

# **2015 World Congress on Internet Security (WorldCIS 2015)**

**Dublin, Ireland  
19 – 21 October 2015**

**IEEE Catalog Number: CFP1563L-POD  
ISBN: 978-1-4673-9483-3**

## **Message from the Steering Committee**

Welcome to the World Congress on Internet Security (WorldCIS-2015). The WorldCIS-2015 conference is an opportunity for researchers and practitioners to exchange ideas about past, present and future trends in Internet Security. The WorldCIS-2015 received 392 papers from 65 countries of which 98 were accepted including 1 Panel Discussion and 5 Posters. A double blind paper evaluation method was adopted to evaluate each submission and selected papers will appear in high impact International Journals.

Many people have worked very hard to make this conference possible. We would like to thank all who have helped in making WorldCIS-2015 a success. The executive committee and Technical Program members each deserve credit for their excellent job. We thank the Keynote Speakers who have contributed to WorldCIS-2015, Dr Ligu Chen and Dr Aspen Olmsted for agreeing to participate in the WorldCIS-2015.

We also like to acknowledge our appreciation to the following organisations for their support: IEEE UK/RI Computer Chapter, Infonomics Society, HP, College of Charleston and Canadian Teacher Magazine. The long term goal of WorldCIS is to build a reputation and respectable conference for the international community.

On behalf of the WorldCIS-2015 Executive members, we would like to encourage you to contribute to the future WorldCIS as authors, speakers, panellists, and volunteer conference organisers. We wish you a pleasant stay in Dublin, and please feel free to exchange ideas with other experts.

### **General Chair**

Professor Charles Shoniregun, Infonomics Society UK and Republic of Ireland

### **General Vice-Chair**

Bernd Markscheffel, Technische Universität Ilmenau, Germany

## Contents Page

Welcome Message	3
Contents Page	4
Executive Committees	7
Technical Programme Committees	8
Keynote Speaker 1: Dr Liquun Chen	11
Keynote Speaker 2: Dr Aspen Olmsted	12
Keynote Speaker 3: Professor Charles Shoniregun	13
<b>Panel Discussion</b>	14
Organisers: Galina Akmayeva, George Ghinea	
<b>PhD / Doctorate Consortium</b>	15
Organiser: Professor Charles A. Shoniregun	
<b>Sessions</b>	16
<b>Session 1: Access Control and e-Society</b>	17
Exploring Mental Models Underlying PIN Management Strategies (Authors: Karen Renaud, Melanie Volkamer)	18
Ensemble Learning utilising Feature Pairings for Intrusion Detection (Authors: Michael Milliken, Yaxin Bi, Leo Galway, Glenn Hawe)	24
The SNAP Principle for Mitigating Privileged Account Breaches: How Secondary Non-Admin Privileged Accounts Can Reduce Breach Impact (Authors: Samuel Moses, Dale C. Rowe)	32
Reasoning on Personal Identifiers: A Guideline for Design and Maintenance (Authors: Rodrigo Borges Nogueira, Ricardo Staciarini Puttini)	39
<b>Session 2: Cloud Security and e-Society</b>	43
Analysing Threats in Cloud Storage (Authors: Fara Yahya, Robert J. Walters, Gary B. Wills)	44
eCurrency Threat Modeling and Hardening (Author: Aspen Olmsted)	49
Multiagent Trust Management of Web Services: The “Asynchronous Computing Environment Profile Unification Methodology” (ACEPUM) (Author: Khalil A. Abuosba)	55

<b>Session 3: Information Security</b>	60
An Ethnographic Study to Assess the Enactment of Information Security Culture in a Retail Store (Authors: Andrew Greig, Karen Renaud, Stephen Flowerday)	61
Provoking Security: Spoofing Attacks against Crypto-Biometric Systems (Authors: Christina-Angeliki Toli, Bart Preneel)	67
Deep Learning for Credit Card Data Analysis (Author: Ayahiko Niimi)	73
Attendance System Based on the Internet of Things for Supporting Blended Learning (Author: Sara Jeza Alotaibi)	78
<b>Session 4: Information Security and Biometrics</b>	84
A View on ISO/IEC 27001 Compliant identity Lifecycles for IT Service Providers (Authors: Sebastian Kurowski, Richard Litwing, Gero Lückemeyer)	85
Human-related IT Security: A Reliability Model for Network and Computer Maintenance (Author: Suleyman Kondakci)	91
Security Analysis of Revocable and Bipartite Biotokens (Author: Neyire Deniz Sarier)	97
<b>Session 5: Network Security</b>	104
AODV Route Maintenance using HoneyPots in MANETs (Authors: T. Divya Sai Keerthi, Pallapa Venkataram)	105
Taming the IPv6 Address Space with Hyhoneydv6 (Authors: Sven Schindler, Bettina Schnor, Thomas Scheffler)	113
A Cascaded Feature Selection Approach in Network Intrusion Detection (Authors: Yong Sun, Feng Liu)	119
Random Walk with Jumps: A New Query Search Method Based on Analysing Gnutella Protocol (Authors: Kholoud Althobaiti, Sara Jeza Alotaibi, HEND Alqahtani)	125
<b>Session 6: Digital Forensics and Cyber Security</b>	131
Forensic Investigation and Analysis on Digital Evidence Discovery through Physical Acquisition on Smartphone (Authors: Taniza Binti Tajuddin, Azizah Abd Manaf)	132
Founding a CyberSecurity Club in a Higher Education Environment: A Case Study (Authors: Matt Piazza, Aspen Olmsted)	139
Development of an Anti-Forensic Tool for Hiding Message in a Directory Index of NTFS (Author: Gyu-Sang Cho)	144
SQLi Penetration Testing of Financial Web Applications: Investigation of Bangladesh Region (Authors: Tanjila Farah, Delwar Alam, Md. Alamgir Kabir, Touhid Bhuiyan)	146

<b>Session 7: Network Security and e-Society</b>	152
Securing the Internet through the Detection of Anonymous Proxy Usage (Authors: Shane Miller, Kevin Curran, Tom Lunney)	153
Anomaly Detection Method using Network Pattern Analysis of Process (Authors: Minho Han, Ikkyun Kim)	159
Transmitted File Extraction and Reconstruction from Network Packets (Authors: Yangseo Choi, Joo-Young Lee, Sunoh Choi, Jong-Hyun Kim, Ikkyun Kim)	164
Runtime-Behavior Based Malware Classification Using Online Machine Learning (Authors: Abdurrahman Pektaş, Tankut Acarman, Yliès Falcone, Jean-Claude Fernandez)	166
