# Contents

|                                                                                                                           |    |
|---------------------------------------------------------------------------------------------------------------------------|----|
| Analysis of Corrugated Edge Variations on Balanced Antipodal Vivaldi Antennas                                             | 1  |
| <i>F. Oktafiani, Y. S. Amrullah, Y.P. Saputera, Y. Wahyu, Y.N.</i>                                                        |    |
| Receiver System Module for Low-Cost Outdoor Antenna Pattern Measurement                                                   | 6  |
| <i>Hana Arisesa, Daday Ruhiyat, Mashury Wahab</i>                                                                         |    |
| Design and Implementation of UWB Band Pass Filter using Modified Optimum Distributed Method for ESM System                | 10 |
| <i>Arie Setiawan, Ken Paramayudha, and Prasetyo Putranto</i>                                                              |    |
| Square Notch Ground Plane Binomial Chebyshev for Maximum Main Lobe Frequency 9.3 GHz Radar Application                    | 15 |
| <i>Y.P. Saputera, M. Wahab, F. Oktafiani, Y. Wahyu</i>                                                                    |    |
| Performance Enhancement of Microstrip Patch Antenna by Incorporating Exponential-Square Patch Model                       | 20 |
| <i>Y. S. Amrullah, A. A. Fathnan, F. Oktafiani, Y. Taryana, Y.</i>                                                        |    |
| Design of a Compact Antenna with Stub using Stepped Impedance Resonator                                                   | 24 |
| <i>R. A. Firdaus, Y. H. Pramono, E. Yahya, Endarko, W. H. Gunawan</i>                                                     |    |
| Design of Substrate Integrated Waveguide Based Power Divider for S-Band Applications                                      | 28 |
| <i>Adi Pandu Wirawan, Prasetyono Hari Mukti, Eko Setijadi</i>                                                             |    |
| Metamaterial Superstrate Effects to the Stacked Bandpass Filter Bowtie Antenna Performances                               | 32 |
| <i>A.Ramli, A.Ismail, A.R.H Hawari, M.A.Mahdi</i>                                                                         |    |
| High-Gain Antenna with Asymmetric Flares                                                                                  | 36 |
| <i>A.A. Lestari, S. Trihatmo, A.I. Wahdiyat, B. Harnawan, N. Sutarya, H. Serliningtyas, D. Yulian, O.D. Winarko</i>       |    |
| Comparison of Array Configuration for Antipodal Vivaldi Antenna                                                           | 40 |
| <i>Nancy Ardelina, Eko Setijadi, Prasetyono Hari Mukti, Baptiste Manhaval</i>                                             |    |
| Ferrite Phase of BaFe <sub>9</sub> (MnCo) <sub>1.5</sub> Ti <sub>1.5</sub> O <sub>19</sub> as Anti-Radar Coating Material | 46 |
| <i>Maulana Randa, Priyono</i>                                                                                             |    |

|                                                                                                                                            |     |
|--------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Doppler Profile Estimation of MST Radar Data Using Multi-parameter Cost Function                                                           | 50  |
| <i>Swati Sinha, Mary Lourde R, T.V. Chandrashekhara Sarma</i>                                                                              |     |
| Detecting Clones in Wireless Sensor Networks using Constrained Random Walk                                                                 | 55  |
| <i>Mohammad Y Aalsalem, Wazir Zada Khan, N M Saad</i>                                                                                      |     |
| A Compact X-Band Bandpass Filter Using Rectangular Split Ring Resonators for Radar Applications                                            | 60  |
| <i>A.A. Fathnan, Y.S. Amrullah, Y.N. Wijayanto, D. Mahmudin, and P. Daud</i>                                                               |     |
| Evaluation on Detection Range of ISRA S-Band Coastal Surveillance Radar                                                                    | 64  |
| <i>Mashury Wahab, Yaya Sulaeman, and Sulistyaningsih</i>                                                                                   |     |
| Ground Moving Target Detection Using LTE-Based Passive                                                                                     | 70  |
| <i>RSA Raja Abdullah, Asem A. Salah, A. Ismail, F. Hashim, N.H. Abdul Aziz, N. E. Abdul Rashid</i>                                         |     |
| Measurement, Processing and Modeling of A Tropical Foliage Clutter Using Forward Scatter Radar Micro-Sensor Network with VHF and UHF Bands | 76  |
| <i>N. N. Ismail, N. E. A. Rashid, Z. Ismail Khan, N. E. A. Rashid</i>                                                                      |     |
| Identification of UHF Gen 2 RFID Privacy and Security Issues                                                                               | 82  |
| <i>Deepika and Usha J</i>                                                                                                                  |     |
| Miniaturization of ESPAR Antenna using Folded Monopoles and Conical Central Element                                                        | 87  |
| <i>Shafaq Kausar, Hamood Ur Rahman, Tayyab Hassan, Ahmed Kausar</i>                                                                        |     |
| Robust Speaker Recognition for E-Commerce System                                                                                           | 92  |
| <i>Humaira Anwer, Shumaila Anjum, Nazar A. Saqib</i>                                                                                       |     |
| Tumor Size Classification of Breast Thermal Image Using Fuzzy C-Means                                                                      | 98  |
| <i>Octa Heriana, Indah Soesanti</i>                                                                                                        |     |
| Wideband Spectrum Sensing Using Welch Periodogram in Cognitive Radio                                                                       | 104 |
| <i>Chaeriah Bin Ali Wael, Nasrullah Armi, Ros Sariningrum</i>                                                                              |     |
| Summed Area Table for Optimizing of Processing Time on CA CFAR Algorithm                                                                   | 109 |
| <i>Tajul Miftahushudur, Dayat Kurniawan, Budiman Putra AR</i>                                                                              |     |
| Security Analysis of RGB Image Encryption Based on Modified Baker Map for Nanosatellite Application                                        | 114 |
| <i>Alfian Subiyakto, Nur Andini, Denny Darlis</i>                                                                                          |     |
| Design of Camera Array Interface Using FPGA for Nanosatellite Remote Sensing Payload                                                       | 119 |
| <i>Whildan Pakartipangi, Budi Syihabuddinm, Denny Darlis</i>                                                                               |     |
