

Integrated Continuous Biomanufacturing II

AN ECI Conference Series Volume 15AD

Berkeley, California, USA
1-5 November 2015

Editors:

**Chetan Goudar
Suzanne Farid
Christopher Hwang
Karol Lacki**

ISBN: 978-1-5108-1944-3

Printed from e-media with permission by:

Integrated Continuous Biomanufacturing II

November 1-5, 2015 - Claremont Hotel Club & Spa, Berkeley, California, USA

Editors: Chetan Goudar, Amgen Inc.
Suzanne Farid, University College London
Christopher Hwang, Genzyme-Sanofi
Karol Lacki, Novo Nordisk

The articles for these proceedings are not peer-reviewed.

Continuous Countercurrent Tangential Chromatography For Purification of High Value Therapeutic Proteins, Andrew Zydney, Oleg Shinkash, Boris Napadensky, and Ami Dutta

1

Scale Up And Implementation Of A High Density Long-Term Perfusion Suspension Cell Culture In a 250L Single Use Bioreactor, Weichang Zhou and Hang Zhou

3

Delivering Steady-State Product Quality with An Intensified And Integrated Perfusion Cell Culture Process, Jason Walther, Neha Shah, Myles Hollenbach, Jonathan Wang, Marcela Yu, Jiuyi Lu, Yang Yang, Agata Villiger, Konstantin Konstantinov, and Chris Hwang

5

Continuous Production of Proteins: Integration of Polishing Using MCSGP, Fabian Steinebach, Daniel Karst, and Massimo Morbidelli

8

Design Criteria and Requirements For Development of Perfusion Media, Jochen Sieck

10

What are the facility design requirements to fit biologics pipeline demands?, Thomas Sauer

12

Tools For Process Intensification Upstream and Continuous Processing Downstream, James Rusche

14

Case study: Optimisation of a Stabilised Large Scale ATF Perfusion Process, Jarno Robin

16

Spectral Deconvolution of Chromatograms Without Offline Analytics, Matthias Rudt, Nina Brestrich, and Jurgen HUBbuch

18

mAb Product Consistency Achieved in Long Duration Microfiltration-Based CHO Perfusion Process, Douglas Rank, Christopher Martin, and Michael Phillips

20

Continuous Downstream Process Or Connected Batch Process: Which One Makes Most Sense For Biogen?, John Pieracci, Sanchayita Ghose, and Venkatesh Natarajan

22

Impact Of Closed And Continuous Processing On Biopharmaceutical Facility Layouts, Marc Pelletier

24

Development Of Functionally Closed Downstream Operations For Continuous Biomanufacturing Of Recombinant Therapeutic Proteins, Rohan Patil, Rahul Godawat, Tarl Vetter, Yogesh Waghmare, Konstantin Konstatinov, and Veena Warikoo

55

Advanced Computational Tools To Enhance Continuous Monoclonal Antibody Production, Maria Papanthasiou, Ana Quiroga Campano, Athanasios Mantalaris, and Efstratios Pistikopoulos

58

Regulatory Challenges Of Continuous Biomanufacturing, Andrew Papas

60

Considerations For An Incubation Chamber For Continuous Viral Inactivation, Raquel Orozco, Loleta Chung, Scott Godfrey, and Jon Coffman

74

Design And Control Of Chromatography Step In An Integrated Column Sequence, Bernt Nilsson, Niklas Andersson, Anders Holmqvist, Anton Sellberg, Peter Tiainen, and Arne Staby

76

What Is Holding The Industry Back From Implementing CBP (Continuous Bioprocessing) More Broadly?, Morten Munk

79

Robust Design And Operation Of Quasi-Continuous Adenovirus Purification By Two-column, Simulated Moving-Bed, Size-Exclusion Chromatography, Jose Mota, Ricardo Silva, Piergiuseppe Nestola, Cristina Peixoto, and Manuel Carrondo

90

Integrated Continuous Processing for the Manufacture of Monoclonal Antibodies, Daniel Karst, Fabian Steinebach, and Massimo Morbidelli

92

Continuous Beer Production Methods: A Review Of Chances And Risks, Konrad Muller-Auffermann

94

A Novel Plant Cell Culture Platform For Semicontinuous Production Of Recombinant Proteins: Butyrylcholinesterase As A Case Study, Jasmine Corbin, Bryce Hashimoto, Kalimuthu Karuppanan, Raymond Rodriguez, Somen Nandi, Brian Roberts, Amy Noe, and Karen McDonald

96

A Biomanufacturing Facility Based On Continuous Processing And Single Use Technology, Jorgen Magnus, Maike Temming, Peter Schwan, Jovana Micovic, Martin Lobedann, and Stefan Sievers

99

Inline Spiking For Viral Clearance Validation Of Continuous Processes, Herb Lutz

102

Monitoring And Control Of Reproducibility In Quasi-Continuous Integrated Production Processes Of Active Pharmaceutical Ingredients, Reiner Luttmann, Sven Borchert, Jan Voss, and Gesine Cornelissen

104

Small-scale platform for rapid on-demand manufacturing of recombinant proteins, Christopher Love

128

Development Of A First Generation Perfusion Process And Medium For Continuous Processing Based On Existing Fed-batch Platform Media, Henry Lin, Samantha Wang, Robert Leighty, Scott Godfrey, Samet Yildirim, Adam Osborne, Flaka Radonigi, Jens Vogel, and Jon Coffman

130

Comparison Of Bioreactor Systems Operated At High Bacterial Cell Density For The Production Of Lactic Acid: Batch – CSTR – CSTR Cascade – Tubular Reactor, Ulrich Kulozik

133

GlycoExpress: A Toolbox For The High Yield Production Of Glycooptimized Fully Human Biopharmaceuticals In Perfusion Bioreactors At Different Scales, Steffen Kreye

135

A regulatory perspective on continuous perfusion production of rFVIII, Robert Kozak

137

Novel Compact Cell Settlers For Continuous Perfusion Bioreactor Cultures Of Microbial (and mammalian) Cells, Dhinakar Kompala and Brian Batt

139

Monitoring intracellular component pools to identify steady state in mammalian cell perfusion culture, Daniel Karst, Robert Steinhoff, Marie Kopp, Renato Zenobi, Massimo Morbidelli, and Miroslav Soos

141

Integration Of Continuous Ethanol Precipitation And Flocculation Into Manufacturing Of Antibodies, Alois Jungbuer

144

Innovations In Bioreactor Operational Modes – Hybrid Semi-Continuous Processes To Push Beyond The limits Of Conventional Fed-Batch Cultures, Gregory Hiller, Matthew Gagnon, Ana Ovalle, Wenge Wang, and Elizabeth Eydelman

146

Genomics Based Methodology Of Cell-Culture Media Formulation For Improved Biotherapeutic Productivity And Quality Consistency, Hemlata Bhatia

148

Medium Optimization Case Study For Continuous Upstream Process, Rashmi Kshirsagar and Alan Gilbert

150

Simple method transfer from batch to continuous chromatography process to fit parameters to business needs, Rene Gantier

152

Evaluating facility design and capacity planning decisions for clinical and commercial supply with hybrid continuous processes, Suzanne Farid

154

Efficient approaches for perfusion medium development, Andreas Castan

165

Factors affecting the productivity of 4-Column Periodic Counter Current Chromatography (4C-PCC), Laura Fagan

167

Continuous culture and downstream processing of algae with recycle: An integrated large-scale approach for production of renewable crude oil, Matt Croughan

169

Transforming The Present Into The Future With Uncertainty And Imprecision, Charles Cooney

171

Integrated Solutions For Continuous Processing In Mobius® Bioreactor Systems, Andrew Clutterbuck

181

Exometabolome Characterization Of High Cell Density Culture Perfusion And Optimization Of The Cell Specific Perfusion Rate, Veronique Chotteau, Leila Zamani, Ye Zhang, Magnus Aberg, Anna Lindahl, and Axel MIE

183

How Continuous-Like Processes Improve Affordability For Viral Vaccines - Example Of LAIV, Jose Castillo

195

Protein Refinery Operations Lab (PRO Lab): A Sandbox For Continuous Protein Production & Advanced Process Control, Mark Brower, David Polland, and Finn Hung

197

CDER's Emerging Technology Team, Kurt Brorson and Sau Lee

207

PAT concepts for chromatography: Real-time monitoring, real-time control, and cause of error diagnostics, Nina Brestrich, Tobias Hahn, Adrian Sanden, Till Briskot, and Jurgen HUBbuch

221

Quality Systems For Continuous Manufacturing, Ron Branning

223

Towards Continuous Aqueous Two-Phase Extraction (CATPE), Andreas Bommarius, Bettina Bommarius, Irene Kaplanow, Julianne Merz, and Gerhard Schembecker

235

The use of Dynamic Control in Periodic Counter Current Chromatography, Hans Blom and Helena Skoglar

237

Upstream Perfusion Process: Back To The Future, Jean-Marc Bielser, Henri Kornmann, and Herve Broly

239

Evaluation Of A Continuous Chromatography Process Through Process Modeling And Resin Characterization, Ketki Behere

252

Leveraging Large Data Sets In Continuous Chromatography Applications: Monitoring Critical Process Parameters Using MVDA, Engin Ayturk

254

Exploring Continuous And Integrated Strategies For The Up- And Downstream Processing Of Human Mesenchymal Stem Cells, Paula Alves

264

Integrated Continuous Bioprocessing – Opportunities And Challenges, Mats Akesson and Peter Tiainen

295
