CONTENTS

Keynote Addresses

Metals, Metallophytes and the Minerals Industry – Opportunities for Exploiting a Natural Resource	<i>A J M Baker</i>	3
Rheology and the Resource Industries	<i>D V Boger</i>	5
The Business Case for Mine Closure Planning and an Overview of Anglo American's Mine Closure Toolbox Approach	<i>P R Botha</i>	7
Experience of Canadian Partnership Programs – Mine Environment Neutral Drainage and National Orphaned/Abandoned Mines Initiative	<i>G Tremblay and C Hogan</i>	11

Assessment Frameworks for Measuring and Monitoring Rehabilitation Performance

Above/Belowground Feedback May Facilitate and Sustain Mono-Dominance on Rehabilitated North Stradbroke Island	<i>P Audet, A Gravina, V Glenn, P McKenna, H Vickers, M J Gillespie and D R Mulligan</i>	15
Embracing Modern Ecological Methods – Monitoring and Modelling for Mine Closure, not Compliance	<i>A M Lechner, S Arnold, A T Fletcher, A Gordon, P D Erskine, M J Gillespie and D R Mulligan</i>	25
Risk Assessment Models for Post-Mining Land Use	<i>R I Maczkowiack, C Smith and P D Erskine</i>	33
Mine Closure Guidelines for Western Australia and Consultation Process	<i>X T Nguyen</i>	43
The Primary Framework for the Mechanism of the Mine Reclamation Monitoring in China	<i>P Wang, J-P Yang, Y Zhou, K Hu and Y Liu</i>	47
Assessment of Environmental Quality Impacts Caused by Red Mud Storage Facilities in China	<i>Z Wen, S Ma, S Zheng and Y Zhang</i>	51
Walk or Talk – Is the Current Mine Approval Process in Queensland Delivering Rehabilitation and Closure Success?	<i>O White, R I Maczkowiack, P D Erskine and T Baumgartl</i>	59

Baseline Knowledge and Data at the Prefeasibility Stage as Benchmarks of Change

Predictive Site-Wide Water Quality Modelling as a Tool for Mine Planning and Permitting – A Recent Canadian Example	<i>A Fitzpatrick</i>	71
Adequacy of Sampling and Volume Estimation for Premining Potential Acid Forming Waste Evaluation Using Statistical and Geostatistical Methods	<i>D Kentwell, A Garvie and J Chapman</i>	79

Biophysical Factors that Influence Rehabilitation Strategies and Land Use Options

Finding Optimal Soil Restoration Strategies in the Face of Uncertain Future Rainfall Amount	<i>S Arnold</i>	91
Development of Effective Rehabilitation Protocols for Mineral Sands Mining in Virginia, USA	<i>W L Daniels, C Stilson and C Zimmerman</i>	97
Sustainable Phytostabilisation of Mine Tailings - A Critical Analysis of System Requirements and Approaches	<i>L Huang, T Baumgartl, M Edraki and D R Mulligan</i>	105
Reclaimed Lignite Mining Areas in Lusatia - Development of Soil Physical Parameters of an Agricultural Site within the First Years after Site Reconstruction	<i>J Krümmelbein and T Raab</i>	117
Assessing Erosion and Run-Off Performance of a Trial Rehabilitated Mining Landform	<i>M J Saynor, J Lowry, W D Erskine, T Coulthard, G Hancock, D Jones and P Lu</i>	123

Impacts and Expectations for the Mine Cycle

Can 'Novel' Ecosystems Offer Suitable Rehabilitation Alternatives for Post-Mined Landscapes?	<i>P Audet, D Doley and D R Mulligan</i>	135
Integrating Environmental Impact Assessment into Life-of-Mine Planning	<i>J Blunt and J Jones</i>	143
'There is an Emptiness for Maori Here in Waihi' – Understanding Indigenous Perspectives on Post-Mine Land Uses in Closure Planning	<i>T Hill, P Clark and J Everingham</i>	153
Health Impacts Extend from the Life of a Mine to the Life of a Community – Knowledge Gaps	<i>P Kirsch, D Viswanathan, R LaBouchardiere, J Shandro and P Jagals</i>	161

Integration of Engineering and Science to Minimise Impacts and Closure Risks

Environmental Variables at Bauxite Mine	<i>P Artioli, M S Kato, A Romanel and M P Piermatei</i>	171
Evaporation and Salt Transport Under Variable Climatic Conditions	<i>T Baumgartl and B Richards</i>	179
Importance of Early Rehabilitation Planning - Case Studies from North West Queensland	<i>M J Gillespie and P D Erskine</i>	187
Application of Risk-Cost-Benefit Analysis to Highway Subsidence Due to Mining	<i>G V Kizil, A Bye and J Joy</i>	197
Mathematical Approach for Better Mine Waste Rock Dumping Management	<i>Y Li, E Topal and D J Williams</i>	207
Mine Site Stream Diversions – A Balance of Competing Objectives	<i>A Markham</i>	215
Integrated Planning, Mining and Rehabilitation for Effective Results and Sustainable Land Use – A Western US Perspective	<i>V Pfannenstiel</i>	219

A Practical and Rigorous Approach for Integrating Sustainability Principles into Decision-Making Processes at Minerals Processing Operations *D Tuazon, G D Corder, M Powell and M Ziemski* **233**

Study on Paste Tailings Capping Ecology Reclamation on Acid Mine Waste Rock Dump *Z Yibin, Z Lianbi, P Bin and Z Youhong* **243**

Lessons Learnt from the Legacies of Closed and Abandoned Mines

Sustainable Waste Rock Remediation and Revegetation – A Real-World Longitudinal Study Comparing ViroMine Technology to Standard Applications and Doing Nothing *L Fergusson, D Blair and G Barros* **249**

Mapping and Prioritising Rehabilitation of Abandoned Mines in Australia *C Unger, A M Lechner, V Glenn, M Edraki and D R Mulligan* **259**

Mine Waste Management and Modification to Maximise Rehabilitation Success

Geochemistry of Tailings and Seepage from Three Tailings Storage Facilities in Australia– Uncapped, Capped and Active Tailings *M Edraki, B Forsyth, T Baumgartl and D Bradshaw* **269**

Pit Backfilling - Managing Chemically Reactive Mine Wastes and Achieving Rehabilitation Objectives *A A Puhlovich* **279**

Understanding Tailings Geochemistry - Continuous Learning and Innovation When Planning for Mine Closure *A M Robertson, N Kawashima, R St C Smart and R Schumann* **287**

Variability in Parameters of the Water Balance Equation and their Influence on Evapotranspiration Cover Performance *A Schneider, T Baumgartl, D Doley and D R Mulligan* **293**

Environmental Risk Assessment System for Typical Staple Industrial Solid Wastes *X Sun, P Ning, X Tang, H Yi and L Zhou* **301**

Projection of Ecological Restoration of Acid Mine Waste Rock of Shui-long Mountain at Dexing Copper Mine *Q Wang and L B Zhou* **305**

Opportunities for Positive Environmental Outcomes through Innovation

Using a Sustainability Assessment Framework to Achieve Enhanced Legacy Outcomes *G D Corder and S R Green* **311**

Rehabilitating Post-Mining Landscapes for Wildlife - A Case Study from the Koala Venture Research Program in Central Queensland *S I FitzGibbon, W A Ellis, D R Mulligan and F Carrick* **319**

The 'Smoking Gun' of Detailed Mine Closure Cost Over-Run – A Review Using Case Studies of the Real Costs Associated with the Demolition and Removal of Infrastructure in Mine Closure *D Fletcher, A Hutton and C Dick* **325**

A New Approach to Mining Research in Canada *T Hynes, M Plouffe and A Galley* **333**

The Green Mine Campaign and Sustainable Mining in China *Y Liu, K Hu, X Li, Y Liu, D Liu and J Wang* **339**

An Ecological Approach to Koala Conservation in a Mined Landscape *D Lunney, J Lemon, M S Crowther, E Stalenberg, K Ross and R Wheeler* **343**

Current Situation, Problems and Countermeasures and Suggestions for China's Metal Mine Development	<i>B L Wang, S B Li, S Li, L B Zhou and Q Wang</i>	353
Eco-Environmental Problems Caused by the Process of Limestone Mining and Management Options	<i>B L Wang, X X Qiu, X Qiu, T Zhang and Y H Du</i>	357
Author Index		361
