

2015 20th Conference on Electrical Power Distribution Networks (EPDC 2015)

**Zahedan, Iran
28 – 29 April 2015**

**IEEE Catalog Number: CFP1531P-POD
ISBN: 978-1-4673-6613-7**

20th Electric Power Distribution Conference

**April 28,29, 2015, Daneshgah Blv, Zahedan,
Iran**

Frequency Control of Micro-Grid Using State Feedback With Integral Control

Maryam Mahmoudi
Hassan Jafari
Reza jafari

Detecting of unnormal conditions of polluted insulators based on analysis phase angle of leakage current

M. Faramarzi palangar
M. Mirzaie
Mohammad faramarzi
palangar

Optimal Implementation of Feeder Automation in Medium Voltage Distribution Networks

Sanaz Koozehkanani
Saeid Salemi
Shahab Sadr

Stochastic Modeling of Plug-in Electric Vehicles Load Demand in Residential Grids Considering Nonlinear Battery Charge Characteristic

Ali Ahmadian
Mahdi Sedghi
Masoud Aliakbar-Golkar

Distribution Feeder Classification Based on Self Organized Maps (Case Study: Lorestan Province, Iran)

Farzad Dehghani
Masoud Dehghani
Hamid Nezami
Majid Saremi

Application of nuSupport Vector Regression in Short-Term Load Forecasting

Adnan Omid
S. Masoud Barakati
Saeed Tavakoli

Short Term Load Forecasting Based On Brain Emotional Predictor

Jila Ayubi
S. Masoud Barakati
Adnan Omid
Peyman Ayubi

An Observability Based Monitoring scheme for Voltage Stability Margin: A Practical System Case Study

Mehdi Ghazavi Dozein
Javad Ansari
Mehran Soleymanifar
Leila Zafari

Simultaneous Placement of Recloser and Fuse based on Society Development Algorithm	Maryam Hajinia Seyed Mehdi Mahaei Jafar Jafarzadeh
Optimal reconfiguration of unbalanced distribution systems using a new hybrid Big Bang-Big Crunch algorithm for loss reduction	S. Ahmadi Sh. Abdi
Benefit of Customers Competition on Power Market	Mehdi Khavaninzadeh Masoud Rashidinejad Amir Abdollahi
Evaluation of an autonomous microgrid for rural electrification in Zahedan, Sistan Va Baluchestan	Homa Rashidizadeh Kermani Mostafa Vahedipour Dahraie Hamid Reza Najafi
Voltage and reactive power control in a distribution system using hybrid SA-DBPSO algorithm	Abdolhamid Rahideh Mohsen Gitizadeh Ali sadrzadeh
Risk-Based Midterm Contract Portfolio Optimization for a DisCo in Hybrid Electricity Market	Mansour Charwand Mohsen Gitizadeh
Control Strategy for Voltage Unbalance Compensation in Islanded Microgrids	Arezou Mahmoudi Hamid Reza Karshenas
Comparison of D-SVC and D-STATCOM for performance enhancement of the distribution networks Connected WECS including voltage dependent load models	Roghayeh Gitibin Faramarz Hoseinzadeh
Scheduling of Energy Hubs Including CCHP, Solar and Energy Storages in Different Climates	Samaneh Pazouki Mahmoud-Reza Haghifam
Effect of Distributed Energy Resources on Load and Loss Factors of Energy Distribution Networks	Samaneh Pazouki Mahmoud-Reza Haghifam

Is Wireless Communication Suitable for Smart Grid?	S. M. Hosseini Mehri Mehrjoo
Using improved time of use demand response in optimal operation of microgrid	Hakime Ardeshiri Seyed Masoud Barakati Kamal Ranjbar
Priority Setting in Various DG Technologies Considering the Reduction of Energy Subsidies Using FAHP Method	Shadi Rezakhani Mojtaba Naghdi Mohammad Yousefi Nima Kia
A priority based approach for protection coordination in distribution system	Sajjad Solat
Optimal Battery Planning in Grid Connected Distributed Generation Systems Considering Different Technologies	Majid Daghi Mahdi Sedghi Masoud Aliakbar-Golkar
Determining the Pattern of MV Overhead Line Failure Rate Using Poisson Regression	Amin Moradkhani Mohammad Rahimkhani
Voltage control of Distribution Networks Using Fuzzy Approach and Capacitors Offline Planning	Reza Aboli Maryam Ramezani Hamid Falaghi
Comprehensive Distribution Network Expansion Planning: a Dynamic Approach	Amir Bagheri Hassan Monsef Hamid Lesani
Single phase fault location in power distribution network using combination of impedance based method and voltage sage matching algorithm	Mohammad Daisy Rahman Dashti
Dynamic Calculation of Leakage Current and Electric Field of Distribution polymeric insulator under pollution layer	Mohammad Mehdi Khademi Abdolsaheb Arjomand Hamid Saedpanah

Pre-Disaster Base Maintains of Distribution Transformers for Improving Crisis Management	Vahid Zarei Vahid Behjat Reza Baziar Mohammad Reza Azimizadeh
Comparison of Maximum Power Point Tracking Methods for Medium to High Power Wind Energy Systems	Mojtaba Heydari Keyue Smedley
Localization of quality management system based on cultural values Case study: ISO9001:2008 management system in Iranian organizations	Jamshid Dianati Saba Kakapour Seyyed Ali Barband Hossein Khanifar
Technical and Economic Assessment of AC/DC Distribution System Configurations	Ali Ghadiri Saeed Mousavizadeh M. R. Haghifam
Load balancing in overhead power distribution network replaced with self-supporting cable	A.Eyni
Optimal Allocation of Reactive Power Considering Voltage Stability Using PSO Algorithm	Fazel Mohammadi Behnam Alizadeh
Distributed Predictive Control for power balancing in electric distribution networks	Hamidreza Iranmanesh Ahmad Afshar
Operational scheduling of virtual power plants in the presence of energy storages and demand response programs for participating in the energy market	Ali Ghahgharaee Zamani Alireza Zakariazadeh Shahram Jadid Ahad Kazemi
The possibility of DC microgrids establishment in remote rural place	Rohollah Jafari Mehdi Baharizadeh S. Yaser Derakhshandeh Mohsen Fadaei
A New Structure and Control System for Boost Converter Based on State Space Modeling for Power Factor Correction	Mostafa Jalalian Ebrahimi Abbas Houshmand Viki
A New Dynamic Voltage Restorer Structure Based on Three-Phase to Single-Phase AC/AC Matrix Converter	Ali Reza Zargar S. Masoud Barakati

Power Loss Reduction And Power Quality Improvement In Distribution Systems Using A Modified Converter Of Distributed Generation Resources	Seyyed Abbas Saremi Hasari Ali Rasoolzadeh Akhijahani Ahmad Salemnia
Presents a new topology for parallel compensator to improve the load unbalance in electrical energy distribution network	Saeed Yeganehfar Mahmoud Ebadian Seyed Hossein Tabatabaee
Data Mining Approach for Islanding Detection of Synchronous Distributed Generation in Micro Grid	Ehsan Farhangi Seyed Masoud Barakati
Reliability Evaluation of the Power Distribution Network Under Penetration of Wind Power Considering the Uncertainty of Wind	M. Zadsar M. R. Haghifam M. Bandei
Decreasing cost of energy in sistan and baluchestan electric distribution company with load management	Zakiye Ghodrati Abbasali Nooshirvani Masoud Ghodrati Maryam Bandei
The Influence of Smart Controller of the Distributed Generation Sources and Capacitor Banks on Loss Minimization and Profile Improvement in the Electricity Distribution Networks Voltage	Omidreza Mashhadi Mahmoud Oukati Sadegh
Non-Destructive Aging of Transformer Oil Using Electromagnetic Waves	Fereshteh Sadat Jafari Fatemeh Kazemi Javad Ahmadi Shokouh
Investigation of SFCL Impacts on Crowbar Protection of DFIG based Wind Turbine	A. Safaei S. H. Hosseini H. Askarian Abyaneh N. Fallah-Amini H. Hashemi-Dezaki
Different Hybrid Filters Configurations Impact on an AC 25 kV Electric Train's Harmonic Mitigation	Sasan Yousefi Mohammad Mahdi Hosseini-Biyouki Aydin Zaboli Hossein Askarian-Abyaneh
