)*; Lingling Zhao, *Harbin Institute of Technology (China)*; Michael Pecht, *University of Maryland (United States)*; Xiaohong Su, *Harbin Institute of Technology (China)*; Zhe Ye, *Harbin Institute of Technology (China)*

Parametric sensitivity analysis of a PEMFC physics-based model developed for Prognostics - 51

Elodie Lechartier, *(France)*; Rafael Gouriveau, *FEMTO-ST Institute / FCLAB (France)*; Daniel Hissel, *FEMTO-ST Institute / FCLAB (France)*; Marie-Cécile Péra, *FEMTO-ST Institute / FCLAB (France)*; Noureddine Zerhouni, *FEMTO-ST Institute (France)*

Vehicle Health Management-1 T.3.A

A Integrated Vehicle Health Management Framework for Aircraft-----A Preliminary Report - 58
Zhang Guigang, (China)

Prognostics Health Management of Condition-Based Maintenance for Aircraft Engine Systems - 66
Zhi Lv, (China); **Jian Wang**, (China); **Zhang Guigang**, (China); **Jiayang Huang**, (China)

Towards an integrated development of PHM systems for aircraft engines: in-design selection and validation of health indicators - 72
Benjamin Lamoureux, Alstom Transport (France)

Energy Systems-2 T.3.B

Remaining Useful Life Estimation of Lithium-ion Battery Using Exemplar-Based Conditional Particle Filter - 80
Zhenbao Liu, Northwestern Polytechnical University (China); **Gaoyuan Sun**, Northwestern Polytechnical University (China); **Shuhui Bu**, (China)

Battery Prognostics Using A Self-Cognizant Dynamic System Approach - 88
Guangxing Bai, Wichita State University (United States); **Pingfeng Wang**, Wichita State University (United States)

Prediction of Remaining Useful Life of Battery Cell Using Logistic Regression Based on Strong Tracking Particle Filter - 98
Zhenbao Liu, Northwestern Polytechnical University (China); **Dasen Fan**, Northwestern Polytechnical University (China); **Shuhui Bu**, (China); **Chao Zhang**, Northwestern Polytechnical University (China)

Battery Prognostics T.3.C

A Dual-level Approach for Lithium-ion Battery Remaining Useful Lifetime Prediction - 104
Lingling Zhao, Harbin Institute of Technology (China); **Zhe Ye**, Harbin Institute of Technology (China); **Zhuo Wang**, (China); **Peijun Ma**, (China); **Xiaohong Su**, Harbin Institute of Technology (China); **Long Pang**, Harbin Institute of Technology (China); **Michael Pecht**, University of Maryland (United States)

Online Thermal State Estimation of High Power Lithium-ion Battery - 110
Hyunjae Kim, Seoul National Univ. (Korea, Republic of); **Sunuwe Kim**, Seoul National Univ. (Korea, Republic of); **Taejin Kim**, Seoul National Univ. (Korea, Republic of); **Chao Hu**, Medtronic, Inc. (United States); **Byeng D. Youn**, Seoul National Univ. (United States)

PHM for Electronics -1 T.4.A

Comparison of Stochastic Response Surface Method and Monte Carlo Method for Uncertainty Analysis of Electronics Prognostics - 116
Wuyang Pan, (China); **Zili Wang**, (China); **bo sun**, beihang university (China)

Prognostication of Solder-Joint Reliability of 0.4mm and 0.5mm Pitch BGAs Subjected to Mechanical Shocks up to 10,000G - 123
Pradeep Lall, Auburn University (United States); **Kalyan Dornala**, Auburn University (United States);

Ryan Lowe, *Applied Research Associates (United States)*; Jason Foley, *Air Force Research Lab (United States)*

Active Learning for Accurate Analysis of Streaming Partial Discharge Data - 137

Hai-Long Nguyen, *Data Analytics Department, Institute for Infocomm Research, A*STAR (Singapore)*; Joao Bartolo Gomes, *Data Analytics Department, Institute for Infocomm Research, A*STAR (Singapore)*; Min Wu, *Institute for Infocomm Research, A*STAR (Singapore)*; Hong Cao, *(Singapore)*; Jianneng Cao, *Data Analytics Department, Institute for Infocomm Research, A*STAR (Singapore)*; Shonali Krishnaswamy, *Data Analytics Department, Institute for Infocomm Research, A*STAR (Singapore)*

Energy Systems-3 T.4.B

Development of proactive risk-based inspection and management technology for the wind turbine system - 142

Keun-Ho Bae, *Korea Institute of Machinery and Materials (Korea, Republic of)*; Byung-Oh Choi, *(Korea, Republic of)*; Bong-Ki Kim, *Korea Institute of Machinery and Materials (Korea, Republic of)*; Jong-Won Park, *Korea Institute of Machinery and Materials (Korea, Republic of)*; Moo Hyun Cha, *Korea Institute of Machinery and Materials (Korea, Republic of)*; Mu-seong Chang, *Korea Institute of Machinery and Materials (Korea, Republic of)*

PHM Based Predictive Maintenance Optimization for Offshore Wind Farms - 152

Peter Sandborn, *University of Maryland, CALCE (United States)*; Xin Lei, *(United States)*; Roozbeh Bakhshi, *(United States)*; Amir Kashani-Pour, *University of Maryland, CALCE (United States)*; Navid Goudarzi, *University of Maryland, CALCE (United States)*

A Post-Prognostics Decision Approach to Optimize the Commitment of Fuel Cell Systems in Stationary Applications - 160

Stéphane Chretien, *Laboratoire de Mathématiques, UFC and UMR CNRS 6623 (France)*; **Nathalie HERR**, *FEMTO-ST Institute, AS2M Department (France)*; Jean-Marc NICOD, *FEMTO-ST Institute, AS2M Department (France)*; Christophe Varnier, *Femto-st Institute (France)*

Algorithms and Implementations-1 T.4.C

FPGA Implementation of Bayesian Network Inference for an Embedded Diagnosis - 167

Sara ZERMANI, *(France)*; **Catherine DEZAN**, *(France)*; Hanen Chenini, *(France)*; Jean-Philippe Diguët, *(France)*; Reinhardt Euler, *(France)*

Detecting Continual Anomalies in Monitoring Data Stream Based on Sampling Gaussian Process Regression - 177

jingyue pang, *Harbin Institute of technology (China)*; Datong Liu, *Harbin Institute of Technology (China)*; Yu Peng, *Harbin Institute of Technology (China)*; xi yuan Peng, *Harbin Institute of Technology (China)*

An application of systemic prediction evaluation parameters for neural network remaining useful life prediction models - 184

Li Qiao, *School of Reliability and Systems Engineering, Beihang University (China)*; Junyou Shi, *School of Reliability and Systems Engineering, Beihang University (China)*; Weiran An, *School of Reliability and Systems Engineering, Beihang University (China)*

Diagnostics/Prognostics of Structures/Materials-1 W.1.A

A Thermodynamic Entropy Based Approach for Prognosis and Health Management with Application to Corrosion-Fatigue - N/A

Anahita Imanian, (United States); **Mohammad Modarres**, University of Maryland (United States)

Probability of Corrosion Failure Analysis Using An Adaptive Sampling Approach - 188

Chaoyang Xie, China Academy of Engineering Physics (China); **zequn wang**, (United States); **Pingfeng Wang**, Wichita State University (United States); **Hongzhong Huang**, University of Electronic Science and Technology of China (China)

Prognostics of Crack Propagation in Structures using Time Delay Neural Network - 196

Faisal Khan, IVHM, Cranfield University (United Kingdom); **Omer Eker**, Cranfield University (United Kingdom); **Ian Jennions**, Cranfield University (United Kingdom); **Antonios Tsourdos**, Cranfield University (United Kingdom)

Vehicle Health Management-2 W.1.B

A Study on Life Monitoring of Landing Gear Based on Weight Parameter and Fatigue Loads Interaction - 202

Yang LUO, (China); **Yanguang HU**, (China)

Health Index and Behaviour Based Vehicle Level Reasoning System - 206

Faisal Khan, IVHM, Cranfield University (United Kingdom); **Omer Eker**, Cranfield University (United Kingdom); **Antonios Tsourdos**, Cranfield University (United Kingdom); **Tarapong Sreenuch**, Cranfield University (United Kingdom)

Tracking Gearbox Degradation based on Stable Distribution Parameters: A Case Study - 213

Tongdan Jin, Texas State University (United States); **Jianshe Kang**, (China); **Xinghui Zhang**, Mechanical Engineering College (China)

W.2.P Poster Session

Modeling of Corrosion Pit Growth for Prognostics and Health Management - 219

Chaoyang Xie, China Academy of Engineering Physics (China); **Pingfeng Wang**, Wichita State University (United States); **Wei Fayuan**, (China); **Hongzhong Huang**, University of Electronic Science and Technology of China (China)

A Simulation-based Health Monitoring System Test-bed for an Electrical Power Distribution System - 226

Faisal Khan, IVHM, Cranfield University (United Kingdom); **Tarapong Sreenuch**, Cranfield University (United Kingdom); **Antonios Tsourdos**, Cranfield University (United Kingdom); **Wasim A Orfali**, Taibah University (Saudi Arabia)

TDR-based Pipe Leakage Detection and Location using Bayesian Inference - 234

Taejin Kim, Seoul National Univ. (Korea, Republic of); **Byeng D. Youn**, Seoul National Univ. (United States); **Sihyeong Woo**, (Korea, Republic of)

Real-Time and Energy-Efficient Bearing Fault Diagnosis Using Discriminative Wavelet-Based Fault Features on a Multi-Core System - 239

*Jaeyoung Kim, (Korea, Republic of); Myeongsu Kang, University of Ulsan (Korea, Republic of); In-Kyu Jeong, University of Ulsan (Korea, Republic of); Heesung Jun, University of Ulsan (Korea, Republic of); **Jong-Myon Kim**, (Korea, Republic of); Byeong-Keun Choi, Gyeongsang National University (Korea, Republic of)*

Diagnostics/Prognostics of Structures/Materials-2 W.3.A

Wear Process Lifetime Prediction Based on Parametric Model Applied to Experimental Data - 250
***Nejra Beganovic**, University of Duisburg - Essen (Germany); Dirk Söffker, University of Duisburg - Essen (Germany)*

Progress Towards Prognostic Health Management of Passive Components in Advanced Reactors – Model Selection and Evaluation - 256
*Surajit Roy, (United States); **Pradeep Ramuhalli**, (United States)*

Physical-Clone-Based Prognostics of Mechanical Structures - 264
***Dong-Cheon Baek**, Korea Institute of Machinery and Materials (Korea, Republic of); Keun-Ho Bae, Korea Institute of Machinery and Materials (Korea, Republic of); Jong-Won Park, Korea Institute of Machinery and Materials (Korea, Republic of); Byung-Oh Choi, (Korea, Republic of)*

Economics of PHM W.3.B

Cost Benefit Analysis for Maintenance of Rotating Machines - 269
*Nishchal Verma, (India); **Sreevidya Khatravath**, Wipro (India)*

Quantifying Expected Gains from Implementing a Prognostics Algorithm on Systems with Long Logistics Delay Times - 276
*Matthew Ward, Naval Surface Warfare Center Port Hueneme Division (United States); **Jack Lam**, Naval Surface Warfare Center Port Hueneme Division (United States); Bryan Stewart, NSWC PHD (United States)*

Aircraft engines systems PHM operational implementation - N/A
*Jean-Remi MASSE, SAFRAN Snecma (France); **Audrey Dupont**, SAFRAN Snecma (France); Aurore Humeau, SAFRAN Engineering Services (France)*

PHM for Railway Systems W.3.C

Development and Evaluation of Health Monitoring Techniques for Railway Point Machines - 280
***David Siegel**, University of Cincinnati (United States); Wenjing Jin, University of Cincinnati - IMS Center (United States); Zhe Shi, University of Cincinnati - IMS Center (United States); Pierre Dersin, RAM Center of Excellence, Information Solutions ,ALSTOM Transport (United States); Cyril Douziech, 2RAM Center of Excellence, Information Solutions ,ALSTOM Transport (France); Michele Pugnaroni, RAM Department ,Information Solutions, ALSTOM Transport, Italy (Italy); Piero La Cascia, RAM Department ,Information Solutions, ALSTOM Transport (Italy); Jay Lee, (United States)*

A Maintenance Mode Decision Method for Traction Power Supply System of High-Speed Railway - 291
***Qi Wang**, Southwest Jiaotong University (China); Zhengyou He, Southwest Jiaotong University (China); Ding Feng, Southwest Jiaotong University (China)*

A Reliability Assessment Method for Traction Transformer of High-Speed Railway Considering the Load Characteristics - 298

Ding Feng, *Southwest Jiaotong University (China)*; **Zhengyou He**, *Southwest Jiaotong University (China)*; **Qi Wang**, *Southwest Jiaotong University (China)*

Algorithms and Implementations-2 Z.1.A

Motor Current Signature Analysis for Gearbox Fault Diagnosis in Transient Speed Regimes - 305

Hossein Davari Ardakani, *Center for Intelligent Maintenance Systems (IMS), University of Cincinnati (United States)*; **Zongchang Liu**, *(United States)*; **Inaki Bravo-Imaz**, *Intelligent Information Systems, IK4 - Tekniker (Spain)*; **Aitor Arnaiz**, *Intelligent Information Systems, IK4 - TEKNIKER (Spain)*; **Jay Lee**, *(United States)*

Considerations in Implementing Canary Based Prognostics - 311

Sony Mathew, *(United States)*; **Michael Osterman**, *CALCE/ Univ of MD (United States)*; **Michael Pecht**, *University of Maryland (United States)*

Sensor Fault Detection and isolation of an Autonomous Unmanned Underwater Vehicle System Using Partial Kernel PCA - 318

Nader Meskin, *Qatar University (Qatar)*; **Mani Navi**, *Qatar University (Qatar)*; **Mohammadreza Davoodi**, *Qatar University (Qatar)*

Gas Turbines and Rotating Machinery Z.1.B

Performance-based prognosis scheme for industrial gas turbines - 327

Elias Tsoutsanis, *Qatar University (Qatar)*; **Nader Meskin**, *Qatar University (Qatar)*; **Mohieddine Benammar**, *Qatar University (Qatar)*; **Khashayar Khorasani**, *Concordia University (Canada)*

A Hybrid Health Monitoring and Prognosis Approach With Application to Gas Turbine Engines - 335

Najmeh Daroogheh, *Concordia University (Canada)*; **Amir Baniamerian**, *Concordia University (Canada)*; **Nader Meskin**, *Qatar University (Qatar)*; **Khashayar Khorasani**, *Concordia University (Canada)*

Reliability Z.1.C

Predicting the Software Reliability of Complex Systems - 343

Chandru Mirchandani, *Lockheed-Martin (United States)*

System Reliability Assessment Based on QMU - 348

Ruoxing Gu, *(China)*

Fault prognostic and prediction based the importance degree of test point - 353

Junfeng Yan, *buaa (United States)*; **wenkui hou**, *(China)*

Algorithms and Implementations-3 Z.2.A

Degradation modelling with operating mode changes - 358

Thi-Bich-Lien Nguyen, *LSIS-Lab, Aix-Marseille University (France)*; **Mohand Djeziri**, *LSIS-Lab, Aix-Marseille University (France)*; **Bouchra Ananou**, *LSIS-Lab, Aix-Marseille University (France)*;

Mustapha Ouladsine, LSIS-Lab, Aix-Marseille University (France); Jacques Pinaton, STMicroelectronics (France)

Remaining Useful Life Estimation for Systems Subject to Multiple Degradation Mechanisms - 363
NAGARAJAN RAGHAVAN, *Singapore University of Technology and Design (SUTD) (Singapore); Daniel Frey, Massachusetts Institute of Technology (MIT) (United States)*

A Failure Rate Model for Traction Transformer Based on PHM Considering Multiple Factors - N/A
Ding Feng, *Southwest Jiaotong University (China); Zhengyou He, Southwest Jiaotong University (China); Xiaojun Sun, Southwest Jiaotong University (China)*

Z.2.B

Electro Hydraulic Servovalve Health Monitoring Using Fading Extended Kalman Filter - 371
Wlamir Vianna, EMBRAER SA (Brazil); takashi Yoneyama, ITA – Instituto Tecnológico de Aeronautica (Brazil); Luiz Gonzaga De Souza Ribeiro, (Brazil)

Detection and modeling of high-dimensional thresholds for Fault Detection and Diagnosis using Bayesian Statistics - N/A
Yuning He, *(United States)*

RUL Prognostics and Critical Zone Recognition for Suspended Time-Series - 377
Sergey Porotsky, *A.L.D. (Israel); Zigmund Bluvband, A.L.D. (Israel)*

Additional Papers

Accurate Health Estimates from HUMS Vibration Data - 382
Rodrigo E. Teixeira, Kari E. Morris and F. Christian Sautter; UAH Research Institute (United States)

AE Entropy for Detection of Fatigue Crack Initiation and Growth - 388
Mehdi Amiri, Mohammad Modarres, Enrique Lopez Droguett; University of Maryland, (United States)

Lithium-ion Batteries Life Prediction Method based-on Degenerative Characters and Improved Particle Filter - 396
Hongzheng Fang, Huanzhen Fan, Haodong Ma, Hui Shi, Yunfan Dong; Beijing Aerospace Measure & Control CORP, (United States)

Similarity-based Residual Useful Life Prediction for Partially Unknown Cycle Varying Degradation - 406
Blaise Kevin Guepie, Stephane Lecoeuche, (France)
