Session A – Spatial Ability Research Studies	
Spatial skills and success in problem solving within engineering education.....1	Thomas Delahunty
Assessing the validity and reliability of dichotomous test results using Item Response Theory on a group of first year engineering students.....10	Edmund Nevin
A profile of the spatial visualisation abilities of first year engineering and science students.....19	Stephanie Farrell
Examining the Relationship between Physics Students' Spatial Skills and Conceptual understanding of Newtonian Mechanics.....28	Aaron Mac Raighne
Longitudinal Study of the Impact of Requiring Training for Students with Initially Weak Spatial Skills.....36	Sheryl A. Sorby
Developing a Spatial Ability Framework to Support Spatial Ability Research in Engineering Education.....45	Niall Seery

Session B – Research Studies of Ethics in Engineering Education	
Engineering Ethics: Ontology and Politics.....54	Eddie Conlon
From Practice to Research: A Plan for Cross-Course Assessment of Instruction in Engineering Ethics.....63	Michael Davis
The Everyday Ethics of Design: A Social and Communicative Approach.....71	Megan Kenny Feister
Exploring Programme Chairs' Understanding of the Integration of Sustainable Development: an Issue of Professional Identity?.....80	Iacovos Nicolaou
Got ISSuES?: Promoting Reflection About Engineering and Society Among Undergraduates 89	Sarah K. A. Pfatteicher
Active Learning, PAR and ICT outside Classroom: Engineering with Social Impact.....98	María Catalina Ramírez Cajiao

Session C – Research Studies in Teaching, Learning & Assessment – A Focus on Engineering Educators	
A Pedagogy of Larger Concerns used as a Reflection Lens to Explore Two Engineering Courses.....107	Jim Borgford-Parnell
"How Prepared are Engineering Educators to Implement Active Learning?" – The Emerging Findings.....116	Norhariati Ismail
Lecturers' Experiences of Assessing Generic Skills in an Active Learning Environment for Engineering Education in Malaysia - Emergent Findings.....125	Muhamad Farid Daud
The role of action research in influencing a senior engineering professor's pedagogical understanding and creating a community of practice for students.....134	Jillian Seniuk Cicek
Exploring the Usefulness of Personas in Engineering Education.....143	Jennifer Turns
A design pattern for skills-based lecturer training programs.....152	David López

Session D – Conceptual Understanding Research Studies	
Uncovering Misconceptions through Text Analysis.....161	Wageeh Boles
Engineering concepts in engineering performances and social interactions.....170	Floraliza Bornasal
Activity based on Didactic Engineering for Conceptual Change in Students' Equilibrium and Stability Understanding.....179	Michael Canu
Do students spend more time on difficult questions? Analysis of item response time versus correctness in the SCI/CATS.....188	Julie Direnga
Measurement of first year engineering students cognitive activities using a spatial skills test and an electrical concepts test: implications for curriculum design.....197	Gavin Duffy
Student Understanding of Open Switches and Open Circuits: What Do We (Not) Know?.....206	Dion Timmermann

Session E – Engineering Design Research Studies	
An Exploratory Study of Students' Empathy Toward Others Following a Product Archaeology Activity.....214	Adam Carberry
Exploring the Relationship between Student Reflectivity and their Understanding of Informed Design.....223	Molly Hathaway Goldstein
Modelling in Engineering Design and the Natural Sciences - Do the Differences Make a Difference?.....231	Milo D. Koretsky
Students' and educators' written feedback on design milestones.....240	Farshid Marbouti
Implementation of an Interest-based Engineering Challenges Framework: A Design Research Approach.....249	Avneet Hira
Changes in Design Thinking through Participation in Design Based Wilderness Education.....258	Chris Saulnier

Session F – Implementation & Evaluation of Pedagogical Approaches in Engineering Education	
An Investigation into the use of Problem Based Learning to Develop Graduate Attributes in Irish Engineering Undergraduate Education.....267	Una Beagon
Flipping Embedded System Design Class using Collaborative Project-Based Learning.....276	Hadil Mustafa
Developing an Inquiry-Based Learning Activity Using	Brian P. Self

Variation Theory.....285	
Enquiry-based Interdisciplinary Learning in Engineering Practice.....294	Mohd Nazri Mahmud
Work in Progress: A Qualitative Study of Instructor Perceptions of the Classroom Flip.....302	Sarah E. Zappe
The Impact of Inquiry-Based Learning Activities on the Retention and Transfer of Conceptual Learning in Heat Transfer.....309	Michael Prince

Session G – Identity, Gender, Cultural Studies in Engineering Education	
Detailing Recruitment Efforts to Interview Faculty about Gender in Engineering.....317	Kacey Beddoes
Influence of Collaborative Learning on Women's Experiences of Engineering Education..325	Shannon Chance
Mapping a supportive institutional culture for a diverse student cohort.....334	Jo Devine
The Humanistic Side of Engineering: A focus on engineering "As" a person.....343	Cole Joslyn

Session H – Research Studies in Mathematics Education within Engineering Curricula	
Participatory Action Research to Incorporate Formative Assessment into a Mathematics Course: An experience in Bioengineering.....351	Carolina L. Carrere
Students' Definitional Knowledge of Mathematical Models, Simulations, and Their Relationship.....360	Heidi Diefes-Dux
New Approaches to Teaching Calculus to Engineering Freshman.....369	Whitney Gaskins
Impact of Simulation Development on Mathematical Model Development.....378	Kelsey J. Rodgers

Session I – Research Studies of Engineering Competency, Skills & Attributes 1	
The Attributes of a Global Engineer Project: A Work-in-Progress 387	Stephen Hundley
Engineers and Their Knowledge: A Longitudinal Study of New Practicing Engineers' Personal Epistemologies.....393	Devlin Montfort
A review of the current level of Entrepreneurship and Enterprise Education in Irish engineering schools.....402	Chris Gibbons
Intercultural competency among doctoral students.....410	Joyce B. Main

Session J – Research Studies in the Context of First Year Engineering 1	
Learner Autonomy in Mechanical Engineering Students: taking it further.....418	Marina Duarte
STS and 'real' engineering: tensions in a first year course in Mechanical Engineering.....427	Bruce Kloot
The effects of spatial skills and spatial skills training on academic performance in STEM education.....435	Gavin Duffy
Using Open-ended Problems with First Year Engineering Students in Order to Foster a Cognitive Paradigm Shift.....444	Domhnall Sheridan
A study into first-year engineering education success with the use of a rigorous mixed methods approach.....453	Maartje van den Bogaard
Making Mole-Hills out of Mountains: Peer Mentoring in Engineering Education.....462	Jane Andrews

Session K – EER Community & Impact of EER	
Creating a Large, Integrated and Flexible Engineering Education Research Facility.....470	David F. Radcliffe
Engineering academics' identity transitions in becoming established engineering education researchers.....478	Anne Gardner
Evolution of a community of scholars: a design science research approach.....487	Bill Williams
Connections to Community: Using our Research in our Teaching Practice.....495	Rebecca Bates
Scaffolded autoethnography: a method for examining practice-to-research.....504	Dermot Shinnors-Kennedy
Interpreting Implications for Practice from a Design Perspective.....513	Jennifer Turns

Session L – Research Studies of Engineering Competency, Skills & Attributes 2	
Difficulty and Discrimination of Critical Engineering Literacy Test for First Year Engineering Students.....522	Kerrie Anna Douglas
Activity theory analysis of the visibility of writing practices in the engineering curriculum.....529	Rosalie Goldsmith
Strengthening Technical Writing Knowledge Transfer through Targeted Study in a First Year Composition Course.....538	Ruth Pflueger
Engineering Students' Perceptions of their Preparation for Engineering Practice.....546	Eileen Goold
How do engineering students develop practical competencies during a period of industrial placement? – Students'	Rohaya Kamaluddin

Perceptions.....555	
Reductive Sketching to Synergize Authentic Problem Solving in Engineering.....564	Leonhard Bernold

Session M – Research Studies in Technology Enhanced Engineering Education 1	
Work in Progress - MOOCs and Remote Lab Equipment: Using At-Home DIY Kits to Enhance the Online Learning Experience.....573	Jennifer DeBoer
An informal learning support framework.....580	Nikolas Galanis
Insights from using a subject specific Facebook group for student engagement and learning....587	Anne Gardner
The Development and Testing of the Soft Robotics Toolkit: an Educational Resource for Mechanical Engineering Design.....596	Donal Holland
Combining Learning and Gaming.....605	Emily S. Tan
Enhancing Engagement with a Competitive Video Game.....613	David A J Pearce

Session N – Engineering Education Research Design – Methodologies	
Analysing and modelling engineering students' learning in the laboratory: a comparison of two methodologies.....620	Jonte Bernhard
The Future of Engineering – Do Primary School engineering education interventions leave a lasting impression?.....629	Rebecca Cottrell
The Atlantic rift in Engineering Education Research Methodology.....638	Erik de Graaff
Designing Research for Theory and Practice.....644	Judith K. Shawcross
Design Science Research – an engineering research paradigm to improve methods for engineering education research.....653	Anna-Karin Carstensen
Design based research – issues in connecting theory, research and practice.....662	Anette Kolmos

Session O – Research Studies in Teaching, Learning & Assessment – A Focus on Practices	
Exploration of Course Syllabi as a Potential Source of Data on the Use of Evidence-Based Instructional Practices in Engineering Courses.....670	Sarah E. Zappe

Learning activity design and scaffolding to promote sustainable changes in students' goal orientation.....679	Keith Willey
Validating a Universal Instrument to Assess Formative Teaching and Learning Performance in Engineering.....688	Leonhard Bernold
Productive Disciplinary Engagement in Design Tasks.....697	Milo D. Koretsky
Then and Now: Past Experience Echoed in University Computing Teachers' Current Practice.....706	Sally Fincher
Difficulty of Adopting Learning Sciences in Engineering Education.....715	Kieran O'Mahony

Session P – First Year Engineering 2	
The correlation between lecture attendance and examination performance for first year engineering students.....724	Aidan O'Dwyer
Reflective Journals: Can they be used to identify struggling students?.....732	Shun Ha Sylvia Wong
Sense of achievement: Initial evaluation of an Integrated Engineering Design cornerstone module.....740	Emanuela Tilley
Uncovering the Role of Emotion in Learning through First-and Second-Year Engineering Students' Narratives.....749	Nadia Kellam

Session Q – Research Studies in Technology Enhanced Engineering Education 2	
Using technology enhanced learning to fuse theory and practice at an open distance learning institute.....758	Arthur James Swart
IT tools in the service of Active Learning: use of Word-clouds and LMS.....766	Pedro Neto
Can Academia-Industry Collaboration through Serious Gaming contribute to Learning and Skills Development?.....773	Emily S. Tan
The Adaptive Virtual Workshop: improving engineering education with the use of online adaptive tutorials.....780	Alexandra Vassar
Closing the university-business gap: model of blended learning for the collaborative design of learning resources.....789	Rémy Crepon
High or low tech approaches to teaching and learning?: The value of pedagogical soundness.....796	Edmond P. Byrne

Session R – Research Studies in Progression, Retention, Attrition & Persistence	
Integration and Achievement: Predicting Persistence among Black and Hispanic Engineering Students at Minority Serving Institutions.....805	Leonard Bliss
Predictive modeling for identifying at-risk students using course performance data.....814	Farshid Marbouti
Grit and Its Role in Achievement among Engineering Students.....823	John Chen
Is Student Performance in Engineering Core Courses Affected by Time Elapsed Since Prerequisite Courses?.....830	Kevin Dahm
Disciplinary Comparison of Engineering Student Outcomes in the USA.....836	Susan M. Lord
What role does Mathematical preparedness play for engineering students who transfer from an Ordinary degree into an Honours degree.....842	Michael Carr

Session S – Research Studies in Teaching, Learning & Assessment 3 – A Focus on Student Learning	
Student Perspectives of Practical Work done in a Laboratory – a Case Study from Mechanical Engineering.....850	Annalene Ollwagen
Learning Practices of Contemporary Engineering Undergraduates Preparing Online Assignments.....859	Angela Minichiello
Conducting a Q Methodological Study to Develop New Measures of Engineering Student Out of Class Involvement.....868	Denise R. Simmons
A Mixed Methods Study to Understand Student Resistance to Active Learning.....876	Prateek Shekhar
Structuring team projects to improve engineering self-efficacy.....883	Laura Hirshfield
Patterns of Team-Member Effectiveness Ratings in Eleven Countries.....890	Matthew W. Ohland

Additional Paper	
Educational Experiences in the Design of Competency-based Programs in Engineering Education. Lecturers and Students Points of View.....899	Guillermo Palacios-Navarro
