

Electrical Transmission and Substation Structures 2015

Technical Challenges and Innovative Solutions in Grid Modernization

Proceedings of the 2015 Electrical Transmission
and Substation Structures Conference

Branson, Missouri, USA

27 September – 1 October 2015

Editor:

Otto J. Lynch

ISBN: 978-1-5108-1971-9

Printed from e-media with permission by:

Contents

Case Studies

Winfall-to-Trowbridge Transmission Line Foundation Design.....1
 Jason R. Truckenbrod, Steven S. Miller, Bruce L. Roth, and Robert Smith

Taft–Lakeland 230 kV Transmission Line.....11
 Charles (Chuck) H. Easterling, Curtis W. Smith, and Hrishikesh (Rishi) P. Moghe

Jack Rabbit–Big Sky 161 kV National Forest Canyon Construction.....23
 Anders Fiske and Heather Dell

Micropile Design and Construction in a Limited Access Wetland Habitat35
 Steven A. Davidow and David G. Carr

Construction Challenges

**CapX2020 Brookings County–Hampton 345 kV River Crossing Foundation
 Challenges.....46**
 I. Lucas D. Karels

Fall Protection Efforts for Lattice Transmission Towers.....58
 David E. O’Claire and David M. Hesse

**Design and Construction Challenges from One Utility’s CREZ
 Transmission Lines.....70**
 Don Cannon, David Hancock, and Neal Chapman

Foundations

**Foundation Designs for a 345 kV Transmission Line Constructed in the
 Lakebed of Glacial Lake Agassiz83**
 David W. Wedell, Gerald V. Chezick, and Bret R. Anderson

**Deep Foundations—Combining Construction Methods, Engineering,
 Inspection, and Testing102**
 Shane C. Watson and Bruce J. LaMeres

Ameren Transmission Company’s Illinois Rivers Transmission Line River Crossings Foundation Design113
 Kasey Woods, Darren Ratliff, Terry Barnett, Danielle Mullendore, and Daniel Whalen

Recommendations for Steel Pole and Drilled Shaft Deflection Criteria Based on a Parametric Study of a 138kV Double Circuit Transmission Line127
 Adam G. Bowland, Paul G. Cass, and Anthony M. DiGioia Jr.

Line Design

Dynamic Loading of Transmission Lines A Qualitative Comparison of Full-Scale Tests and Computer Simulations143
 Bryan Williams, Erik Ruggeri, and Jason Pfaff

Updating ASCE Manual No. 74: Guidelines for Electrical Transmission Line Structural Loading154
 T. G. Mara and R. H. Behncke

Compilation of Damaging Ice Storms in the United States166
 K. F. Jones and R. Bates

Best Practices for the Design of 115KV to 230KV Overhead Transmission Lines178
 L. Kempner Jr. and A. Haldar

Managing Aging Infrastructure

Generation Drone: The Future of Utility O&M190
 Grant T. Leaverton

Celanese–Peters Mountain 138kV Line: A Case Study of One of American Electric Power’s Oldest Weathering Steel Pole Lines202
 T. J. Christy, E. H. Witt, M. J. McMillen, T. D. Parrish, and W. J. Oliphant

Best Practices for Transmission Line Inspections and Recommended Inspection Techniques214
 Andrew Stewart, Robert Nelson, Matthew Sinclair, and Alex Mogilevsky

Rerating and Upgrading

Thinking Outside the Box: Tennessee Valley Authority Uses the ACCR Conductor on a 500-kV Transmission Line227
 Jeffery Phillips, Mark Ryan, and Doyle Glass

Southern Reinforcement Project—Squeezing 21st Century Demand into 20th Century Right-of-Way237
 Bill Rusciollelli and Sean Crandall

Raising Transmission Line Steel Towers.....249
 Ashley Dupree, Fang Liu, Jonathon Rumble, and Ricardo Ortegón

Special Design Considerations

EIS Project Survival Guide: How to Keep Engineering Choices Alive and Emerge from the NEPA Process with Your Project (Mostly) Intact.....261
 Ronald Carrington

Aesthetic Transmission Line Structures: Past, Present, and Future.....275
 M. Khavari and K. L. Sharpless

Design of Fibre-Reinforced Polymer (FRP) Structures for BC Hydro’s Transmission System.....289
 A. Gilpin-Jackson, M. L. Lu, G. Mathew, and G. Fecht

Developing a Structure for BOLD—Challenges from a Simple Aesthetic Structure Design306
 Nancy (Meihuan) Fulk, T. David Parrish, Anthony J. Hansen, and Jeff Steele

Structural Analysis I

Validation and Testing of Tubular Steel Pole Designs for Southern California Edison’s Tehachapi Renewable Transmission Project.....322
 Clinton Y. Char, Tony Cunha, and Jerry Lembke

Design and Testing of 500kV Double Circuit Monopoles for the Heartland Transmission Project in Edmonton, Alberta337
 Kishor Kumar and Jason Dwyer

Innovative Structure Designs for Large Spans351
 Jaron T. Reay and Abe J. Dilworth

Slip Joints Connections—How Do These Things Work?363
 Richard Slocum and Mark Fairbairn

Structural Analysis II

The Effect of Eccentricity on the Design of Towers for Transmission Lines—A Case Study with the Finite Elements Approach375
 Angelo Fabri

Considerations in the Development of a Lattice Tower Structure Family.....387
 Jondy Britton and Travis Bouslog

**Graphical Analysis: Obsolete Method or a Compliment to Modern Design
 Techniques?401**
 Philip Joel Bryant

Substation Design Issues

Seismic Base Isolation of a High Voltage Transformer413
 R. S. Cochran

**NERC CIP-014-01: Physical Security—Regulatory Compliance and
 Real World Implementation426**
 Katherine Bentley and Jeffrey Boucher

**Innovative Analysis and Seismic Retrofit of 500kV Flexible Bus Substation
 Support Structures438**
 Scott Howard, Craig Riker, Brian Knight, and Sarah Knoles

Poster Program

Transmission Pier Foundation QC/QA452
 Gina Beim, Robert Kluge, Matthew Lohry, and Daniel Belardo

Updated Gust Response Factors for Transmission Line Loading464
 T. G. Mara

Repair of Corrosion-Damaged Substation Structures482
 Mo Ehsani and Gannon McGhee

**Structural Performance of Bolted Connectors in Retrofitted Transmission
 Tower Leg Members.....489**
 Chenghao Lu, Xing Ma, and Julie E. Mills

**Design and Construction Challenges for a Transmission
 Line and Structures Crossing a River for Bridge Relocation.....500**
 Rengaswamy Shanmugasundaram, W. Greg Ford, and Rodger Calvert

**Modification of Single-Circuit 765 kV Lattice Steel Towers for a
 Double-Circuit 345 kV Application512**
 Todd Edwards and Joe Pattison

Examination of Yawed Wind Loading on Transmission Towers522
 T. G. Mara and R. H. Behncke

New Approach for Upgrading an Existing 115 kV Transmission Line	538
Karen Callery and Ibrahim Hathout	
Impact of Extreme Weather on Transmission Line Structures	550
Ibrahim Hathout and Karen Callery	
Highland City Repurposing of an Existing Substation Property for Upgrade to New Substation Facilities	565
David R. Thornton	
Study of Electric Transmission Line Deep Foundation Design.....	577
P. M. Kandarlis and S. Davidow
