# Table of Contents

## Biot Theory in Seismic Wave Propagation

<b>Use of the Biot-Gassmann Equation in Modeling of the Seismic Velocity Changes During Supercritical CO<sub>2</sub> Injection in Sandstone</b>	<b>1</b>
Marte Gutierrez, Daisuke Katsuki, and Abdulhadi Almrabat	
<b>Complex Function Approach to Biot Consolidation Equations for Wave Scattering by a Cylindrical Cavity in Cross-Anisotropic Porous Media</b>	<b>11</b>
S. H. Eslami	
<b>A Semi-Analytical Solution to the Dynamic Response of Saturated Multi-Layer Porous Media under Progressive Waves</b>	<b>21</b>
M. B. Can Ulker	
<b>Modeling Seismic Attenuation due to Wave-Induced Fluid Flow in the Mesoscopic Scale to Interpret Laboratory Measurements</b>	<b>31</b>
Beatriz Quintal and Nicola Tisato	
<b>Fracture Connectivity Effects on Seismic Attenuation</b>	<b>41</b>
J. Germán Rubino, Tobias M. Müller, Luis Guarracino, and Klaus Holliger	
<b>Wave Attenuation and Dispersion in Patchy Saturated Gas Reservoirs: Influence of Frequency and Saturation on AVO Attributes</b>	<b>51</b>
Bastien Dupuy and Alexey Stovas	
<b>Generalization of the Biot's Equations for Account of Fluid Shear Relaxation: The Second Shear Wave</b>	<b>61</b>
G. A. Maximov	
<b>Rock Physics Templates in Heterogeneous Gas Reservoir: An Application of the Biot-Rayleigh Theory</b>	<b>71</b>
Jing Ba, Hong Cao, Fengchang Yao, J. M. Carcione, Guochen Wu, and Lin Zhang	
<b>Rock Physics Model for Tight Sandstone with Complex Pore Geometry</b>	<b>77</b>
Xinfei Yan, Gang Tang, Minghui Lu, and Zhifang Yang	
<b>Propagation of Sound Waves in Poroelastic Media with Anisotropic Permeability</b>	<b>83</b>
Bettina Albers and Krzysztof Wilmanski	
<b>Krauklis Wave Initiation in Fluid-Filled Fractures by a Passing Body Wave</b>	<b>92</b>

M. Frehner	
<b>P-wave Propagation in Double-Porosity Materials Saturated with Dual-Fluid</b>	<b>101</b>
Weitao Sun, Jing Ba, and Hong Cao	
<b>Linear and Nonlinear Waves in Porous Media Filled with Electrolyte</b>	<b>111</b>
Ashot V. Shekoyan and Alexander G. Bagdoev	
<b>Full-Waveform Simulation of Multipole Seismoelectric Logging While Drilling in a Fluid-Saturated Porous Formation</b>	<b>116</b>
W. Guan, H. Hu, and X. Liu	
<b>Acoustic Reverberation of a Borehole Located in a Poroelastic Formation</b>	<b>126</b>
M. Markov and A. Markov	
<b>An Experimental Study of Low-Frequency Wave Dispersion and Attenuation in Water Saturated Sandstones</b>	<b>135</b>
V. Mikhaltsevitch, M. Lebedev, and B. Gurevich	
<b>Effects of Squirt-Flow in Cracks on Drained Bulk Modulus of Porous Media</b>	<b>145</b>
Y. Song and H. Hu	
<b>Simulation of Poro-Elastic Seismic Wave Propagation in Complex Borehole Environments Using a Pseudo-Spectral Approach</b>	<b>154</b>
Rolf Sidler, José M. Carcione, and Klaus Holliger	
<b>Acoustoelasticity for a Dissipative Fluid-Saturated Porous Rock</b>	<b>164</b>
Huaqing Wang, Tengchao Dong, and Jiayong Tian	
<b>Novel Technique to Measure the Biot-Gassmann Modulus</b>	<b>173</b>
Bouko B. S. A. Vogelaar and David M. J. Smeulders	
<b>Stoneley Wave Properties in a Fracture Filled with Viscous Fluid</b>	<b>183</b>
Anatoly A. Nikitin, Boris D. Plyushchenkov, and Arkady Yu. Segal	
<b>Acoustic Characterization of Porous Materials with a Rigid Structure in the Low Frequency Regime</b>	<b>193</b>
M. Sadouki, M. Fella, Z. E. A. Fella, E. Ogam, and C. Depollier	
<b>Digital Rock Physics: Poroelastic Signature of Permeability and Tortuosity</b>	<b>200</b>
Erik. H. Saenger and Holger Steeb	
<b>Use of CO<sub>2</sub> as a Fluid in Fundamental Studies of Wave Propagation through Porous Media</b>	<b>209</b>
D. R. Schmitt, G. Njiekak, M. Chowdhury, R. Kofman, A. Rabbani, and H. Yam	
<b>Biot's Slow Wave and Effective Hydraulic Conductivity in Random Media</b>	<b>217</b>
E. Caspari, T. M. Müller, J. G. Rubino, and B. Gurevich	

<b>Effect of Fluid on Wave Propagation in Weakly Anisotropic Porous Media</b>	<b>227</b>
Olivia Collet and Boris Gurevich	
<b>Experimental Results on the Combined Effects of Frequency, Pressure, and Pore Fluid on the Dispersion of Elastic Waves in Porous Rock</b>	<b>235</b>
Jerome Fortin, Y. Gueguen, E. David, M. Adelinet, L. Piementa, and A. Schubnel	
<b>A Comparison of Seismic Attenuation Models for Unconsolidated Surficial Sediments: Evidence from Multi-Frequency Sonic Logs</b>	<b>239</b>
Marco Milani, J. Germán Rubino, Ludovic Baron, Rolf Sidler, and Klaus Holliger	
<b>Quantifying the Effect of Squirt Flow Dispersion from Compliant Clay Porosity in Clay Bearing Sandstones</b>	<b>249</b>
M. K. Soerensen and I. L. Fabricius	
<b>Transient Acoustic Wave Propagation in Non-Integer-Dimensional Rigid Porous Media</b>	<b>259</b>
A. Berbiche, M. Fellah, Z. E. A. Fellah, M. Sadouki, and C. Depollier	
<b>Interaction between Fracture Zones and Shock-Induced Borehole Waves</b>	<b>267</b>
Huajun Fan and D. M. J. Smeulders	
<b>Wave Propagation in Residual Saturated Porous Rocks—A Multiscale Approach</b>	<b>276</b>
Holger Steeb and Patrick S. Kurzeja	
<b>Observation of the Diffuse Biot Slow Wave via Its Electrokinetic Coupling: A Numerical Perspective</b>	<b>282</b>
S. Garambois and M. Dietrich	
<b>Biot-Pride Electrokinetic Wave Propagation in Porous Rocks</b>	<b>292</b>
D. Smeulders and M. Schakel	
<b>Some Theoretical and Practical Questions in Transient Electrokinetic Coupling in Fluid-Saturated Porous Media</b>	<b>299</b>
M. Dietrich and S. Garambois	
<b>Effect of the Fracture Fill on the Dispersion and Attenuation of Elastic Waves in a Porous Rock with Aligned Fractures</b>	<b>306</b>
L. Y. Kong, Boris Gurevich, Tobias M. Müller, Yibo Wang, and Huizhu Yang	
<b>Slow Shear Waves in Poroelasticity and the Concept of Dynamic Permeability</b>	<b>316</b>
T. M. Müller, Q. Qi, C. Delle Piane, and P. N. Sahay	
<b>The Wave Field of a Point Source that Acts on the Permeable Free Boundary of a Biot Half-Plane</b>	<b>326</b>
G. L. Zavorokhin	

<b>Numerical Models of Converted Slow P-wave Modes in Porous Media</b>	<b>332</b>
Y. Bouzidi	
<b>On the Field Variables of the Biot Theory and Modeling of Seismic Wave Propagation</b>	<b>342</b>
P. N. Sahay and T. M. Müller	
<b>A Poro-Elastic Model for Underwater Sand and Silt</b>	<b>352</b>
Nicholas P. Chotiros and Marcia J. Isakson	

## **Mechanics of Fluid-Infiltrated Earth Materials— In Memory of Terzaghi and Biot**

<b>On Poro-Elasticity in Finite-Element Geomechanical Simulations: Theory and Implementation</b>	<b>359</b>
Famke Kraaijeveld, Peter Fokker, and Peter Schutjens	
<b>Triggering a Shear Band in Variably Saturated Porous Materials</b>	<b>367</b>
Xiaoyu Song, Ronaldo I. Borja, and Wei Wu	
<b>A Theoretical Framework for Modeling Chemo-Mechanical Behavior of Porous Media with Multiphases and Multispecies</b>	<b>371</b>
Changfu Wei and Xia-Ting Feng	
<b>Examination and Implications of Preconsolidation Pressure Changes in Overconsolidated Clay Underlying a Large Embankment</b>	<b>381</b>
M. J. Burlingame	
<b>Study on 1-D Nonlinear Consolidation Behavior for Ningbo Soft Clay with Threshold Gradient</b>	<b>390</b>
Jie-Qing Huang, Xin-Yu Xie, Wen-Jun Wang, and Kai-Fu Liu	
<b>Chemical Degradation and Compaction Instabilities in Geomaterials</b>	<b>397</b>
I. Stefanou and J. Sulem	
<b>Mechanics of Time-Dependent Deformation in Crustal Rocks</b>	<b>407</b>
Nicolas Brantut, Patrick Baud, Michael Heap, and Philip G. Meredith	
<b>A General Criterion for Liquefaction in Granular Layers with Heterogeneous Pore Pressure</b>	<b>415</b>
Liran Goren, Renaud Toussaint, Einat Aharonov, David W. Sparks, and Eirik Fløkkøy	
<b>Poroelastic Center of Dilation Revisited</b>	<b>425</b>
Alexandre Huynen and Emmanuel Detournay	
<b>Propagation of a Semi-Infinite Hydraulic Fracture in a Poroelastic Medium</b>	<b>431</b>
Yevhen Kovalyshen and Emmanuel Detournay	
<b>Mechanical Compaction of Porous Rock: Comparison between the Behavior of a Porous Sandstone and a Porous Basalt</b>	<b>438</b>

Jerome Fortin and Yves Gueguen

<b>On Foundations of the Biot's Theory: New Interpretation on the Basis of the Generalized Variational Principle</b>	<b>443</b>
G. A. Maximov	
<b>Pore Pressure and Stress around Dipping Structures</b>	<b>452</b>
Maria A. Nikolinakou and Peter B. Flemings	
<b>Finite Element Modeling of Fluid-Driven Fracture in Permeable Medium</b>	<b>462</b>
B. Carrier and S. Granet	
<b>Localization of Shear in Saturated Granular Media: Insights from a Multi-Scaled Granular-Fluid Model</b>	<b>471</b>
Einat Aharonov, Liran Goren, David W. Sparks, and Renaud Toussaint	
<b>Unjacketed Bulk Compressibility of Sandstone in Laboratory Experiments</b>	<b>481</b>
R. M. Makhnenko and J. F. Labuz	
<b>Derivation of the McNamee-Gibson Displacement Functions for Plane Strain and Axisymmetric Consolidation Problems</b>	<b>489</b>
Andi Merxhani and Dongfang Liang	
<b>Thermal Consolidation with Chemical Dehydration Reactions: Pore Pressure Generation in the Slow Slip Region of Subduction Zones</b>	<b>499</b>
Robert M. Skarbek and Alan W. Rempel	
<b>On Nature of Earthquakes with Cause of Compressed Methane Gas Expansion and Migration in Crustal Rocks</b>	<b>507</b>
Z. Q. Yue	
<b>One-Way versus Two-Way Coupling in Reservoir-Geomechanical Models</b>	<b>517</b>
Jean H. Prevost	
<b>Micromechanical Origin of Static and Dynamic Liquefaction in Granular Soils</b>	<b>527</b>
J. E. Andrade, U. Mital, and T. Mohammadnejad	
<b>On Solitary Shock Waves for Solute and Fluid Pressure in Geologic Porous Media</b>	<b>533</b>
A. Caserta, R. Kanivesky, and E. Salusti	
<b>An Analytical Solution of Flow-Deformation Coupling due to a Point Sink within a Finite Poroelastic Layer</b>	<b>541</b>
P. C. Li, L. Wang, Y. L. He, and D. A. Sun	
<b>An Analytical Solution to Plane Strain Consolidation due to Surface Loading within a Finite Poroelastic Media</b>	<b>547</b>
P. C. Li, Z. H. Xu, and Z. Z. Zhang	
<b>On Modeling of Collective Behaviour of Hydro-Fractures in Rockmasses</b>	<b>553</b>
A. N. Galybin	

# Application of Multi-Phase Models in Structural Engineering

- Strength Homogenization for Partially Frozen Soil using Linear Comparison Composite Approach** 560  
M.-M. Zhou and G. Meschke
- An Improved Cap Model for Partially Saturated Soils** 569  
P. Gamnitzer and G. Hofstetter
- Simulation of Early-Age Cracking due to Drying Shrinkage Based on a Multi-Scale Constitutive Model** 579  
T. Yoneda, T. Ishida, K. Maekawa, E. Gebreyouhannes, and T. Mishima
- Visualization of Finite Element Data of a Multi-Phase Concrete Model** 589  
M. Ritter, M. Aschaber, W. Benger, and G. Hofstetter
- Ultrasonic Measurement of Evolving Microstructure in Hydrating Mortar** 599  
Kolluru V. L. Subramaniam
- Finite Element Modeling and Computer Design of Porous Composites** 608  
A. V. Nasedkin and A. A. Nasedkina
- Porosity Development in a Numerical Model for Concrete Shrinkage** 618  
A. D. Jefferson and A. Chitez

# Microporous and Mesoporous Materials—Adsorption and Poromechanics

- Adsorption-Induced Breathing Transitions in Metal-Organic Frameworks** 626  
Alain H. Fuchs, François-Xavier Coudert, Carles Triguero, Anne Boutin, and Alexander V. Neimark
- Pressure Effects in Phases Confined in Pores: Application to In-Pore Freezing and Mechanical Enhancement of Porous Materials** 632  
Benoit Coasne
- Characterisation of MOF Materials by Thermomechanical Methods** 641  
Isabelle Beurroies, Renaud Denoyel, Bogdan Kuchta, Philip Llewellyn, and Christian Serre
- THM Modeling of the CO<sub>2</sub> Injection in Coal: Influence of Biot's Coefficient and Langmuir's Adsorption Parameters** 648  
Kanssoun Saliya, Dragan Grgic, Richard Giot, and Albert Giraud
- Enhanced Continuum Poromechanics to Account for Adsorption Induced Swelling of Saturated Isotropic Nanoporous** 658

## Materials

Romain Vermorel and Gilles Pijaudier-Cabot

### **Role of Adsorption in the Creep Behavior of Coal and Shale** 668

Sander Hol, Mark D. Zoback, and Christopher J. Spiers

### **Nuclear Magnetic Resonance and Sound Velocity** 678

#### **Measurements of Chalk Saturated with Magnesium Rich Brine**

K. Katika, M. M. Alam, and I. L. Fabricius

### **Swelling/Shrinkage Induced by Shear in Narrow Pores** 685

H. Hoang and G. Galliero

### **Freezing of Water in Cylindrical Nanopores** 693

G. H. Findenegg, S. Jähnert, and A. Schreiber

### **Sorption-Induced Deformation of Microporous Solids Studied by In-situ Dilatometry** 701

C. Balzer, G. Reichenauer, and M. Wiener

### **Effect of Water Content on the Mechanical Behavior of Thin Clay Films** 710

B. Carrier, M. Vandamme, R. J.-M. Pellenq, and H. Van Damme

### **Found in Translation: From Adsorption Thermodynamics to Poromechanics of Nanostructured Solids** 716

Alexander V. Neimark

### **Measurement of Adsorptive-Mechanical Properties of Fractured Coal Cores** 721

D. Nicolas Espinoza, Matthieu Vandamme, Jean-Michel Pereira, Patrick Dangla, and Sandrine Vidal-Gilbert

### **Poromechanics of Swelling in Nanoporous Materials: Motivations and Introduction of Strain Effects on Adsorption** 729

Gilles Pijaudier-Cabot, David Grégoire, Romain Vermorel, and Laurent Perrier

### **A Poromechanics Approach to Predict the Effective Swelling Behavior of Cellular Materials** 739

Ahmad Rafsanjani, Dominique Derome, and Jan Carmeliet

### **Adsorption Process in MesoPorous Materials: New Investigations on the Role of Elastic Strain** 749

A. Grosman and E. Rolley

### **Water Melting Induced Deformation of Ordered Nanoporous Silica** 755

Oskar Paris and Maxim Erko

### **Adsorption and Defect-Sensitive Structure of Single Wall Nanocarbons** 762

T. Fujimori, F. Koherunnisa, and K. Kaneko

## **Poromechanics of Confined Reactions**

<b>Pressure from Crystallization in Pore Channels</b>	<b>766</b>
George W. Scherer and Sonia Gupta	
<b>Poromechanics of Salt Nucleation within an Unsaturated Reservoir Rock</b>	<b>772</b>
Florian Osselin, Antonin Fabbri, Teddy Fen-Chong, Jean-Michel Pereira, Arnault Lassin, and Patrick Dangla	
<b>The Thermodynamic and Poromechanic Crystallization Pressure of Sodium Sulfate Heptahydrate: An NMR Study</b>	<b>782</b>
Leo Pel and Tamerlan A. Saidov	
<b>Episodic Slip and Waves of Fluid-Filled Porosity</b>	<b>790</b>
Y. Y. Podladchikov and Stephen. A. Miller	
<b>Anisotropy of Alkali-Silica Reaction under Loading</b>	<b>794</b>
L. Charpin and A. Ehlacher	
<b>Confinement During In-Pore Crystallization</b>	<b>804</b>
Rosa M. Espinosa-Marzal	
<b>Potential Gradients Produced by Pore-Space Heterogeneities: Application to Isothermal Frost Damage and Submarine Hydrate Anomalies</b>	<b>813</b>
Alan W. Rempel and Laura J. Van Alst	
<b>Reaction-Driven Cracking During Mineral Hydration, Carbonation, and Oxidation</b>	<b>823</b>
Peter B. Kelemen, Heather Savage, and Greg Hirth	

## **Computational Poromechanics**

<b>Fast Numerical Computation of Effective Elastic Moduli of Porous Materials</b>	<b>827</b>
M. Kabel, H. Andrä, and F. Krzikalla	
<b>Boundary Element Formulation for Partially Saturated Poroelastic Media</b>	<b>834</b>
Peng Li and Martin Schanz	
<b>Materials under Shock Loading: From Biot's Theory to Nano-Poromechanics</b>	<b>844</b>
Ahmad K. Al-Qananwah, Joel Koplik, and Yiannis Andreopoulos	
<b>A Boundary Element Formulation for the Wave Propagation in the Unsaturated Soils</b>	<b>853</b>
Pooneh Maghoul, Behrouz Gatmiri, Murray Fredlund, and Denis Duhamel	
<b>Modeling Effects of Clay Structure on Consolidation Behavior</b>	<b>862</b>
Boning Ma, Balasingam Muhunthan, and Xinyu Xie	
<b>An Isogeometric Analysis Approach to Fluid Flow in a Fractured Porous Medium</b>	<b>872</b>
Faisal Irzal, Joris J. C. Remmers, Clemens V. Verhoosel, and René de Borst	

<b>Modeling of Flow-Induced Sound in Poroelastic Materials</b>	<b>882</b>
M. Zahid, S. C. Beck, and S. Langer	
<b>Poromechanical Cohesive Surface Element with Elastoplasticity for Modeling Cracks and Interfaces in Saturated Geomaterials</b>	<b>891</b>
R. A. Regueiro, J. D. Sweetser, E. Jensen, and W. Wang	
<b>A Trefftz Based Prediction Technique for the Dynamic Response of Poroelastic Media in Vibro-Acoustic Applications</b>	<b>899</b>
E. Deckers, D. Vandepitte, and W. Desmet	
<b>Fully Coupled Computational Simulations of Pile Foundations in Improved and Unimproved Soft Clays</b>	<b>909</b>
Karrthik Kirupakaran and Kanthasamy K. Muraleetharan	
<b>A Stability Condition for the Numerical Simulation of Poroelastic Systems</b>	<b>919</b>
Marco Favino, Alfio Grillo, and Rolf Krause	
<b>A Comparison of Fully Implicit and Semi-Implicit Methods for Integration of an Elastoplastic Model for Clays</b>	<b>929</b>
Majid T. Manzari, Mohamed El Ghoraiby, and Karma Yonten	
<b>Preliminary Assessment of Higher-Order <math>u</math>-<math>p</math> Elements for Poromechanics Applications</b>	<b>933</b>
Victor N. Kaliakin and Majid Talebi	

## **From Blast and Impact Responses of Porous Media to Constitutive Modeling—Honoring Prof. Frank L. DiMaggio**

<b>Blast Response of Cellular Cement Foams: An Experimental Evaluation</b>	<b>943</b>
Kolluru V. L. Subramaniam and Yiannis Andreopoulos	
<b>Advanced Structural Materials to Mitigate Explosive and Impact Threats</b>	<b>953</b>
Caleb M. Baumgart and Jason Baird	
<b>Dynamic Fracture of Cellular Cementitious Plates under Blast/Shock Loading</b>	<b>962</b>
Doug Jahnke, Weihua Jin, and Yiannis Andreopoulos	
<b>Mitigation of Blast Effects on Underground Structure Using Compressible Porous Foam Barriers</b>	<b>971</b>
Anirban De, Alberto N. Morgante, and Thomas F. Zimmie	
<b>Poro-Elasto-Plastic Modeling of Saturated Granular Soils Subjected to Blast Loading</b>	<b>981</b>
Huabei Liu and Yuzhen Han	
<b>Simulation of Excavation in Soft Cohesive Soils Using Enhanced Anisotropic Elastoplastic Bounding Surface Models</b>	<b>987</b>
Ching Hung, Hoe I. Ling, and Victor N. Kaliakin	

<b>An Anisotropic Elastoplastic Bounding Surface Model for New York Bay Clay—A Parametric Study</b>	<b>993</b>
Guan-Wei Lin, Hoe I. Ling, Ching Hung, and Victor N. Kaliakin	
<b>Two-Phase Dynamic Finite Element Method with One-Dimensional Examples</b>	<b>1001</b>
D. Zaman, I. K. Jassim, and Ch. Moormann	
<b>Towards a Generalized Bounding Surface Model for Cohesive Soils</b>	<b>1011</b>
Victor N. Kaliakin and Andrés Nieto Leal	

## **Multiscale Modeling and Simulation of Granular and Porous Media**

<b>Finite Element Modeling of the Elastic Modulus of Ti6Al4V Scaffold Fabricated by SLM</b>	<b>1021</b>
M. R. Karamooz Ravari and M. Kadkhodaei	
<b>Stress Fluctuations in a Soil Element Testing</b>	<b>1029</b>
A. F. Cabalar and C. R. I. Clayton	
<b>Porosity and Permeability Change under Stress and Correlation to Rock Texture</b>	<b>1037</b>
Vladimir V. Petunin, Carlos Labra, Feng Xiao, Azra N. Tutuncu, Jin Sun, and Xiaolong Yin	
<b>Prediction of Flow Behavior of Liquid and Particles in Liquid-Solid Risers with Modified Cluster Structure-Dependent Drag Method</b>	<b>1047</b>
G. D. Liu, H. L. Lu, S. Wang, and L. Y. Sun	
<b>A Constitutive Model for Sand Incorporating the Effects of Rotation of Principal Stress and State-Parameter-Dependant Dilatancy</b>	<b>1057</b>
Peng Liu, Zhong-Tao Wang, Mao-tian Luan, and Andrew Chan	
<b>Micromechanics of Dilatancy, Critical State, and Shear Bands in Dense Granular Matter</b>	<b>1067</b>
Sinisa Dj. Mesarovic, Jagan M. Padbidri, and Balasingam Muhunthan	
<b>Modeling Stress-Strain Behaviour of Granular Soils</b>	<b>1075</b>
A. Ahangar-Asr, A. Faramarzi, and A. A. Javadi	
<b>Macro and Micro Analysis for Grading-Dependent Mechanical Behavior of Granular Materials</b>	<b>1082</b>
Y. J. Liu, Z. Y. Yin, P. Y. Hicher, J. H. Wang, and X. H. Xia	

## **The Effect of Hierarchical Pore Structure and Anisotropy on Pore Fluid Flow in Bone Tissue**

<b>Investigation of the Flow in the Microscopic Level and Its Contribution to the Poroelastic Properties in Cortical Bone</b>	<b>1090</b>
Gaffar Gailani, Mohamed Benalla, Luis Cardoso, and Stephen Cowin	

<b>Homogenizing the Ultrasonic Response of Wet Cortical Bone</b>	<b>1097</b>
R. P. Gilbert, A. Panchenko, A. Vasilic, and Yongzhi Xu	
<b>Estimation of the Poroelastic Properties of Trabecular Bone at the Microscopic Scale Using CT Based FE Models</b>	<b>1107</b>
Clara Sandino, David D. McErlain, John Schipilow, and Steven K. Boyd	
<b>The Sensitivity of Fabric Tensor in Bovine Cancellous Bone</b>	<b>1113</b>
Young June Yoon	
<b>Experimental and Theoretical Analysis of Water Uptake and Swelling Kinetics of Trabecular Tissue from Human Femur Head: Some Preliminary Results</b>	<b>1119</b>
Franco Marinozzi, Fabiano Bini, Andrea Marinozzi, Annalisa De Paolis, Emanuele Habib, Alessandro Quintino, and Massimo Corcione	
<b>Assessment of the Lacunar-Canalicular Permeability Using Harmonic Loading</b>	<b>1128</b>
M. Benalla, L. Cardoso, and S. C. Cowin	
<b>Modeling Rest-Inserted Loading in Bone Mechanotransduction Using Poroelastic Finite Element Models: The Impact of Permeability</b>	<b>1137</b>
Andre F. Pereira and Sandra S. Shefelbine	
<b>Multi-Scale Permeability of Murine Bone Measured by Nanoindentation</b>	<b>1145</b>
Nalara Rodriguez-Florez, Michelle L. Oyen, and Sandra J. Shefelbine	
<b>Models of Poroelastic Double Porous Structures Based on Hierarchical Homogenization—Application to Compact Bone</b>	<b>1152</b>
Eduard Rohan, Salah Naili, Jana Turjanicová, and Thibault Lemaire	
<b>Ultrasonic Response of Functionally-Graded Anisotropic Porous Bones</b>	<b>1160</b>
Vu-Hieu Nguyen and Salah Naili	
<b>On the Reconstruction of Dynamic Permeability of Cancellous Bones</b>	<b>1166</b>
Miao-Jung Yvonne Ou, Yen-Hsi Richard Tsai, and Seong Jun Kim	
<b>Fabric Dependence in Dynamic Poroelasticity</b>	<b>1176</b>
L. Cardoso and S. C. Cowin	
<b>Assessment of Cancellous Bone Microarchitecture from Poroelastic Ultrasound (PEUS) Theory</b>	<b>1183</b>
Luis Cardoso and Stephen C. Cowin	
<b>The Role of Microarchitecture on Absorption and Scattering of Ultrasound Waves in Trabecular Bone</b>	<b>1193</b>
Luis Cardoso and Stephen C. Cowin	
<b>Interstitial Flow in the Hierarchical Pore Space Architecture of Bone Tissue</b>	<b>1203</b>
S. C. Cowin and L. Cardoso	

**Prediction of Anisotropic Trabecular Orientation and Spatial Distribution of Anabolic Remodeling by Acoustic Wave Propagation** 1213  
Y.-X. Qin, L. Lin, S. Ferreri, and F. Serra-Hsu

**The Fabric Anisotropy Effect on Elastic and Yield Behavior of the Human Calcaneus Trabecular Bone** 1219  
M. F. Souzanchi, P. E. Palacio-Mancheno, L. Cardoso, and S. C. Cowin

## **Micro-Scale and Field-Scale Modeling of Underground Storage of Wastes and Hydrocarbons**

**A Coupled Poroelasticity Model by Mixed Finite Elements for Aquifer Recharge Simulations** 1229  
M. Ferronato, N. Castelletto, and G. Gambolati

**Saturation-Induce Failure: Mechanics of a Class of Unstable Processes** 1237  
G. Buscarnera and C. di Prisco

**FFT-Based Homogenization of Permeability Using a Hashin-Shtrikman Type Variational Framework** 1245  
F. Bignonnet and L. Dormieux

**Strain-Gradient Poromechanical Description of Unsaturated Porous Materials** 1255  
G. Sciarra

**Compartmentalization Effects in Geologic CO<sub>2</sub> Sequestration—A Case Study in an Offshore Reservoir in Italy** 1265  
N. Castelletto, M. Ferronato, G. Gambolati, C. Janna, and P. Teatini

**Withdrawal of Fluid from a Poroelastic Layer** 1271  
Julien Marck and Emmanuel Detournay

**The Equivalent Inclusion Method for Poroelasticity Problems** 1279  
H. Bedayat and A. Dahi Taleghani

**Analytical Approach to the Creep and Hydromechanical Couplings Around Underground Cavities** 1289  
T. A. Bui, F. Deleruyelle, H. Wong, N. Dufour, and C. Leo

**Modeling Ground Deformations and Potential for Induced Micro-Seismicity at the In Salah CO<sub>2</sub> Storage Operation, Algeria** 1299  
Jonny Rutqvist and Antonio P. Rinaldi

**A Microstructural Model on the Link between Change in Pore Size Distribution and Wetting Induced Deformation in a Compacted Silt** 1309  
Francesca Casini, Jean Vaunat, and Enrique Romero

## **Geotechnical Engineering—Practical Issues of Design, Construction and Applied Research**

<b>Frost Heave Protection Using Soil-Shredded Tire Mixture</b>	<b>1314</b>
J. M. Kang, J. Lee, Y. S. Kim, and S. S. Hong	
<b>Estimation of Frost Depth in South Korea</b>	<b>1320</b>
J. Lee, H. S. Kim, J. M. Kang, and Y. S. Kim	
<b>Centrifuge Test of Face Stability of Shallow Tunnels in Unsaturated Soil</b>	<b>1326</b>
E. Soranzo and Wei Wu	
<b>Relevant Factors for the Liquefaction Susceptibility of Cyclically Loaded Offshore Monopiles in Sand</b>	<b>1336</b>
P. Cuéllar, M. Baeßler, and W. Rücker	
<b>Consolidation/Creeping of Soils and Pre-treated Sludge</b>	<b>1346</b>
H. Brandl	
<b>Differential Settlements—Case Studies of Settlement Correction by Specialist Foundation Methods</b>	<b>1358</b>
E. Falk and C. Kummerer	
<b>Application of Numerical Methods for Estimating Settlements due to Consolidation and Creep—Two Case Histories</b>	<b>1364</b>
H. F. Schweiger, I. Ikhyia, and F. Tschuchnigg	
<b>Deep Excavations with Special Ground Shape</b>	<b>1372</b>
Christian Moormann and Linus Klein	

## **Coupled Processes in Geomechanics—Bridging Theory and Experiments**

<b>Influence of Confining Stress on the Effective Stress Parameter</b>	<b>1382</b>
Mohammad Hossein Tavakoli and Ghassem Habibagahi	
<b>Poro-Mechanical Coupling versus Chemical Effects of Different Fluids in a Porous Rock During Brittle Creep: Acoustic and Mechanical Evidences</b>	<b>1390</b>
D. Grgic	
<b>Modeling Particle Breakage in Unsaturated Granular Assemblies</b>	<b>1400</b>
G. Buscarnera and I. Einav	
<b>A Multiscale Anisotropic Poroplasticity Damage Model for Cracked Solids</b>	<b>1410</b>
Qi-Zhi Zhu and Jian-fu Shao
