RAMS 2016 Program

Accelerated Life Degradation

Understanding Accelerated Degradation - - 1

James McLinn, *Ops A La Carte (United States)*

A Lifetime Prediction Method with Hierarchical Degradation Data - - 9

Lizhi Wang, *Beihang University (China)*; **Xinlei Zhao**, *Beihang University (China)*; **Xiaohong Wang**, *Beihang University (China)*; **manman Mu**, *(China)*

Accelerated Degradation Testing of Membrane Heat Exchanger under acid heat environment - - 14

Julio Pulido, *NORTEK (United States)*

Supplied products reliability comparison using degradation testing - - 20

Sylvain Delage, *(France)*; **Fabrice Guérin**, *Institut des Sciences et Techniques de l'Ingénieur d'Angers (France)*; **Sylvain Cloupet**, *(France)*; **Jean-Marc Vogt**, *(France)*

Accelerated Life Testing: A Critical Reliability Application

SSD Next Gen RDT - - 26

Nematollah Bidokhti, *(United States)*

the Corrosion Failure Study On the Coating of Chassis Plates - - 30

Guilin zhang, *(China)*; **Xiaohui Wang**, *(China)*; **Yue Shao**, *(China)*; **Liwei Sun**, *(China)*; **Qingming Xu**, *(China)*

Operating IGBTs Above Rated Junction Temperature Limits: Impacts to Reliability and Electrical Performance - - 35

Garron Morris, *Rockwell Automation (United States)*; **Mark Phillips**, *(United States)*; **Lixiang Wei**, *(United States)*; **Richard Lukaszewski**, *(United States)*

Accelerated Testing Methods

Convex Optimization of Durability Testing Profiles for Autonomous Vehicles based on rainflow damage functions - - 42

Vaibhav Nangia, *Google Inc (United States)*; **Sangram Patil**, *Google Inc (United States)*

Complex Data Classification in Weighted Accelerated Failure Time Model - - 48

Nasser Fard, *Northeastern University (United States)*; **Keivan Sadeghzadeh**, *Northeastern University (United States)*

Duration of Reliability Growth and Demonstration Tests Using Mathematics and Physics of Failure - - 54

Milena Krasich, *Raytheon (United States)*

Aerospace Reliability Modeling and Analysis

A Bayesian Posterior Estimate of Traveling Wave Tubes Failure Rates Based on Spacecraft On-Orbit Observation - - 60

Wei Huang, *Space Systems/Loral, LLC (United States)*

A method of space radiation environment reliability prediction - - 66

QUNYONG WANG, *Beijing San-talking Testing Engineering Academy co. Ltd. (STEA) (China)*;

DONGMEI CHEN, *Beijing San-talking Testing Engineering Academy co. Ltd. (STEA) (China)*;

HUA BAI, *Beijing San-talking Testing Engineering Academy co. Ltd. (STEA) (China)*

A transmission failure model for avionics Full-Duplex Switched Ethernet based on traffic dynamics - - 72

Zhitao Wu, *(China)*; **Ning Huang**, *(China)*; **Weiqiang Wu**, *Beihang University (China)*

Facilitating R & M in Spaceflight Systems with Model Based System Engineering - - 78

Michel Izygon, *Tietronix Software (United States)*; **Howard Wagner**, *Tietronix Software (United States)*;

Shira Okon, *Tietronix Software (United States)*; **Lui Wang**, *NASA/JSC (United States)*;

Miriam Sargusingh, *NASA/JSC (United States)*

Component Analysis

Cutting Tool Remaining Useful Life during Turning Metal Matrix Composites - - 84

yasser shaban, *Faculty of Engineering, Helwan University (Egypt)*; **Soumaya Yacout**, *École Polytechnique of Montreal (Canada)*

Degradation of leakage currents and reliability prediction for tantalum capacitors - - 90

Alexander Teverovsky, *(United States)*

A Multi-Team Competitive Optimization Network Used in Bearing Fault Diagnosis - - 97

bo zheng, *(China)*; **Hongzhong Huang**, *(China)*; **Huanwei Xu**, *(China)*; **Debiao Meng**, *(China)*;

Xiaoling Zhang, *University of Electronic Science and Technology of China (China)*

A proposal of ESD control method with considering semiconductor device charged voltage - - 104

Nobuyuki Wakai, *Toshiba Corporation (Japan)*; **Futoshi Kaku**, *(Japan)*; **Kenji Hirose**, *(Japan)*;

Takashi Setoya, *(Japan)*; **Kunihiro Maki**, *Toshiba Corporation Oita Works (Japan)*

Design Optimization Using R&M Techniques

Translating Maintenance needs into product characteristics with applications of QFD - - 109

Jianping Hao, *(United States)*; **Hui Liu**, *Management Engineering Department (China)*; **Jinglu Song**, *(United States)*

Reliability Growth and Demonstration: the Multi-Phase Reliability Growth Model (MPRGM) - - 116

Christopher Jackson, *Acuitas (Australia)*

Field Data Driven Design-for-Reliability - - 122

Celine Geiger, *Tesla Motors (United States)*; **Georgios Sarakakis**, *Tesla Motors (United States)*

Dynamic Reliability Based Design Optimization of the Lifting Gear Transmission System for Mining Excavator - - 128

Xiaoling Zhang, *University of Electronic Science and Technology of China (China)*; **Hongzhong Huang**, *(China)*; **Yuan-Jian Yang**, *(China)*; **Debiao Meng**, *(China)*; **Wei Peng**, *University of Electronic Science and Technology of China, Zhongshan Institute (China)*

Economic Models

Determining Availability Targets - A Value Managerial Approach - - 134

Michael Bartholdt, *University of Stuttgart (Germany)*; **Bernd Bertsche**, *University of Stuttgart, Institute of Machine Components (Germany)*; **Rüdiger Schmidt**, *European Organization for Nuclear Research (CERN) (Switzerland)*

Infrastructure Systems Renewal and Replacement Model Using Probabilistic Forecasting - - 140

JD Solomon, *CH2M (United States)*; **Adam Sharpe**, *CH2M HILL (United States)*

A delay time model for mission-based systems subject to imperfect inspections - - 146

Li Yang, *Schools of Reliability and Systems Engineering, Beihang University (China)*; **Xiaobing Ma**, *Beihang University (China)*; **Yu Zhao**, *Beihang University (China)*

System and Software Cost Correlation to Reliability - - 152

Debra GREENHALGH LUBAS, *NAVSEA Newport RI (United States)*

Effective R&M Management Tools

Planning Reliability Growth for Product-Service Integration considering Latent Failures - - 157

Tongdan Jin, *Texas State University (United States)*; **Zhaojun Li**, *Western New England University (United States)*

Maintenance Scheduling Optimization based on Reliability and Prognostics Information - - 164

Zhaojun Li, *Western New England University (United States)*; **Jian Guo**, *Western New England University (United States)*; **Ruolin Zhou**, *Western New England University (United States)*

Maintenance Decision Making System Supported By Computerized Maintenance Management System - - 169

Ali Rastegari, *Volvo GTO (Sweden)*; **Mohammadsadeh Mobin**, *Western New England University (United States)*

NAVSEA RELIABILITY AND MAINTAINABILITY ENGINEERING - - 177

Paul Dube, *NAVSEA (United States)*; **Debra Lubas**, *Naval Undersea Warfare Center (United States)*

Fault Trees

Research on Testing Diagnosis Strategy for Offshore Oil Platform Based on Equivalent Fault Tree - - 183

Hongdong Wang, *Shanghai Jiao Tong University (China)*; **Yi Hong**, *(China)*; **Yu Ping**, *(China)*; **Xiao-Feng Liang**, *Shanghai Jiao Tong University (China)*

Parallel algorithm for finding modules of large-scale fault trees - - 190

Zhifeng Li, *Beihang University (China)*

Fault maintenance trees: reliability centered maintenance via statistical model checking - - 196
Enno Ruijters, University of Twente (Netherlands); Dennis Guck, University of Twente (Netherlands); Peter Drolenga, NedTrain (Netherlands); Mariëlle Stoelinga, University of Twente (Netherlands)

Application based Dynamic fault tree modeling method for AFDX network - - 202
Xinkun Li, (China); Ning Huang, (China); Xiaoyan Zheng, (China)

FMEA

Forced Rank Methodologies to More Efficiently Perform Criticality Analysis - - 207
JD Solomon, CH2M (United States); Jim Oldach, (United States)

FMECA for Intrinsically Safe Devices - - 213
Nicole Stavish, Intertek (United States); Erik Reynolds, Intertek (United States); Mihail Bantic, Intertek (United States)

An Innovative GSFC Methodology for using FMECA as a Risk Assessment and Communication Tool - - 218
Nancy Lindsey, NASA-GSFC (United States)

Human Reliability

Human Induced Variability during Failure Mode Effects Analysis (FMEA) - - 227
Marc Banghart, (United States); Kari Babski-Reeves, (United States); Linkan Bian, (United States)

Human Error Oriented Stochastic Hybrid Automation for Human System Interaction - - 234
Jianyu Zhao, IEEE reliability society (China); Shengkui Zeng, Beihang University (China); Jianbin Guo, (China)

Tailoring a Human Reliability Analysis to Your Industry Needs - - 241
Diana DeMott, (United States)

Managing R&M in the Aerospace Industry

The Role of Probabilistic Design Analysis Methods in Safety and Affordability - - 245
Fayssal Safie, NASA (United States)

A functional reliability and safety approach for analyzing complex, aerospace systems - - 250
Eduardo Cota, Raytheon (United States); Bryan O'halloran, (United States)

Effective Implementation of a Reliability Based Asset Management in the Airline Industry - - 256
Julio Pulido, NORTEK (United States)

Detection and identification of sensor anomaly for aerospace applications - - 262
Liansheng Liu, Harbin Institute of Technology (China); Yu Peng, Harbin Institute of Technology (China); Datong Liu, Harbin Institute of Technology (China)

Modeling for Design Optimization

Component Integrated Importance: Modeling Complex Aging Systems - - 268

Peng Liu, JMP Division, SAS Institute Inc. (United States); **Leo Wright**, SAS (United States)

Redefinition of Dispatch Reliability along with Dispatch Modeling and Simulation - - 273

Wen Zhan, (China); **Jian Jiao**, (China)

Coherent System Reliability Improvement Using PCA Based Multi-Response Optimization Method - - 279

Nasser Fard, Northeastern University (United States); **Huyang Xu**, Northeastern University (United States); **Yuanchen Fang**, (United States)

Alternate “flow” approach for reliability modeling of a complex system - - 287

James Ferreira, Raytheon (United States); **Philip Bedard**, Raytheon Company (United States)

Network and Software Analysis

Software Functional Safety: Possibilities & Limitations of IEC61508-7 Annex D - - 292

Julia Bukowski, Villanova University (United States); **William Goble**, exida, LLC (United States); **David Jonhson**, exida, LLC (United States)

Resource optimization with reliability consideration in cloud computing - - 299

Nan Zhang, (China); **Ruiying Li**, Beihang University, University of Arizona (China)

Performability Optimization Design of Virtual Links in AFDX Networks - - 305

Xiaoyan Zheng, (China); **Ning Huang**, (China); **Yue Zhang**, Beihang University (China); **Xinkun Li**, (China)

Using Fault Trees to Analyze Safety-Instrumented Systems - - 311

Joseph Belland, Isograph, Inc. (United States); **David Wiseman**, Isograph Ltd. (United Kingdom)

Physical Reliability Models

A Research on Optoelectronic Coupler Storage Reliability by Accelerated Degradation Testing - - 317

Chun Pei, (China); **Guicui Fu**, (China); **Bo Wan**, (China); **Youhu Zhao**, (China)

Toward a Unified Failure Theory with Implications for Condition Based Maintenance - - 324

Joel Nachlas, (United States); **Edvin Beqari**, (United States)

Constructing the “Best” Reliability Data for the Job - - 328

Robert Graber, SAIC (United States); **Roger Kleinhammer**, Science Applications International Corp (United States)

A reliability assessment system for power MOSFET using multi-parameters - - 334

Shujuan Wang, Harbin Institute of Technology (China); **Yixing Wang**, Harbin Institute of Technology (China); **Mingdong Lv**, (China); **xuerong ye**, (China)

Prognostics and Health Management (PHM) Applications

Modeling and Analysis of Linkage Fluctuation for Industrial Process Based on Complex Network Theory - - 341

Juntai Xie, Xi'an Jiaotong University (China); Jianmin Gao, (China); Zhiyong Gao, (China); Xu Gao, (China); ZHao Wang, (China)

Remaining Useful Life Prognostics Using Pattern-Based Machine Learning - - 348

Ahmed Ragab, École Polytechnique of Montreal (Canada); **Soumaya Yacout**, École Polytechnique of Montreal (Canada); Mohamed-Salah Ouali, École Polytechnique of Montreal (Canada)

A Dual-Sensing Method for Fracture Prediction of Mechanical Structures under Variable Loads - - 355

Dong-Cheon Baek, Korea Institute of Machinery and Materials (KIMM) (Korea, Republic of); Jong-Won Park, Korea Institute of Machinery and Materials (Korea, Republic of); Byung-Oh Choi, Korea Institute of Machinery and Materials (Korea, Republic of)

Coupling Fault Diagnosis of Rotating Machinery by Information Fusion - - 359

Tangbo Bai, (China); Laibin Zhang, (China); Lixiang Duan, (China); Jinjiang Wang, (China)

R&M Applications in Healthcare

Reliability Modeling of Relay-Assisted Wireless Body Area Networks - - 365

Yujie Wang, UMass Dartmouth (United States); Liudong Xing, UMass Dartmouth (United States); Honggang Wang, UMass Dartmouth (United States)

A Psychometric Interpretation for Environmental Conditions and its Impact on Lifespan of Biomedical Electronics - - 372

Khaled Abuhasel, (Saudi Arabia)

Research on the Remaining Life Estimation of Products in Highly Accelerated Stress Screening - - 380

Manman Mu, (China); Xiaohong Wang, Beihang University (China); Lizhi Wang, Beihang University (China); Wenhui Fan, (China)

Reliability Models of Chronic Kidney Disease - - 385

Rafael Fricks, Duke High Availability Assurance Laboratory (United States); Andrea Bobbio, Università del Piemonte Orientale, Alessandria, Italy (Italy); Kishor Trivedi, Duke High Availability Assurance Laboratory (United States)

R&M Applications in Supportability

Research on Aircraft Spares Warehouse Location Method Considering the Operational Availability - - 391

Zhen Yuan, (China); Xiao Boping, (China); Lin Mu, Beihang University (China); Xiang Li, Beihang University (China)

Analysis of Maintenance through Graphical Representation - - 397

Philip Hensley, Sikorsky Aircraft (United States)

A Strategy for Optimal Management of Spares - - 403

Paul Franklin, *Primus Software (United States)*; **Igor Tavrovsky**, *(United States)*; **Rob Ames**, *Cox Communications (United States)*

Innovations in Supportability Engineering and Program Implementation Using AR&M and Business Case Analyses - - 409

Ahmed Bashir, *Department of National Defence Canada (Canada)*; **Graham Brum**, *(Canada)*

R&M Business Practices: What You Should Remember & What You May Want to Forget

FROM PREDICTION TO PREVENTION: THE TRANSITION AWAY FROM MTBF - - 415

Mark Morelli, *(United States)*

Real Time Tribal Knowledge Reviews: Getting the Right Data, Faster - - 418

Melissa Seely, *GE Power and Water (United States)*; **Christiane Veitch**, *GE Power and Water (United States)*

How FMEAs Can Be The Cornerstone of ISO 2001:2015 Compliant Risk Based Quality Management System - - 422

Richard Harpster, *Harpco Systems (United States)*

A Change in Process and Culture: Implementing Quality, Reliability and Safety in Early Development - - 427

Jason Cook, *US Army ARDEC-QE&SA (United States)*

Reliability Allocation and Optimization

How Reliable Does a Delivery Drone Have to Be? - - 433

Fred Schenkelberg, *FMS Reliability (United States)*

Design of Maintenance Outsourcing Contracts considering Fleet Expansion - - 438

Tongdan Jin, *Texas State University (United States)*; **Shuying Li**, *University of Electronic Science and Technology of China (China)*; **Hongzhong Huang**, *(China)*; **Peng Wang**, *(United States)*

Evaluation of Reliability Design based on Information Axiom - - 445

Jingjing Cui, *Beihang University (China)*; **Yi Ren**, *Beihang University (China)*; **Dezhen Yang**, *(China)*; **Shengkui Zeng**, *Beihang University (China)*

Using Reliability and Warranty Data to Determine the Optimal Number of Parts for a Lifetime Buy - - 451

Andre Kleynner, *Delphi Electronics & Safety (United States)*; **David Elmore**, *Delphi Electronics & Safety (United States)*

Reliability Modeling

A Fault-tolerant Classifier for Prognostics and Health Management considering Correlated Failures - - 459

Saikath Bhattacharya, *University of Massachusetts (United States)*; **Lance Fiondella**, *University of Massachusetts (United States)*

Physics-Based Reliability Method in Early Design Stage for Components Adopted in New Products - - 465

Xiaoping Du, *Missouri University of Science and Technology (United States)*; **Zhengwei Hu**, *Missouri University of Science and Technology (United States)*

Predicting Hardware Failure Using Machine Learning - - 472

Noah Lassar, *Google[X] (United States)*

Reliability Testing: Design, Data Collection & Assessment

Data Analysis for Accelerated Life Tests with Constrained Randomization - - 478

Kangwon Seo, *Arizona State University (United States)*; **Rong Pan**, *Arizona State University (United States)*

Does distribution choice matter in practical reliability analysis? - - 485

Patrick Tudor, *We Predict (United Kingdom)*

Optimization of test procedures based on OBD system specific field data. - - 491

Marcin Hinz, *University of Wuppertal (Germany)*; **Stefan Bracke**, *University of Wuppertal Chair of Safety Engineering and Risk Management (Germany)*; **Philipp Temminghoff**, *Bergische Universität Wuppertal (Germany)*

Applying Automotive Robustness Validation to Reduce the Number of Unplanned Reliability Testing Cycles - - 497

Andre Kleynner, *Delphi Electronics & Safety (United States)*; **Alexander Nebeling**, *Delphi Electronics & Safety (Germany)*

Reliability Centered Maintenance

Reliability Centered Preventive Maintenance Optimization for Aircraft Indicators - - 504

Jian Guo, *Western New England University (United States)*; **Zhaojun Li**, *Western New England University (United States)*; **John Wolf**, *Spirit AeroSystems (United States)*

Optimal Maintenance Policies Under Changing Technology & Environment - - 510

Miklós Szidarovszky, *(United States)*; **Huairui Guo**, *ReliaSoft (United States)*; **Ferenc Szidarovszky**, *ReliaSoft (United States)*

Condition-based maintenance policy for deteriorating multi-component systems with hierarchical dependences - - 516

HEPING LI, *university of troyes (France)*; **Laurence Dieulle**, *university of technology of troyes (France)*; **estelle deloux**, *(France)*

Joint maintenance and inspection optimization of a k-out-of-n system - - 523

Vladimir Babishin, *Ryerson University (Canada)*; **Sharareh Taghipour**, *Ryerson University (Canada)*

Repairable Systems Modeling

Modeling failure and maintenance effects of a system subject to multiple preventive maintenance types - - 529

Uthman Said, *Ryerson University (Canada)*; **Sharareh Taghipour**, *Ryerson University (Canada)*

Performance modelling of fuel cell systems through Petri Nets - - 536

Claudia Fecarotti, *University of Nottingham (United Kingdom)*; **John Andrews**, *(United Kingdom)*

RAID-6 System Reliability Dependence on Recovery, Disk Scrubbing, and Group Size - - 543

Jon Elerath, *(United States)*

O&M Modelling of Offshore Wind Farms – State of the Art and Future Developments - - 549

Masoud Asgarpour, *Aalborg University of Denmark & Energy research Centre of the Netherlands (Netherlands)*; **John Sørensen**, *Aalborg University (Denmark)*

Risk Analysis

GADS-Based Loss Exposure Evaluation of Transformers - - 555

Sujit Purushothaman, *FM Global (United States)*; **Kumar Bhimavarapu**, *FM Global (United States)*

Experimental study on solid CO₂ BLEVE based on the superheat limit theory - - 563

Mingzhi Li, *(China)*; **Qian Huang**, *(China)*; **Zhenyi Liu**, *(China)*; **Yao Zhao**, *(China)*

Cable Routing Modeling in Early System Design to Prevent Cable Failure Propagation Events - - 570

Bryan O'Halloran, *Raytheon Missile Systems (United States)*; **Nikolaos Papakonstantinou**, *VTT Technical Research Centre of Finland (Finland)*; **Douglas Van Bossuyt**, *Colorado School of Mines (United States)*

Probabilistic Risk Assessment of Manned Balloon Programs - - 576

Akshay Kothakonda, *University of Southern California (United States)*; **Michael Kezirian**, *(United States)*

Risk Management

Characterizing and Managing System Risks with Selective Redundancy during Early Mission Formulation - - 581

David Tseng, *JPL (United States)*; **chester everline**, *JPL (United States)*; **Kim Plourde**, *JPL (United States)*

Incorporating Human Reliability Analysis in Early Emergency Operating Procedure Development - - 586

Nikolaos Papakonstantinou, *VTT Technical Research Centre of Finland (Finland)*; **Markus Porthin**, *VTT Technical Research Centre of Finland (Finland)*; **Bryan O'Halloran**, *Raytheon Missile Systems (United States)*; **Douglas Van Bossuyt**, *Colorado School of Mines (United States)*

Analysis Methods for Performance and Availability in Technology-Reliant Critical Health Care - - 592

Rafael Fricks, *Duke High Availability Assurance Laboratory (United States)*; **Kishor Trivedi**, *Duke High Availability Assurance Laboratory (United States)*

A Risk based Methodology for Managing Material/Product Life-Cycle Disruptions - - 599

William Clay, *Rockwell Automation (United States)*; **James Morrison**, *Rockwell Automation*

(United States); Daniel Weyer, Rockwell Automation (United States); Biman Ghosh, Rockwell Automation (United States); Francis Wolff, Rockwell Automation (United States)

Simulation Methods

Considering Confidence Levels in Reliability Simulation - - 605

*Volker Schweizer, University of Stuttgart (Germany); **Michael Bartholdt**, University of Stuttgart (Germany); Bernd Bertsche, University of Stuttgart, Institute of Machine Components (Germany)*

A Spark-Based Monte Carlo Parallel Simulation Approach for Complex Large Systems Reliability Assessment - - 611

***Liu Yan**, (China); Yi Ren, Beihang University (China)*

A Fault Propagation Modeling and Analysis Method Based on Model Checking - - 616

***Lu Chen**, Beihang University (China); Jian Jiao, (China); Jiping Fan, Beihang University (China); Fuchun Ren, Beihang University (China)*

Real Time Update of Multi-State System Reliability Using Prognostic Data-Driven Techniques - 623

***NAGARAJAN RAGHAVAN**, Singapore University of Technology and Design (SUTD) (Singapore); Daniel Frey, Massachusetts Institute of Technology (United States)*

Software Reliability Analysis

Software Rejuvenation of a Fault-tolerant Server subject to Correlated Failure - - 628

***Vidhyashree Nagaraju**, University of Massachusetts (United States); Veeresh Varad Basavaraj, University of Massachusetts (United States); Lance Fiondella, University of Massachusetts (United States)*

A Research of Architecture-based Fault Tolerance with Fault Propagation for Software-intensive Systems - - 634

***Shaoguang Shu**, (China); yichen wang, (China); Wang Yikun, (China)*

A Fault Propagation Model for Embedded Software system - - 640

***Yan Xiaobo**, Science & Technology on Reliability & Environment Engineering Laboratory, Beihang University (China); yichen wang, (China); Bin Liu, (China); Li Jianxing, (China)*

Software Test Case Generation Based on Fault Propagation Path Coverage - - 647

***Kun Wang**, (China); yichen wang, (China)*

Statistical Models for R&M

Combinatorial Competing Failure Analysis Considering Random Propagation Time - - 651

***Huadong MO**, Department of Systems Engineering and Engineering Management, City University of Hong Kong, Hong Kong (China); Min Xie, (China); Liudong Xing, Department of Electrical and Computer Engineering at the University of Massachusetts (UMass) Dartmouth (United States)*

Modelling Maintenance Interrupts of Supercomputers and Reviewing the Maintenance Policy - - 656

***Xiaoyan Zhu**, University of Chinese Academy of Sciences (China); Jagadish Cherukuri, (United States); Tao Yuan, Ohio University (United States)*

Hot Carrier and Negative Bias Temperature Instability induced NMOS and PMOS degradation on Ring Oscillator - - 662

***Insaf Lahbib**, (France); Aziz Doukkali, (France); Patrick Martin, (France); Guy Imbert, (France)*

Model Based Mission Assurance (MBMA) – NASA’s Assurance Future - - 669

***John Evans**, NASA HQ (United States); Steven Cornford, NASA JPL Office of Chief Engineer (United States); Martin Feather, NASA JPL Office of Mission Success (United States)*

System Safety Analysis

Traversal Time Modelling of Safety Critical In-Vehicle Communication using Reliability Modelling Techniques - - 676

***Nika Nowizki**, Institute for Machine Elements, University of Stuttgart (Germany); Peter Zeiler, University of Stuttgart, Institute of Machine Components (Germany); Bernd Bertsche, University of Stuttgart, Institute of Machine Components (Germany)*

SYSTEM SAFETY ANALYSIS AS DECISION MAKING TOOL FOR AIRCRAFT SYSTEMS - - 686

***SELDA SALIHLER**, TUSAS TURKISH AVIATION INDUSTRIES (Turkey)*

An Integrated System Safety Model of the National Airspace System - - 687

***Nathan Girdner**, Systems Enginuity (United States)*

Radiation Hardening: Approach, Mechanisms, and Reliability Impacts - - 693

***Hycham Aboutaleb**, ENSTA ParisTech (France); Bruno Monsuez, (France)*

System Safety Modeling

Application of Fault Tree Analysis for Flight Control System Architecture Design - - 699

***John Hanks**, Woodward HRT (United States); Estella Chung, Woodward (United States)*

INSiDER: Incorporation of System and Safety Analysis Models using a Dedicated Reference Model - - 705

***Marc Zeller**, Siemens AG (Germany); Kai Hoefig, Siemens AG (Germany)*

Algorithm based on Bayesian networks for GO-FLOW methodology - - 711

***Dong Ming Fan**, Beihang University (China); Yi Ren, Beihang University (China); Linlin Liu, Beihang University (China); Zili Wang, (China)*

An Optimized Method for Generating Fault Tree from Counter-example - - 718

***Qianxin Wei**, (China); Jian Jiao, (China); Jiping Fan, (China); Ting-di Zhao, (China)*

System Safety Tools

Addressing Uniqueness and Unison of Reliability and Safety for a Better Integration - - 725
Zhaofeng Huang, Aerojet Rocketdyne (United States); **Fayssal Safie**, NASA (United States)

An Agile Development Processes for Petrochemical Safety Conformant Software - -732
Thor Myklebust, SINTEF ICT (Norway); **Tor Stålhane**, (Norway); **Narve Lyngby**, SINTEF (Norway)

STPA Application for Safety Assessment of Generic Missile Systems - - 738
Stephanie Chiesi, Raytheon Missile Systems (United States)

Sneak Circuit Analysis: Lessons Learned From Successful Application - - 745
Darryl Kellner, Acquisition Logistics Engineering (United States); **Rod Benson**, Acquisition Logistics Engineering (United States); **Antonio Scappaticci**, Acquisition Logistics Engineering (United States); **Daniel Foley**, Acquisition Logistics Engineering (United States)

Test Verification and Validation Methods

Creep Behavior Analysis, Optimization and Reliability Evaluation for Bolted Joints of Engine Rotor - - 751
Wei Dai, Beihang University (China); **Zhiyuan Lu**, Beihang University (China); **Jian Chu**, Beihang University (China); **Yu Zhao**, Beihang University (China)

Life Data Analysis with applications for the Airline Industry. - - 757
Julio Pulido, NORTEK (United States)

Methods and tools for comparison and evaluation of vibration specifications in the automotive industry. - - 763
Marco Bonato, VALEO (France); **Philippe Goge**, Valeo Thermal Systems (France)

A System Approach to Reliability Verification Test Design and Evaluation - - 769
Jiliang Zhang, Tesla Motors (United States); **Celine Geiger**, Tesla Motors (United States); **Fengbin Sun**, Tesla Motors (United States)

Additional Papers

Methods The Role of FMEA in Identifying CBM+ Opportunitites-- 775
G. Stephen Brunner, **Darryl Kellner**, **Rodney Benson**, **Steve Rogers**
