

2015 International Association of Institutes of Navigation World Congress (IAIN 2015)

**Prague, Czech Republic
20-23 October 2015**

**IEEE Catalog Number: CFP15D12-POD
ISBN: 978-1-4673-7635-8**

TABLE OF CONTENTS

Session A: Satellite navigation systems, their augmentation, receiver technologies and special questions.

Operation and Development of BeiDou Navigation Satellite System (Jing Li)	1
The Overall Research on BeiDou Augmentation System in China Transportation (Zhang Bingqi)	7
Radio-Navigation System Coverage Modelling Software (Martin Bransby)	15
Experimental Reception of New GNSS Signals (Jiří Svatoň)	22
Determining the Accuracy of Ship Position as a Function of Radar Bearing (Sławomir Świerczyński)	26
Satellite Navigation Data Mining (SENDAI) (Adam Polívka)	32
Monitoring Ionosphere over South America: the MImOSA and MImOSA2 projects (Fabio Dovis)	38
Simulink based prototype for real-time Intelligent GNSS-based localisation system (Hansjörg Manz)	45
Assessing of Low Cost GLONASS/GPS Receivers versus GPS Receivers in Egypt (Mohsen Fekry)	52

Session B: Space weather and ionosphere phenomena.

Services for GNSS users within the ESA Space Situational Awareness Space Weather Service Network (Erwin De Donder)	60
Ionosphere Monitoring in South East Asia: activities in GINESTRA and ERICA projects (Fabio Dovis)	65
High latitude ionospheric disturbances: characterization and effects on GNSS precise point positioning (Reza Ghoddousi-Fard)	72
GNSS ionospheric model performance under non-nominal conditions: CMEs and Solar Eclipse (Angela Aragon-Angel)	78

Session C: Signal processing in navigation systems.

The Influence of the GNSS Solution on the Estimated Parameters in the Course of Sensor Integration (Roman Lesjak)	85
Beacon aided Attitude Estimation Using Angle of Arrival Measurements (Kyungwoo Yoo)	93
Ship-board Pedestrian Positioning Method by Integrating Dead Reckoning and Wireless Sensor Networks (Yihang Xie)	98
Particle Filter technique for position estimation in GNSS-based localisation systems (Hansjörg Manz)	105

Session D: Marine navigation. Applications of GNSS and other technologies. Special problems.

Delivering resilient PNT (Nick Ward)	113
Grasp of a Latent Risk of Ship Evacuation during a Tsunami using AIS Data Analysis (Masao Furusho)	121
Has EGNOS its own place in Maritime Navigation? (Andrzej Felski)	126
Automatic Route Checking Method Using Postprocessing for the Measured Water Depth (Dongwoo Kang)	132
A Method for IMU/GNSS/Doppler Velocity Log Integration in Marine Applications (Michailas Romanovas)	137
Study on Case Study of Ship Handling (Yoshiaki Kunieda)	145
Turning maritime data into information (Nick Ward)	149
A Study on the Verification of Collision Avoidance Support System in Real Voyages (Dajung Kim)	154
Analyzing the marine traffic condition for estimating the high risk areas in the emergency evacuation (Gen Fukuda)	160
An Efficient Heave Estimation using Time-Differenced GPS Carrier Phase Measurements and Compensated Barometer Measurement Applying Error Model (DongSun Lee)	166
Advanced Optimized Weather Routing for an Ocean-Going Vessel (Ei-ichi Kobayashi)	172
Study on Manoeuvrability and Control of an Autonomous Wave Adaptive Modular Vessel (WAMV) for Ocean Observation (Jyotsna Pandey)	180
Basic System of Sea Navigation for a Maneuvering Support System (Shigeaki Shiotani)	187

Session E: Aviation and terrestrial navigation. Applications of GNSS and other technologies. Sensors and their data fuse. Special problems.

Air Traffic Control Real-time Simulation Experiment Regarding the Mixed Operation between RNP AR and ILS Approach Procedures (Osamu Amai) 191

Civil aviation, the adoption of new systems and applications: institutional impacts (Alberto Tuoizzi) 197

Safety relevant application of satellite based localisation in transportation with the focus on railways (Hansjörg Manz) 205

A GNSS based solution for supporting virtual block operations in train control systems (Pietro Salvatori) 211

Performance Evaluation of GNSS-based Railway Applications (Nobuaki Kubo) 217

An Inertial Sensor Calibration Platform to Estimate and Select Error Models (Jan Skaloud) 225

Trends in GNSS Italian Application Scenarios in transportation (Alberto Tuoizzi) 229

Session F: Spectrum management. Jamming and spoofing of navigation systems.

Multi-spectral image analysis for rescue target detection (Xin Ran) 237

A Study on the Accuracy of GPS Positioning during Jamming (Patrick Oonincx) 243

Exploiting the Doppler Effect in GPS to Monitor Signal Integrity and to Detect Spoofing (Patrick Oonincx) 247

Performance Analysis of a Multi-GNSS receiver in the Presence of a Commercial Jammer (Mohammad Zahidul H. Bhuiyan) 255

Session G: Precise positioning. RTK.

Real-time multi-constellation precise point positioning with integer ambiguity resolution (Xianglin Liu) 261

Session H: Radar, electronic maps, special sensors. Session I: Special problems, other topics.

The Need to Develop New Geodesic-Based Computational Algorithms for Marine Navigation Electronic Devices and Systems (Adam Weintrit) 268

Session I: Special problems, other topics.

Characterization of Chip-Scale Atomic Clock for GNSS navigation solutions (David Calero) 280

Accurate Time Distribution Using Optical Fiber (Vladimir Smotlacha) 288

Evaluation of Mental Workload by Large Model Sensor toward Development of Healthcare Monitoring System (Kenichi Kitamura) 293

A New Algorithm for Improving the Tracking and Positioning of Cell of Origin (Yuntian Brian Bai) 298
