TABLE OF CONTENTS

VOLUME 1

Platform for Advanced Control and Estimation (PACE): Shell's and Yokogawa's Next Generation Advanced Process Control Technology 1
R. Amrit, W. Canney, P. Carrette, R. Linn, A. Martinez, A. Singh, T. Skrovanek, J. Valiquette, J. Williamson, J. Zhou, B. J. Cott

Providing Ancillary Service with Commercial Buildings: the Swiss Perspective 6
Ioannis Lymperopoulos, Faran A. Qureshi, Truong Nghiem, Ali Ahmadi Khatir, Colin N. Jones

On-line Maximization of Biogas Production in an Anaerobic Reactor Using a Pseudo-Super-Twisting Controller 14
Alejandro Vargas, Jaime A. Moreno

Economic MPC with Terminal Cost and Application to Oilsand Separation 20
Su Liu, Jing Zhang, Jinfeng Liu

Distributed Economic Model Predictive Control of a Catalytic Reactor: Evaluation of Sequential and Iterative Architectures 26
Timothy L. Anderson, Matthew Ellis, Panagiotis D. Christofides

Economics-Oriented NMPC of Two-Stage-Riser Catalytic Pyrolysis Processes for Maximizing Propylene Yield 32
Ping Wang, Xuemin Tian, Chaohe Yang, Zhihong Yuan

Economic Multi-stage Output Feedback NMPC using the Unscented Kalman Filter 38
Sankaranarayanan Subramanian, Sergio Lucia, Sebastian Engell

Average Constraints in Robust Economic Model Predictive Control 44
Florian A. Bayer, Matthias A. Muller, Frank Allgower

Scenario-based Model Predictive Control: Recursive Feasibility and Stability 50
Michael Maiworm, Tobias Bäthge, Rolf Findeisen

Well Placement Optimization with Geological Uncertainty Reduction 57
Shahed Rahim, Zukui Li

Froth Pipeline Water Content Estimation and Control 63
Yu Miao, Fangwei Xu, Yi Zheng, Biao Huang, John Macgowan, Aris Espejo

Evaluation of Lyapunov-based Adaptive Observer using Low-Order Lumped Model for Estimation of Production Index in Under-balanced Drilling 69
Amirhossein Nikoofard, Tor Arne Johansen, Glenn-Ole Kaasa

Pipeline Leak Detection Using Particle Filters 76
B. M. S. Arifin, Zukui Li, Sirish L. Shah

Infinite-Dimensional Observer for Process Monitoring in Managed Pressure Drilling 82
Agus Hasan

Stochastic Proxy Modelling for Coalbed Methane Production Using Orthogonal Polynomials 88
Gouthami Senthamaraikkannan, Vinay Prasad, Ian Gates

Continuous-Time Enclosures for Uncertain Implicit Differential Equations 94
Jai Rayjaguru, Mario E. Villanueva, Boris Houska, Benoit Chachuat

A Probabilistic Approach to Robust Optimal Experiment Design with Chance Constraints 100
Ali Mesbah, Stefan Streif

Robust Design of Experiments Using Constrained Stochastic Optimization 106
Khushaal Popli, Vinay Prasad

Model Migration through Bayesian Adjustments 112
Linkai Luo, Furong Gao

Dynamic-Inner Partial Least Squares for Dynamic Data Modeling 117
Yining Dong, S. Joe Qin

Nearest Correlation Louvain Method for Fast and Good Selection of Input Variables of Statistical Model 123
Taku Uchimaru, Koji Hazama, Koichi Fujiwara, Manabu Kano

State and Input Estimation of an Anaerobic Digestion Reactor using a Continuous-discrete Unknown Input Observer 129
E. Rocha-Cozatl, M. Sbarciog, L. Dewasme, J. A. Moreno, A. Vande Wouwer

Moving-Horizon Predictive Input Design for Closed-Loop Identification 135
M. Yousefi, L. D. Rippon, M. G. Forbes, R. B. Gopaluni, P. D. Loewen, G. A. Dumont, J. Backstrom

Observer Design Using Potential Based Realizations 141
Martin Guay, Ryan Bennett, Nicolas Hudon

A Bayesian Method for Estimating Parameters in Stochastic Differential 147
Equations Hadiseh Karimi, Kimberley B. McAuley

Optimal State Estimation for Linear Systems with State Constraints 153
Xiaodong Xu, Biao Huang, Stevan Dubljevic

Distributed Adaptive High-Gain Extended Kalman Filtering for Nonlinear Systems 158
Mohammad Rashedi, Jinfeng Liu, Biao Huang

Model-based On-Line Optimization Framework for Semi-batch Polymerization Reactors 164
Tae Y. Jung, Yisu Nie, J. H. Lee, L. T. Biegler

On Bifurcations of the Zero Dynamics - Connecting Steady-State Optimality to Process Dynamics 170
Olle Trollberg, Elling W. Jacobsen

On Handling Cost Gradient Uncertainty in Real-Time Optimization 176
Martand Singhal, Timm Faulwasser, Dominique Bonvin

Comparison of Modifier Adaptation Schemes in Real-Time Optimization 182
Weihua Gao, Simon Wenzel, Sebastian Engell
Preparation of Papers for IFAC Conferences & Symposia: Integration of Process Design and Control Using Hierarchical Control Structure 188
Mengfei Zhou, Long Li, Lei Xie, Yijun Cai, Haitian Pan
Anti-Fouling Control of Plug-Flow Crystallization via Heating and Cooling Cycle 193
Andy Koswara, Zoltan K. Nagy
Spectroscopic Measurements in Oil Sands Industry-From Laboratories to Real-time Applications 199
Enbo Feng, Elom Domlan, Ramesh Kadali
Refinery Optimization Integrated with a Nonlinear Crude Distillation Unit Model 205
Yu Yang, Paul I. Barton
Adaptive Soft Sensing and On-line Estimation of the Critical Minimum Velocity with Application to an Oil Sand Primary Separation Vessel 211
Nima Sammaknejad, Biao Huang, R. Sean Sanders, Yu Miao, Fangwei Xu, Aris Espejo
Production Optimization under Uncertainty - Applied to Petroleum Production 217
Kristian G. Hanssen, Bjarne Foss
Modifier-Adaptation Methodology for RTO Applied to Distillation Columns 223
T. Rodriguez-Blanco, D. Sarabia, D. Navia, C. De Prada
Inclusion of Long-term Production Planning/Scheduling into Real-time Optimization 229
Divya Kumar, Ye Chen, Ali Esmaili
A Comparative Study on Improved DPLS Soft Sensor Models Applied to a Crude Distillation Unit 234
Chao Shang, Xinqing Gao, Fan Yang, Wenxiang Lyu, Dexian Huang
Generalizing ODE Modeling Structure for Multivariate Systems with Distributed Parameters 240
Naim Bajcinca, Steffen Hofmann, Holger Eisenschmidt, Kai Sundmacher
Time-series Prediction Modelling Based on an Efficient Self-organization Learning Neural Network 248
Gang Yang, Hui Yang, Lizhen Dai
Identification of Time-Delay Systems: a State-Space Realization Approach 254
Rafael B. C. Lima, Pericles R. Barros
A Calibration Model Maintenance Roadmap 260
Barry M. Wise, Robert T. Roginski
Incremental Model Identification of Distributed Two-phase Reaction Systems 266
Diogo Rodrigues, Julien Billeter, Dominique Bonvin
Integrated Optimization Based on Transition Tracking Analysis for Batch Processes 272
Yan Qin, Chunhui Zhao, Furong Gao
On Operation of PECVD of Thin Film Solar Cells 278
Marquis Crose, Joseph Sangil Kwon, Michael Nayhouse, Dong Ni, Panagiotis D. Christofides
Experimental Validation of Robust Process Design and Control Based on Gaussian Mixture Densities 284
N. Rossner, R. King
Data-Driven Two-Dimensional LQG Benchmark Based Performance Assessment for Batch Processes under ILC 291
Shaolong Wei, Jinxu Cheng, Youqing Wang
Optimization of Two-stage Cooling Profile in Unseeded Batch Crystallization 297
Jared C. King, Huayu Li, Martha A. Grover, Yoshiaki Kawajiri, Ronald W. Rousseau
Process Parameter Optimization based on LW-PLS in Pharmaceutical Granulation Process 303
Ryosuke Yoshizaki, Manabu Kano, Shuichi Tanabe, Takuya Miyano
Revision of the Tennessee Eastman Process Model 309
Andreas Bathelt, N. Lawrence Ricker, Mohieddine Jelali
Simulation and Control of Monomer Conversion in a Continuous Emulsion Polymerization Reactor 315
M. Barazandegan, M. Shahrokhi, H. Abedini, E. Vafa
Modeling and Simulation for Feasibility Study of Taylor-Couette Crystallizer as Crystal Seed Manufacturing System 321
Kiho Park, Dae Ryook Yang
Distributed MPC for Upstream Oil & Gas Fields - A Practical View 325
Y. H. Al-Naumani, J. A. Rossiter
Box-Complex Assisted Genetic Algorithm for Optimal Control of Batch Reactor 331
Narendra Patel, Nitin Padhiyar
Global Optimization of an Industrial Natural Gas Production Network 337
Dan Li, Xiang Li
Predicting Electricity Pool Prices Using Hidden Markov Models 343
Ouyang Wu, Tianbo Liu, Biao Huang, Fraser Forbes
Optimal and Coordinated Functioning of Oil and Gas Wells 349
Apeksha Bandi, Vishwa Mukhtyar, Ravindra D. Gudi
Real Time Optimisation of Industrial Gas Supply Networks 355
Richard Adamson, Martin Hobbs, Andy Silcock, Gary Montague
Identification and Control of Chemical Processes Using the Anisochronic Modeling Paradigm 361
M. Espinoza, J. D. Rojas, R. Vilanova, O. Arrieta
Urea-SCR Process Control for Diesel Engine Using Feedforward-Feedback Nonlinear Method 367
Jinghua Zhao, Zhigang Chen, Yunfeng Hu, Hong Chen
Optimization of Catalytic Naphtha Reforming Process Based on Modified Differential Evolution Algorithm 373
Min Wei, Minglei Yang, Feng Qian, Wenli Du

Optimal Scheduling of the Maintenance and Improvement for Water Main System Using Markov Decision Process 379
Jong Woo Kim, Gobong Choi, Jung Chul Suh, Jong Min Lee

Energy Demand Response of Process Systems through Production Scheduling and Control 385
Chudong Tong, Nael H. El-Farra, Ahmet Palazoglu

Time and Frequency Performance Assessment of IMC PI Control Loops 391
Henrique C. Barroso, George Acioli Junior, Pericles R. Barros

A Novel and Efficient Hybrid Optimization Approach for Wind Farm Micro-siting 397
Prateek Mittal, Kedar Kulkarni, Kishalay Mitra

Inferential Active Disturbance Rejection Control of a Distillation Column 403
Fahad Al Kalbani, Jie Zhang

Decentralized SISO Active Disturbance Rejection Control of the Newell-Lee Forced Circulation Evaporator 409
Rainer Dittmar

Sulfur Determination in Diesel using 2D Fluorescence Spectroscopy and Linear Models 415
Cassiano Ranzan, Lucas Ranzan, Luciane F. Trierweiler, Jorge O. Trierweiler

Detection of Stiction in Level Control Loops 421
Ana S. R. Brásio, Andrey Romanenko, Natércia C. P. Fernandes

Soft Sensor Model Maintenance: A Case Study in Industrial Processes 427
Kuilin Chen, Ivan Castillo, Leo H. Chiang, Jie Yu

A New Implementation of Open-loop Two-move Compensation Method for Oscillations Caused by Control Valve Stiction 433
Tingren Wang, Lei Xie, Feiqi Tan, Hongye Su

Dumpling Cooking - Modeling and Simulation 439
Qiang Zhu, Yuan Liang, Zhijiang Shao

Reducing Fuel Cell Degradation in Micro Combined Heat and Power Systems 445
Federico Zenith

Monitoring Safety of Process Operations Using Industrial Workflows 451
Sridhar Dasani, Sirish L. Shah, Tongwen Chen, Jay Funnell, Robert W. Pollard

Multi-Innovation Parameter Estimation for Hammerstein MIMO Output-Error Systems Based on the Key-Term Separation 457
Qianyan Shen, Feng Ding

Multivariate Data Analysis of Gas-Metal Arc Welding Process 463
Rajesh Ranjan, Anurag Talati, Megan Ho, Hussain Bharmal, Vinay A. Bavdekar, Vinay Prasad, Patricio Mendez

Industrial Test Setup for Autotuning of PID Controllers in Large-scale Processes: Applied to Tennessee Eastman Process 469
Esmaeil Jahanshahi, Selvanathan Sivalingam, John B. Schofield

Control-relevant Multiple Linear Modeling of Simulated Moving Bed Chromatography 477
Girish Sharma, S. V. Vignesh, K. Hariprasad, Sharad Bhartiya

Pseudo-LIDAR Data Analysis and Feed-forward Wind Turbine Control Design 483
Jie Bao, Mengling Wang, Hong Yue, William Leithead

Adaptive Optimizing Control of an Ideal Reactive Distillation Column 489
Jayaram Valluru, Jalesh L. Purohit, Sachin C. Patwardhan, Sanjay M. Mahajani

Design and Implementation of a Multiple-Model based Control scheme for Boiler-Turbine Unit 495
S. Kapil Arasu, J. Prakash

Analytical Scheme of Centralized PI Controller for Non-square Processes with Time-delays 501
Z. Q. Wang, X. L. Luan, F. Liu

Economic Optimization of Spray Dryer Operation using Nonlinear Model Predictive Control with State Estimation 507
Lars Norbert Petersen, John Bagterp Jorgensen, James B. Rawlings

A Stable Two-time Dimensional (2D) Model Predictive Control with Zero Terminal State Constraints for Constrained Batch Processes 514
Jingyi Lu, Zhixing Cao, Furong Gao

Latent Variable Models and Big Data in the Process Industries 520
J. F. Macgregor, M. J. Bruwer, I. Miletic, M. Cardin, Z. Liu

On the Design of Economic NMPC Based on an Exact Turnpike Property 525
Timm Faulwasser, Dominique Bonvin

Model Predictive Control in Industry: Challenges and Opportunities 531
Michael G. Forbes, Rohit S. Patwardhan, Hamza Hamadah, R. Bhushan Gopaluni

Model-Predictive-Control (MPC) of Steam Trap Subcool in Steam-Assisted Gravity Drainage (SAGD) 539
Sagar N. Purkayastha, Ian D. Gates, Milana Trifkovic

Experimental Evaluation of a MIMO Adaptive Dual MPC 545
Kunal Kumar, Tor Aksel N. Heirung, Sachin C. Patwardhan, Bjarne Foss

Distributed Model Predictive Control Based on Nash Optimality for Large Scale Irrigation Systems 551
Rongchao Zhang, Andong Liu, Li Yu, Wenan Zhang

Optimizing Control of a Tubular Polymerization Reactor: Comparison of Single Shooting and Full Discretization 556
R Hashemi, R. Schilling, S. Engell

A Model Predictive Controller for Inverse Response Control Systems 562
Ky M. Vu

Modeling and Control of Rankine Based Waste Heat Recovery Systems for Heavy Duty Trucks 568
V. Grelet, P. Dufour, M. Nadri, T. Reiche, V. Lemort

Wiener Model and Extremum Seeking Control for a CO Preferential Oxidation Reactor with the CuO-CeO_2 Catalyst 574
Hyun Chan Lee, Sin Kim, Jae Pil Heo, Dong Hyun Kim, Jietae Lee
Control of a Post-combustion CO_2 Capture Plant During Process Start-up and Load Variations 580
Jozsef Gaspar, John Bagterp Jorgensen, Philip Loldrup Fosbol
Graph Reduction for Material Integrated Process Networks with Flow Segregation 586
Seongmin Heo, Prodromos Daoutidis
Proactive Optimization and Control of Heat-Exchanger Super Networks 592
Xiaonan Wang, Ahmet Palazoglu, Nael H. El-Farra
Operational Optimization of SWRO Process with the Consideration of Load Fluctuation and Electricity Price 598
Aipeng Jiang, Shu Jiangzhou, Wen Cheng, Jian Wang, Qiang Ding, Changxin Xing
Kernel Canonical Variate Analysis for Nonlinear Dynamic Process Monitoring 605
Raphael T. Samuel, Yi Cao
A Nonlinear Quality-relevant Process Monitoring Method with Kernel Input-output Canonical Variate Analysis 611
Huang Linzhe, Cao Yuping, Tian Xuemin, Deng Xiaogang
Robust Process Monitoring via Stable Principal Component Pursuit 617
Chun-Yu Chen, Yuan Yao
Gross Error Management in Data Reconciliation 623
M. J. Fuente, G. Gutierrez, E. Gomez, D. Sarabia, C. De Prada
Identification Techniques for Stiction Quantification in the Presence of Nonstationary Disturbances 629
Riccardo Baccidi Capaci, Claudio Scali, Gabriele Pannocchia
Stiction Quantification based on Time and Frequency Domain Criterions 635
Chen Li, Feng Qian, M. A. A. Shoukat Choudhury, Wenli Du
An Application of Advanced Alarm Management Tools to an Oil Sand Extraction Plant 641
Wenkai Hu, Muhammad Shahzad Afzal, Gustavo Brandt, Eric Lau, Tongwen Chen, Sirish L. Shah
Fast Sequence Alignment for Comparing Industrial Alarm Floods 647
Wenkai Hu, Jiandong Wang, Tongwen Chen

VOLUME 2

Mode Based Alarm Solutions at Syncrude Canada 653
Suvomoy Bhaumik, John Macgowan, Vimal Doraj
Methodology and Application of Pattern Mining in Multiple Alarm Flood Sequences 657
Shiqi Lai, Tongwen Chen
Risk-based Warning System Design Methodology for Multimode Processes 663
Hangzhou Wang, Faisal Khan, Salim Ahmed, Syed Imtiaz
Design and Analysis of Improved Alarm Delay-Timers 669
Hao Zang, Fan Yang, Dexian Huang
Proportional-integral Extremum-seeking Control 675
M. Guay
Adaptive Control of Chemical Distributed Parameter Systems 681
Davood Babaei Pourkargar, Antonios Armaou
High-order Differential Dissipativity Analysis of Nonlinear Processes 687
Ruigang Wang, Michael James Tippett, Jie Bao
Distributed Extremum-seeking Control Over Networks of Unstable Dynamic Agents 693
M. Guay, I. Vandermeulen, S. Dougherty, P. J. McLellan
Neighbouring-Extremal Control for Steady-State Optimization Using Noisy Measurements 698
Vinicius De Oliveira, Johannes Jaschke, Sigurd Skogestad
Dissipativity-based Analysis of Controller Networks with Reduced Rate Communication 704
Michael James Tippett, Chaoxu Zheng, Jie Bao, Jinfeng Liu
Model Predictive Control of the Steam Cycle in a Solar Power Plant 710
Dominik Mier, Florian Môllenbruck, Michael Jost, Wolfgang Grote, Martin Mônnigmann
Model Predictive Control of Once Through Steam Generator Steam Quality 716
Fei Qi, Eliyya Shukeir, Ramesh Kadali
Optimal Concentration Control for Direct Methanol Fuel Cells 722
Federico Zenith, Youngseung Na, Ulrike Krewer
Nonlinear Operability of a Membrane Reactor for Direct Methane Aromatization 728
Juan C. Carrasco, Fernando V. Lima
A Distributed Parameter Model for a Solid Oxide Fuel Cell: Simulating Realistic Operating Conditions 734
Dayadeep S. Monder, V. Goutham Polisetty, Phanindra V. Jampana, Vinod M. Janardhanan
Dynamic Operational Optimization of Air Source Heat Pump Heating System with the Consideration of Energy Saving 740
Changxin Xing, Qiang Ding, Aipeng Jiang, Wen Cheng, Dahan Zhou
A Novel Algorithm for Model-Plant Mismatch Detection for Model Predictive Controllers 746
Y. Tsai, R. B. Gopaluni, D. Marshman, T. Chmelyk
Assessment of Model-Plant Mismatch by the Nominal Sensitivity Function for Unconstrained MPC 753
Viviane Rodrigues Botelho, Jorge Otávio Trierweiler, Marcelo Farenzena, Ricardo Duraiski
Drill-down Diagnosis of Deficient Models in MPC 759
Lijuan Li, S. Joe Qin

A Method for Automatic Detection of Controller Tuning Issues 765
Kaushik Ghosh, Ulaganathan Nallasivam, Nandkishor Kubal
Multirate Partial Least Squares for Process Monitoring 771
Ya Cong, Zhiqiang Ge, Zhihuan Song
PLS-based Similarity Analysis for Mode Identification in Multimode Manufacturing Processes 777
Ying Zheng, S. Joe Qin, Fu-Li Wang
Parametric Identifier of Metabolic Networks Based on Robust Differentiation 783
A. M. Gálvez, J. A. Badillo-Corona, I. Chairez
Parameter Estimation for Non-uniformly Sampled Wiener Systems with Dead-zone Nonlinearities 789
Ranran Liu, Haoran Li, Tianhong Pan, Zhengming Li
Identification of Equation Error Models from Small Samples using Compressed Sensing Techniques 795
Satheesh K. Perepu, Arun K. Tangirala
Soft-sensing in Complex Chemical Process Based on a Sample Clustering Extreme Learning Machine Model 801
Di Peng, Yuan Xu, Yanqing Wang, Zhiqiang Geng, Qunxiong Zhu
A MPC Operation Method for A Photovoltaic System with Batteries 807
Bing Liu, Zhou Lu, Ke Yao, Furong Gao
A Survey of Guaranteeing Feasibility and Stability in MPC During Target Changes 813
S. S. Dughman, J. A. Rossiter
Cascade Nonlinear Control for a Class of Cascade Systems 819
J. P. García-Sandoval, D. Dochain, V. González-álvarez
Modeling of Bisphenol A Condensation Reaction based on UKF Algorithm 827
Wentao Cang, Li Xie, Huizhong Yang
N-Step Impacted-Region Optimization based Distributed Model Predictive Control 831
Y. Zheng, S. Y. Li
A Multi-Model Identification Method for the Fiber Stretching Process Based on the EM Algorithm 837
Fan Guo, Yongsheng Ding, Lei Chen, Lihong Ren, Kuangrong Hao
Integrating Iterative Learning Estimation with Optimal Control for Batch Productivity Enhancement 843
Anish Gupta, Ravindra D. Gudi
Data Filtering Based Parameter Estimation Algorithms for Multivariable Box-Jenkins-Like Systems 849
Yanjiao Wang, Ling Xu, Feng Ding
Multi-Innovation Gradient Identification for Input Nonlinear State Space Systems 853
Xuehai Wang, Yanjun Liu, Feng Ding
Simultaneous Control Loop Performance Assessment and Process Identification Based on Fractional Models 859
Radek Skarda, Martin Cech, Milos Schlegel
Fractional-order Process Simulator Based on Exact Step Response Discretization 865
Martin Cech, Milos Schlegel, Jan Reitinger
Model-based Fault-Tolerant Control of Uncertain Particulate Processes: Integrating Fault Detection, Estimation and Accommodation 871
Trina Napasindayao, Nael H. El-Farra
Reliable H∞ Control of Switched Linear Systems 877
Jun Fu, Tianyou Chai, Ying Jin, Ruicheng Ma
An Observer-based Model Predictive Control Strategy for Distributed Parameter System 883
Meng Ling Wang, Hongbo Shi, Wen Yang
Iterative Identification of Output Error Model with Time Delay 888
Shijian Dong, Tao Liu, Fengwei Chen
Integration of Design and Control Using Efficient PSE Approximations 894
Sami S. Bahakim, Siddharth Mehta, Hassan Ahmed, Erik Gaspar, Luis Ricardez-Sandoval
Development of Ant Colony Optimization (ACO) Algorithms Based on Statistical Analysis and Hypothesis Testing for Variable Selection 900
C. M. Pessoa, C. Ranzan, L. F. Trierweiler, J. O. Trierweiler
A Bilevel Programming Formulation for Dynamic Real-time Optimization 906
Mohammad Zamry Jamaludin, Christopher L. E. Swartz
Handling Parametric Drift in Batch Crystallization Using Predictive Control with R2R Model Parameter Estimation 912
Joseph Sangil Kwon, Michael Nayhouse, Dong Ni, Panagiotis D. Christofides
Algorithm for Image-based Biomarker Detection for Differential Diagnosis of Parkinson's Disease 918
Gurpreet Singh, Lakshminarayanan Samavedham
Double-Objective Optimal Control for Non-Gaussian Systems: An Example Study on Analytical vs Numerical Solutions 924
Mifeng Ren, Jianhua Zhang, Hong Wang, Min Huang
Robust Nonlinear Predictive Control for a Bioreactor Based on a Dynamic Metabolic Flux Balance Model 930
Divya Kumar, Hector Budman
Fast Mesh-Sorting in Multi-objective Optimization 936
Narendra Patel, Nitin Padhiyar
Parameter and Delay Estimation of Fractional Order Models from Step Response 942
Salim Ahmed
Asynchronous Separable Self-triggered Model Predictive Control based on Relaxed Dynamic Programming 948
Liang Lu

Unraveling Apoptosis Signalling using Linear Control Methods: Linking the Loop Gain to Reverting the Decision to Undergo Apoptosis 954
Monica Schliemann-Bullinger, Mark C. Readman, Dimitrios Kalamatianos, Rolf Findeisen, Eric Bullinger

Overload Detection in Semi-Autogenous Grinding: A Nonlinear Process Monitoring Approach 960
K. S. McClure, R. B. Gopaluni

Analysis of Problems Induced by Imprecise Dating of Measurements in Oil and Gas Production 966
Nicolas Petit

A Multiobjective Optimization Perspective on the Stability of Economic MPC 974
Victor M. Zavala

Set-Theoretic Approaches in Analysis, Estimation and Control of Nonlinear Systems 981
Benoit Chachuat, Boris Houska, Radoslav Paulen, Nikola Peri'C, Jai Rajyaguru, Mario E. Villanueva

Control Challenges in Synthetic Biology 996
Christopher V. Rao

Zone Model Predictive Control and Moving Horizon Estimation for the Regulation of Blood Glucose in Critical Care Patients 1002
Timothy D. Knab, Gilles Clermont, Robert S. Parker

Robust Output Feedback Model Predictive Control Using Reduced Order Models 1008
Markus Kögel, Rolf Findeisen

Potential and Limitations of Multi-stage Nonlinear Model Predictive Control 1015
Sergio Lucia, Sebastian Engell

User Friendly Robust MPC Tuning of Uncertain Paper-Making Processes 1021
Ning He, Dawei Shi, Jiadong Wang, Michael Forbes, Johan Backstrom, Tongwen Chen

Trajectory Bounds of Input-to-State Stability for Nonlinear Model Predictive Control 1027
Devin W. Griffith, Lorenz T. Biegler

Dual MPC for FIR Systems: Information Anticipation 1033
Tor Aksel N. Heirung, B. Erik Ydstie, Bjarne Foss

Stable Adaptive Predictive Control System Design via Adaptive Output Predictor for Multi-rate Sampled Systems 1039
Ikuro Mizumoto, Masataka Ikejiri, Taro Takagi

Lyapunov Based Nonlinear Control of Tubular Chemical Reactors 1045
W. Zhou, B. Hamroun, Y. Le Gorrec, F. Couenne

On the Relaxing Dissipation of Dissipative Pseudo Hamiltonian Models 1051
N. Ha Hoang, T. Phong Mai, Denis Dochain

Dissipative and Conservative Structures for Thermo-mechanical Systems 1057
J. P. García-Sandoval, D. Dochain, N. Hudon

Potential-based Analysis of Closed Reacting Systems 1065
Nicolas Hudon, Denis Dochain, N. Ha Hoang, Juan Paulo Garcia-Sandoval

Representation of Irreversible Systems in a Metric Thermodynamic Phase Space 1070
Nicolas Hudon, Denis Dochain, Martin Guay

Feedforward Ouput-feedback Control for a Class of Exothermic Tubular Reactors 1075
Isrrael Najera, Jesus Alvarez, Roberto Baratti

An Observer-based Robust Control Strategy for Overflow Metabolism Cultures in Fed-Batch Bioreactors 1081
G. Araujo Pimentel, M. Benavides, L. Dewasme, D. Coutinho, A. Vande Wouwer

Adaptive Control of Lactic Acid Production Process from Wheat Flour 1087
Karen Vanessa Gonzalez, Sihem Tebbani, Didier Dumur, Filipa Lopes, Dominique Pareau, Aurore Thorigné, Sébastien Givry

Dynamic Optimization of Biomass Productivity in Continuous Cultures of Microalgae Isochrysis Galbana through Modulation of the Light Intensity 1093
Jean-Sébastien Deschênes, Alain Vande Wouwer

Model-based Control to Maximise Biomass and PHB in the Autotrophic Cultivation of Ralstonia Eutropha 1100
Flavia Neddermeyer, Niko Rossner, Rudibert King

Extended and Unscented Kalman Filter Design for Hybridoma Cell Fed-Batch and Continuous Cultures. 1108
Sofia Fernandes, Anne Richelle, Zakaria Amribt, Laurent Dewasme, Philippe Bogaerts, Alain Vande Wouwer

Oscillatory Behavior Control in Continuous Fermentation Processes 1114
Piotr Skupin, Mieczyslaw Metzger

Integrated Process Design and Control of Reactive Distillation Processes 1120
Seyed Soheil Mansouri, Mauricio Sales-Cruz, Jakob Kjobsted Huusom, John M. Woodley, Rafiqul Gani

Worst-case and Distributional Robustness Analysis of a Thin Film Deposition Process 1126
Shabnam Rasoulian, Luis A. Ricardez-Sandoval

Establishing Multivariate Specification Regions for Raw Materials using SMB-PLS 1132
Kamran Azari, Julien Lauzon-Gauthier, Jayson Tessier, Carl Duchesne

Energy Saving through Control in an Industrial Multicomponent Distillation Column 1138
Marcella Porru, Roberto Baratti, Jesus Alvarez

An Intelligent Control Strategy for the Intervals of Temperature in a Plate Heat Exchanger 1144
Yao Jia, Tian-You Chai, Hong Wang

Optimal Energy Management of a Building Cooling System with Thermal Storage: A Convex Formulation 1150
Daniele Ioli, Alessandro Falsone, Maria Prandini

Chance Constrained Planning and Scheduling under Uncertainty using Robust Optimization Approximation 1156
Zhuangzhi Li, Zukui Li

Multi-product Multi-stage Production Planning with Lead Time on a Rolling 1162
Horizon Basis, Shan Lu, Hongye Su, Yue Wang, Lei Xie, Quanling Zhang

Optimization using ANN Surrogates with Optimal Topology and Sample Size 1168
M Srinivas Soumitri, Saptarshi Majumdar, Kishalay Mitra
Controller Verification and Parametrization Subject to Quantitative and Qualitative Requirements 1174
Petar Andonov, Anton Savchenko, Philipp Rumschinski, Stefan Streif, Rolf Findeisen
Iterative Procedure for Tuning Decentralized PID Controllers 1180
Thiago A. M. Euzebio, Pericles R. Barros
Stability Margin Interpretation of the SIMC Tuning Rule for PI Controllers and its Applications 1186
Jietae Lee, Su Whan Sung, Thomas F. Edgar
Optimal Operation of an Energy Integrated Batch Reactor - Feed Effluent Heat Exchanger System 1192
Sujit S. Jogwar, Pródromos Daoutidis
Radio Frequency Heating for Oil Recovery and Soil Remediation 1198
Matteo Bientinesi, Claudio Scali, Luigi Petarca
Optimization of the Cyclic Operation of a Continuous Biobutanol Fermentation Process Integrated with Ex-Situ Adsorption Recovery 1204
Boeun Kim, Moon-Ho Eom, Hong Jang, Jay H. Lee
Plant-wide Hierarchical Optimal Control of a Crystallization Process 1210
Rogelio Mazaeda, Smaranda P. Cristea, Cesar De Prada
Optimal Low Temperature Charging of Lithium-ion Batteries 1216
Bharatkumar Suthar, Dayaram Sonawane, Richard D. Braatz, Venkat R. Subramanian
Robust Optimization of Competing Biomass Supply Chains Under Feedstock Uncertainty 1222
David S. Zamar, Bhushan Gopaluni, Shahab Sokhansanj, Nathaniel K. Newlands
A Two-level Approach for Fusing Early Signaling Events and Long Term Cellular Responses 1228
Nadine Rudolph, Tina Meyer, Kristina Franzen, Christoph Garbers, Fred Schaper, Stefan Streif, Anna Dittrich, Rolf Findeisen
Plant-wide Optimization of a Full-Scale Activated Sludge Plant with Anaerobic Sludge Treatment 1234
C. Puchongkawarin, S. Fitzgerald, B. Chachuat
Agent-Based Modeling of Vascularization in Gradient Tissue Engineering Constructs 1240
Elif Seyma Bayrak, Banu Akar, Nan Xiao, Hamidreza Mehdizadeh, Sami I. Somo, Eric M. Brey, Ali Cinar
Nonlinear Model Predictive Control of a Wastewater Treatment Process Fitted with a Submerged Membrane Bioreactor 1246
G. Araujo Pimentel, A. Rapaport, A. Vande Wouwer
Computational Modeling of Fed-Batch Cell Culture Bioreactor: Hybrid Agent-Based Approach 1252
Elif Seyma Bayrak, Tony Wang, Ali Cinar, Cenk Undey
Optimal Experimental Design for an Enzymatic Biodiesel Production System 1258
Hui Yu, Hong Yue, Peter Halling
Robust Leakage Detection and Interval Estimation of Location in Water Distribution Network 1264
Yeonsoo Kim, Shin Je Lee, Taekyoon Park, Gibaek Lee, Jung Chul Suh, Jong Min Lee
Stochastic Fault Diagnosis using a Generalized Polynomial Chaos Model and Maximum Likelihood 1270
Yuncheng Du, Thomas A. Duever, Hector Budman
Fault Diagnosis Using Concurrent Projection to Latent Structures 1276
Yu C. Pan, Yining Dong, S. Joe Qin
Fault Identification in Batch Processes Using Process Data or Contribution Plots: A Comparative Study 1282
Sam Wuyts, Geert Gins, Pieter Van Den Kerkhof, Jan Van Impe
Dynamic Time Warping Based Causality Analysis for Root-cause Diagnosis of Nonstationary Fault Processes 1288
Gang Li, Tao Yuan, S. Joe Qin, Tianyou Chai
Process Monitoring Based on Recursive Probabilistic PCA for Multi-Mode Process 1294
Zhengdao Zhang, Bican Peng, Linbo Xie, Li Peng
Artificial Pancreas: From In-Silico to In-Vivo 1300
M. Messori, C. Cobelli, L. Magni
Design of a Smart Adaptive Control System 1309
