

2015 3rd International Conference on Green Energy and Technology (ICGET 2015)

**Dhaka, Bangladesh
11 September 2015**

**IEEE Catalog Number: CFP15A36-POD
ISBN: 978-1-5090-0170-5**

2015 International Conference on Green Energy & Technology

11 September, 2015

University of Dhaka, Bangladesh

Table of Contents

*Paper ID	Paper Title
5	Consumer is Producer- A Novel Model for Electricity Generation 1
6	A Review of Current Renewable Energy Activities in Bangladesh 6
20	CPU Power Consumption Reduction in Android Smartphone 11
23	Optimization of Distributed Energy Resources to Balance Power Supply and Demand in a Smart Grid 17
37	Simulation of Standalone 80kW Biomass Fueled Power Plant in Sailchapra, Bangladesh 22
38	Minimization of Power Shortage by Using Renewable (Solar) Energy through Smart Grid, Perspective: Bangladesh. 26
40	AN AUTOMATIC MONITORING AND CONTROL SYSTEM INSIDE GREENHOUSE 31
43	Harvesting Green Energy from Wastage Energy of Human Activities Using Gymnasium Bicycle at Chittagong City 36
45	Prospect of Green Power Generation by using Nuclear Energy in Bangladesh 40
47	Scope of Geothermal Potential of Bangladesh: A Review 44
48	Distributed Storage Based DC Micro Grid: A Reliable PV based Solution for Rural Electrification of Bangladesh 48
50	Designing of a 2kW Stand-alone PV System in Bangladesh Using PVsyst, Homer and SolarMAT 54
51	Prospect analysis of biofuel production and usage for transportation in Dhaka city, Bangladesh 60
52	An Objective Assessment of Walkability in Khulna City: A GIS Based Approach 65
53	Green Spaces: Assets or Liabilities? An Economic Study on the Urban Residential Neighborhood of Dhaka 70
54	Numerical Analysis of Deep Level Defects in Cu ₂ ZnSnS ₄ (CZTS) Thin Film Solar Cells 75
57	Application of Short Term Energy Consumption Forecasting for Household Energy Management System 81
59	Modelling of Solar Cell Characteristics Considering the Effect of Electrical and Environmental Parameters 87
60	The Prospect of Renewables of Bangladesh: A Study to Achieve the Policy Goal 93
61	Performance Characterization of Photovoltaic Technology with Highly Efficient Multi-Junction Solar Cells for Space Solar Power Satellite System 99
63	Solid State Lighting can resolve the present power crisis in Bangladesh 105
65	Study of Power Quality with changing customer loads in an urban distribution network 110
67	Electricity Generation by Using Amplitude of Ocean Wave 116
68	A comprehensive study on green technologies used in the vehicle 122

70	Design, Implementation and Performance Analysis of a Dual-Axis Autonomous Solar Tracker 127
71	Design and Performance Analysis of a Hybrid Solar PV and Biogas Power Plant using PLC 132
72	Shifting Generation of Energy of Solar PV Using OPTANG Method-Case Study Sandwip Area 138
73	Biomass energy an alternative solution for Bangladesh 143
76	An Efficient Wind Speed Sensor-less MPPT Controller Using Artificial Neural Network 147
78	Feasibility Analysis of Solar DC Nano Grid for Off Grid Rural Bangladesh 152
81	Design, Implementation and Cost Analysis of a Solar Powered Water Pump for Multistoried Building 157
82	Efficient Hybrid Renewable Energy System for Industrial Sector with On-Grid Time Management 162
83	Developing a Sustainable Peer-to-Peer Network Infrastructure for Rural Areas 168
84	Roadside Power Harvesting for Auto Street Light 172
85	Alternative Technology for Cooling 177
88	Enhanced Audio-Visual Warnings for Reducing Bird Fatalities at Wind Turbines 181
89	Design and Performance Analysis of a Directly-Coupled Solar Photovoltaic irrigation pump system at Gaibandha, Bangladesh 187
90	Design of Blades for a Low-Speed 400W Wind Turbine Suitable for Coastal Area of Bangladesh 193
91	Empowering Remote Area of Bangladesh Using Pedal Generator 199
92	Design and Analysis of an Outer Rotor Permanent Magnet Alternator for Low-Speed Wind Turbine 204
94	A Novel Model of Electricity Generation to Change the Direction of Grid Expansion and Power Flow Network 211
95	Facts and Popular Perceptions on Saving Energy and the Environment 216
97	Simulation of Saturation Current in In _{1-x} GaSb Based Solar Cell 222
98	Study of PV Implementation for Electricity Generation in Bangladesh 226
100	A Hybrid of 30 KW Solar PV And 30 KW Biomass System for Rural Electrification in Bangladesh 231
102	Design of High Efficient and Stable Ultra-Thin CdTe Solar Cells with ZnTe as a Potential BSF 236
