CONTENTS

| | |
|--|-----|
| Preface | vii |
| Developments in reactive mixing | |
| J. R. Bourne | 1 |
| Some mixing problems in gas-liquid reactors | |
| R. Pohorecki | 3 |
| Turbulence, flow variation and deformation facets of mixing in stirred vessels | |
| M. Yianneskis | 5 |
| Mixing and recirculation characteristics of gas-liquid Taylor flow in microreactors | |
| T. Abadie, J. Aubin, C. Xuereb and D. Legendre | 7 |
| New concept of energy-efficient and resource-saving apparatuses for mixing and conjugated processes | |
| R. Abiev | 13 |
| A combined criterion to identify mixing performance for the blending of non-Newtonian fluids using a Kenics KM static mixer | |
| F. Alberini, M. J. H. Simmons, A. Ingram and E. H. Stitt | 19 |
| Disruption of yeast cells with ultrasound | |
| J. Bałdyga, M. Jasińska, M. Dziegielewska and M. Żochowska | 25 |
| Investigation of drop breakage and coalescence in the toluene/water dispersions with dissolved surface active polymers PVA 88% and PVA 98% | |
| A. Bąk and W. Podgórska | 31 |
| Mixing performances in biogas plants | |
| M. Brehmer and M. Kraume | 37 |
| Mixing time in unbaffled stirred tanks | |
| A. Busciglio, F. Grisafi, F. Ippolito, F. Scargiali and A. Brucato | 43 |
| On vortex shape in unbaffled stirred vessels as measured by digital image analysis | |
| A. Busciglio, F. Grisafi, F. Scargiali and A. Brucato | 49 |
| Experimental investigation and CFD modeling of micromixing of a single-feed semi-batch precipitation process in a liquid-liquid stirred reactor | |
| D. Cheng, J. Cheng, Y. Yong, C. Yang and Z.-S. Mao | 55 |
| Development of optical trajectography device for the Lagrangian study of the turbulent flow inside a stirred tank used in pharmaceutical industry | |
| M.-L. Collignon, A. Delafosse, F. Delvigne, M. Crine, P. Thonart and D. Toye. | 61 |
| Highly resolved simulations of solids suspension in a small mixing tank | |
| J. Derksen and R. Sungkorn | 65 |
| Simulation of mixing and precipitation of nanoparticles for pharmaceutical applications with CFD and MD | |
| N. Di Pasquale, P. Carbone, D. L. Marchisio and A. A. Barresi | 71 |
| Influence of mixing on the course of reactive extraction of carboxylic acids using supercritical carbon dioxide | |
| M. Djas and M. Henczka | 77 |

| | |
|---|-----|
| Liquid-liquid mixing using micro-fluidized beds E. Doroodchi, M. Sathe, A. Boyes, G. Evans and B. Moghtaderi | 83 |
| Influence of nonionic surfactant on nanofluid properties M. Drzazga, G. Dzido, M. Lemanowicz and A. Gierczycki | 89 |
| Influence of solids on macro-instabilities in a stirred tank M. Eng and A. Rasmuson | 95 |
| Numerical simulation of liquid-liquid turbulent flow in a stirred tank with an explicit algebraic stress model X. Feng, X. Li, J. Cheng, C. Yang and Z.-S. Mao | 101 |
| The NETmix® Reactor: 3D CFD modelling and pressure drop measurements C. M. Fonte, M. E. Leblebici, M. M. Dias and J. C. B. Lopes | 107 |
| Flow field characterization and impinging jets stability studies in RIM C. P. Fonte, M. A. Sultan, R. J. Santos, M. M. Dias and J. C. B. Lopes | 113 |
| PIV study of mixing characteristics in a stirred vessel with a non-Newtonian fluid J. C. Gabelle, A. Liné, J. Morchain, D. Anne-Archard and F. Augier | 119 |
| Unsteady flow features in a T-shaped micro-mixer C. Galletti, E. Brunazzi and R. Mauri | 125 |
| Slinger design for three phase stirred tank reactor R. Ghadge and T. Mathew | 131 |
| Vortex generation with submerged baffles J. Giacomelli and W. Wyczalkowski | 135 |
| The effect of scale on liquid-liquid dispersion in in-line Silverson rotor-stator mixers S. Hall, A. W. Pacek, A. J. Kowalski, M. Cooke and D. Rothman | 139 |
| Development of new static mixer to reduce unevenness of flow direction T. Hanada, T. Okada and K. Takahashi | 145 |
| Interaction between fluid mixing and chemical reaction - Effect of non-uniform chaotic mixing on concentration distribution for periodical reaction system S. Hashimoto, Y. Chikamochi and A. Nishimura | 151 |
| New impeller design: anti-ragging impeller, ARI2 R. Higbee, J. Giacomelli and W. Wyczalkowski | 157 |
| Micromixing in two- and three-phase (s-l and g-s-l) systems in a stirred vessel J. Hofinger, W. Bujalski, S. Bakalis, A. Eaglesham and A. W. Nienow | 163 |
| Surface aeration for water treatment agitated tank mixing time, power consumption and hydrodynamics H. M. Issa, M. Poux and C. Xuereb | 169 |
| Investigations of mass transfer and micromixing effects in two-phase liquid-liquid systems with chemical reaction M. Jasińska, J. Baldyga, M. Cooke and A. J. Kowalski | 175 |
| Numerical and experimental studies of liquid-liquid mixing in a Kenics static mixer Z. Jaworski and H. Murasiewicz | 181 |

| | |
|--|-----|
| Pumping capacity of pitched blade multi-stage impellers T. Jirout | 187 |
| Development of novel drop diameter measuring method in the manufacturing process of functional O/W microcapsules K. Kanaya, S. Akao, R. Misumi, K. Nishi and M. Kaminoyama | 193 |
| Numerical modelling of the hydrodynamics in an agitated vessel with an eccentrically located HE 3 impeller J. Karcz, M. Domański and M. Bitenc | 199 |
| An effect of grid quality on the results of numerical simulations of the fluid flow field in an agitated vessel J. Karcz and L. Kacperski | 205 |
| 2D fluid deformation induced by a rotational reciprocating plate impeller in a cylindrical vessel Y. Komoda, S. Senda, H. Takeda, Y. Hirata and H. Suzuki | 211 |
| Numerical and experimental modelling of a multiflux static mixer for continuous extrusion of layered polymer blends T. Köpplmayr and J. Miethlinger | 217 |
| Comparison of power consumption for mixing process using the new construction of mixer with the reciprocating and rotating agitator M. Kordas, S. Masiuk and R. Rakoczy | 223 |
| Experimental and CFD investigation of commercial PC heat sink performance using water and nanofluids M. Korpyś, G. Dzido and J. Wójcik | 229 |
| CFD modelling of hydrodynamics in supercritical fluid extraction systems J. Krzysztoforski and M. Henczka | 235 |
| Mass transfer coefficients during aeration by a self-aspirating impeller Cz. Kuncewicz and J. Stelmach | 241 |
| Mixing enhancement of flow in stirred vessels by chaotic advection H. D. Lee, D. H. Lee and W. R. Hwang | 247 |
| Investigation of discrete population balance models and its parameters for turbulent emulsification processes S. Maaß and M. Kraume | 251 |
| On-line monitoring of fluid particle size distributions in agitated vessels using automated image analysis S. Maaß, J. Rojahn, J. Emmerich and M. Kraume | 257 |
| Transitional flow behaviour in the Shear and Sedimentation Test Cell (SSTC) M. B. Machado and S. M. Kresta | 263 |
| Large Eddy Simulation of chemical processes carried out in jet reactors Ł. Makowski, W. Orciuch and J. Bałdyga | 269 |
| A comparison of subgrid closure method for passive scalar dynamics Ł. Makowski, W. Orciuch and K. Wojtas | 275 |
| Influence of micromixing on the course of homogenous chemical reactions in suspensions K. Malik and J. Bałdyga | 281 |

| | |
|---|-----|
| Scale-up of a DTM crystallizer A. Małysiak and P. M. Synowiec | 287 |
| Process intensification of continuous starch hydrolysis with a Taylor-Couette flow reactor H. Masuda, T. Horie, R. Hubacz and N. Ohmura | 293 |
| Relation between particle rising behavior and liquid flow around the bottom of a stirred vessel R. Misumi, T. Sasaki, H. Kato, K. Nishi and M. Kaminoyama | 299 |
| Influence of axial mixing and particle size non-uniformity on performance of chromatographic reactors E. Molga, M. Lewak and A. Ostaniewicz-Cydzik | 305 |
| CFD modelling of a novel stirred reactor for the bio-production of hydrogen G. Montante, M. Coroneo, J. A. Francesconi, A. Paglianti and F. Magelli | 311 |
| Lattice-Boltzmann method for the simulation of laminar mixers F. Muggli, L. Chatagny and J. Lätt | 317 |
| Determination of drop breakage mechanisms by experimental and numerical investigations of single drop breakages S. Nachtigall, D. Zedel, S. Maaß, A. Walle, M. Schäfer and M. Kraume | 323 |
| Measurement of cavern sizes and shape in agitated yield stress aqueous solutions with an electrochemical probe T. Nagafune and Y. Hirata | 329 |
| Modelling algal cultivation in a bubble column photobioreactor E. K. Nauha and V. Alopaeus | 335 |
| Effect of temperature change on transient organized structure of isolated mixing regions in stirred vessel N. Ohmura, H. Tanaka, N. Kumagai and T. Horie | 341 |
| Incorporation of nanoparticle clusters into liquids using a proprietary design mixer-Ytron Y Jet G. Özcan-Taşkin | 347 |
| Dispersion of nanoscale silica particles using a novel design stirred bead mill G. Özcan-Taşkin, E. Gavi, D. Kubicki and Y. Wang | 353 |
| Fluid-dynamics characteristics of a vortex ingesting stirred tank for the production of hydrogen from organic wastes fermentation A. Paglianti, G. Montante and F. Magelli | 359 |
| The non-newtonian fluid flow through the Kenics static mixer S. Peryt-Stawiarska and Z. Jaworski | 365 |
| Application of the Conditional Quadrature Method of Moments for the simulation of coalescence, breakup and mass transfer in gas-liquid stirred tanks M. Petitti, M. Vanni, D. L. Marchisio, A. Buffo and F. Podenzani | 371 |
| Power consumption of the rotor-stator mixer with cavities K. Piela, J. J. M. Janssen and P. Bongers | 377 |
| Modelling of drop coalescence in stirred liquid-liquid dispersion containing surfactant W. Podgórska and A. Bąk | 383 |

| | |
|--|-----|
| Development of positron emission particle tracking for studying laminar mixing in Kenics static mixer | |
| M. Rafiee, M. J. H. Simmons, A. Ingram and E. H. Stitt | 389 |
| Evaluation of mixing performance in a magnetic mixer based on information entropy | |
| R. Rakoczy, S. Masiuk and M. Kordas | 395 |
| Particle suspension with a TX445 impeller | |
| F. Rieger, D. Ceres and P. Seichter | 401 |
| Correlation of drop size with shear tip speed | |
| T. L. Rodgers and M. Cooke | 407 |
| Modelling of unsteady interphase mass transfer from elongated liquid drops at capillary numbers close to a critical level | |
| A. Rozeń | 413 |
| The effect of phase fraction on drop size distribution in a high shear mixer with a viscous continuous phase | |
| P. E. Rueger and R. V. Calabrese | 419 |
| Modelling and measurement of bubble formation and growth in electroflotation processes | |
| M. D. Sarkar, P. M. Machniewski and G. M. Evans | 425 |
| Scale-down studies for assessing the impact of different stress parameters on growth and product quality during mammalian cell culture | |
| W. H. Scott, C. R. Thomas, C. J. Hewitt, G. Lewis, S.J. Meier, A. Amanullah, R. Kiss and A. W. Nienow | 431 |
| CFD simulation of fluid flow in an agitated system with a pitched blade worn impeller | |
| J. Skočilas, I. Fořt and T. Jirout | 437 |
| Analysis of methods for measuring energy dissipation rates in the tank with the use of a PIV system | |
| J. Stelmach and Cz. Kuncewicz | 443 |
| A numerical study of 3D structure of the flow field in the T-jets mixers with experimental validation | |
| M. A. Sultan, M. M. Dias, J. C. B. Lopes and R. J. Santos | 449 |
| Rheological properties of pastous mixtures | |
| B. Tal-Figiel, M. Kwiecień and W. Figiel | 455 |
| Application of information entropy and fractional calculus in emulsification processes | |
| B. Tal-Figiel | 461 |
| The velocity field in the discharge stream from a Rushton turbine impeller | |
| J. Talaga and I. Fořt | 467 |
| Assessment of the minimum power requirements for complete suspension in top-covered unbaffled stirred tanks | |
| A. Tamburini, A. Cipollina, G. Micale and A. Brucato | 473 |
| Investigation of turbulence modulation in solid-liquid suspensions using parallel competing reactions as probes for micro-mixing efficiency | |
| H. Unadkat, Z. K. Nagy and C. D. Rielly | 479 |

| | |
|--|-----|
| The details of the turbulent flow field in the vicinity of a Rushton turbine H. E. A. Van den Akker | 485 |
| On the design of mixing limited precipitation processes using a novel technique for in-situ particle size distribution measurement L. Vicum, P. Czajka and A. Laurenzis | 491 |
| Characterization of NS-impeller mixing in viscous batches containing exopolysaccharides S. D. Vlaev, M. Martinov, K. Pavlova, S. Russinova-Videva and K. Georgieva | 497 |
| Appraisal of shaken bioreactor mixing efficiency for different operating conditions W. Weheliye, G. Rodriguez, T. Anderlei, M. Micheletti, M. Yianneskis and A. Ducci | 503 |
| On the flow dynamics and out-of-phase phenomena in orbitally shaking bioreactors W. Weheliye, M. Yianneskis and A. Ducci | 509 |
| Mixing of shear-thinning fluid with yield stress in a vessel with unsteadily rotating impeller S. Woziwodzki and L. Broniarz-Press | 515 |
| Power measurements of commercial laboratory impellers H. Ying, S. Lebioda and T. W. M. Martin | 521 |
| The effect of mixing and sonication during protein coagulation on the particle size distribution in the suspension created L. Zander, F. Dajnowiec, Z. Zander, D. Mickiewicz and M. Biegaj | 523 |
| Micro-mixing characteristics and bubble behaviors in an airlift internal loop reactor with low height-to-diameter ratio W. Zhang, Y. Yong, G. Zhang, C. Yang and Z.-S. Mao | 529 |
| Author index | 535 |
